INTRODUCTORY TREATISE

PAGE – A

Practical Way to *Nibbāna*

Nibbānagāminipaṭipadā- Fourth Volume

Notes on Fundamental Reason for Practice = *Nidānakaṭṭhā*

Weary Practice with Sluggish Supernormal Knowledge = Strenuous effort followed by slow realization of the Right Path and Fruition (*Dukkha paṭipadam dandhābhiññānam*)

In *Dhammasaṅgani* Scripture (*Abhi-1-72*), the Buddha mentions many Practices including Distressing Practice with Sluggish Supernormal Knowledge etc. The Commentary teacher also explained the above Doctrines as follow:_____

(*Abhi-ṭṭha-1-260-261*)

It is impossible to attain Mental absorption without any practice leading to absorption (= *Jhana*) even in Mundane Mental Absorption (= *Lokīya jhana*). As for Mundane Mental Absorption where the proper practice is essential, the Buddha specially wants to mention the Practical way to Supramundane Absorption (= *Lokutthara jhana*) apart from the Method of Purification (= *Suddhika naya*). So, the Buddha mentions the words like “Distressing Practice with Sluggish Supernormal Knowledge” (= *Dukkha paṭipadam dandhabhiññānam*). The explanations for the words Distressing Practice with Sluggish Supranormal Knowledge are as follow:_____

If a *meditator* starts to discard the defilements (= *Kilesa*), he will find some difficulties in taking up the Sense of Subjects of Meditation (= *Kammaṭṭhāna*). So as to discard the defilements, one should have the Act of Forming (= *Saṅkhāra*) to perceive the Subject of Meditation and diligence with much difficulties; or [one should perceive the Subject of Meditation (known as the act of Forming = *Saṅkhāra*) and have mental exertion or diligence (= *Payoga*)]. Such kind of practice taken by a *meditator* to reach Noble Path (= *Ariya magga*) is the Distressing Practice (= *Dukkha paṭipadā*).

If a *meditator* has already discarded the defilements = and continues to practise insight meditation (= *Vipassanā*), and supposing that the attainment of the Noble Path (= *Ariya magga*) occurs only after long time; that *meditator* is said to have Sluggish super normal Knowledge (= *Dandha bhinna*). So, among various practices in which there are no definite numbers of turns or numbers of times (= *Vara*) in which one may attain Noble path, only to one particular turn of practice; the old Commentary teachers gave the term “Distressing Practice with Sluggish Supernormal Knowledge”(= *Dukkha paṭipadā dhandhabhinna*). [The practice in which defilements are discarded in one time, (= *Sakim vikkhambhana vara*), or in two times (= *Dvikkhattum vikkhambhana vara*), or in three times (= *Tikkhattum vikkhambhana vara*), or in four times (= *Catukkhattum vikkhambhana vara*) or in numerous times (= *Anekakkhattum vikkhambhana vara*); or whatever the times that may be ; the old Commentary teachers gave the term “Distressing Practice with Sluggish Supernormal Knowledge”].

So, among these numerous times of abandonment; to which number of time do the Commentary teachers want to give the term “Distressing Practice with Sluggish Supernormal Knowledge”? _____ In a particular practice; if the defilements recur after first and second times of abandonment, but finally discarded after third time, and if the recurrence

of these defilements are totally prevented by attainment of Noble Path _____ to such kind of practice, the Commentary teachers

PAGE-B

want to accept as “Distressing practice with Sluggish Supernormal Knowledge”. So, to this times of practice (= *Vara*), the Commentary teacher gave the term “Distressing Practice with Sluggish Supernormal Knowledge”. (The Commentary teacher wanted to accept the practice; in which the defilements are discarded in three times and totally abandon these finally with Noble Path, as Distressing Practice with Sluggish Supernormal Knowledge. So, there is no doubt that other practices which need more than three times to discard the defilements are accepted as Distressing Practices. It means that the practices which are able to discard all the defilements with Noble Path after one or two times of abandonment of these, are known as “Pleasurable or Comfortable Practices” (= *Sukhapatipadā*).

It may not be clear with these explanations only. So, it is necessary to explain the words “Distressing practice with Sluggish Supernormal Knowledge” with following fundamental statements. Wider explanation is as follow:_____

Pāli-Text

(*Abhi-ṭṭha-1-260*)

A *meditator*, after discerning the 4 Great Elements (= *Mahābhūta*) with Insight knowledge, again discern the Derived Corporeality (= *Upadarūpa*) with Insight Knowledge. Further; Mentality is taken up or seized with Insight knowledge. Again, if that *meditator* tries to discern the Corporeality and Mentality simultaneously with Insight Knowledge, he finds difficulty in taking up these phenomena. The practice of the person is known as “Distressing Practice”. (= *Dukkha paṭipadā*). Further, _____ after taken up the Corporeality and Mentality with Knowledge, if he slowly attains the Noble Paths by Insight meditation, the nature is known as “Sluggish Supernormal Knowledge” (*Dandhabhinna*).

(*Abhi-ṭṭha-1-260*)

Pāli-Text

(*Mūlaṭṭi-1-112*)

Seizing on Character-Essence-Perception-and Proximate cause of Corporeality or Mentality with Insight knowledge is known as Taking up or Seizing on or Grasping (= *Pariggahetva, Parigganhati*). With these words it describes the nature of Purity of view or outlook. (= *Ditthi visuddhi*). If one finds difficulty in taking up with knowledge it is strenuous practice (= *Dukkha paṭipadā*). If one finds difficulty in taking up of Mentality with knowledge although he finds no difficulty in taking up of Corporeality, it is also known as weary practice. So, if some difficulty occur at any period of Practice (= *Paṭipadā*), it is termed weary = Strenuous practice. According to these words _____

1. Seizing on Corporeality = *Rūpa pariggaha*,
2. Seizing on Mentality = *Arūpa pariggaha*,
3. Seizing on Corporeality and Mentality = *Rūparūpa pariggaha*, to these 3 kinds of Seizing (= *Pariggaha*)

the term Distressing and Strenuous Practice is applied.

PAGE-C

Pāli-Text (Abhi-ṭṭha-1-260)

(Mūlaṭṭ-1-112)

Definite determination with Knowledge that “this phenomenon is just Corporeality and Mentality only, and there is no such thing like male, female, persons, sentient beings; life, self, human, gods, and higher being etc etc” _____ is known as “Knowledge of Analysing (or Determination of) Mentality and Corporeality (= *nāmarūpa vavatthapana* = *nāmarūpa vavatthana ñāṇa*).

A *meditator* may find some difficulty when he is trying to analyse the Mentality and Corporeality like “there is no such thing as person, living being, life, Self, human, gods, higher being etc; and truly existing nature is only Corporeality and Mentality “, even after he is able to seizing on the Corporeality and Mentality with Knowledge.

Again when he takes long time in the practice of Insight meditation (= *Vipassanā*) to reach Noble Path (= *Ariya magga*); after attaining Analytical determination of Corporeality and Mentality with Knowledge _____ the Practice of this *meditator* is also “Strenuous = Weary practice with Sluggish Supernormal Knowledge (= *Dukkha paṭipadā dandhabhinna*). (Abhi-ṭṭha-1-260.)

The above description mentions _____

4. Analytical Determination of Corporeality and Mentality with Knowledge (= *nāmarūpa vavatthana ñāṇa*). This nature is also included in Purity of View or Outlook (= *Ditthi visuddhi*). It is also known as “Knowledge of the Distinction between Mind and Body “(= *nāmarūpa pariccheda ñāṇa*).

Pāli Text (Abhi-ṭṭha-1-260)

Again, a *meditator* may find some difficulty in taking up of the Causes of Body and Mind with knowledge even after he is able to analyse the distinction between the Mind and Body. Further, he may take a long time to reach Noble Path although he is able to take up the Causes of Body and Mind with knowledge. The practice of that person is also “Distressing Practice with Sluggish Supernormal Knowledge”. (Abhi-ṭṭha-1-260.)

By means of these statements; it shows -- the Seizing on the nature of Causes and Effects (= *Paccaya pariggaha ñāṇa*) in three periods like the Past, Future and the Present time. It is the level of attainment of “Purity by having transcended doubts” (= *Kankha vitarana visuddhi*). It consists of two kinds of Seizing as follow: _____

5. Seizing on the Cause or Condition (= *Paccaya pariggaha*)

6. Prolong or Long-time Seizing (= *Addhana pariggaha*).

Pāli Text (Abhi-ṭṭha-1-261)

PAGE-D

Next, a *meditator* may find difficulty to discern the Impermanence, Suffering and Not-self (= *Anicca, Dukkha, Anatta*) nature of Formative and Conditioned phenomena (= *Saṅkhāra dhamma*)-ie:- Corporeality, Mentality, Cause and Effect_____ even after he is able to Seize the causative nature with Knowledge. Further he may take long time of Insight meditation (= *Vipassanā*) to reach Noble Path, even after attainment of the 3 Characteristics of Existence (= *Ti-lakkhana*) in Formative and Conditioned phenomena (= *Saṅkhāra dhamma*). The practice of that *meditator* is also “Distressing = Strenuous = Weary Practice with Sluggish Supernormal Knowledge”. (*Abhi-ṭṭha*-1-261.)

In this case; the words “When the 3 characteristics of Existence are preceived with Knowledge “(= *Lakkhanani pativijjhanto*) means _____ the Basic Knowledge of Physical and Mental phenomena in the light of the three Characteristics of Impermanence, Suffering and Not-self (= *Sammasana ñāṇa*).

Pāli Text (Abhi-ṭṭha-1-261)

Another *meditator* may find difficulty to overcome the desire (= *nikanti*) of having Radiance (= *Obhasa*) which is a pollutant to Insight meditation and attained at the time of trying to have Insight Knowledge after awareness of the 3 Characteristics of Existence in Formative phenomena with Knowledge. He may take long time to reach Noble Path even after getting rid of that Desire (= *Nikanti*) with Insight knowledge. The practice of that *meditator* is also “Weary Practice with Sluggish Supernormal Knowledge”. The Commentary teachers liked this numbers of attempt (= *Vara*) and give the term “Weary Practice with Sluggish Supernormal Knowledge” to this numbers of attempt. Note in similar way for the three kinds of Practices (= *Paṭipadā*) mentioned by the Buddha later.

(*Abhi-ṭṭha*-1-261.)

The Buddha mentions the analysis of Supra mundane wholesome phenomena (= *Lokuttara kusala dhamma*) in “*Dhamma sangāṇī Pāli* Scripture” in (4) types as follow:

1. Person who has “Weary practice with Sluggish Supernormal Knowledge”= Slow realisation of the right Path and Fruition only after strenuous effort (= *Dukkha paṭipadā dandhabhinna puggala*).
2. Person who has “Weary practice with Quick Supernormal Knowledge”= Quick realisation of the right Path and Fruition after strenuous effort (= *Dukkha paṭipadā khippabhinna puggala*).
3. Person who has “Cheerful practice with Sluggish Supernormal Knowledge”= Slow realisation of the right Path and Fruition after exertion at a comfortable pace (= *Sukha paṭipadā dandhabhinna puggala*).
4. Person who has “Cheerful practice with Quick Supernormal Knowledge”= Quick realisation of the right Path and Fruition after exertion at a comfortable pace (= *Sukkhapaṭipadā khippa bhinna puggala*).

(*Abhi-1-72-85*.)

Again, the Buddha classifies two types of procedure in each person as: _____-

1. The type of Practice = Effort (= *Paṭipadā*). and
2. The type of Supernormal Knowledge = Realisation (= *Abhiññā*).

PAGE-E

Among these procedures: _____

1. Seizing on Corporeality (= *Rūpa pariggaha*)
2. Seizing on Mentality (= *Arūpa pariggaha*)
3. Seizing on both Corporeality and Mentality (= *Rūparūpa pariggaha*)
4. Analytical Determination of Corporeality and Mentality with Knowledge (= *nāmarūpa vavatthana*)

_____ are (4) types of procedures which are included in the Knowledge of Distinction between Mind and Body (= *nāmarūpa pariccheda ñāṇa*).

Again, _____

1. Seizing on the Causes and Effects of present time (= *Paccaya pariggaha*),
2. Seizing on the Causes and Effects of Long time ie:- the Past and Future (= *Addhana pariggaha*)

_____ these two types of Seizing (= *Pariggaha*) are known as Knowledge of Seizing on the Cause and effect (= *Paccaya pariggaha ñāṇa*).

Further; _____

1. The Knowledge of Distinction between Mind and Body (= *nāmarūpa pariccheda ñāṇa*)
2. The Knowledge of Seizing on the Cause and Effect (= *Paccaya pariggaha ñāṇa*)
3. The Knowledge of Physical and Mental Phenomena in the Light of the three Characteristics of Impermanence, Suffering and Not-self (= *Sammasana ñāṇa*)
4. The Knowledge of perceiving the changes through which physical and mental phenomena undergo constantly = up to the state of freedom from the pollutants of Insight Knowledge (= *Upakkilesa*) = up to the attainment of purity in the aspect of discriminating between what is right path and what is not (= *Maggamagga ñāṇadassana visuddhi*)

_____ up to the level of these Knowledges, the Buddha mentions as the Section of Practice (= *Paṭipadā*).

After attainment of Freedom from the Pollutants of Insight Knowledge (= *Upakkilesa*): _____

1. The Knowledge (mature enough) of perceiving the changes through which Mind and Body undergo constantly (= *Udayabbaya ñāṇa*)
2. The Knowledge of perceiving the dissolution of physical and mental phenomena (= *Bhaṅga ñāṇa*)
3. The Knowledge of perceiving the fearful dangers faced by physical and mental phenomena (= *Bhaya ñāṇa*)
4. The Knowledge of perceiving the flaws inherent in Mind and Body phenomena (= *Adīnava ñāṇa*)
5. The Knowledge of Disenchanted attitude towards physical and mental phenomena (= *Nibbinda ñāṇa*)
6. The Knowledge of adoption of the idea of liberating oneself from the Conditioned phenomena (= *Muccitukamyatā ñāṇa*)
7. The Knowledge Reviewing the Impermanence, Proneness to suffering and Not-self nature of the Conditioned phenomena (= *Paṭisaṅkhā ñāṇa*)
8. The Knowledge of perceptivity to regard the Conditioned phenomena with indifference (= *Saṅkhārupekkhā ñāṇa*)

9. The Knowledge of ability to persue the foregoing steps and adapt one's powers of perception to the attainment of the right Path and Fruition (= *Anuloma ñāṇa*)

All these above mentioned (9) types of Insight Knowledges are included in the “Purity of having practised the adaptation to the right path “(= *Paṭipadāññāṇa dassana Visuddhi*).

The last Knowledge ie: --

10. The Knowledge of the Noble Path to *Nibbāna* (= *Ariyamagga ñāṇa*)

_____ - this Knowledge of the Noble Path to *Nibbāna* is included in the section of “Purity of Intellect and Knowledge of the Right Path” (= *ñāṇa dassana visuddhi*).

(The meanings of all these Steps of Knowledge will be fully explained in the Chapter of Insight Meditation). These two Sections of “Purity of having practised the adaptation to right path”- and-“Purity of Intellect and Knowledge of the Right Path” (= *Paṭipadā ñāṇa dassana visuddhi*, *Ñāṇa dassana visuddhi*) are classified as the type of Supernormal Knowledge (= *Abhinna*) in the Commentary and Subcommentary Scriptures. So

PAGE-F

1. If a *meditator* finds difficulties in both Practice and Supernormal Knowledge, such kind of person is known as person with “**Weary practice and sluggish Supernormal Knowledge**” (= *Dukkhaṭṭhapaṭipadā dandhabhinna puggala*).
2. If a *meditator* finds difficulties in the Practice, but not tiresome in attainment of Supernormal Knowledge, he is known as a person with **Weary practice and Swift Supernormal Knowledge** (= *Dukkhaṭṭhapaṭipadā khippabhinna puggala*).
3. Another *meditator* finds no difficulties in the section of Practice, but he may find difficulties in the attainment of Supernormal Knowledge, such kind of person is known as a person with **Pleasurable Practice and Sluggish Supernormal Knowledge** (= *Sukhaṭṭhapaṭipadā dandhabhinna puggala*).
4. Another *meditator* may find no difficulties in both the Practice and Supernormal Knowledge, such kind of person is known as a person with **Pleasurable Practice and Swift Supernormal Knowledge** (= *Sukhaṭṭhapaṭipadā khippabhinna puggala*).

_____ these are the basic definitions, mentioned in the above Commentary and Subcommentary *Pali* scriptures. In the section of Practice (= *Paṭipadā*), it is also mentioned to discern the Character-Essence-Perception-and Proximate cause of the Corporeality-Mentality-Cause and Effect = Conditioned phenomena (= *Saṅkhāra dhamma*).

There is a question why to discern in this way. If you *meditator* want to know the answer to this question, read further following explanations written in the: _____

1. Great Life History of the Buddha (= *Mahā Buddhavamsa*)
2. The Dictionary of Burmese-English for *Tipitaka* Scriptures.

Explanations in the Great Life History of the Buddha _____ (4) Types of Compactness (*Ghana*)

There are (4) types of Compactness known as (1) Compactness of consciousness of a series of sensations, seemingly merge into a continuum (= *Santati ghana*) (2) Compactness of conceiving the octad groups of matters (= *Attha kalāpa*) which are always in a flux of genesis, statis and dissoultion in the body as solid entity of bodily organs and the body (= *Samuha ghana*) (3) Compactness of the conception of various consciousness like seeing consciousness, Hearing consciousness etc; etc as a soul, entity or as a unified whole (= *Kicca*

ghana), (4) Compactness of conceiving the conglomeration of various Sense objects as palpable solid entity (= *Arammana ghana*).

1. Among these (4) types of Compactness, the continuous formation in order without interruption of various physical matters and mental processes which are seemingly merge into a single solid entity is known as Compactness as Continuity (= *Santati ghana*).

The continuous arising without interruption means, the following phenomenon arises as soon as the preceeding phenomenon is passing away (= *Bhanga khana*). In other words, the following phenomenon distinctly arises as soon as the preceeding phenomenon degenerated. To this phenomenon the Sub commentary teachers explained as “there is no interval between the preceeding and following phenomena” (= *Purimapacchimanam nirantarata*). Due to this nature of non-interrupted arising; the nature of arising is more powerful and overwhelms the nature of dissolution which becomes less obvious. So, the people wrongly think that “the presently seen phenomena are nothing, but these are the phenomena previously seen”. Very good example of this nature is appearance of “a fire whirl when someone waves the burning firewood hold in the hand “. (This is the Compactness as Continuity = *Santati ghana*).

PAGE-G

2. The Mentalities such as Contact (= *Phassa*) and Materialities such as Earth elements (= *Pathavī*) etc; etc; are aggregated in various Groups of Mentality and Materiality and perceived as single entity of ultimate nature. It is known as Compactness as Mass (= *Samuha ghana*).

When, the Mentalities or Materialities arise, these never occur as single unit. There are at least eight types of Mentalities (ie:- Eye-consciousness and seven Mental concomittants present in every occurrence of consciousness = *Cakkhu vinñāṇa citta + Sabbacitta sadharana cetasika*) in Mental process and at least eight types of Materialities (ie:- Eight types of Corporeal group = *Attha kalāpa rūpa*) on Corporeality side. So, arising of at least these eight natural phenomena which seemingly merge into a single natural entity is known as Compactness as Mass (= *Samuha ghana*).

3. The Mentality and Materiality exist in single unit or; type of Mental group and Material group (= *nāma kalāpa, Rūpa kalāpa*) arise to perform their respective duty. In such occasions, it is very hard for a person who has no intellectual ability of the Knowledge in Higher Doctrines (= *Abhidhamma panna*) to analyse like “It is the function of Contact, or It is the function of Feeling, or It is the function of Perception etc; etc; or” It is the duty of Earth element, or It is the duty of Water element, or Fire element or Air element etc; etc. So, when the Mentality and Materiality perform their respective functions, that performance seemingly merge into a single natural entity which is difficult to know. This is the Compactness as Duty (= *Kicca ghana*).

4. When various Mentalities in each Group of mentality take up the Sense object collectively and when various Materialities in each Group of Materiality exist as a single Sense-object, their occurrence seemingly merge into a single natural entity in Ultimate natural sense. This is known as Compactness as Sense object (= *Arammana ghana*).

So, in conclusion, the various Materialities and Mentalities are arising as Causative phenomena or Resultant phenomena (= *Paccaya dhamma, Paccayuppana dhamma*), in the various situations and the nature of which are difficult to be perceived; since these phenomena are compacted in continuity, mass, function and various senses. This

phenomena are known as Compactness as Continuity, Compactness as Mass, Compactness as Duty and Compactness as Sens-object respectively (= *Santatighana*, *Samuha ghana*, *Kicca ghana*, *Arammana ghana*). [The descriptions of (4) types of Compactness (= *Ghana*) are extracted from *Dhamma sangani* Original Subcommentary- Page (60) and *Dhamma sangani* Detail Subcommentary-Page (66).]

“In Ultimate reality Meditation, discern only the Original Nature, like; only the nature of peppery taste is perceived in eating up a chilli seed”

According to this phrase, you will attain Knowledge of Ultimate reality, only when you discern the original nature of various Materialities and Mentalities with Insight Knowledge (= *Ñāṇa*). Only when you attain the Knowledge of Ultimate reality, you will realize the nature of Compactness (= *Ghana*). Only when you realize the nature of Compactness, you will attain Knowledge of Not-self (= *Anatta*). If one does not discern original nature with knowledge, he will not realise the Ultimate reality. If one does not realise the Ultimate reality, he will not realise the nature of Compactness. If he does not realise the nature of Compactness, he will not realise the Knowledge of Not-self. So, the wise men say that the nature of Compactness (= *Ghana*) conceals the Characteristic of Not-self (= *Anatta lakkaṇā*)

(*Mahā Buddhavamsa* - volume IV, page-323-325.)

PAGE-H

Explanations in the Dictionary of Pāli-Burmese for Tipitaka Scriptures

Ghana vinibbhoga-[Pu]- [*Ghana* + *vinibbhoga*. *Vinibhujanam vinibbhogassa karanam vinibbhogo ñāṇam*; *Dhammanam ghanassa ekattassa vinibbhogo ghanavinibbhogo*. *Atthasa*, yo. 76. *Vinibhujjanam puthakkaranam vinibbhogo*. *Ghamassa samuhassa vinibbhogo ghanavinibbhogo*. *Sammo*, yo. 147.]

Knowledge of the Compactness (= aggregation) by differentiation, analysis and criticism, _____ Knowledge by analysis and differentiation to a nature of conglomeration, which appears to the mind as a single solid entity; _____ Demolition of the concept of single solidity.

The Ultimate truth phenomena are occurring in series like; Five-door advertence, seeing consciousness, receiving consciousness, Investigating consciousness (= *Pañca dvāravajjana*, *cakkhu viññāṇa*, *sampaticachana*, *santīrana*) etc; etc in the Thought process. In such occurrence, foregoing consciousness and following consciousness are not single consciousness. But there is no interval between these two, so as these two seem to be a single consciousness. It is known as “Compactness of Continuity” (= *Santati ghana*).

Not being perceived as single conglomerated consciousness (in the knowledge of a *meditator*) “Analytical Knowledge like; this is Five door advertence consciousness, that is seeing consciousness etc; etc” is known as Knowledge of Analysis and Differentiation of Compactness of Continuity, or Destruction of Compactness of Continuity (= *Ghana vinibbhoga*).

There are many associated Mental Concomitants like Contact, Feeling , Perception; etc; etc; to a single consciousness, or a single consciousness occurs simultaneously with Mental Concomitants like Contact, Feeling, Perception etc. So, since these phenomena are arising collectively, it is difficult to separately know as Contact, Feeling and Perception etc. The existence of these phenomena as single mass is known as

“Compactness as Mass”(= *Samuha ghana*).

Not perceiving as single phenoma, instead the Analytical Knowledge like - “this is Contact, this is Feeling and this is Perception”; etc-is known as “Knowledge of Analysis and Differentiation of Compactness of Mass, or Destruction of Compactness of Mass”(= *Ghana vinibbhoga*).

In Mental concomitants like Contact, Feeling; etc;- the Contact has function of striking or impact (= *Sanghattana kicca*) and Feeling has function of experiencing or suffering (= *Anubhavana kicca*). Although these have separate functions, when these arise in connection with a single consciousness, it is very difficult to know the special function of each and every Concomitants and their function are seemingly single one. It is known as “Compactness of Function or Duty”(= *Kicca ghana*).

So, not perceiving as a single function, instead the Knowledge that the Contact has function of impact or the Feeling has function of Experiencing etc, etc, is known as “Knowledge of Analysis and Differentiation of Compactness as Duty, or Destruction of Compactness as Duty”(= *Ghana vinibbhoga*).

All the consciousness and Mental concomitants when arising in the Eye-door thought process and taking up only the Sense-object of sight, although these are not single unit, they seem to be a single entity. That nature is known as “Compactness as Sense-object”. (= *Arammana ghana*).

So, although it seems to be a single unit due to taking up of a kind of Sense-object, if one perceives as separate nature like “this is Five-door advertence consciousness, this is seeing consciousness etc; etc; or this is the Contact mental concomitant, this is the Feeling mental concomitant etc; etc”; it is known as “Knowledge of Analysis and Differentiation of Compactness of Sense-object or Destructive Analysis of Compactness as Sense-object “(= *Ghana vinibbhoga*). (Netti-ṭṭha-154. Sam-ṭṭi-1-271. Mūlaṭṭi-1-60.)

PAGE-I

The Characteristic of Not-Self (= *Anatta lakkhana*) is perceptible only in the years of Buddhist Era, when the Buddha attains enlightenment. It is not perceptible in the period beyond the Buddhist Era. (Abhi-ṭṭha-2-46.)

The Characteristic of Not-self is under cover of the nature of “Compactness” (= *Ghana*) like Continuity, Mass etc; etc. So the nature of it is not knowledgeable, nor visible nor perceptible. If a person can destruct the nature of the Compactness;- the Characteristic of Not-self will be truly perceptible in its own original nature.

(Abhi-ṭṭha-2-47.)

Pāli Text

[**Remark --** These are the explanations for (4) types of Compactness written in the Great Life History of the Buddha (= *Mahā Buddhavanisa*) and the Dictionary of Burmese-English for *Tipitaka* Scriptures. The explanations for (4) types of Compactness in this “Practical Way to *Nibbāna*” Scripture (= *Nibbānagāmini paṭipadā*) are already described in the First Volume of this Scripture.]

You *Meditator* should discern the Corporeal Aggregates and Mental Aggregates, known as Corporeal Compactness and Mental Compactness (= *Rūpa ghana, nāma ghana*) with Analytical and Discriminating Knowledge so as to attain the Knowledge of Ultimate truth for the Ultimate phenomena. So, you *meditator* should definitely seize on and analyse

with Insight knowledge to the Corporeality and Mentality in terms of Character-Essence-Perception and Proximate Cause so as to reach the Knowledge of Ultimate reality after destructing the Conception of Compactness. (= *Ghana*). In conclusion; may all you noble persons who want to attain the true teachings of the Buddha, realise the Ultimate truth sense of all Conditioned phenomena known as the Truth of Suffering and the Truth of Origin of Suffering, by seizing on with Analytical knowledge in terms of Character-Essence-Perception and Proximate cause of these, and after attaining Discriminating knowledge of the existence of Corporealies and Mentalities in Compactness.

(c) This is the degeneration and passing away of the Perception.
- 4.(a) These are the nature of Mental Formations (Mental concomitants),
(b) This is the cause and arising of these Mental Formations,
(c) This is the nature of degeneration and passing away of these Mental Formations.
- 5.(a) This is the consciousness,
(b) This is the cause and arising of consciousness,
(c) This is the nature of degeneration and passing away of consciousness.

Again, in the above Discourse of the Practice in the Foundation of Mindfulness (= *Saṭṭipatṭhāna*) _____

The Buddha teaches the *meditators* and Monks to have repeated contemplation in the phenomena of the (5) Groups of Existence which form the Objects of Clinging as Natural Phenomena in the following ways: _____

1. This is the nature of Corporeality = *Iti rūpam.*
2. This is the nature of Feeling = *Iti vedenā.*
3. This is the nature of Perception = *Iti saññā.*

PAGE-2

4. These are the nature of Mental Formations = *Iti Saṅkhāra.*
5. This is the nature of consciousness = *Iti viññāṇa.*

To above Buddha's teachings, the Commentary and Subcommentary give following explanations: _____

Pāli Quotation (Dī-A-2-253, Sam-A-2-44,45)

Pāli Quotation (Sam-ṭī-2-58)

Question _____ The Buddha instructs the Meditating monk to contemplate the (5) Groups of Clinging (= *Upādanakkhandhā*) repeatedly as _____ this is Corporeality ; this is the Feeling; this is the Perception; this is the Mental formations and this is the consciousness. If so, there in a question how to contemplate the (5) Groups of Clinging with the Knowledge of Right view (= *Sammādiṭṭhi ñāṇa*) by the meditating monk.

Answer _____ the answer is as follow: _____

A *meditator* should discern all Corporealities in terms of Character-Essence-Perception and Proximate cause as: _____

1. This is corporeality. This is the extent of the Corporeality. The Corporeality is not more than that. The nature of alterations (= *Rūppana sabhāva*); that is the occurrence of Corporeality-continuum (= *Rūpa santati*) of the preceeding Corporeality and the following Corporeality are quite different due to various causes like heat and cold _____ and varieties of different (28) types of Materiality like Primary elements and Derived Materialities, are completely seized on with Insight knowledge in terms of Character-Essence-Perception and Proximate cause. (= *Lakkhaṇa, Rasa, Paccupaṭṭhāna, Padaṭṭhāna*). So; it means that, all the Corporealities should be completely discerned to know their nature in terms of Character, Essence, Perception and Proximate cause.

In case of, “This is the phenomena of Feeling” etc: _____
the *meditator* should discern like,

2. This is the Feeling, This is the extent of Feeling, The Feeling is not more than that.
3. This is the Perception..... etc.

PAGE-3

4. These are the Conditioning forces..... etc.
5. This is the consciousness, This is the extent of consciousness, The consciousness is not more than that _____
2. The nature of taking up the Sense object by the Aggregate of Feeling,
3. The nature of memorising the Sense object by the Aggregate of Perception,
4. The nature of collective accomplishment of effects by the causative Aggregate of conditioning forces (= *Saṅkhārakkhandhā*),
5. The nature of seizing on and recognition of Sense objects by the Aggregate of consciousness,
2. Various nature of the Aggregate of Feeling like Bodily Agreeable Feeling etc etc.,
3. Various nature of the Aggregate of Perception like Perception as Corporeality etc etc.,
4. Various nature of the Aggregate of Mental Formation like the Contact, Volition etc etc.,
5. Various nature of the Aggregate of consciousness like Seizing consciousness etc etc.,

Since, the Buddha wants to mention the total and complete discernment of the

Feeling, Perception, Conditioning forces and consciousness in terms of Character- Essence- Perception and Proximate cause, a **meditator** should try to perceive the nature of Feeling, Perception, Conditioning forces and consciousness in terms of Character-Essence-Perception and Proximate cause. (*Dī-A-2-53, Sam-A-2-44,45.*)

Take care of the words like _____ *Anavasesarūpa pariggaho vutto....(pa).* *Anavasesa vedanā saññā Saṅkhāravinnāṇa pariggaho vutto* _____ in the above Commentaries. The Buddha instructs for total and complete discernment of the (5) Groups of existence which form the objects of Clinging (= *Upādanakkhandhā*) like Corporeality- Feeling-Perception- Conditioning forces and consciousness in terms of Character, Essence, Perception and Proximate cause.

The Buddha does not instruct just to seize on: _____

1. Only one Materiality, or
2. Only one Mentality, or
3. Only one on the part of Materiality or on the part of Mentality in terms of Character, Essence, Perception and Proximate cause. Instead, the Buddha instruct to perform total and complete (= *Anavasesa*) discernment of the Corporeality, Feeling, Perception, Conditioning forces and consciousness with Knowledge. So, the explanation that the **nibbāna** is attainable by discernment of just only one kind of Materiality element or mentality-element or only one on the part of Materiality or on the part of mentality, is the concept deviated from the instructions described in the Discourse of the Buddha.

According to the above **Pāli** scriptures, Commentaries and Subcommentaries; a noble **meditator** should discern the: _____

1. Character, Essence, Perception and Proximate cause of the appropriate (28) types of Corporeality like; (4) Primary elements (= *Bhuta rūpa*), and Derived corporealies (= *Upāda rūpa*) or the type of Corporeal Element like Earth element, Water-element Fire-element and Wind-element,

PAGE-4

2. Bodily agreeable feeling, Bodily disagreeable feeling, Mentally agreeable feeling, Mentally disagreeable feeling, Indifferent Mental feeling (= *Sukha vedanā, Dukkha vedanā, Somanassa vedanā, Domanassa vedanā, Upekkha vedanā*) and Character, Essence, Perception and Proximate Cause of each and every Kinds of Feeling,
3. Visual perception, Auditory perception, Olfactory perception, Gustatory perception, Tactile perception, Mind-object perception and Character, Essence, Perception and proximate cause of each and every types of Perception (= *Saññā*),
4. (50) types of Mental concomitant included in the Aggregate of Mental formation like the Contact, Volition, Concentration, Vitality and Advertence (= *Phassa, Vedanā, Ekaggatā, Jivitindriya, Manasikāra*) and Character, Essence, Perception and Proximate cause of each and every types of these Mental concomitants,
5. Various consciousness like seeing consciousness, Hearing consciousness, Smelling consciousness, Tasting consciousness, Body- consciousness and Mind consciousness and the Character, Essence, Perception and Proximate cause of each and every types of these consciousness.

You noble person who want to attain True teaching of the Buddha should firmly take care of this fact regarding the method of meditation, in the mind somewhat like “a nail firmly hammered in the head” described in Burmese proverb.

It is not Comparable Matter

Heretical ascetic (= *Paribbajaka*) named *Upatissa* who was future Venerable *Sariuputta Arahat* attained the Fruition of Stream-Winning (= *Sotāpatti phala*) after hearing a single phrase of the Doctrine as _____ “*ye dhammā hetuppabhavā*” from Venerable *Assaji Arahat*. Next, heretical ascetic named *Kolita* who was future Venerable *Mahāmoggallāna Arahat* also attained the Fruition of Stream-Winning after hearing a single phrase of the Doctrine as _____ “*Ye dhammā hetuppabhavā*” from Venerable *Sariputta Arahat*. Future Venerable *Bahiyadaruciriya Arahat* attained the Fruition of Arahat or Holiness after hearing concise Doctrine of Practice as “*Diṭṭhe diṭṭha mattam*” from the Buddha. (as described in the Chapter of Meditation on Mentality).

All these Venerable Arahat, probably have no time for detailed and complete contemplation on the Materiality and Mentality. And, so some wrongly ask like “How can they have enough time to discern each and every types of Materiality and Mentality in terms of Character, Essence, Perception and Proximate cause?” They wrongly give arguments to the attainment of the Holiness by these Arahats. If you noble *meditator* also have some doubt regarding to this matter, read the following words.

Pāli Quotation (Vs-2-72)

PAGE-5

Pāli Quotation (Mahāṭṭ-2-84)

The Pre-eminent disciples (= *Aggasāvaka*) like Venerable *Sariputta Arahat* and Venerable *Mahāmoggallāna Arahat*, developed the Perfections of Virtue (= *Pārami*) for one infinite number of years plus one hundred thousands world cycles in their past existences as Future Pre-eminent disciples to attain the Enlightenment = Perception of the Four Noble Truths as Pre-eminent Disciples (= *Aggasāvaka bohiñṇana*). Future Venerable *Bahiyadaruciriya* developed the Perfections of Virtue for one hundred thousands world-cycles to become Virtuous disciple (= *Mahāsāvaka*) who attained Pre-eminence (= *Etadagga*) in the Ability to perform miracles through higher psychic power and knowledge. (= *Khippābhiñṇa etadagga*). All these Venerable Arahats attained (4) kinds of Analytical intellect (= *Paṭisambhidā*) after learning in the Teachings of the Gotama Buddha and known as Analytical intellect-attained Holy Ones (= *Paṭisambhidā patta arahanta*).

The (4) Kinds of Analytical intellect can provide the ability to know the true nature of the various aspects in two existences like the existence as Noble Learner (= *Sekkhā bhūmi*) where the mental continuum is occupied with the 4 Supramundane Paths and the 3 Lower Fruitions of Noble Learner; and the existence as one Beyond Training (= *Asekkhā bhūmi*), where Mental continuum is occupied with the Fruition of Holiness (= *Arahatta-phala*) of No more Learner (= *Asikkhā puggala*).

In these two occasions the Analytical intellects, provide the ability to know the true nature in various aspects by Pre-eminent disciples or Virtuous disciples in the existence as “One Beyond Training” (= *Asekkhā bhūmi*) = they attain (4) kinds of Analytical intellect as soon as they become Holy One (= *Arahanta*).

In case of the Analytical intellect of the various persons like Venerable *Ananda*, Wealthy *Citta*, *Dhammika* (the male devotee of the Three Gems = *Upasakā*), Wealthy *Upāli*, and *Khujjuttara* (the female devotee of the Three Gems), that Analytical intellect provides the Knowledge of true nature in various aspects as soon as they reached the existence as Noble Learner.

[Venerable *Ānanda* attained the (4) kinds of Analytical intellect as soon as he realized the Knowledge of the Path of Stream-Winner and the Knowledge of the Fruition of Stream-Winner. Wealthy *Citta* and *Dhammika* the male devotee of the Three Gems attained (4) kinds of Analytical intellect as soon as they realized the Knowledge of the Path of Non-Return and Fruition of Non-Return. Wealthy *UPāli* and *Khujjuttara* the female devotee of the Three Gems attained (4) kinds of Analytical intellect as soon as they realized the Knowledge of the Path and Fruition of Stream-Winner.]

As described above, the disciples in both kinds of Existences as Noble Learners and One Beyond. Training (= *Sekkha*, *Asekkha*) are able to attain the Analytical intellect. These Analytical intellects are pure in nature due to following (5) causes.

1. Attained Absorption and Fruition of Holiness (= *Adhigama*) = Attainment of the Fruition of Holiness without interruption after the Knowledge of Path and Fruition.
2. Learning of the Buddhist Doctrine (= *Pariyatti*) = Learning and recitation of the education in the Buddhist scriptures,
3. Listening to Sermons (= *Savana*) = Listening and hearing the explanations in the Commentaries of the Buddhist Instructions or Doctrines.
4. Questioning (= *Paripuccha*) = Asking and Learning the meaning (= *Paḍaṭṭha*), and Intention (= *Adhippayatṭha*) of the difficult words and phrases in the Commentaries of the *Pāli* Scriptures, (Asking and Learning the meaning and Intention, regarding the Aggregates, Bases, Elements, Truths, and Dependent Origination = *Khandhā, āyatana, Dhātu, Sacca, Paticca samuppāda*)

PAGE-6

5. Connection with former actions (= *Pubbayoga*) = keeping in a state of Mental absorption during alms-rounds at the time of the previous Lord Buddhas (= *Gatapacca gatika vatta*) = practising the Insight meditation _____ to attain adoption of the idea of liberating oneself from Conditioned phenomena, to review the impermanence, proneness to suffering and illusariness of conditioned phenomena, _____ to attain perceptivity to regard Conditioned phenomena with indifference (= *Muncitukamyata ñāṇa, Paṭisañkhā ñāṇa, Sañkhāruphekkhā ñāṇa*); all of these Insight Knowledges arise near the Adaption-knowledge and Maturity-Knowledge(= *Anuloma ñāṇa, Gotarabhu ñāṇa*).

So, due to the above (5) cause, the Analytical intellect is very pure in nature. In that instance _____

1. The Lord Buddhas and
2. The Lesser Buddhas _____ attains the Analytical intellect based on: _____
 1. Connection with former actions (= *Pubba yoga*) _____ that is they practised Insight meditation in previous Lord Buddhas up to the attainment of perceptivity to regard Conditioned phenomena with indifference (= *Sañkhāruphekkhā ñāṇa*) and
 2. Attainment of the knowledge of Path and Fruition of Holiness (= *Adhigama*).

The remaining Disciples (= *Sāvaka*), attain the Analytical intellect based on all kinds of above (5) causes. (Vs-2-72.)

 1. Analytical intellect which is able to analyse the meaning of the Truth of Suffering (= *Dukkha sacca*) is known as “Analytical intellect in the meaning” (= *Aṭṭha Paṭisambhidā ñāṇa*): _____ ie:- the Knowledge of the Effect of the Cause is known as Analytical intellect in the meaning (= *Aṭṭha Paṭisambhidā*).
 2. Analytical intellect which is able to know the cause of sufferings or the Origin of Suffering (= *Samudaya sacca*) is known as “Analytical intellect to discern Various phenomena”(= *Dhamma Paṭisambhidā ñāṇa*): ie.,_____ the Knowledge of the cause is known as “Analytical intellect to discern various phenomena”.

3. The intellectual ability to know the natural meaning and phenomena which are known as the Truth of Suffering and the Truth of the Origin of Suffering; especially the Ability to produce logical explanations of grammatical meanings of difficult words in the Doctrinal Scriptures is known as “Analytical intellect of grammatical usage” (= *Nirutti Paṭisambhidā ñāṇa*).
4. The ability to explain lucidly in above Analytical intellect in the meaning, Analytical intellect to discern various phenomena and Analytical intellect of grammatical usage (= *AṭṭhaPaṭisambhidā ñāṇa*, *DhammaPaṭisambhidā ñāṇa*, *Nirutti Paṭisambhidā ñāṇa*) is known as “Analytical intellect- ability to explain in terms of grammatical and contextually designated meaning”(= *Patibhāna Paṭisambhidā ñāṇa*). (Abhi-2-307-308. Vs-2-70-72.)

As described above, the Venerable *Sariputtara*, *Mahāmoggallāna* and *Bahiyadaruciriya* attained the Analytical intellect as soon as they reached the Path and Fruition of Holiness. So, to attain above special intellects and knowledges, the two Pre-eminent disciples (= *Aggasavaka*) had already developed the Perception of Virtues and various causes to fulfil the attainment of these knowledges for one infinite number of years plus one hundred thousands world-cycles and the Venerable *Bahiyadaruciriya* for about hundred thousands world-cycles in their past existences in the Teachings of Previous Lord Buddhas. Among the (5) causes, the causes in connection with **former actions** (= *Pubbayoga*) will be specially mentioned in this instance. These Venerable Holy Arahats had already contemplated repeatedly the Conditioning phenomena (= *Saṅkhāra dhamma*) until they reached Perceptivity to regard Conditioned phenomena with indifference (= *Saṅkhārupekkhā ñāṇa*) which arises near the Adaptation knowledge and Maturity-knowledge. (= *Anuloma ñāṇa*, *Gotarabhū ñāṇa*). In other words: _____

PAGE-7

1. These Venerable Holy Arahats had already discerned and known the (5) groups of existence which form the Objects of Clinging (= *Upādānakkhandhā*) and exist in (11) aspects like Past, Future, Present, Internal, External, Gross, Subtle, Low, Lofty, Far-away, Near _____ (= *Atīta*, *Anāgata*, *Paccupana*, *Ajjhatta*, *Bahiddha*, *Olārika*, *Sukhuma*, *Hina*, *Panīta*, *Dura*, *Santika*) -- all these are known as the Truth of Suffering (= *Dukkha sacca*). All these phenomena were repeatedly discerned with knowledge in terms of Character, Essence, Perception and Proximate cause.
2. The relation between Cause and Effects = Dependent Origination which are the Truth of Origin of Suffering (= *Samudaya sacca*) had already discerned and known. The various constituents of Dependent origination were repeatedly contemplated with knowledge in terms of Character, Essence, Perception and Proximate Cause.
3. All these Conditioned phenomena (= *Saṅkhāra dhamma*) which are known as the Truth of suffering and the Truth of Origin of Suffering had already discerned with Insight Knowledge in terms of the (3) Characteristics of existence (= *Ṭī-lakkhana*). The nature of Impermanency, Suffering and Not-Self (= *Anicca*, *Dukkha*, *Anatta*) in these Conditioned phenomena had already perceived by themselves with Insight Knowledge and Right view. They had tried to attain Perceptivity to regard Conditioned phenomena with indifference (= *Saṅkhārupekkhā ñāṇa*) and with this Knowledge they felt indifferent (= *Udasina*) to the nature of Impermanency, Suffering and Not-Self of these Conditioned phenomena.

All these facts are the **Causes in connection with former actions** (= *Pubbayoga*) of these Noble and Holy persons. So, among these Holy persons, the two Pre-eminent

Disciples before becoming as Stream-Winners (= *Sotāpañña*) and the Venerable *Bahiyadaruciriya* before becoming as the Holy One (= *Arahat*), had no enough time to contemplate repeatedly the Conditioned phenomena in terms of Character, Essence, Perception and Proximate Cause. But they all had repeatedly discerned these Conditioned phenomena in terms of Character, Essence, Perception and Proximate cause in their past existences at the time of previous Lord Buddhas. That experience of discernment with Insight Knowledge itself is the Decisive-Supportive cause or Decisive-Support Condition for perception of (4) kinds of Ultimate Truths (= *Sacca*).

So, you noble *meditator* should not stand shoulder to shoulder with these Holy Noble persons who had already attained the Causes in connection with former actions (= *Pubbayoga*). If you noble *meditator* want to stand shoulder to shoulder with them or: if you noble *meditator* think that, these Holy Ones attained the Supramundane Paths and Fruitions and *Nibbāna* without discernment of Corporealities and Mentalities in terms of Character, Essence, Perception and Proximate Cause and you are also able to attain the Supremundane Paths, Fruitions and *Nibbāna* without any discernment of Corporealities and Mentalities in terms of Character, Essence, Perceptions and Proximate cause; -- then you noble person read the following *Pāli* verse that made the Venerable *Sariputtara* attained the Fruition of Stream-Winning.

*ye dhammā hetuppabhavā, tesam hetum taṭhāgato āha.
tesanca yo nirodho, evam vādi mahāsamano.*

Translation: _____

1. All phenomena of the Truth of Suffering (= *Dukkha sacca dhamma*) begin from phenomena of the Truth of Origin of Suffering (= *Samudaya sacca dhamma*); and this phenomena of the Truth of Suffering, or
2. the Truth of Origin of Suffering which is the cause of the Truth of Suffering, or
3. the Extinction of Suffering which is cause of cessation of the Truth of Suffering (and Truth of Origin of Suffering), or
4. the Truth of the Path which lead to *Nibbāna* = Extinction of Suffering: _____

PAGE-8

all these (4) kinds of Noble Ultimate Truths are taught by the Lord Buddha who is known as the One Who Has Trod the Path of Reality (= *Taṭhāgata*). The Lord Gotama Buddha who is the Noble Holy *Arahat* also, and named Great monk (= *Mahāsamana*) accept such kind of ideology “. _____

The two Pre-eminent Disciples attained the Fruition of Stream-Winner after hearing a part of above Doctrinal Verse. If you noble person ask and assess yourself whether you are able to attain the Fruition of Stream-Winner after just hearing or reading the above Doctrinal Verse. If the answer is “Unable to attain the Fruition of the Stream-Winner”; then scrutinize the descriptions in the various scriptures that the Conditioned phenomena should be thoroughly discerned in terms of Character, Essence, Perception and Proximate cause with Knowledge.

Again, listen or read the practice of _____ *Ditthe ditthamattam* _____ taught by the Buddha to Future Venerable *Bahiyadaruciriya* which was mentioned in the Chapter of meditation on Mentality. After listening or reading that *Pāli* verse, assess yourself as whether you are able to attain the Fruition of Holiness (= *Arahatta phala*) like Venerable *Bahiyadaruciriya* *Arahat*. If the answer is “Unable to attain the Fruition of Holiness”, -- then you are not suitable to stand shoulder to shoulder with Venerable *Bahiyadaruciriya* *Arahat*. So, all you man and woman of good lineage or family who want to attain true and right Doctrinal teachings should have belief and pure wise attention to the Doctrinal teachings

given by the enlightened Buddha or to the explanations given in the various Commentaries to know the meanings of these teachings .

The Definitions of Character-Essence-Perception and Proximate cause

Pāli Quotation (Abhi-A-1-105)

1. Character _____ There are two kinds of Character; Real or Natural Character (= *Sabhāva lakkhana*) and General Character (= *Samanna lakkhana*). The Character of Impermanence, Character of Suffering and Character of Not-Self, known as (3) characteristics of Existence (= *Ṭī-lakkhana*) are concerned with all conditioned phenomena. So these are named General Characters. Since, this General Character for all phenomena is concerned with the Section of Insight Knowledge, the *meditator* should discern it by self with Right view in the Section of Insight knowledge.

The alternate occurrence of the Corporeal continuum of all Materialities in which the occurrence of the following Material Continuum is not similar to the preceding Material continuum due to the opposite conditions like heat or cold; i.e.,:- the Ever-changing Character (= *Ruppana lakkhana*) is the General Character (= *Sāmañña lakkhana*) of all Materialities. The nature of inclination to respective sense-objects by all Mentalities;

PAGE-9

ie: -the Character of Inclination (= *namana lakkhana*) also is the General Character (= *Sāmañña lakkhana*) of all Mentalities. These Ever-Changing Character and Character of Inclination respectively of the Materialities and Mentalities, ie:- the General Characters are concerned with the Section of the “Knowledge of the distinction between Mind and Body”(= *nāma rūpa pariccheda ñāṇa*). So, a *meditator* should completely discern all these nature by himself with Penetrative perception and the Knowledge of Right View (= *Samā dīṭṭhi ñāṇa*) in the section of the Knowledge of the Distinction between Mind and Body.

The specific and own nature of the various Materialities and Mentalities which is not in common is known as the Natural Character (= *Sabhāva lakkhana*). A *meditator* should also completely discern all the Natural characters of the respective Ultimate real phenomena by himself with Penetrative perception and the Knowledge of Right view in the section of the Knowledge of the Distinction between Mind and Body.

2. Essence_____ *Kiccam vā sampatti vā raso nāma. (Abhi-ṭṭha-1-105.)* *Raso taseva attano phalam pati paccayabhāvo. (Dī-ṭṭi-2-53.)*

The nature of giving advantage and effect to other phenomena by various Materiality and Mentality in connection with their own benefit is known as Essence (= *Rasa*). There are two kinds of Essence. The matters to be carried out by the Ultimate real elements is known as Functional Essence. (= *Kicca rasa*). The nature which arises by accumulation of various causes is known as Essence of accomplishment (= *Sampatti rasa*). In other words, obvious quality of a phenomenon is known as Essence of accomplishment (= *Sampatti rasa*). In this instance Functional Essence is obvious in some phenomena and the Essence of Accomplishment is obvious in others. So, all these Essences will be explained in their respective phenomena.

3. Perception _____

Pāli Quotation (Abhi-A-1-105)

(Mulaṭṭhi-1-64)

(Dī-ṭi-2-53)

The nature of obvious existence of the Materiality and Mentality as Ultimate real matters, acting as true Sense objects taken up by the Knowledge is known as **Perception (= Paccupaṭṭhana)**. It is also of two Kinds known as Taken up Perception (= *upaṭṭhāna kāra paccupaṭṭhana*) and Effect-Perception (= *aṭṭhana*). Between these two; the Taken-up Perception is the nature which is perceived in the Knowledge, when respective Ultimate real element is discerned by a *meditator*. The Effect-Perception is the nature by which the effect of respective phenomenon arising together is perceived. So, it is the result obtained by the Functional Essence (= *Kicca rasa*).

4. Proximate Cause _____ *Asaññākāraṇam padaṭṭhānam nāma. (Abhi-A-1-105)*
Padaṭṭhānam āsaññākāraṇam, tenassa paccayā yatta vuttiā dassitā. (Dī-ṭi-2 -53.)

Among the far and near causes of various Ultimate elements, the nearest cause is known as the Proximate cause (= *Padaṭṭhāna*). By means of the words "Proximate cause", it indicates the nature related to the cause of that Ultimate phenomenon.

PAGE-10

Preliminary Notes

Since, Materialities and Mentalities should be completely discerned with the Knowledge, in terms of **Character-Essence-Perception and Proximate Cause**, and since the Materialities and Mentalities never occur alone or since these occur in association as Groups of Materiality (= *Rūpa kalāpa*) and Groups of Mentality (= *nāma kalāpa*);- only when a *meditator* should perceive each and every Group of Materiality and Mentality with differential Knowledge and only when a *meditator* is able to realize and understand these phenomena and reaching the nature of Ultimate reality of these, he will be able to understand the methods of meditation in terms of Character-Essence-Perception and Proximate Cause.

In this Section of "**Lakkhanadi Catukka**"= Section of the Four Kinds of features in regard to Ultimate realities (started from the Character, Essence etc.); The *Pāli* phrases are mentioned for those who want to study in *Pāli*. For those who are not familiar with *Pāli*; Burmese translation in short is also given for easy understanding . In this case, note these features in sequential order as follow: _____

1. Character (= *Lakkhana*),
2. Essence (= *Rasa*),
3. Perception (= *Paccupaṭṭhāna*),
4. Proximate cause (= *Padaṭṭhāna*).

In translation, shortest and easiest way is used with reference to "**Visuddhi magga Nissaya**" "(= Word by word translation of the Path of Purification) by Venerable Pyay Sayadaw and various translated books by other teachers who translate *Pāli* texts.

Although the method of word by word translation of *Pāli* texts (= *Nissaya*) is excellent and the precise way of translation, it is not easy to study and memorise for those who are not familiar to *Pāli* Literatures. So, only the Burmese translation is written in this scripture.

(28) Types of Corporeality = The Chapter of Speech on Aggregate of Corporeality
(*Rūpakkhandaḥ kathaṃ*)

1. Earth Element

(*Pathavī dhātu*)

1. *Kakkhaḷatta lakkhaṇā pathavī dhātu,*
2. *Pattīḥāna rasa,*
3. *Sammaticchana paccupaṭṭhana,*
4. *Avasesadhātuttaya padaṭṭhāna.*

(*Abhi-A-1-368. Vs-1-362. Vs-2-73*)

1. Earth Element

1. Has the nature of hardness (= Strength, firmness.)
2. Has Function (Essence) to support the remaining matters of same group.
3. It is perceived in the Knowledge of a *meditator* as a nature which reinforces the remaining matters of the same group (= *Kalāpa*).
4. It's Proximate cause is the remaining (3) Elements of the same group of matters.

PAGE-11

Remark _____ The above translation is the shortest and briefest one. It may need more explanations to understand that translation. So, another short translation will be mentioned so as to memorise the Character, Essence etc, in similar way in the next section; and to make the words compact. Although it is written in shorter way, try to memorise as above translation, if you want to do so. But the meaning should be memorised as above translation. Note the remaining Character-Essence etc, etc, in similar way.

1. Earth Element

- | | |
|--|---------------------|
| 1. Hardness (= Toughness, Firmness) | Character, |
| 2. Supportive to remaining matters of the same group | (Function) Essence, |
| 3. Foundation to remaining matters of the same group | Perception, |
| 4. Remaining (3) Elements of the same group | Proximate cause . |

Method of Meditation

The Earth element is always incorporated in every Groups of matter of (6) Doors (= *dvāra*) and (42) Body-parts (= *Koṭṭhāsa*) and the consciousness produced groups of matter, Temperature produced groups of matter, and Nutriment produced groups of matter (= *Cittaja kalāpa, Utuja kalāpa, Āhāraja kalāpa*) which are included in the secondary matters. You, disciple can not discern completely each and every Earth elements included in each and every groups of matter amounting to about a quarter of a viz (= Approx-408 gram) in the body. But so as the perceive the Ultimate nature of the existence of the solid matters in Compacted state (= *Rūpa ghana*) with Insight Knowledge, a *meditator* should be able to discern with Knowledge all Earth elements included in every Groups of matter incorporated in (6) Doors and (42) types of Body parts in terms of Character-Essence-Perception and Proximate cause.

So, a **meditator** should analyse the Group of matter in which the Earth element you want to seize on is included. Only after you perceive the Ultimate real matter, select the Earth element you want to seize on and discern it, in terms of Character-Essence-Perception and Proximate cause.

But, the better method is to discern completely, the nature of 8 types, 9 types, or 10 types, in respective Groups of matters in which (8), (9) or (10) types of matter are included. In Eye-door (= **Cakkhu dvāra**), there are (6) types of Group of matters and (54) kinds of Corporeality. A **meditator** should discern each and every kinds of these (54) Corporealities in term of Character-Essence-Perception and Proximate Cause. After discerning the (54) Corporealities in interior (= *Ajjhata*), discern External (54) corporealities (= *Bahiddha rūpa*) in similar method. Then similar method in applied to other Doors like Ear-door etc, or (42) types of Body parts. To be able to discern in this way, a noble **meditator** should learn by heart; the Character, Essence, Perception and Proximate causes of the (28) types of Corporeality at first. Only after then, you will be able to discern the Ultimate nature of the various materialities in single Group of matter (= **Rūpa Kalāpa**) completely, after recognition of their existence in Compacted state (= *Ghana*) with the Knowledge.

PAGE-12

Example ____ If a **meditator** wants to seize on each and every types of matter included in the Eye-decad group of matter (= **Cakkhudasaka kalāpa**) of the Eye door (= **Cakkhu dvāra**) in terms of Character, Essence, Perception and Proximate Cause; ____ discern the (10) Ultimate real matters included in the Eye-decad group first. There are so many Eye-decad groups of matter in the eye. But, a **meditator** should discern first, the (10) Ultimate real matters in the Eye- decad group he wants to discern. Only after then, select the Earth-element included in that (10) types of matter and discern that Earth-element in terms of Character, Essence, Perception and Proximate Cause. Then, sequentially discern further, the remaining (9) types of matter like Water-element, Fire element, Air element, Color, Odour, Taste, Nutritive essence, Life faculty and Eye transparent element (= *Āpo, Tejo, Vāyo, Vanna, Gandha, Rasa, Oja, Jīvita; Cakkhupasāda*) one by one excluding the Earth element in that particular Eye-decad group of matter. Next, sequentially discern various groups of matter like the Body-decad group, Sex-decad group, consciousness produced octad group, Temperature produced octad group, and Nutriment produced octad group in similar way. Again, completely discern the (54) types of Corporeality in both interior and exterior (= *Ajjhatta, Bahiddha*) according to the tables of Material Meditation, mentioned in the section of Material Meditation. Similar method of discernment is also applied in (6) Doors, (42) Body-parts etc,etc

The Earth Element ____ Among the (10) Ultimate real matters in the Eye-decad group, select the Earth-element and discern the nature of toughness = hardness of the Earth element. That is the natural Character of the Earth element. In the Discourse of *Mahārahulovada* etc;- that Earth element is mentioned, having two Characters like hardness and roughness (= *Kakkhalam kharigatam*). A **meditator** can discern both kinds of Character. Again, that Earth-element performs supportive function for the remaining (9) types of matter in the same groups. Discern also that nature. There are so many Eye-decad groups in the Eye-door. That Earth-element performs supportive function only for the matter in the same group. It can not perform supportive function for those matters, not in the same group. Instead, it supports the matters in the same group excepting by itself. Try to understand in similar way in other remaining groups of matters.

Since, the Earth element performs supportive function to the materialities in the same group excepting itself, a *meditator* discerning that Earth element perceives, in his Knowledge as a phenomenon which supports the units of matters in the same group excepting of itself. This is the Perception. This kind of Perception is Taken-up Perception (= *Upatthānākāra paccupaṭṭhana*). So, since the Earth element is acting supportive function for existence of units of matter in the same group excepting itself, a *meditator* discerning the Earth element will perceive in his knowledge as a phenomena where the Earth element exists at the bottom, on which the remaining matters in the same group depend and situated on top of it. Try to perceive in this way with Insight Knowledge.

Pathavīdhātu āposaṅgahitā tejoanupālītā vāyoviṭṭhambhitā tiñṇam mahābhūtānam paṭiṭṭhā hutvā paccayo hoti. (Vs- 1-365.)

PAGE-13

The nearest cause of the Earth element is the remaining (3) types of great elements in the same group. Only when the Water element enhances the cohesion of the matters in the same group, the Fire element looks after the maturation of the matters in the same group with it's heat and the Air element pushes or moves the matters in the same group; the Earth element will be able beneficial as a support for other Great elements and associated materialities in the same group. Only then, it will be able to perform supportive function for the matters in same group. Without other (3) Primarty great elements, it can't perform the supportive function in the same group. That is why, the nearest cause for the Earth element is the remaining (3) Primary element in the same unit group of matters. That is the Proximate cause. (= *Padaṭṭhāna*).

Again, the Earth element which is organised by the Water element, looked after by the heat of Fire element, and supported by the Air element, performs as a foundation for the remaining Water, Fire and Air elements in the same group of matter. So it is beneficial for those (3) Primary elements as a foundation. By getting the foundation on the Earth element, the Water element is able to organise the matters in the same group. The Fire element is able to give heat and cold to the matters in the same for maturation. The Air element, getting firm base on the Earth element, also becomes able to support the matters in the same group. When a house is propped up with a buttress-wood block, that block of wood may need support on the firm ground. When a wooden block is pushed from place to place, people who are pushing the block may need support on the firm ground. Take these examples in mind when considering the Earth element.

That is how the (4) Primary or Fundamental Elements are mutually beneficial among each others. Like “the island and the land formed by the process of silting” are intimately related. Aiming to this mutual reliance, the Buddha teaches in the *Paṭṭhana* Discourse as follow: _____

Cattāro mahābhūtā aññamaññaṃ sahaṇā paccayena paccayo. (Paṭṭhana-1-5.)

(The 4 Primary Elements are conditioned among each others by way of Mutuality and Co- nascence)

So, the nature of conditioning among each other of the Ultimate phenomena by ways of Co-nascence, Mutuality, Support etc,etc., (= *Sahaṇā, Aññamañña, Nissaya*) is termed as Proximate cause (= *Padaṭṭhāna*) by Commentary teachers. If you noble person accept the concept that “the Buddha does not mention the Proximate cause”, the great opportunity will be lost by you. Your knowledge which has great power in the perception of very delicate

phenomena of Ultimate truth field will lose opportunity to perceive. Even the wise man may miss it.

2. Water Element

2. Water Element

1. The nature of flowing _____ Character,
2. Multiplication of the materialities arising together _____ (Function) Essence,
3. Organisation and Cohesion of the materialities arising together _____ Perception,
4. Remaining (3) Primary elements in the same group of matters _____ Proximate cause..

Pāli Quotation (Vs-1-345)

Pāli Quotation (Mahāṭṭi-1-430)

Water Element moves to various directions (i.e., to the remaining (3) Primary elements) by flowing and trickling. So it is named *Āpo* in *Pāli*. These words are based on the quality of water element in natural aggregation (= *Sasambhāra āpo dhātu*). That is right _____ That Water element in aggregation moves to various direction where the Earth element etc, etc, in aggregation exist; by the nature of liquid or by flowing.

If so, since all the Ultimate truth phenomena pass away at the same place where these arise, there is a question that “Is it possible of moving to other place?”. For that question it is explained that, “the Subcommentary teacher mentioned above words based on the quality of Water element in aggregation.(= *Sasambhāra āpo dhātu*)”.

Water element in natural aggregation (= *Sasambhāra āpo*) _____ that water is not completely broken down into Conventional designation (= *Pannatti*) like Compactness of Continuity (= *Santati ghana*) etc, etc . If so, there is another question. “Does the Water element with Ultimate true character (= *Lakkhana āpo*) not have the nature of flowing or seeping?”. To answer that question _____ the Great Subcommentary teacher again explains as _____ “*Lakkhanapavaseneva va*” etc, etc.

The Water-element which is Ultimate true element, integrated in a group of mater (= *Rūpa kalāpa*), not designated and broken down into Compactness of materiality (= *Rūpa ghana*) like Compactness of Continuity, Compactness of Grouping and Compactness of Function (= *Santati ghana*, *Samuha ghana* , *Kicca ghana*); is known as Water element with Ultimate Character (= *Lakkhana āpo*). That Water element of Ultimate Character is beneficial to remaining (3) Primary elements of the same unit group by ways of Co-nascence, Mutuality and Support Conditions. (= *Sahajāta*, *Aññamañña*, *Nissaya*). So, it is able to organise, cohere and prevent scattering of remaining (3) Primary elements in same group to form a whole with it's nature of fluidity and flowing . That is why it is stated as moving to various places. (*Mahāṭṭi-1-430.*)

PAGE-15

According to above statements in the Commentaries and sub commentaries, if you see the nature of flowing like natural or ordinary water, it means that you see the Water element in natural aggregation (= *Sasambhāra āpo*). It is in the field of Conventional designation (= *Paññatti*). If a *meditator* develops Concentration (= *Smādhi*) with meditation of Elements (= *Dhātu kammaṭṭhāna*) or develops Concentration up to the Fourth-Absorption Concentration (= *Catuttha jhanasmādhi*) or Neighbourhood Concentration (= *Upacāra smādhi*, *Appanā smādhi*) with one kind of meditation like Mindfulness of Breathing (= *Ānāpāna kammaṭṭhāna*), and when he further discerns (4) Primary elements (= *Mahābhūta*) so as to seize on the Materiality, then before seeing the various unit-groups of matter with Insight knowledge, he will have to start the development of concentration with the Earth element, Water element, Fire element and Air element in natural aggregations. (= *Sasambhāra pathavī dhātu*, *Sasambhāra āpo dhātu*, *Sasambhāra tejo dhātu*, *Sasambhāra vayo dhātu*). When the degree of Concentration reaches higher levels, and when the *meditator* becomes able to analyse the Groups of matters with Insight knowledge, he perceives the Earth element, Water element, Fire element and Air element with Ultimate characters (= *Lakkha dhātu*). Such kinds of the Earthelement with Ultimate character etc,etc, are somewhat like properly treated pure gold and liberated from the field of Conventional designation and broken down from Compactness of Materiality like Compactness of Continuity, Compactness of Grouping and Compaction of Function. These are the real elements and Ultimate elements. If a *meditator* is able to discern Ultimate real matters in a single unit group of matter systematically with Insight knowledge in terms of Character, Essence, Perception and Proximate cause, he has already broken down the Compactness of Continuity, Grouping and Function ; and escapes from dirty Conventional designation. So, if one is able discern the natural character of the Earth, Water, Fire and Air-elements in a single unit group of matter with analytical Insight knowledge, he will see the Ultimate Character of Earth, Water, Fire and Air-elements.

That Water element with Ultimate Character (= *Lakkhana āpo*) does not flow like ordinary natural water. It means that it flows, moistens and seeps into the remaining (3) Primary elements of the same group with it's nature of fluidity. That nature can organise , cohere and prevent scattering of the (3) Primary elements arising together in the same group of matter. So, an explanation like _____ the Water element has the character of organizing the units of matter in the same group (= *Yam abandhana lakkhanam*, *ayam āpodhātu*) (*Visuddhi*- 1- 346), is given again. It is to be noted that, the flowing, seeping or trickling of the natural water is also due to more and more aggregation of the groups of matter where the natural power of the Water element is in excess and repeated occurrence of the preceeding and following groups of matter in succession.

This Water element has the function (Essence) of multiplication of the materialities arising together. Consider that, the increasing number of trees in forest, and the growth of living beings due to multiplication of the materialities are caused by this function of the Water element. The trees are developed by the Fire element. That Fire element can produce new generations of successive Temperature produced nutritive- essence- octad group (= *Utuja- ojaṭṭhamaka kalāpa*), only when it gets supports from the Earth, Water, and Air-elements which are beneficial factors by way of Co-nascence condition (= *Sahajata paccaya*). The trees grow by using the Earth essence and drinking the Water- element fluid essence. Similarly, the multiplication of Nutrient produced materialities in continuum of the living beings taking up the nutrition, can occur only when it gets support from beneficial factor of the Water element- fluid essence.

PAGE-16

The Water element is perceived by a *meditator* who is discerning it with Insight knowledge as a phenomenon which organises and prevents scattering of various units of matter arising together in the same group, somewhat like the natural water prevents scattering and produce cohesion of the flour for making bread. This is the Perception (= *Paccupaṭṭhama*). To this Collective and Concise Perception (= *Sangaha paccupaṭṭhama*) it is mentioned as: _____”the natural character of organizing and grouping the matters arising together in the same group = *Abandhana lakkhana* “_____in *Visuddhi- magga* Commentary which is described above.

Pāli Quotation (Vs-1-365)

The Water element; which gets support from the Earth element, looked after by the Fire element with heat and cold and propped up by the Air element; is beneficial to remaining (3) Primary elements by the process of organisation. It prevents scattering of these Earth, Fire and Air elements by Cohesion. To this function, it is stated that the Water element gives beneficial effect to the remaining (3) elements of same group by way of Co-nascence, Mutuality and Support condition.

Again, the Water element can perform organisation only when there are (3) Primary elements to be organised in the same group of matters. The nature of organisation is possible only when there are phenomena to be organised. So, remaining (3) Elements of same group again support the Water element to stand. The Earth element gives foundation. The Fire element makes mature with heat and cold. It prevents decaying. The Air element pushes and props up. That's why, Water element can stand, and able to perform it's function for multiplication of materialities. And on this ground, Water element is the nearest cause or Proximate cause of the remaining (3) Primary elements in the same group. Like in case of Earth element; seize on the Water element after analysing the group of matter which the *meditator* wants to discern and choose the Water element to be discerned from these Ultimate real materialities.

3. Fire Element (*Tejo dhātu*)

1. *Tejodhātu unhatta lakkhana,*
 2. *Paripacanarasa,*
 3. *Maddavanuppādana paccupaṭṭhama,*
- Avasesa dhātuttaya padaṭṭhāna.* (Abhi-A-1-360. Vs-1-362, Vs-2-73)

3. Fire Element

(*Tejo dhātu*)

- | | |
|---|---------------------|
| 1. The nature of heat (= the nature of Cold) | Character, |
| 2. Gives maturity to other materialities of same group | (Function) Essence, |
| 3. The nature which gives softness to other materialities of same group accordingly | Perception, |
| 4. Remaining (3) Primary elements of same group | Proximate cause. |

PAGE-17

Pāli Quotatiion (Vs-1-345)
(Mahāṅgī-1-430)

Tejeti paripācetiti tejo _____ Like various substances are cooked, heated and burnt by natural fire, the gaseous element which cooks, heats up and burns the materialities of the same group is known as Fire element.

Tejodhātu paṭṭhavipatitthitā āpo sangahitā vāyovittthambhitā tīñṇam mahābhutānam paripācanam hutvā paccayo hoti. (Vs-1-365.)

That Fire element can give maturity to remaining (3) Primary elements only when it gets support (like inflammable material) on the Earth element; moistened and organised (like fuel) by the Water element and pushed (like blowing wind) by the Air element. So, the remaining (3) Primary elements of the same group are the Proximate cause (= *Padaṭṭhāna*) of the Fire element.

Pāli Quotation (Vs-1-361)

The Fire element, which has character of heat, exists as heat element and has ability to digest the swallowed foods, drunk fluids and will cook, warm and make alert all materialities (= All materialities exist in same group with every Fire elements) only when it gets support from the Earth element, organised by the Water element, pushed and propped up by Air-element. It also give color and brightness to all these materialities. The special effect is that, these materialities = Body groups (= *Rūpa kāya*) which are cooked, warmed and made alert by the Fire element having qualities described above; never grossly decompose. (Vs-1-361.)

That Fire element is perceived in the knowledge of a medifactor who is discerning it, as a nature which soften the materialities in the same group, like the natural fire can soften the sealing wax and candle wax. That is the Taken up Perception (= *Upaṭṭhanakara paccupaṭṭhana*). Due to this power of the Fire element, those with good body temperature have delicate skin and good complexion.

The natural temperature in the body is known as Normal body heat (= *Usmatejo*) which makes the body warm in the winter and cold in the summer. Apart from that Normal body heat there are (4) types of Fire element like Alternate-day heat (= Temperature) = the heat that makes the body hotter (= *Santappana tejo*) etc, etc.

PAGE-18

When the natural temperature or Normal body heat (= *Usama tejo*) becomes abnormal, the temperature is increased and febrile episode occurs every one or two alternate day. That is the Alternate day heat = Heat that makes the body hotter (= *Santappana tejo*). If the degree of heat is more than this Alternate-day heat, there will be very hot Fire element known as Excessive Heat of fever (= *Dāha tejo*), when the sufferer is groaning from unbearable rising temperature so much so that he or she may ask for application of butter (100) times cooked and cooled in cold water, or Sandalwood paste all over the body and fanning with hand-fan to make a current of air blow over the body. It burns like fire. The Fire element which makes a person's hair white, teeth lost, vision blurred, skin wrinkled and age older _____ is known as Heat that causes maturing and ageing process (= *Ziraṇa tejo*).

All these (3) types of Fire elements known as; Alternate-day heat, Excessive heat, and Heat that causes ageing process are not always present in the body. The Alternate-day heat

and Excessive heat are the Fire elements occurring at the onset of fever, when the normal body heat is lost and degree of temperature arises. For the Heat for ageing process, it is explained as follow: _____

Pāli Quotation (Vs-1-435)
(*Mahāṭṭ-1-430*)

This Heat for ageing process (= *Ziraṇa tejo*) produces ageing and deterioration of the materialities of Body groups (= *Rūpa kāya*). The various faculties become defective like, the vision is blurred, the hearing is deafened. The body is weakened, the skin is wrinkled and the hairs are whitened. (Vs-1-345)

The commentary teacher explained the above description so as to know that the occurrence of ageing process in the Body groups (= *Rūpa kāya*) produced by the Fire element should be known by means of the Obvious ageing phenomena (= *Pākata jarā*). (*Mahāṭṭ-1-430*.)

So, the Great Subcommentary teacher explained that the Heat for ageing process (= *Ziraṇa tejo*) is meant for the Obvious ageing phenomena (= *Pākata jarā*). This Fire element is nothing but, abnormality in the natural body heat existing in the material groups of this physical body, when a person gets a disease or becomes older. But, it is also to be noted that the ageing process is always occurring.

Digestive Fire Element (*Pācaka tejo*)

Pāli Quotation (Vs-1-345)

Pāli Quotation (Mahāṭṭ-1-430)

PAGE-19

All the foods and fluids, eaten, drunk, chewed and licked are digested by the power of Digestive Fire element, also known as Action produced Digestive faculty = Internal gastric heat (= *Gahani*) which equally digests all these nutritions. If all these nutritions taken are not fully digested by the above Digestive Fire element, these will be partially digested by Internal gastric heat. These digested nutriments when mature and purified, will become: _____

1. Essence (= *Rasa*) = Nutritive fluid essence
2. If this nutritive fluid essence becomes mature, it will change into Blood (= *Rudhira*)
3. If this blood becomes mature, it will change into Flesh (= *Mamsa*)
4. If this flesh becomes mature, it will change into Fat (= *Meda*)
5. If this fat becomes mature, it will change into Sinew, Tendon (= *Nharu*)
6. If this sinews becomes mature, it will change into Bone (= *Atthi*)
7. If this bone becomes mature, it will change into Bone marrow (= *Atthiminja*)
8. If this bone marrow becomes mature, it will change into Semen (= *Sukka*)

So, sequential changes of matters occurs in this way. This is the statement of Conventional designated world. (In, Ultimate truth sense, this is sequential changes of particles in the groups of matter. It is the repeated and sequential occurrence of the preceeding and following groups of matter.)

The taken up nutriment will change into Essence fluid only when it gets support of digestion by the Digestive Fire element of gastric heat, known as *gahaṇī* (Internal gastric heat = Digestive faculty). That Essence fluid when supported by the Digestive gastric heat, it becomes mature. Based on this mature Essence fluid, the blood arises. So, try to note this sequential changes until the development of semen (= *Sukka*).

That Digestive Fire element always occurs in the body. It exists in the neighbourhood of the stomach. It is the Fire element, included in the Life-nonad group of materiality (= *Jīvitānavaka kalāpa*) in which Life-faculty (= *Jīvitā*) is the ninth factor. These are the Action produced materialities (= *Kammaja rūpa*) formed by the Action of past life. According to the quality of that Action, this gastric heat is active and digest properly in some person. In some, it is defective and can not digest the foods properly. In some, it is over-active. The support by Digestive Fire element will be better, if some manipulation of the consciousness, Temperature and the Nutriment(= *Citta, Utu, Āhāra*) near the Digestive Fire element in over-active or defective person are made by expert medical persons who know the Consciousness, Temperature and Nutriment produced Fire elements. In manipulation of mind, if highly noble consciousness (= *Adhicitta*) like consciousness of Tranquility meditation and Insight meditation are occurring successively in the Mind continuum, these consciousness are Wholesome Impulsion consciousness. (in Ordinary and Noble learner = *Puthujjana, sekkha*). These are the Wholesome actions of the present life. Weak and faint Wholesome actions of the Past time will get chance to give effects when these are supported by strong Present Wholesome action.

PAGE-20

If so, the Digestive Fire element = Digestive gastric heat will also have strength if it is supported by the Wholesome action. But it is to be noted that the Past action is not changeable. Only by performing numerous strong Wholesome actions in Present time, one can give pathway to give effect for Past actions which are still not gaining chance to give their effects. When getting support by Present action, the Actions which do not have chance to give effects will attain chance to give effect. When, Past action gets chance to give it effect, the Digestive fire element which is included in the Action produced materialities (= *Kammaja rūpa*), formed by Past action will become strong. That Digestive Fire element or Digestive gastric heat is concerned only with Past action.

When, the Mind is manipulated with Wholesome deeds, especially with Tranquility and Insight meditation, there will be numerous occurrence of noble (= *Panīta*) consciousness produced materialities (= *Cittaja rūpa*). Similarly, living in suitable weather and having appropriate medicines and diet, will give support for occurrence of better Temperature and Nutriment produced materialities. Only when noble consciousness, and better Temperature, Nutriment produced materialities give their support, the Action produced Fire element or Digestive Gastric fire element will become strong.

When discerning the Character, Essence etc, etc of this Fire element; select and discern the Fire element after analysing the various Groups of materiality you want to discern among the groups of matter in (6) Doors, (42) Body parts and consciousness Temperature and Nutriment produced groups of matter included in the secondary corporeality. As described in the Earth element, it is better to discern completely each and every unit of matters included in each and every group of matter (= *Rūpa kalāpa*).

4. Air Element (*Vāyo dhātu*)

1. *Vāyodhātu viṭṭhambhana lakkhanā,*
 2. *Samudūraṇa rasā,*
 3. *Abhinīhāra paccupaṭṭhānā,*
- Avasesadhātuttaya padaṭṭhānā. (Abhi-A-1-368. Vs-1-362, Vs-2-73.)*

1. The nature of support = stiffness = Tension Character,
2. The nature of pushing = produces motion (Function) Essence,
3. 3. The phenomenon which carries the matters arising in same group of units from here to there Perception,
4. 4. The remaining (3) Primary elements in the same group Proximate cause.

Pāli Quotation (Vs1-345)
(Vs-1-360)

PAGE-21

Supporting Character (= *Viṭṭhambhana lakkhanā*) _____ The nature of supporting, propping up the materialities arising together so as to prevent looseness and to give stiffness is the Character of the Air element. When the Air-element is excessive, there will be stiffness in muscles and tendons of the body and there will be increased tension in the balloon or hot air balloon. By taking these as example, it is easy to understand the nature of Air element, propping up and supporting the material units in the same group of matter.

Function of Pushing (= *Samudirana rasa*) _____ The function to produce motion of the materialities in the same group means the nature of pushing these. Only when there is the pushing nature, there will be motion. Without pushing, there will be no motion. So, making motion is same as pushing. That is why Venerable Pyay sayadaw, translated in his *Visuddhi magga nissaya* (second volume- Page 521.) only as “Function of Pushing”= *Samudirana rasa*.

Perception as Arising at newer places (= *Abhinīhāra paccupaṭṭhāna*) _____ By preventing the occurrence of 4 Conditions produced materialities arising together, at the same original site and causing occurrence of these at various newer places _____ that phenomenon makes movement of various Primary elements arising together to other places. That is why this phenomenon is known as Air (= *Vāyo*) _____ according to *Pāli* phrase described in (*Visuddhi*-1-360). So, leaving the original site and slow gradual arising at newer places of the Groups of matter is due to the special power of Air element included in the newly arising Groups of matter. There are some explanations for Materiality of Intimation (= *Viññatti rūpa*) written in *Attasalini Commentary* in Section of Materiality Meditation. Only the Impulsion consciousness of Mind-door Thought process can produce Materiality of Bodily Postures (= *Iriyā paṭha rūpa*) = Materiality of Intimation (= *Viññatti rūpa*). It is also to be noted that among the (7) Impulsion consciousness of Mind-door Thought process, the Air elements of first (6) Impulsion consciousness ie:-- starting from first to sixth Impulsion consciousness can not produce arising of materialities at newer places in the periods their moments.

Only the Fire elements produced by seventh Impulsion consciousness can make arising of materialities at newer places.

Motion or movement means arising of groups of materialities from original site to another site = New arising of materialities at newer places. The phenomenon of changeable arising is due to the special power of the Fire element included in the following groups of matters produced by the seventh Impulsion consciousness which gets special power and

supported by the Fire element included in the previous groups of matters produced by preceeding (6) Impulsion consciousness. The Air element included in the consciousness produced groups of matter formed by Seventh Impulsion consciousness _____when supported by the Air element included in the consciousness produced groups of matters formed by preceeding (6) impulsion consciousness:-- will give following effects on the Materialities = Body-group (= *Rūpa kāya*) which are arising together with it: _____

PAGE-22

1. Having tensile strength and tension,
2. Gaining supportive nature,
3. Various motions,
4. Moving forwards,
5. Moving backwards,
6. Looking ahead,
7. Looking sideways,
8. Flexion, and
9. Extension.

Based on these abilities of Air element produced by that seventh Impulsion consciousness, the nature of going and returning arise. Going to somewhere and, returning from somewhere become possible. So, one will able to say “I arrive a place 13 miles away, 130 miles away, or I have walked for 13 miles or 130 miles etc, etc.”. (*Abhi-A-1-124.*)

So, a *meditator* perceives the power of that Air element in his Insight knowledge, as a nature which takes the matters arising in same group with it from here to there (= *Abhinihāra paccupaṭṭhāna*). If the Ultimate true Air element is discerned with Insight Knowledge after analysing the groups of matters, the above nature will be obviously seen in the Knowledge of a *meditator*. But, it is to be noted that, the Ultimate truth phenomena never change in the place of origin. So, the Air element is not really carrying the materialities arising together from one place to another. Actually, it is the nature of arising of new materialities in various never places due to the power of the above described Air element.

Proximate cause _____

Pāli Quotation (Vs-1-361)

The Air element, moving along the various body parts large or small; having character of Pushing or Propping up;--when gets foundation on the Earth elements, cohered and organised by Water element and taken care by gaseous nature of Fire element, will give support and strength to all materialities or this Body-group (= *Rūpa kāya*). Due to that support and strength given by Air element, this physical body is able to stand upright, not falling to the ground. Various body postures like walking, standing, sitting and lying are also maintained by the Air element. The phenomenon which maintains this Body = Body-groups = Corporealities in various above postures, is the Supporting Character (= *Vitthambhana lakkhana*) of the Air element.

PAGE-23

When consciousness produced Air element _____ which has the Pushing Character (= *Samudirana*) included in the consciousness produced groups of matters, formed by seventh Impulsion consciousness which in turn gains support from consciousness produced

Air element included in consciousness produced groups of matter formed by preceeding six Impulsion consciousness of Mind-door _____give support to Corporealities=Body groups and if it gives effects of new genesis of all (4) Conditions produced materialities (= *Catusamutthanika*) at newer places apart from the original site of occurrence; there will be obvious Materiality of Intimation (= *Viññatti rūpa*) in various bodily postures and movement (= *Iriyā paṭha*) like walking, standing, sitting and lying down. The Air element which has Character of pushing (= having Function of pushing) included in the consciousness produced groups of matter arising repeatedly in newer sites, produces Materiality of Intimation like walking, standing, sitting and lying. The consciousness produced Air element which has Character of pushing, forms Materiality of Intimation that again causes flexion, extension, and movements of limbs. The ability to perform this function by the Air element depends on the foundation provided by the Earth element, organisation provided by the Water element and taking care by the gaseous Fire element. So, the Proximate cause of the Air element is the remaining (3) Primary elements of the same group.

Note : _____ - In above Section of Perception, although the consciousness produced Air element formed by seventh Impulsion consciousness of Mind door Thought process is mainly described; consider that the support from consciousness produced Air elements formed by preceeding Impulsion consciousness are also essential. Note that, so many seventh Impulsion consciousness can arise in very very short period, the duration of which is not longer than a twinkling of eye, a flash of lightning or a snap of fingers; and note also that there are so many consciousness produced groups of matters continuously arising which are formed by above described seventh Impulsion consciousness. In this case, it is not essential to know which consciousness produced Air element formed by seventh Impulsion consciousness can carries the materialities arising together from here to there. The main thing is just to perceive in the Insight Knowledge that consciousness produced Air element carries the materialities arising together from here to there.

Again, it is questionalbe that the consciousness produced Air element alone can carry the materialities arising together from here to there. Do other elements like Action, Temperature and Nutriment produced Air elements not carry the materialities arising together from here to there ? Does consciousness produced Air element alone has Perception of Arising at newer places (= *Abhinihāra paccupaṭṭhana*) ? Do other elements like Action, Temperature and Nutriment produced Air elements not have Perception of Arising at new places ?. The answer is:- “Yes, the other Air elements also have this nature”.

In carrying of materialities arising together from here to there,-- in other words, making repeated continuous arising of materialities in new places; the consciousness produced Air element takes the main role. So, the explanation is meant for decisive factor.

PAGE-24

Cittasamutṭhā niki pana kāye calante tisamutṭhāniko calati na calatīti. So pi tatheva calati, tamgatiko tadanuvattakova hoti. (Abhi-ṭṭha-1-126.)

Again, there is a question whether there is movement or shifting of (3) Conditions produced materialities (= *Tisamutthanika rūpa*), like Action, Temperature and Nutriment produced materialities from here to there, like consciousness produced materialities which moves from here to there. Three (3) Conditions produced materialities formed by Action, Temperature and Nutriment also move like consciousness produced materialities. These are similar in nature to consciousness produced materialities. These follow the way of consciousness produced materialities.

For example, when dry leaves, dry branches of trees and dry grasses drop in a flowing river, these matters follow along the current of water in the river. If the river stops flowing,

these stop flowing and if the river continues to flow, these also flow again. Likewise, three Conditions produced materialities follow the nature of consciousness produced materialities. (*Abhi-ttha*-1-126.)

So, it is to be noted that, not only the consciousness produced Air element has the nature of carrying the materialities arising together from here to there, but other Action, Temperature and Nutriment produced Air elements also have that nature (ie:--Perception as Arising at new places = *Abhinihāra paccupaṭṭhana*). (In this instance, note that the Air element carries the materialities arising together from place to place means making the materialities arising at newer places. For wider explanations, refer to Meditation of Materiality.)

5. Eye Transparent Element

1. (a) *Rūpabhigataraha bhutappasada lakkhanam*,
(b) *Datthu kamatanidana kamma samutthana bhutappasada lakkhanam va cakkhu*.
2. *Rupesu avinchana rasam*,
3. *Cakkhu vinñāṇassa adharabhava paccupaṭṭhanam*,
4. *Datthu kamatanidana kammajabhuta padaṭṭhānam* (Abhi-A-1-349. Vs-2-74)

1. (a) The nature which deserves impingement, (striking) to Sense object of Sight, the nature which clears up the Primary elements Character,
(b) The nature which cleans up the Primary elements produced by Action, based on craving of Visual object (= *Rūpa taṇhā*) and having desire to see Sense object of Sight Character,
2. Taking the persons or Thought process to Visual objects (towards the Sense object of sight) (Function) Essence,

PAGE-25

3. The nature acting as Physial Base for Eye-consciousness Perception,
4. The Primary elements of same group of matters (on which the Eye-transparent element depends), produced by Action, and based on Craving of Visual object, having desire to see Sense object of sight Proximate cause.

Discern the Ultimate true nature of (10) types of materialities included in the Eye-decad group of matter(= *Cakkhu dasaka kalāpa*) at the Eye-Door(= *Cakkhu dvāra*). Among these materialities, select the Eye transparent element and discern it. In the eye, there are (2) kinds of Transparent elements known as Eye transparent element and Body transparent element. Eye-transparent element is included in the Eye-decad group and Body-transparent element is included in the Body decad group. Between these two groups, the nature which clears up the (4) Primary elements included in the Eye decad group which deserves impingement and striking to Sense object of sight is the own natural Character (= *Sabhāva lakkhana*) of the Eye transparent element. Whether really striking (= impinging) or not to the Sense of sight; the nature which deserves impingement is the Character of the Eye transparent element.

Impingement = Striking
(*Abhighāta*)

Pāli Quotation (Mahāṭṭī-1-89)

Impingement or Striking does not necessarily mean actual hitting between the Sense object of sight and Ear-transparent element = Ear door, like the two sticks are striking each other. It means that the Sense of sight and the Door appear to strike each other. Only the nature of face to face existence of Sense object and Eye door or existence in suitable site is known as *Abhighata* = Impingement = Striking. To that nature; the term Character of Impingement to Sense object of sight is given. To this nature of Impingement, two kinds are given as: _____

1. Striking of Eye transparent element to Sense object of sight,
2. Striking of Sense object of sight to Eye transparent element _____

Both of these two types are known as Natural Character (= *Sabhāva lakkhana*). (Refer to *Abhi-A-1-157*). Here; the explanation to Character of Eye transparent element is according to the meaning of first type of classification.

Second method of explanation_____ *Daṭṭhukāmatanidānakamma samuṭṭhāna bhūtapasada lakkhanaṃ vā cakkhu*. = In another explanation of the Character of Eye-transparent element: _____ it is stated that it has the Character of clearing up the (4) Primary elements of same group, and the Eye transparent element which is produced by Action based on Craving of Visual object (= *Rūpa taṇhā*) and having desire to see Sense object of Sight. Regarding to this explanation, the Subcommentary teachers explained the essence as follow: _____

Pāli Quotation (Mūlaṭṭī-1-147, Mahāṭṭī-2-89)**PAGE-26**

Desire to feel various living and non-living pleasurable worldly enjoyments (= *Kāma vatthu*) known as Sensuous Cravings (= *Kāma taṇhā*); basic cause of Action which in turn produce physical body (= *Attabhāva*) with complete or incomplete Bases (= *āyatana*)-and-desire to perceive Sense of vision known as Craving of visual object (= *Rūpa taṇhā*)-(Craving of Auditory object, Olfactory object, Gustatory object, Tactile object, Mental object = *Sadda, Gandha, Rusa, Phothhabba, Dhamma*): _____ both of these desires lead to get existences = lives (= *Bhava*) with various Sense-Bases (= *āyatana*) or Sense-Organs like Visual base, Auditory base, Olfactory base, Gustatory base, Tactile base, and Mind base (= consciousness)-(*Cakkhāyatana, Sotāyatana, Ghanāyatana, Jīvāyatana, Kāyāyatana, Manāyatana*). So, the words striking or Impingement (= *Abhighata*) are used to express the desire to see sense object of sight. That is why Commentary teacher gave again, second explanation for own natural character of the Eye-transparent element. Note in similar way for other Transparent elements like Ear-transparent element etc, etc. (*Mūlaṭṭī-1-147. Mahāṭṭī-2-89.*)

Performing Wholesome Action of Conditioning forces (= *Kusala Saṅkhāra kamma*) with desire to see or hear various senses _____ ie:- desire to see Sense-of sight, or to hear Sense of sound _____ and performing Action of Conditioning forces (= *Saṅkhāra kamma*) with desire to attain an existence (= *Bhava*) like Happy Course of Sensuous existence (= *Kāma sugati bhava*) with complete Bases (= *āyatana*) (eg:- Visual object, Visual organs = *Rūparammana, Cakkha yatana*) or Brahma-existence (= *Brahma bhava*) with incomplete Bases; -- whatever it may be all these performances and desires are appropriate to accept as “Desire to see visual object or Desire to hear Auditory object etc”. The volitional action performed with desire to see Sense of sight or to attain an existence with complete or incomplete Bases, whatever it may be; the Action performed with such desires is based on Sensual Craving (= *Kāma taṇhā*) = Craving for Sensual existence and Craving for Fine-

material existence (= *Rūpa taṇhā*). The nature which clears the (4) Primary elements on which the Eye-decad group of matters (Ear-decad, Nose decad, Tongue decad and Body decad groups of matter etc etc) _____ produced by that Volitional action (= *Kamma*) depends; should have the name Eye transparent element (= *Cakkhu pasada*). (Understand in similar way how other Transparent elements like Ear-transparent element etc, etc-get their names).

Desire to see (= *Datthukāmatā*) _____ Craving to see Sense object of sight is known as Craving for visible objects (= *Rūpa taṇhā*). Craving to hear Sense object of sound is known as Craving for audible objects (= *Sadda taṇhā*). Try to understand in similar way for other cravings like Craving for Olfactory, Gustatory, Tactile and Mental objects (= *Gandha, Rasa, Photthabba, Dhamma taṇhā*). These (6) kinds of Desires or Cravings like _____ Craving for visible object etc, etc; when occur after the Action which can produce the Physical body with Corporeality and Mentality; their effects will be obvious. If these Craving do not occur after performing Action, which produces the physical body with Corporeality and Mentality; their effects will exist as dormant elements unless these are totally abolished by the appropriate Noble Path (= *Ariya magga*). It means that, since the Vicious Circle of Defilements (= *Kilesa vatta*) which is known as Craving (= *Taṇhā*) can produce Vicious Circle of Actional process and Conditioning forces (= *Kamma vatta*), these Defilements (= *Kilesa*) like Craving for visible object etc naturally occur before performing respective Action. Before performing various Actions i.e.,: Vicious circle of Actional process and Conditioning forces (= *Kamma vatta*); if Vicious circle of Defilements (= *Kilesa vatta*) like Craving for visible object (= *Rūpa taṇhā*) do not occur; and if these Defilements are not yet abolished by Noble Path -- this non abolished dormant elements can produce various Vicious circle of Actional process and Conditioning forces (= *Kamma vatta*). That Vicious circle of Actional process and Conditioning forces again is enough to produce in turn various Vicious circles of Defilements (= *Kilesa vatta*) like various Existences with complete Bases and various Existence with incomplete Bases. (Refer to *Mahāṭṭ-2-89*.)

PAGE-27

If various Cravings like Craving for Sense object of sight evidently arise in various Body and Mind continuum after performing various Actions, these are known as **Obvious cause for Vicious circle of Defilements = *Uppannata***. If these Cravings do not evidently arise with Arising phase, standing phase and Passing away phase in various Body and Mind continuum after performing various Actions and since these are not abolished by Noble Paths; these remain as Dorment elements (= *Anusaya*). This nature of existence as Dorment element is known as **Obvious cause for existence as Dorment phenomena = *Atthita***. Both of these Causes ie:--Cause for Vicious circle of Defilements and Cause of existence as Dorment nature: _____ can make the Action (= Vicious circle of Actional process and Conditioning forces) to become the cause of it's effect. That is why all the Cravings like Craving for visible objects etc, etc:-are accepted as obvious phenomena. (*Mahāṭṭ-2-89*.)

So, if an Action is performed based on desire of Sense object of sight (Craving for visible object) or if the Action is performed at the time when the desire of Sense of sight (Craving for visible object does not arise evidently in 3 phases of Arising, Standing and Passing away; and these exist as Dorment nature since these are not abolished by appropriate Noble Path:-whatever it may be; the Action is said to be the one which is based on Craving for Visible object. That is why the phenomenon produced by that Action making the (4) Primary elements clear is suitable to get the name as the Eye-transparent element.

Sometimes, when *meditators* are searching for Past causes, like the Action that produce respective effects or effect of Body and mind, they could not find the Ignorance,

Craving and Obsession (= *Abijja, Taṇhā, Upādana*) arising evidently in (3) phases. (ie:- arising, Standing and Passing away) of that Action. But, they do obviously recognise by the knowledge of the cause and effect relation; that the Action is giving it's effect. That Vicious circle of Defilements , the basic cause of Vicious circle of Action and Conditioning forces, are the main causes for existence as Dorment phenomena (= *Atthita*) ie:- the obvious existence of Ignorance, Craving and Obsession, all remains as Dorment elements, since these are not totally abolished by the Noble Paths.

Pāli Quotation (A-1-295-cetanā sutta)

According to this Discourse on Volition (= *Cetanā suttana*), although respective Viscious cycle of Defilements do not arise obviously before the performance of the Action, but exist as dorment nature; the Action done by that person with dorment element is the cause to produce the effect of rebirth in next-life i.e.,:-it is the cause of Actional consciousness (= *Kamma vinñāṇa*) (Refer to the Section of Dependent Origination for fuller account.)

(Function) Rasa _____ - Rupesu puggalassa, vinñāṇassa va avinchana rasam. (Mūlaṭṭi-1-147. Mahāṭṭi-2-90).

The Eye-transparent element takes _____ the Adverting consciousness = the Adverting consciousness of (5) door = the consciousness of consideration in Eye-door thought-process (= *Avajjana, Panca-dvāravajjana, Cakkhudvāravūthi*) -- the consciousness of Follower-mind door thought-process (= *Tadanuvattaka manodvāra vūthi*) and Pure mind door thought-process (= *Suddhika manodvāra vūthi*) which further takes up the Sense of sight _____ towards the Sense object of Sight (= *Rūparammana*). When the consciousness is taken; the consciousness in turn takes the being.

PAGE-28

So, it is metaphorically expressed that the living being in whom Eye transparent element exists is taken towards the Sense Object of Sight. Such kind of expression is known as “*Thanyupacara*” in *Pāli* text. Due to attraction of the Eye transparent element, the living beings of Sensuous sphere look at the Sense object of sight. People who can't control their mind may look at sense of sight all of a sudden for a moment, even though they restrain from seeing that scene. Hearing of Sense of sound due to attraction of Ear transparent element, breathing in the Sense of smell even after knowing the bad odour of it, tasting the substances even after knowing the bad taste of it, abusing the narcotics and intoxicants even after knowing bad effects of these and feeling the various senses of touch even after knowing the troublesome nature of these etc, etc, are examples of attraction by various Transparent elements, to be considered in this world.

Question _____ Why various Transparent elements like Eye transparent element etc, are able to attract respective Thought processes towards various Sense objects ?

Answer _____ These Transparent elements are produced by the Action (ie:- Action produced materialities = *Kammajarūpa*) which is based on Ignorance, Craving and Obsession (= *Avijjā, Taṇhā, Upādana*). That Cravings, as described above are nothing but desires to feel (5) types of Sensuous objects (= *Kāma guna*) ie:- Sensuous Craving (= *Kāma taṇhā*) to see, hear, breathe in, lick and touch . Since these are the effects produced by the Action which is performed aiming to feel various senses; the Transparent element (produced by Action based on Craving) are able to attract the beings with various Transparent elements

and their Thought processes towards the Sense-objects. If a person do not discern in time with Insight Knowledge , the Causes of these Ultimate materialities and Mental phenomena before or at the time of attraction like: _____

1. Visible phenomenon, seeing phenomenon,
2. Audible phenomenon, Touching phenomenon,
3. Tangible phenomenon, Touching phenomenon
4. Perceptible phenomenon, Perceiving phenomenon -- etc, etc, _____there will be further continuous arising of Sensuous cravings later. There will be new occurrence of Immoral and Moral actions (= *AbhiSaṅkhāra kamma*) based on these Sensuous cravings, all of these, having desire to feel Sense-objects and will produce new life or rebirth. Due to this Action, the Transparent elements (like Eye-transparent element etc, etc,) will occur again in the later new life. So, there will be Ceaseless cycles of Dependent origination with rebirths (= *Paṭicca samuppāda samsāra cakka*) if Dormant defilement elements led by Ignorance, Craving and Obsession are not abrogated by the Insight Knowledge, Knowledge of the Path and Knowledge of the Fruition (= *Vipassanā ñāṇa, Magga ñāṇa, Phala ñāṇa*) in time.

Perception_____ Cakkhuviññāṇamdīnam yaṭhāraham vatthudvārabhāvam sādhayamānam tiṭṭhati. (Vs-2-76.)

Cakkhuviññāṇassa vatthubhāvam nissayabhāvato āvajjana sampaticchanādīnam tadārammaṇāvasānam dvārabhāvam samavaraṭṭhānato (samavasaraḍānato). (Mahāṭṭ-2-94.)

The Eye-transparent element is the Base-matter (= *Vatthu rūpa*) on which the Eye-consciousness (= *Cakkhuviññāṇa*) depends. So, the Eye transparent element is beneficial to the Eye consciousness with power of Support condition (= *Nissaya paccaya*). Since the Eye consciousness can not arise without Eye transparent element (or if there is no Base matter of Eye transparent element) (or if a person is blind); the presence of Eye transparent element is an essential condition for arising of the Eye consciousness. To such kind of nature, the term Support condition (= *Nissaya paccaya*) is given. And to this phenomenon, the *uddha* mentions as: _____ “Eye transparent element is beneficial to Eye consciousness as a Support condition”.

PAGE-29

Again, if there is no Eye-transparent, not only the Eye consciousness, but other consciousness of Eye door Thought process like Eye-door adverting consciousness, receiving consciousness, Investigating consciousness, Determining consciousness, Impulsion consciousness and Registering consciousness, also can not arise. Only when the Sense-object of sight strikes both the Eye transparent element and the Subconsciousness (= *Cakkhu pasada, Bavanga citta*) simultaneously, all consciousness of Eye door thought process can arise. If there is no Eye-transparent element , Eye-consciousness and associated phenomena do not arise. There will be no Eye-Impression = Eye-contact (= *Cakkhu samphassa*). Only when Eye-Impression gives benefit or support, all other consciousness of Eye door like receiving consciousness etc, etc, can arise. That is why, for the development of Eye-door thought processes, Eye transparent element also give beneficial support. To such kind of support it is stated that, Eye transparent element affects arising of consciousness of Eye door thought process. (= *Samava saraṭṭhana*); or Eye-transparent element give good effects to consciousness of Eye door thought process (= *Samavasaraḍana*). Since, Eye transparent element affects arising of consciousness of Eye-door thought process or give effects to consciousness of Eye door thought process; that Eye transparent element will be perceived in the Knowledge of a *meditator* as: _____

- (1) _____ a Base, on which Eye consciousness depends, and
- (2) _____ a Door (= *dvāra*), where Eye consciousness and its associated consciousness of Eye door thought process arise.

On which Eye transparent element, does the Eye consciousness depend?

In earlier Section on Meditation of Materiality, explanations for Eye-organ and Eye transparent element were given in terms of Ultimate truth sense. Now, some more explanations will be given again.

*Sambhariyati etehiti sambhara*_____ Various structural parts of (4) Conditions produced Materiality continuum formed by Action, consciousness, Temperature and Nutriment arising in the Eye, all having power of keeping and supporting the Eye transparent element are known as structural organ (= *Sambhara*).

Saha sambharehiti sasambhāram, tadeva cakkhuti sasambhāra cakkhu _____ The nature which has the power of arising together-- with structural parts of Materiality continuum supporting the Eye transparent element and produced by (4) conditions is known as Materiality arising together with structural organ. In Ultimate truth sense, it is the collection of (54) types of materialities including the Eye-transparent element in the Eye-door.

In Conventional truth sense _____ a mass of flesh with cornea, sclera and brown eyelashes, looking like petals of blue lotus, is known as Eye (= *Cakkhu*).

The Materialities arising together with structural organ (= *Sasambhāra cakkhu*) are the support to Eye transparent element. The Eye transparent element arises together with that supportive element and situated at a place along the pathway with the centre of cornea

PAGE-30

surrounded by sclera of the Eye ball (ie:-Structural Eye), where the images of people at the face to face direction are mirrored. At that place, Eye transparent elements are dispersed in (7) layers of eye-coats, like the oil is soaked in the (7) layer of cotton pads, and as a prince, who is carried, bathed dressed and being fanned by (4) guardians; _____ these Eye-transparent elements are guarded by: _____

1. Earth element, taking the supportive function,
2. Water element, taking the organizing function,
3. Fire element, giving maturity and
4. Air element, taking the function of pushing and propping up.

By these (4) kinds of function, (4) Primary elements of same group (= *Kalāpa*) give beneficial effect to Eye transparent elements.

So, Eye-transparent element, is dispersed in an area about the size of a louse-head, supported by Temperature, consciousness and Nutriment produced materialities of different groups which are collectively known as Materialities arising together with structure Eye organ (= *Sasambhāra cakkhu*); [in other words _____ supported by consciousness, Temperature and Nutriment which can form separate groups of consciousness, Temperature and Nutriment produced Materialities arising with Eye-organ (*Mahāṭṭi*-2-93-94.)]; and guarded by Life-faculty materiality (= *Jīvita rūpa*) and associated other materiality like “Form, Scent, Taste and Nutritive essence “of the same group of matter. That Eye transparent element is acting as Base matter (= *Vatthu*) for the Eye consciousness and the Eye-Door (= *dvāra*) for the development of the Eye consciousness and associated other consciousness of Eye-door thought process. (*Vs*-2-75,76)

Pāli Quotation (Mahāṭṭi-2-94)

In the Commentary, it is mentioned that, the Eye transparent elements spread throughout the (7) layers of Eye-coat. According to this statement, it is to be noted that eye-transparent element is included not only in single group of matter, but also in so many groups of matter (= *Rūpa kalāpa*). [Here again it is to be noted that, the statements _____ “Since the Eye transparent element is spreading over (7) layers of Eye-coat, there are only (7) Eye-decad groups of matter” _____ are not in agreement with that of the Great Commentary.].

If, it is stated that Eye-consciousness depends on Eye-transparent element; it is also to be noted that there are two different dependable eye-organs. These Commentary and Subcommentary also mention that there are so many Eye-transparent elements spreading all over the (7) layers of Eye-coat and so any Eye-decad groups of matter (= *Cakkhu dasaka kalāpa*) situated in an area about the size of a louse-head.

PAGE-31

According to these statements _____

1. There are two different dependable Eye-organs,
2. There are so many Eye-decad groups of matters arising simultaneously in a single Mind-moment (= *Cittakkhana*) of each eye-organ _____

So, there are so many Eye transparent elements. So, many Eye transparents are arising simultaneously. Among these Eye transparent elements, one Transparent element only will perform as dependable base matter for Eye-consciousness. For this reason, one should ask on which dependable Eye-transparent element will Eye consciousness depend ? The answer is as follow: _____

Since there are two Eye-organs and, numerous Eye decad groups of matters in each Eye-organ; there are so many Eye transparent elements. And, again there is only one Adverting consciousness of (5) Sense-door (= *Panca dvāravajjana*) which considers the Sense object of sight arises in one Eye door thought-process, and only one Eye transparent element is functioning as Base matter for Eye-consciousness in single Mind-moment; all Eye transparent elements are considered as single unit. In other words, although there are so many Eye-transparent elements, these are similar in nature and denoted as single transparent unit in an ordinary way (= *Samanna niddesa naya*). But, explanation for a single Eye transparent element among others, functioning as Base-matter for Eye consciousness should be further considered.

Among the numerous Eye-transparent elements; one Eye-transparent is very clear and suitable to take up the striking Sense-object of sight. So, to that Eye transparent element, it is to be assumed as a support (= *Nissaya*) for the Eye consciousness. It is similar to the assumption, that only one Body-transparent element among so many, is acting as a support for Body consciousness and suitable to take up the sense of peculiar Object of touch. Since there are so many Body decad groups of matter in whole body, there are so many Body transparent elements. Although there are numerous Body transparent elements all over the body; Body-consciousness does not arise by depending on all these Body-transparent elements. Body-consciousness arises by depending on the Body-transparent element where striking of Touch -element (= *Photthabba dhātu*) like Earth, Fire, and Air elements are obvious. Note in similar way. (Mahāṭṭi-2-94.)

It is better to Carry Out Practical Test

You, noble *meditator* should carry out practical test on the explanations of the Great Subcommentary teacher. Practical investigation should be carried out. Some venerable teachers do not want to accept the concept of this Great Subcommentary teacher. They accept that Eye-consciousness depends on so many Eye-transparent elements. But, some clever noble *meditator* still accept the concept of the Great-Subcommentary teacher.

PAGE-32

Proximate cause _____ The proximate cause of this Eye transparent element produced by Action (= *Kamma*) based on Craving for visible objects (= *Rūpa taṇhā*) with desire to see Sense object of sight (= *Rūparammana*), is the (4) Primary great elements (= *Mahābhuta dhātu*) of same group of matters on which it depends. In the Eye, there are so many Eye-decad groups of matters. The Eye transparent element depends only on the (4) Primary elements of same group (= *Kalāpa*). It does not depend on (4) Primary elements in other groups of matter; because the Eye-transparent elements mean, the matters which are able to clear up only the (4) Primary elements on which these depend.

The Character noted in (b) of this Eye transparent element and Method of meditation of this Proximate cause are the methods which can be undertaken only by noble person who has already attained the Knowledge of Seizing on the Cause and Effect (= *Paccaya pariggaha ñāṇa*); described in the Section of Dependent Origination (= *Paticca samuppāda*). If a person performed an Action in the past life so as to be reborn in this human world and if that Action was based on the Sensuous Craving (= *Kāma taṇhā*) with desire to attain Five aggregates of Human existence, and if that person attain the Five aggregates of Human Existence due to this Action based on Sensuous Craving; the Sense object of sight is also included in that Five Aggregates (= *Khandha*). So, in the desire of Human life and human body; the desire to attain Sense-object of sight is also included. In this case, some teachers accept that the desire to attain Sense-object of sight is a separate nature. So, you noble person may or may not have separate desire to see the Sense object of sight in your Body and Mind Continuum of Past life, at the time of performing the Conditioning Forces of Moral Volitional Actions (= *AbhiSaṅkhāra kusala kamma*) based on Sensuous Craving to attain human-life. But desire to have Sensuous Craving (= *Kāma taṇhā*) ie:-Desire to have existence as man or woman, is definitely present as Arising, Standing and Passing away phases or Dorment elements (= *Uppāda, ṭhiti, Bhaṅga, Anusaya dhātu*). So, discern first with knowledge, that the (4) Primary elements on which the Eye transparent element depends are produced by the Past (5) causes or Formative Volitional Action (= *Saṅkhāra kamma*) done in the past existence based on Ignorance, Craving and Clinging (= *Abijjā, Taṇhā, Upādāna*). After seeing the Primary elements produced by the Action on which the Eye transparent element depends with Knowledge; further discern the nature which cleans these Primary element. At that time, the phenomena that Eye-transparent element which has the natural character to clear the Action produced Elements (= *Kammaja mahābhuta*) (ie:-Action produced Element on which Eye-transparent element depends) formed by the Action based on Sensuous Craving; and the Proximate cause of that Eye-transparent is Action produced elements of same group, will be clearly seen by yourself with Knowledge of Right view.

The Character shown in (a), is able to be discerned by a *meditator* who has not attained the Knowledge of Seizing on the Cause and Effect, as yet. But the Character shown in (b) and the Proximate cause are able to be discerned only by a *meditator* who has already attained the Knowledge of Seizing on the Cause and Effect (= *Paccaya pariggaha ñāṇa*). So, in this scripture of *Nibbānagāmini paṭipadā* (Practical Way to Nibbāna), the method of

meditation in accordance with Character-Essence Perception and Proximate cause is mentioned with consideration of some Ultimate elements for those who have already attained the Knowledge of Seizing on the Cause and Effect . After discerning the Conditioning forces on the Cause and Effect of Materiality and Mentality, (= *nāmarūpa Saṅkhāra dhamma*) including the various constituent, of Dependent Origination; in terms of Character, Essence, Perception and Proximate cause, further practices should be continued as follow: _____

PAGE-33

1. Seizing on Corporeality (= *Rūpa pariggaha*)
2. Seizing on Mentality (= *Arūpa pariggaha*)
3. Seizing on both Corporeality and Mentality (= *Rūparūpa pariggaha*)
4. Analytical determination of Corporeality and Mentality with Knowledge (= *nāmarūpa vavaṭṭhana*)
5. Seizing on the Causes and Effects in Present time (= *Paccaya pariggaha*)

Knowledge of Distinction between Mind and Body (= *nāmarūpa pariccheda ñāṇa*) and Knowledge of Seizing on the Cause and Effect (= *Paccaya pariggaha ñāṇa*) are not completely attainable with first time of discernment. Actually, these arise only after repeated and frequent penetrating awareness which is known as repeated attainment of these knowledges . It means that the required destination is not obtainable with one time of awareness; instead it is obtained only after repeated awareness. So, these two kinds of Knowledges are known as **Knowledges of Recognition** (= *Anubodha ñāṇa*). (*Dī-ṭī-2-89-90.*)

Try to understand about other Transparent elements like the Ear-transparent element, etc, etc, in similar way as explained for this Eye-transparent element.

PAGE-33**6. Ear Transparent –Element*****Pāli Quotation (Abhi-A-1-349, Vs-2-74)***

1. (a) It clarifies the Basic-elements which are destined to grasps the impingement of the Sense object of sound. Characteristic;
1. (b) It clarifies the Basic- elements resulted from the Volitional action caused by craving of sound matter which has desire to hear Sense- object of sound Characteristic;
2. It draws the attention of a person, or a thought-process towards the Sense-object of sound. (Function) Essence;
3. It acts like a dwelling place of the Consciousness of ear. Perception;
4. The Base-elements of same group resulted from the Volitional action caused by craving of sound matter which has desire **to** hear Sense -object of sound. Proximate cause.

PAGE-34

In the earlier description of Mindfulness of materiality; it is noted that the ear has two parts known as Ear organ (Sasambhara sota) and Ear -transparent -element (Pasada sota). The Ear transparent-element is interspersed in a delicate, smooth, crimson red, ring like area with *very* fine cilliary processes in the internal ear which is known as eye organ (Sasambhara sota) in Conventional truth world. This Ear-transparent-element is reinforced by the Earth-element, organised by the Water-element, made matured by the Fire-element and supported by the Air-element. It is propped up by the Consciousness > the Temperature and the Nutriment all of which can form the Consciousness, the Temperature and the Nutriment produced materialities, Finally; the survival of the Ear-transparent-element depends on the Life-faculty unit of same group and it occurs in association with other units of matters of the same group, like Colour, Odour, Taste and Nutritive-essence units. The resulting Ear-transparent-element acts as a dependable matter for Consciousness of ear and being as a door; it gives the pathway for occurrence of Consciousness of ear and -associated Eye-door thought-process, (Visudhi- 2- 76.)

7. Nose Transparent-Element

1. (a) *Gandhabhigh'dtSraha b^xutappas'ada lakkhanam,*

1. (a) It clarifies the Basic-elements which are destined to graspe the impingement of the sense object of smell Character,
- (b) It clarifies the Basic-elements resulted from the Volitional action caused by craving of smell which is the desire to breathe in the Sense object of smell. Character,
2. It draws the attention of a thought-process towards the Sense object of smell (Function) Essence,

3. It acts like a dwelling place of the Consciousness of nose Perception,
4. The Basic-elements of same group resulted from Volitional action caused by craving of smell which is the desire to breathe in the Sense object of smell Proximate cause.

As mentioned in previous chapter on Meditation of matter, the nose has two parts; known as Nose-transparent-element (*Pasadaghana*) and the Nose organ. (*Sasambhara ghana*). There are 53 types of materiality in nose organ. This statement is based on the Ultimate truth sense. In Conventional truth sense, the Nose transparent-element is situated on an area which looks like a hoof of a goat in the nose. The Nose-transparent-element is reinforced by the Earth-element, organized by the Water-element; made matured by the Fire-element and supported by the Air-element. It is propped up by the Consciousness, Temperature and Nutriment all of which can form consciousness; Temperature and Nutriment produced materialities. The vitality of Nose-transparent-element depends on Life-faculty unit of same group and it occurs in association with other units of same group, like Colour, Odour, Taste and Nutritive-essence. The resulting Nose-transparent-element acts as a dependable matter for Consciousness of nose and being as a Door, it gives the pathway for occurrence of Consciousness of nose and associated Nose-door thought-process. (Vs-2-76.)

(Abhi ttha-1-350. Visuddhi-2 -74.)

1. (a) It clarifies the Basic-elements which are destined to grasps the impingement of the Sense object of touch ----- Character,
- (b) It clarifies the Basic-elements resulted from the Volitional action caused by craving of touch which is the desire to feel Sense object of touch ----- Character,

PAGE-36

2. It draws the attention of thought-process towards the Sense object of touch -----
(Function) Essence,
3. It acts like a dwelling place of the Body-consciousness ----- perception,
4. The Basic-elements of same group resulted from Volitional action caused by Craving of touch which is the desire to feel Sense object of touch. Proximate cause.

The action produced materialities known as "*Upadinnaka*" = (Clinging produced, matters) are interspersed throughout the entire body. The Body transparent-elements are situated among these Action produced matters in the whole body; somewhat like the oil is soaked in the cotton wool and that Body transparent-element is supported by the Earth-element, organised by the Water-element; and made matured by the Fire-element. It is propped up by the Consciousness, Temperature and Nutriment which also form Consciousness, Temperature and Nutriment produced materialities. The vitality of body transparent-dement is controlled by Life-faculty unit of same group and occurs in association with units of matter in same group, like Colour, Odour, Taste and Nutriment-essence. The resulting Body Transparent-element acts as a dependable matter for Consciousness of body and being as a Door, it gives the pathway for occurrence of Consciousness of body and associated Body-door thought-process. (Abhi-tttia-1-348)

One May Ask a Question -----

If the Body-transparent elements are interspersed throughout the entire body composed of action produced matters (*Upadinnaka*), like oil soaked in the cotton wool; these will also be present in the Eye, Ear, Nose and middle of Tongue. If so, since the Doors are near by structures, is there any possibility of the character of the Body-transparent-element to be mixed with the characters of other transparent-elements (eg; 10 unit-eye-group, 10 unit-ear-group etc j. If the Body transparent-element produced by Volitional action spreading throughout the whole body; it will also be present in the Eye-transparent-element. If so; the nature of Body-base (^body transparent-element) may also be present in Eye-transparent-clement. Then, sense of touch may be felt by Eye transparent-element and sense of sight may be felt by Body transparent-elements. The characteristics of these two transparent-elements (= sense base =Ayatana)will be intermingled.

Answer :.....

The transparent-elements (eg:-Eye transparent-element. Body trans-parent-element in this case); never intermingled nor mixed; since these have different characteristics and different Basic elements on which they depend.

Why? Because, ——— various groups of matters (*rupa kalapa*) are never intermingled. Ten units Body groups (*kaya dasaka katapa*) and ten units Eye groups are interspersed like rice flour and turmeric flour are mixed together. Although these 2 kinds of flour are mixed together, these are seperable. Likewise; although the Body transparent-elements are spreading throughout the places where action produced groups of matter are situated; it only means the possible sites of existence (*dvara*) of the Body transparent-elements. It does not mean that all the groups of matter are the Body transparent-elements. And it means that in the body, where Consciousness of body which can perceive the Sense of touch (*phoththabbdhatu.*) occurs; there will be Body transparent-elements and associated ten units Body group of matters.

PAGE-37

The Body transparent-elements are present in any parts sensitive to touch. So; except in nails and hairs the 10 units body group of matters are present in entire body intermingled with other groups of materialities. Don't think, that the body is composed of 10 units body group of matters only. In Ultimate truth sense; the Body sense-base (*kayayatana*) can't exist alone in the absence of other groups of matters. Even in very small area of louse-head size; where Eye transparent-element exists; both the Body transparent-element and Eye transparent element are present in mixture as 10 units Body groups and 10 units Eye groups. Similar nature presents in other sites.

Although the particles of groups occur in mixture; these are seperate particles, like seperate existence of sand particles. Since group-matters occur seperately, the Basic elements on which Body transparent-element and Eye trans-parent-clement depend are different. The Body transparent-elements depends on 4 Basic element of same ten unity body group. Similarly, Eye-transparent-element depends on 4 basic elements of same ten units Eye-group of matters. The Body trans-parent-element never depends on 4 Basic elements of 10 units Eye group of matter on which Eye transparent-element depends and vice versa. Both have their own respective Basic-element to depend. It means that Body and Eye transparent-elements have different dependable Basic element and seperate nature and characteristic of their own. The differences in dependable Basic elements explain that the two transparent-elements although exist together; these are seperate matters.

So, it is impossible to say the sites where only 10 units Body group excist alone in the absence of other groups of matter like 10 units Eye-group. On this ground it is described that. the Body sense-base (*kayayajatana*) exists at any places where the Action produced materialeties are distributed.

Since the groups of matters are not intermingled and exist seperately, if one can discern the materiality by analysis to perceive the Ultimate nature of matters in the Insight-knowledge, he will realise that even the small units of matter like Colour; Smell, Taste and Nutritive-essence which are present in the same 10 units Body group have seperate nature

and characteristics of their own. It should be noted, that even in the same group; the matters have separate, distinct characteristics of their own and that the differences in natural characteristics of materialities of separate groups of matter is very obvious. (Referred to Abhi-ttha-1-349-353 etc:)

PAGE-38

10. Sense Object of Sight

1. *Cakkhupatihanana lakkhanam ruparh,*
2. *Cakkhuvinn'dssa visayabhavarasam,*
3. *Tasseva gocavapaccipatthanarh,*
4. *Catumahabhuta padatthanam. (Abhi-ttha-1-353. Visuddhi-2-76.)*

1. It is perceptible to Eye transparent-element ——— Characteristic;
2. (a) It is the sense-object of Eye-consciousness = (It supports the Eye-consciousness being as an object-condition) ——— (Function)Essence;
(b) It is beneficial to the Eye-consciousness with the power of Sense-object nature (object-condition = *arammana-paccaya*) ——— (Accomplishment) Essence;
3. It is the sphere or locality of sense-object; where Eye-consciousness wanders ——— Perception;
4. Four Basic-elements of same group of matter on which Sense-object of sight depends ——— Proximate cause.

Place of Existence and Site of Frequent Occurrence (*Visaya and Gocara*)

Pali Quotation (Mahati-2-94) *(Mulati-1-150)*

The character of the Eye-consciousness; which does not occur in the other Sense-objects (non-existence = *anannatthabhava*), apart from the Sense-object of sight is known as 'Visaya' = (place of existence). It is the special site of existence for eye-consciousness. The frequent occurrence of eye-consciousness in that sense-object of sight (frequent occurrence = *tabbahulacarita*) is known as "Gocara".

Take for example; although other animals of various kinds are going about here and there; only the catties are main group of animals living on the grass in the meadow. Likewise; in the meadow of sense-object of sight; it is the Eye-consciousness which occurs frequently. Other kinds of consciousness (eg: Reception consciousness = *Sampaticchana citta*) take in Sight-object as well as other kinds of senses. Therefore the sense-object of sight is the only place where Eye-consciousness frequently occurs. "Gocara" is the description to denote the frequent occurrence of Eye-consciousness in Sense-object of sight (*tabbahulla*= frequent occurrence).

Why it is called as Sense-object of sight

Rupayati hadayarigatabhavam pakasetti rupam —The phenomenon of alteration in appearance, changing the nature of perception in consciousness is known as sense-object of

sight. If there is alteration in appearance the look will change. The changes in look shows like an obvious object.

PAGE-39

The external appearance changes with the alterations in the underlying state of mind. If one is in a state of ecstasy; there will be a clear look and if in a state of grief, the look will be of despair. The statement is appropriate only for living sentient beings. There should be more explanation which is suitable for both the living and inert objects.

Rupayati dabbam pakasetiti rupam-

The name "Sense object of sight" is given to a matter which shows the site of its existence. The group of matters in which the Sense of sight exists the particles of groups of matter, become obvious due to their color and light. So; in this sense, all the color and light such as white; red; black; stripes etc: are known as Sense object of sight (*Rupa*).

Pali Quotation (Abhi-A-1-354)

The texture and the length are not seen with the eye = Eye-consciousness, but are felt by palpation. That's why the length and texture are not Sense-object of sight. The color of an object are not palpable, but are seen with Eye-consciousness. Therefore only the color and appearance are the Sense-object of sight. The meditators are able to see the unit-groups of matters due to the color of sense-object of sight present in these units. That is; the various colours known as sense-object of sight are showing the unit-groups of matters. Again; the meditator will be able to analyse the phenomena of physical matters within the individual unit group of matters with Insight-knowledge only when he sees the unit-group of matters. Only after breaking down the three kinds of compactness (*ghana*) of materiality in each and individual of unit-group of matter with In- sight-knowledge, the meditator will obtain knowledge of the Ultimate-reality.

Only after obtaining the knowledge of Ultimate-reality; the inherent non-self nature (*anatta*) will becomes obvious in its own true natural character. When one sees the Three characteristics of existence (*ti-lakkhana*) with pure Insight-knowledge, he will reach Nibbana through the Path-consciousness (*magga*) and the Fruition-consciousness (*phalla*). That's why it is stated previously; that the Primary-materialities (4 Great-elements = *bhnta-mpa*) and Secondary-materialities (Derived-materialities = *upada-rupa*) are interdependent, Now; the statement that " without clear knowledge of 4 Basic-elements one can't attain clear knowledge of the Derived-materialities and vice vasa " is understandable.

11. Sense object of sound

Pali Quotation (Abhi-A-1-356, Vs-2-77)

1. It is perceptible to the Ear-transparent-element-Characteristic;
- 2.(a) It is Sense-object of Ear-consciousness ^ It is beneficial to Ear-consciousness being as a sense-object nature (Function) Essence;

PAGE-40

(b) It is beneficial to Ear-consciousness with the power of Sense-object being = (*Arammana paccaya satti*) ————— (Accomplishment) Essence;

3. It is the sphere or locality of Sense-object where the Ear-consciousness wanders Perception;

4. Four-Basic-Elements of same unit-group of matter on which Sense-object of sound depends ————— Proximate cause.

Pali Quotation (Mahati-2-87)

The voice which is uttered is known as sound. (*Sadda*). The phenomenon which is heard with ear = the object which is sensed by the Ear-consciousness is known as sound. (*Sadda*). All the voices produced by inert or living objects which are the Sense-objects of the Ear-consciousness are known as sound (*Sadda*).

12. Sense-Object of Smell

Pali Quotation (Abhi-A-1-356, Vs-2-77)

1. It is perceptible to the Nose-transparent-element ————— Characteristic;

2.(a) It is Sense-object of the Nose-consciousness = (It is beneficial to Nose-consciousness with the power of being as a Sense-object) ————— (Function) Essence;

(b) It has the power of being as a Sense-object, beneficial to Nose-consciousness = (ie:-the power of Sense-object being) ————— (Accomplishment) Essence;

3. It is the sphere or locality of Sense-object where Nose-consciousness wanders ----- Perception;

4. Four-Basic elements of same unit-groups of matter on which Sense-object of smell depends ————— Proximate cause.

Pali Quotation (Mahati-2-88)

The nature presents in the object and making the object become obvious by good or bad odour is known as smell (*Gandha*). The smell of a rose indicates where it is; even the rose is covered. The smell of durian also indicates where the fruit is; even it is covered. So; the various flower and fruits give various odour to indicate where these are present. The various odour point out the Sense-object are known as smell (*Gandha*). Therefore, the odour which may be sweet or foul are known as smell (*Gandha*).

PAGE-41

13. Sense-Object of Taste

Pali Quotation (Abhi-A-1-357, Vs-2-77)

1. It is perceptible to the Tongue transparent-element ----- Characteristic;

2. (a) It is Sense-object of tongue-consciousness = It is beneficial to Tongue-consciousness with power of being as a Sense object ----- (Function) Essence;

- (b) It has power of Sense-object which is beneficial to Tongue-consciousness — (Accomplishment) Essence;
3. It forms sphere or locality of Sense-object where the Tongue-consciousness wander about - -----Perception;
4. The Four-basic elements of same unit-groups of matter on which the Sense-object taste depends -----Proximate cause,

Pali Quotation (Mahati-2-88)

Since all living beings are pleased with various taste which may be good or bad; the various objects taken up by the Tongue-consciousness are known as Sense-object of tastes. Therefore all the senses which are sweet, sour, salty, hot, astringent and bitter are included in 6 kinds of taste.

The Power of Volitional-Action (*Kamma*) on Transparent-Elements

All the transparent-elements mentioned are able to clear the 4 Basic-elements of same unit-groups of matter on which the individual element depends. The nature of making clear the 4 Basic-elements is the same. If so; what is the underlying cause which differentiate these elements into Eye-transparent-element, Ear-transparent element etc; etc;?

Pali Quotation (Abhi-A-1-350)

It is the Volitional-action (*Kamma*) or deed which differentiate the various transparent-elements into Eye-transparent elements, Ear-transparent etc:. The different Volitional-action produce different kinds of transparent-elements. It is not due to difference in the respective Basic-elements on which different kinds of transparent-elements depend. The Eye-transparent element although it has typical character of transparent element; can perceive the Sense object of sight only. It can not perceive the voices and sense-object of sound. Again, the Ear-transparent-element can perceive the Sense-object of sound. It has no ability to receive the object of sight. Try to appreciate these differences. Although all the transparent-elements can make clear the 4 Basic-elements; the underlying cause which makes differences among the various transparent-elements is the Volitional-action done in the past; which is based on severe Cravings to have a body composed of different kinds of transparent-elements. The Volitional-action is the main cause of different sense-organs.

The Volitional-action (*Sankhara = Kamma = Karma*-formation) which is influenced by the Ignorance, the Craving and the Clinging (*Avijjatanha* and *Upadana*.) can produce a body with or without complete sense-organs (*Ayatana*) according to the requirement of these Ignorance, Craving and Clinging. Therefore the differences in transparent-elements are not due to the 4 Basic-elements. It is due to Volitional-action. The transparent-elements are produced by various Volitional-action or single Volitional-action. It is easy to understand that various Volitional actions can produce different transparent-elements, since different causes can produce different effects. But in case of different transparent-elements produced by single Volitional-action, it is the differences among

Ignorance, Cravings and Clinging which are the underlying causes of that particular Volitional-action. (Refer to *Anuti-1-158*.)

PAGE-42

Reachable and Unreachable Transparent-Elements

There are two kinds of transparent-element known as Reachable transparent-element. and Unreachable transparent-element.

[*Sampattavisayaggahakampa and Asampattavisayaggahaka nlpa.*] The Eye-transparent-element and the Ear-transparent- element are unreachable transparent elements. The Nose-transparent element, Tongue-transparent element and Body-transparent- element are reachable elements.

In *Abhidhammattha-sangaha*- scripture, the five-Transparent-elements like Eye, Ear etc: are described as (*Gocaraggahaka*); which means the matters which take up the sense-objects. That statement is similar to the one described in the Introductory Notes of Commentary (*Atthasalini atthakatha* 350-351.). When Eye -consciousness takes up or knows the Sense-object of sight; it can only take up the sight depending on Eye-transparent-element. The work or function (*Thane* of Eye-consciousness (ie:-taking -up of Sense-object of sight) is metaphorically used on the Eye -transparent- element which is the workplace (*Thana*) for Sense- object of sight. So the Eye -transparent element is metaphorically termed as the matter which can take up the Sense-object of sight (*Gocaraggahaka rupa*). In *Pali-texts* it is known as "*Thanyupacara*" = which means the imaginative use of the work (*Thana*) on workplace (*Thana*). In other words the Eye -transparent element is the Pre-existent base-support condition (*Vatthupurejata-nissaya paccaya*) of the Eye-consciousness, and the Eye -consciousness is the dependent conditioned thing of the Pre-existent base-support (*Vatthupurejatanissaya paccayuppanna*). One is the cause and the other in the effect or result of the conditionality. The Eye-transparent element is the Pre-existing cause which is the condition for occurrence of the effect = Eye-consciousness and so, the term "*Gocaraggahaka*" (= the matter which takes up the Sense-object) which is used for Eye-consciousness is also used for the Pre-existing cause ie:- the Eye-transparent element. In this phrase; the name given for the effect "*Gocaraggahaka*" = the Eye-consciousness is also given to the cause (ie:-Eye -transparent element). Interchangeable use of the name between cause and effect is known as "*Phalupacara*" in Pali-text. So; the Eye -transparent element is also known as "*Gocaraggaha*W. Similarly other transparent-elements get the name as "*Gocaraggahaka*".

Among various transparent-elements; Eye and Ear-transparent elements are known as (*Asampattavisayaggdhaka rupa*); because these elements perceive the remote Sense-objects like sights and sounds. Their respective sense-objects need not to be directly applied to the Basic-elements on which the individual transparent-elements depend. In case of Nose Tongue and Body-transparent elements, the sense-objects like smell, taste and touch are directly applied to the Basic -elements of their own. So these transparent-elements are known as (*Sampattavisayaggahaka-rupa*).

PAGE-43

It is important to Note that the terms (*Sampatta*, *Asampatta*- = Reachable and Nonreachable) do not necessarily mean whether the sight; sounds really travel or not to reach the transparent- elements. But it means that Sense-objects strike successively to the Basic-elements in the media in between, and finally taken up by the Basic-elements on which the appropriate transparent-element depends.

Pāli Quotation (Abhi-A-1-35, Vs-2-74)

The meditator reaching the Insight-knowledge up to this level has thoroughly attained the mind and matter meditation objects; and able to take up that all mind and mental phenomena occur only in group nature, (ie:-unit-groups of mind and unit-groups of matter =*Dhammapunja*). According to the Law of nature; the Eye-transparent-element occurs as 10- units-Eye matter group (*Cakkhudasaka ka. i0. pa*). If one analyses this group of matter with Insight-knowledge; he will see the constituent 10 units of matter in it. Again the Sense-object of sight also exists naturally as unit-groups of matter. It is grouped as 8, 9 or 10 units of matter. The Sense-object of sight taken, up by one is the object included in one of the above unit-groups of matter. That is; it is the Sense-object of sight in 8, 9, 10 units-group of these Ultimate-matters.

It should be noted that there are 4 dependable Basic- **elements in** Eye-transparent-element and so also in the Sense-object of sight.

Once the Sense-object of sight is perceived by the Eye-transparent-element, the 4 Basic -elements on which the Sense-object depends do not **come** into direct contact with 4 Basic -elements of the Eye-transparent element.

Again the Sound-object according to the Law of nature exists as 9 units-group of matter with sound as ninth- factor of the group. (*Saddanavaka kalapa* \ That is; the type of sound matter is included in that group of matter. Once the Sense-object of sound is perceived by the Ear-transparent-element, the four Basic-elements on which the Sense-object of sound depends do not come into direct contact with 4 Basic -elements on which the Ear-transparent-element depends.

So, in these statements it is mentioned that the Eye and Ear-transparent elements take up the Sense-objects of sight and sound with dependable 4 Basic -element of their own, which are not reachable to the 4 Basic-elements of **the** individual transparent element. (ie—Nonreachable support = *Anallma nissaya*).

In other words, the consciousness of Eye and Ear occur at the Sense of objects of sight and sound with dependable 4 Basic -elements of their own;

which are not in touch with 4 Basic-elements of Eye and Ear-transparent elements. Although there is no direct contact between the dependable Basic-elements of transparent-elements and. sense-object, these Sense-objects of sight and sound are one of the various causes of development of Eye and Ear-Consciousness. There are many causes for the development of Eye-consciousness and Ear-consciousness. Some more explanations will be given here for the beginner of meditation:—

Please keep in the mind for "the Law of Dependent-origination" (*Paticcasamupada*); where it is stated that the Eye-consciousness is produced by various underlying causes:—

1. The Eye-transparent-element, which is the Pre-existent Base-support condition (*Vatthupurejata nissaya paccaya*) = The Eye-transparent element which occurs simultaneously with Vanishing-mind of thought-process (*Atllabhavahga*) before the Eye-consciousness; is acting as Pre-existing supportive Base,
2. The Sense-object of sight is the object-condition (*Arammana paccaya*)=The sight is taking the role of being as a Sense-object,
3. The associated Mental-concomitants- (*Cetasika*)- like sense-impression=contact (*Phcissa*) which are beneficial as Co-nascence- Conditions (*Sahajata paccaya*),
4. The illumination (*Aloka*) -It is essential as Decisive-support condition (*Upanissaya paccaya*);
5. The five-door Adverting- consciousness (*Panca du'ara-vajjana*) which are also known as Mental advertences (*Manasikara*); **are** the conditions for the immediately following stage in the thought-process. (*Anantara paccaya*= *Proximity condition*);
6. The Volitional activity (*SankhUra kamma=karmci*. formation) done in the past life; lead by the Ignorance; Craving and the Clinging (*Avijja; Tanha; Upadana*) is finally promoting with underlying Karma condition (*Kamma paccaya*) and Decisive- Support condition (*Upanissaya paccaya*). When the Sense-object of sight is in direct contact with Eye-transparent-element; there will be no more light in between. If one tries to approximate index finger and thumb; again there will be no more light in between these two fingers. Likewise, there will be no more illumination if the Sense-object is in direct contact with the Eye-transparent elements. Only when these two elements are separated, one of the factor (ie—Illumination -•*Aloka*) of seeing-process is obtained. Therefore, the Eye-transparent -element on which the Eye-consciousness depends can perceive the Sense of sight only when it is not in contact with the Sense-object of sight.

Again, the factors required for the development of Ear-consciousness are:—

1. The Ear-transparent-element,
2. Sense- object of sound,
3. Associated Mental concomitants (like "Contact" = *Phassa*),
4. The space or the media in between (*Akasa*).
5. The Five-door Adverting consciousness in association = (*Manasikara*),
6. Past causative conditions like the Ignorance, Craving;Clinging and Formative action and Volitional Action (*Avijja, Tanha, Upadana, Sankhara, Kamma*).

In this case; if the Sense-object Sound is in direct contact with Ear-transparent element, the space (*Akasa*) is obliterated. The Ear-consciousness can take up sound only when there is space in between the Sense-object of sound and Ear-transparent element. So; the space is present only when the sense of sound and Ear-transparent element are not in contact and only in that condition the Ear-transparent- element on which Ear-consciousness depends can perceive the unreachable Sense-object of sound. That is why the Eye and Ear-transparent elements are unreachable transparent- elements (ie: -*Asampattavisayaggahaka rupa*)

The Nose Tongue and Body -transparent elements can perceive the Sense-objects only when these are in direct contact respective Sense-objects.

The Sense-object of smell when perceived by the Nose-transparent element; there is direct contact of 4 Basic-elements on which the Sense-object and Transparent- element depend respectively. The Sense-object of Taste when perceived by the Tongue transparent -element, there is direct contact of **4 Basic** -elements on which the Sense-object of Taste and Tongue-transparent-elements depend respectively.

PAGE-45

The factors needed for development of the Nose-consciousness are:——

1. Nose -transparent element,
2. Sense-object of smell,
3. Associated Mental concomitants, (eg: Contact = *Phassa*),
4. Air-element
5. The Five-door Adverting consciousness (*Manasikdra*),
6. Five **past** causative conditions——

In this case; if one closes the nose; the smell is not taken up; even if it is near the nose. Only when external air (*Bahiddh-a vayo*)is inhaled with opened nose, the Basic-elements in units-group of matter of Sense-object on which this smell depends, come into direct contact with the Basic-elements of the 10 units-group of nose-matter (*Chanadasaka kalapa*) on which the Nose-transparent element depends. The nose -transparent element can take up the smell only when such direct contact is present.

Again; the Tongue-consciousness is caused by following factors——

1. Tongue -transparent element,
2. Sense -object of Taste,
3. Associated Mental concomitants,
4. The Water-element
5. The Five -door Adverting consciousness = (*Manasikara*),
6. Five-past causative conditions —

In this case; one will not **know the taste; although** the foods **are near** him, but not **in** contact with the **tongue**. Only **when** the Basic-elements in the **taste** -object (foods) come into **contact with** those of the Tongue-transparent -element and moistened by the Water-element of **the saliva; the taste** is known and Consciousness of Tongue arises.

So; the Nose and Tongue -transparent elements can take up the Sense-objects of smell and taste only when the 4 Basic-elements in them **is** in direct contact with those in the Sense-objects. Only such kinds of Sense-objects **are** the factors for appearance of Tongue and Nose-consciousness.

The Sense-object of Touch is nothing, but it is composed of the Earth, The Fire and the Air -elements. Only these 3 kinds of Elements can give rise to Sense of touch and known as Body-impression-object (Element of Tactile-object = *Photthabba dhatu.*). Since, the Tactile-object (*Photthabba 'aram. mana*) is the 3 Basic -elements by itself; it can adhere to the Basic-elements of the Body-transparent element. That is why it is stated that the Body-transparent-element can take up the Sense-object of touch which comes into direct contact with the Basic-elements of it's own.

PAGE-46

The factors needed for production of Body-consciousness;———

1. The Body-transparent -element,
2. Sense -object of Touch.
3. Associated Mental concomitants like *Phassa* (contact),
4. The Earth -element (on which the Body -transparent element depends),
5. The Five -door adverting consciousness ¹- (*Mansikara*), and
6. Five past causative conditions: —

So, the Body-consciousness does not arise even when the tactile-objects are near the body. Only when this Sense- object of touch reaches or comes into contact with Basic-elements of the Body -transparent element, there will be Body-consciousness.

It is the Natural law; that the Body-transparent- element exists as 10 unit- groups of body matter (*Kdyadasaka kaldpa*). There are 10 units of Ultimate Real matter (*Paramatta rupa*) in 10 unit-groups of body-matter in which 4 Basic-elements are included. These are the Basic -elements on which the Body-transparent-element, depends. The Body-transparent **can** clean these Basic-elements. So; keep this nature of the Body-transparent in mind with Insight-knowledge.

Again, the Sense-object of Touch, which **is** composed of 3 Touch-elements also naturally exists in the unit-groups of matter. It may exist **as 8-unit, 9- unit, or 10 unit groups** of matter. But, the Body -transparent element which the meditator takes up in the Insight-knowledge and the Sense- object of Touch are not in the same unit-groups of matter. They are from the different unit-groups of matter.

After having discerned the Body-transparent.-element with Insight-knowledge (eg:-In Mundane-world; when you are establishing mindfulness on meditation object with cross-legged and overlapped palms, after having discerned the Body-transparent- element among the 44 kinds of physical matters of the lower palm with Insight-knowledge; the meditator should also try to discern the various Touch -objects (*Phottabba dhlitu*); which are the nearest to the above Body- transparent element (ie:- Those elements among the 44 kinds of physical matters of upper palm)with Insight-knowledge.

The meditator should continue to endeavour to get in the Insight-knowledge; that Body-consciousness arises only when all three Touch -elements or one of them (ie:—The Earth -element; the Fire-element or the Air-element) comes into direct contact, with the Basic-elements of the Body-transparent r. element on which the meditator is keeping in mind. Only after that; the meditator will know that the Body -transparent element can take up the Touch-elements only when these are in direct contact with it; i.e.:- the nature of Reachable-Transparent-element "= *Sampattawsayaggahaka-rupa*.

The Nature of Relation Among the Basic- Elements

It is to be noted that, only the Basic-elements are able to come into contact with **each** other. Apart from the Sense -object **of Touch**, the other Sense- objects and Transparent-elements have **no character of** Tactile-nature, **and** can not. **come** into contact with each others, So, the **terms such as** Reachable, Nonreachable **are** meant **only for** the Basic-elements.

PAGE-47

The Earth-Element *Fathcivft dhatu*) as a Main Dependable Cause For the Body-Consciouness (*Kdya vinnana*)= (*Pathavisannissita*)

Among the various causative factors of the Body-consciousness; the Earth-element **is** one factor, which is present in the 4 Basic-elements of the same **unit** -groups of matter on which the Body-transparent-element depends and **so** which the Sense-object **of** touch strikes.

The 4 Basic-elements of **same** unit-groups **of matters** are Co-nascence-condition (*Sahajata-paccaya*) on which the Body-transparent-element **depends**.

The Body-transparent element can exist only in the presence of the 4 Basic-elements of same unit-group. So the 4 Basic-elements of the same unit-groups are Support-conditions (*Nissaya. paccaya*) for the Body-transparent element. Only in the presence of Support-condition (ie; -Earth-element) in the conditioned thing (ie:-Body-transparent, element), there will be Body-consciousness. Body-consciousness does not arise without that Earth-element. When external (*Bahiddha*) Basic-element sense-object of Touch strikes the Body-transparent element through, the Body-door (*Kayadvara*); it comes into contact with Support-condition Basic-element on which the internal (*Ajjhatta*)Body-transparent element depends. The sense-object reaches not only to the Body-transparent element, but up to the Basic-elements on which the Body-transparent element depends. Among the Basic-elements; the Earth-element takes part as major role and main causative factor. That is why the Earth-element is known as a causative factor for the production of the Body-consciousness.

Perception of Sense-Object of Touch

Pali Quotation (Abhi-A-1-369)

When the impression of three Basic-elements (Touch-elements) come within the reach of Body-transparent-element and Mind-element (*Mano dhatu*); it is known as "*Apathagarnana*". (ie:-reaching the impressable place). In other words; it is the impression of Touch-element (*Photthabba dhatu*) appearing in the Body-transparent element and Mind-element. At that time; all 3 Touch-elements are appearing simultaneously.

By just giving the impression in the Body-transparent element; the nature of contact of these Basic-elements (Sense of Touch) are not well defined. So, there is a question; whether these Basic-elements of Touch come into contact with the Body-transparent element simultaneously or not?. The answer is "simultaneously".

PAGE-48

Although there is impression and contact of the Basic-elements of touch; if there is no Five-door adverting consciousness (*Manasikdra = Pmcadvaravijana citta and cetasika*); the Body-consciousness will not arise. So the Body-consciousness can not perceive the all 3 Basic-elements of Touch simultaneously within the period of one Body-consciousness-moment (*Kayavinnana citta kkhana*).

In conclusion; the perception of sense-object will depend on the power of mind attention (*Abhujita*); the dominant power of one of the 3 Basic-element (*Ussada*) and the number of Body-transparent element.

The Power of Mind Attention. (*Abhujita*)

If a person feels a fistful of alms-food in the alms-bowl to assess the hardness; softness, well cooked or not; that person is palpating the hardness and softness-of the cooked-rice which is the nature of the Earth-element. Although there are other elements like Fire and Air-elements; the person is feeling the hardness or softness of the alms-food and his mind-attention is more prominent in the Earth-element. At that time; the Body-consciousness

perceives the Earth-element only in the period of one Body-consciousness moment. It takes up the sense of the. Earth-element.

The hot water is composed of many units of Temperature-produced-nutritive-essence-as-eighth-factor unit-groups of matters and so there are Earth-element as well as Air-element. The person who wants to know the temperature of water keeps in his mind the Fire-element only since. he wants to know whether the water is hot or cold. At that time, the Body-consciousness perceives the Fire-element only in the period of one Body-consciousness-moment. It takes up the sense of the Fire-element.

If one stands near the opened window to feel. the breeze, that breeze is composed of many units of Temperature-produced-nutritive-essence-as -eighth-factor unit-groups of matters. There are Earth-element as well as Fire-element. But the person who is feeling the breeze is taking up the Air-element more in his Mind-attention. So, at that time; his Body-consciousness perceives the Air-element only in the period of one Body-consciousness moment. It takes up the sense of the Air-element.

So, the Body-consciousness will perceive only one kind of sense-object of Touch at a time in accordance with the power of Mind-attention. (Abhi-ttha-1-369.)

The Power of Dominant Sense-Object (A)

(Ussada)

If a person falls down on the ground, and strikes a tree with his head or chews a small grain of sand during taking meal; in all these examples the tree, the ground and the sand-grain are composed of many unit-group of Temperature-produced-nutritive-essence-as-the-eighth-factor unit-groups of matter,

PAGE-49

so these possess the Fire-element and Air-element. But the Earth-element is dominating power in these objects and the Body-consciousness perceives the Earth-element only. (In this case the dominant nature does not mean the excessive number of unit-groups of matter nor the percentage ratio of the matter contained. But it means the natural power of dominant Earth-elements in these sense-objects of tree, ground and sand-grains).

Likewise; a burning wood is nothing; but it is the group of Temperature-produced-nutritive-essence-as-eighth-unit-groups of matter. So, if a person treads on a burning wood; his Body-consciousness will take up the Fire-element only since it is dominant in power among the other two elements (ie:-Earth-and Air-element). And at that time; that person only knows the heat = Fire-element.

The, blowing wind is composed of the Temperature-produced-nutritive-essence-as-the-eighth-factor-unit-groups of matter, in which the Air element is predominant, 'The strong wind can strike the ear to deafness. In such wind there are the Earth-element as well as Fire-element. But the Body-consciousness takes up the Air-element only which is the predominant element in the wind or in other words the mind knows the Air-element only. This is how the Body consciousness arises according to the power of dominant sense-object. (Abhi-Una-1-370.)

The Effect of Numerous Transparent-Element (B)

(Ussada)

Apart from the dominant nature of the sense-objects of Touch, the Body-consciousness arises under the influence of numerous Transparent-Elements, If a person takes up one of the Basic-elements like the Earth, the Fire or the Air-elements, although many sense-objects of Touch reach. many Body-transparent-elements; multiple Body-consciousness which depend on each and every Body-transparent never occur simultaneously. If a person is pricked with a tie-up bundle of needles; the needle-bundle touch many Body-transparent elements simultaneously. But the Body-consciousness arises at the needle-point where there are many Body-transparent-elements. So, the Body-consciousness arises at the site where the touch-sense of Touch-element is more significant or present in excess.

If a person cleans a wound with a feather, many filaments of that feather may touch the Body-transparent. The Body-consciousness arises at the site where many Body-transparent elements exist. That is how the production of Body-consciousness depends on the presence of many Body-transparent elements. (Abhi-ttha-1-370.)

PAGE-50

How the Mind takes up from One Sense-object to Another

Here; a meditator who is practising mindfulness of mentality should know how the mind changes in taking up from one sense-object to another. How does the mind take up from one object to another? For this nature, it is explained in *Atthasalini* Commentary as follow:—

The mind changes in taking up one object to another due to:---

1. The desire of underlying Interior will (*Ajjhasaya*), and
2. Excessive stimulation by the sense-object.

These two phenomena are the causes which make the mind changing to take up from one object to another.

How the Will changes the Mind to Take up Various Sense-Object = *Ajjhasaya*

A person going about in the pagoda, festival with will to pay homage to Buddha Image or to-enjoy the festival-decorations, after paying homage or enjoying decoration he still want to wander about the festival to pay homage to another Buddha Image and enjoy other decorations in the festival. That is how the mind shifts from one object to another according to the will (*Ajjhasaya*) of a person. (Abhi-ttha-1-370.)

Excessive Stimulation by the Sense-Object = *Visayadhimatta*

A person paying homage to *Mahacetiya* Temple which looks like *Keiwsa*-Hill, once hears the music played from various musical instruments, his mind shifted from taking the sense of Temple to sense-of the music. In this case; the mind does not move physically from one place to another, since the nature of the Ultimate realities are to pass-away at the place where they arise. In fact; in the Process of consciousness (*Citta vlti*) which follows the mental-continuum (*Nama santati*); the Process of Consciousness which takes up the sound-sense will arise only after the passing-away of the Process of consciousness which takes up the vision-sense.

PAGE-51

Again; when that. person breathe-in the sweet smell from the flowers or fragrant woods brought to offer the Buddha Image; his mind releases the sense-object of musical sound and takes up the sense-object of smell, (ie:-the Process of Consciousness which take up the sense-object of sound is released and the Process of Consciousness which take up the sense-object of smell arises in his mental-continuum.) That is how the mind shifted from one object to another in accordance with the excessive stimulation by the various sense-objects. (Abhi-ttha-1-370.)

A Good Medicine for a Noble One

The above statements should be thoroughly learnt by Meditators of Physical 'Matter and Mentality, (*Rupakammatthana, Namakammatthana*); and especially by those who are trying for the development of Insight-knowledge (ie:-*Vipassana bhavana*).

If he wants to discern the mentalities produced by taking up die sense-object of sight; the will be able to do so at any time in accordance with his will (*Ajjhdsaya*) or desire (*Chanda*). Likewise the mentalities produced by the sense-object of sound etc, etc; can be discerned at any time. Every mentalities produced by awareness of the six sense-objects can be discerned by the noble meditator to get Insight-knowledge at any time in accordance with his will. There is no need to wait and watch the appearance of the individual sense-object.

After discerning the mentalities produced by taking sense-object of sight according to his will and desire, he can meditate the mentalities produced by -taking up sound-object in succession. Try to understand this way.

During the Contemplation of mentalities produced by taken up sense-object of sight according to one's own will; if the mind continuum follows the sense-object of sound, the meditator can discern alternatively the mentalities produced by taken-up sense of sound.

Alternatively; if the meditator can control his mind; and not allowing it to perceive the excess stimulation of sense-object, he can discern the mentalities, which appear as mental-processes one after another. in succession, produced by taken-up single sense-object in accordance with his own desire or will, in respective sense-Bases, (*Ayatcma dvara*). (All these methods of meditation are already described in the Chapter on Mindfulness of Mentality.)

The Power of (4) Basic-Elements

From now; its time to mention the Character, Function, Perception and Proximate causes of the Sense-object of Touch. But; as mentioned before the sense-object of Touch is nothing but the 3 Basic-elements like the Earth; the Fire and the Air-Element, about which arc explained before. So; in this portion, the power of 4 Basic-elements will be further explained.

PAGE-52

The Water-Elements:- The element which has the quality of cohesion to other primary Basic-elements like Earth, with wet and sticky nature.

The alloy is a block of metal in which various kinds of metals are stuck to each other by the cohesive quality of the Water-element. Due to cohesive quality of the Water-element, all the physical matters are compacted as alloy metal block. All physical objects eg: mountain, tusk, ox-horns etc etc are compacted by the Water-element. All these matters exist as solid state due to the cohesive character of the Water-element contained in them. (Abhi-ttha-1-371.)

The Earth-element presents in the metal-block if not compacted by the Water-element, these Earth-elements will be separated and scattered. That is why the venerable Commentary teachers stated as above. For example-appropriate amount of water makes the earth-powders into earth--block (If the quantity of water is too much, there will be mud, and if the water is less these will be no block. That's why suitable proportion of water Is needed. Again if the cement powder, sands and grables are mixed in correct proportion with water there will be a concrete cement-block). Likewise, the solidity of the metal, blocks are due to the appropriate ratio of the Water-element in which it contains, (Mulati-1-154.)

Pali Quotation (Anuti-1-167)

In above paragraphs written in Commentary and Original Subcommentary; the natural earth (*Sasambhara pathavi*) forming metal alloys, soil-block are compacted by the natural water (*Sasambhara apo*).

The natural earth or soil is nothing but the Earth-element which exists as so many similar units of group of matter compacted in solid metal alloy sand soil block. Similarly, the water in nature (ie:-the water in ordinary sense = *Sasambhara apo*) is the water-element which exists as so many similar units of group of matters compacted in fluid state.

The water in nature makes the earth in nature into block of metal and soil. Similarly, the Ultimate-real water (= the Water-element) enhances the cohesion of the Ultimate-real earth (^the Earth. -element) in same unit-group-or (same Basic-element) of matters, as mentioned in Commentary and Subcommentary.

PAGE-53

In the sphere of Ultimate reality; there is no such things as metal block, Soil-block. Actually these are compacted various types of matters known as *Utujaojatthamaka mpakalapa* " r Temperature produced- nutritive-essence-as -the eighth-factor unit-group of matter. In these unit-group of matters (*R= pa kalapa*)', there, are 8 units or types of different matter such as; the Earth -element, the Water-element, the Fire-clement, the Air-element, the Colour, the Odour, the Taste, and the Nutritive essence. (= *Pathavi, Apo, Tejo, Vayo, Vanna, Gandha, Rasa, Oja*). The Earth-element in each individual unit-group is the Ultimate-real Earth-element and the Water-element in each individual Unit-group is also the Ultimate-real Water-element.

The Earth-element in the same unit-group of matter which has the quality of being compacted by the Water-element, and which can support the groups of matter in same unit-group (*Sandharana*) at present moment;-and the. Earth-element of the previously existed

unit-group of matter are the causes of metal and soil block. Based on these underlying causes, the Water-element can perform its function of cohesion to produce blocks of metal and soil. (Anuti-1-167.)

If the meditator can discern the matters in living and non-living object, continue to discern the 4 Basic-Elements in these soil and metal blocks, exist in the external world. (*Bahiddha loka*). He will see particles of group of matter only. On analysing these groups of matter again, he will see that one group of matter is composed of 8 units (8 types) of Ultimate-real matters. These are the Temperature (= the Fire-element)-produced-nutritive-essence-as-the eighth-factor unit -group of matters which are arising one after another in succession in a group of matter. These are continuously arising so far as the power of the Fire-element (=Temperature) is persisting. Since, the life-span of these matters are equal to the time occupied by 17 Consciousness-moments (17-*Cittakkhana*), new groups of matter will be arising before passing-away of the. previously formed groups of matters. This is the natural J. aw of matters and this is how the newer groups of matter are arising before the passing-away of previously existing groups of matter in the solid block of soil or metal. So; in these natural processes; the Water -element of the same unit group of matter in solid block like alloys; exerts its power of cohesion only when there is underlying supports which are exerted by the Earth-element which are present in previous unit-group of matters at the period of static-moment (*thiti*) of matter, still not passing-away and the newly arising Earth-element of the same unit-groups of matter. The nature of cohesion can take place only when there is organizable matters like the Earth-element. That is why the Basic-elements like the Earth-elements in the previously formed groups of matters and those which are arising along with the Water -element in the same unit -group are the main proximate causes for the Water-element to exert its function of cohesion. In case of metal blocks, the Space -element (*Akasa-dhatu*) among the various groups of matter is narrow; so that the each and individual matters occur in very intimate relation. So the metal blocks are condensed and heavy. In soil blocks; the Space-element is wide, so these are not heavy as metal block.

The Earth-Element:- Is the Earth-element; dependable matter for the remaining 3 Basic-elements?

PAGE-54

Yes; it is. If the Earth-element is a support for the remaining 3 Basic-element; Is it tangible or not to these 3 elements?

Again;- If the Water-element performs its cohesive function to the. remaining 3 Basic-elements, Is it tangible or not to these 3 elements?

The Earth-element supports the Water-element which is out of touch (ie:-not tangible). (The Water-element is not a tangible matter = *Aphotthabba rupa*). So the Earth--element support the Water-element without touching it.

The Earth-element supports the Fire-element and the Air-element of same unit-group by touching them.

Again;- The Water-element on the contrary performs its cohesive function to the Earth, the Fire and the Air-elements in the same unit-group by not touching with them. If the water -element organises these 3-elements of the same unit-group by touching, it will become tangible-object. (ie;-Sense-object of *Vouch-Photthabbayatana*). (Abhi-ttha-1-371.)

It is right; that the 3 -Basic-elements which are the sense-object of. touch are dependable on each other by touching among them. But on the contrary these are dependable on the Water -element not by touching, since the Water-element is not tangible-object. This is what the Commentary Teacher means. Again, it is impossible to say that the 4-Basic-elements in the same unit-group of matter are not dependable to each, other since they are not separable into different units and since these are also conditioned to each other by way of mutuality (*AfiHamanKa' paccaya satti*). So it is to be noted that, it is not suitable to criticise the nature of Touch or Nontouch among the Basic(Primary)elements and Derived Corporeality (Secondary-elements) — ie:— *Mahdbhuta rupa and Upadarupa*) which occur in single unit -group of matter, since these are inseparable units of matters in a unit- group. These are inseparable units in same group of matter, (*Avinibbhoga rupa*. (Mulati-1- 1. 54-155.). In conclusion, it is important to understand that the nature of touch or nontouch are criticised only in different unit-groups of matter. It is not suitable to criticise this nature among the 3-Basic-elements of sense- object of Touch vs the Water-element and among the 3-Basic-elements of Sense of Touch; which are aggregated into **same single** unit-group of matter.

The Fire-element and The Air-element — The functions of these two elements on the Earth and the Air-element are same as above. ———The Fire-element makes the Earth-element in same unit-group hot and mature. Although the Earth-element is heated; it does not possess the nature of heat. If the Earth- element, when heated becomes hot; it will possess character of heat. (*Unhatta. lakkhand*). (**Abhi-A-1-370**)

PAGE-55

So, by saying that the Earth-element, although it is heated, it is not hot, since the Earth-element does not have the nature of heat; which is the character of the Fire-element. And on the contrary; the Earth-element does not have the nature of cold as well. The phrase — "*No. unhahutva jhayati* which means that the Earth-element although it is heated, it is not hot"- -also denies the nature of cold in the Earth-element. That is right. It is the Fire -element which has dual nature of heat and cold (Sila = the cold). How do you know the presence of the (Cold)Fire-element? In snowy day or at the time of snow storm, the (Cold)

Fire-element burns the surrounding objects. (The fish-flesh and meat submerged in the ice-land are burnt and cooked).

Although the nature of cold and heat are opposite phenomenon; there is no two different kinds of Fire-element like " Heat Fire-element and Cold Fire-element." So, it is the Fire-element which is cold (*Sita*). It is to be noted these two nature are opposite, so the nature of heat-element does not occur in the. group of matter which has excessive nature of cold-element and vice versa. That is why it is better **to** accept that Fire-element has the dual nature of heat and cold. (Mulati-1-155.)

If a febrile person recovers, his body becomes cold. The lessened nature of heat is the cold (*Sita*). (ie:-the higher temperature hot and the lower temperature is cold). So the heat by itself is the cold. (*the lack of heat is the nature of cold). It. is just a name given on the same natural process at a given time. For example, if a person enters a shelter, from sunshine-area, he feels cold (*Sita*) and for a person who comes out from underground-cold-room and enters that shelter, he feels hot (*Unha*). (Anuti-1-168.)

For a person living on the east bank of a river; the opposite-bank is the west bank and vice versa, Likewise, a shelter which is cold for a person comes from the sunshine; is hot for a person who comes out from the underground cold room. So the nature of cold (Sa) is recognisable at a particular moment of time; it is said that. the nature of heat is the nature of cold and vice versa. But; it should be noted that these two natural processes does not occur in the same unit-group of matter. The well defined or excessive heat is known as "*Unha*." and the lessened heat is known as "*Sita*"; and the two natures do not exist in same unit-group of matter. If these two natural processes occur in same unit-group; there will be doubt; since the heat is-the nature of the Fire-element; the other Water-element and the Air-element have the nature of cold (5f (a)). Actually, the Water-element and the Air-element have no nature of cold. If these two elements are cold in the nature; the nature of cold will exist with the nature of heat in the same unit-group of matter. But these two nature never occur in the same unit-group of matter; so both of these two elements do not have the nature of cold. In the groups of matter which have excessive nature of the Water-element and the Air-element; there is not always the nature of cold-So the nature of cold is not the character of the Air and Water-elements. (AnutI-1-168.)

The hot water in which the Water-element is in excess; has no nature of cold and the hot air, blowing across the hot land, . composed of many groups of matter, which has the nature of Air-element in excess, also has no nature of cold . So, the nature of cold is not the feature of the Air and Water-elements. If the nature cold is owned by the Air and Water-elements, that cold-nature will exist with the nature of heat. in the same unit-group of matter. But it's not true. So; in conclusion, the nature of cold is the feature or character of the Fire-element.

If, one makes sugar blocks from sugar cane juice, Is the Water-element in the juice becoming hard or not? The Water-element does not become hard. It has character of flowing. The hardness is the feature of the Earth-element. In this case; the Water-clement which has weaker power follows the Earth-element which is stronger. (The nature of the Water-element which is weaker, is over-whelmed by the strong nature of the Earth-element and it gets the state of solid-blocks).

It is true; that the Water-element loses it nature of existence as fluid. (ie., fluid. (ie:- It's fluid state in sugar-cane juice is lost, when it becomes sugar-cake). But, the nature of flowing (*Paggharana*) is not lost. Again, if the sugar-block is crushed and dissolved; the Earth-element in it does not transform into fluid state; because; the Earth-clement has the nature of hardness (ie:-*Kakkhala lakkhana*). In this case, the Earth-element with weaker nature of its own follows the state of the Water-element with stronger nature and transform into sugarcane fluid. That is, the Earth-element lost it's nature of existence in the state of solid, but the nature of hardness (= *kakkhala*) is not lost.

PAGE-57

Pali Quotation (Abhi-A-1-372)

Bhavcmnathatta:- (The Influence of the Ultimate nature of the element in excess)-
 ---The word (*Bhava*)is applied to the Ultimate Real matter. The nature that the element which has weaker Ultimate Nature follows the element which has stronger nature is known as "*Bhavanna thatta*". The sugar cakes in which when the power of the Earth-element becomes weak and the power of the Water-element becomes strong; changes into fluid state. Similarly

when the power of the Earth-element becomes stronger than that of the Water-element, the sugar cane juice transformed into hard sugar cake. That is the process of " *BhavaKnathatta*'.

Lakkhanahnathattcv. -- (Changeable Character)— The nature of changing from one character to another is known as "*Lakkhanannathatta*". This nature never occur in the 4 Basic-elements, The Earth-element never loses it's character of hardness (*Kakkhala*), the Water-element never loses it's character of flowing (*Paggharana*), the Fire-element never loses it's character of heat (*Unhatta*) and the Air-element never loses its character of support (*Vitthambhana*). So, in the 4 Basic-elements; there is only the nature of *Bhavarmathatta* ie:- the influence of increasing or decreasing natural power of the. individual element. There is no phenomenon of changing from one character to another (*Lakkhananna thatta*). This fact is explained by the Elder Commentary teachers in "*Atthanaparikappa Sutta*". (An-1-223), as follow:_____

"*Ananda. may there be the character of the Earth, the Water; the Fire and the Air-element changes from one to another = Annathatta-Lakkananna thatta* (Actually there is no such thing), the deep confidence based on conviction (*Saddha*) in the Buddha with the knowledge of Right view (*Samrnaditthmhana*) by a noble disciple never changes. That is, the misbelief in the Buddha by that noble disciple never, never occurs. (*Tikaanguttara, Anandavagga, Nivesakasutta.*)

The following statement explains the above discourse:—*Ananda. may there be that the Earth-element which has the character of hardness (Kakkhala-Lakkhana) transforms into the Water-element with character of flowing (Paggharana-Lakkhana), the confidence and belief of a purified noble person (Ariyasavaka) in the Lord Buddha with knowledge of right view will never turn into the opposite direction. This is the way how the impossible natural processes are emphasized in the Discourses of the Buddha. (Abhi-ttha-1-371 -372, Mulati-1-155.)*

PAGE-58

14. Female Sex Materiality (*Itthindre = Itthi-bhava-rupa*)

Pali Quotation (Abhi-A-1-358, Vs-2-77)

1. *Itthi* Existence as a female. , Character,
2. It shows a subject being as a female. (Function). Essence,
3. (a) *Itthi lingo.* =- Female sexual character
- (b) *Itthi nimitta* = Female external **sign**
- (c) *Itthi kutta* = Female manner
- (d) *Itthi akappa* = F"emale appearance. Perception,
- . 4. Four Basic-elements in same unit group produced by Volitional action on which Faculty of Feminity depends —————Proximate cause,

(A) ***Itthi lingo.*** —————"*Imgeti-gameti bodhetfti Ungam* = The body produced. by aggregation of groups of matter which have female characteristics is known as female feature. (*santJiana*). Among these aggregations of groups of matter, the 10 unit-sex group of matter in which Female-sex-Materiality exists are distributed throughout the body. The

aggregate of matter composed of 10 unit **sex** group of matter (in which Female-sex materiality exists) is known as "Female- Sex- character (*Itthi-linga*). There are differences in the characters of hands, foot, neck, chest between female and male. It's right. Lower part of the female body is simple not like upper part. The hand and foot are small and the face as well. (Abhi-ttha- 1 -375.)

(B) ***Itthinimitta*** ———Signs of femininity-The breasts of the female are complicated in structure. On the face, there are no beard and moustache. There are differences in hair-style and dressings. All these signs denote a person as female. (Abhi-ttha- 1-357)

(C) ***Itthi kutta*** : ——— **Female manner**-Woman in young age (girl) usually plays with toys of house -hold utensils= e:-= toy-pot, toy-tray, etc.) or they may play with attractive dolls; or they may play spinning and weaving. All these are examples of female manners. (Abhi-ttha-1 -375.)

(D) ***Itthi akappa*** : — **Female appearance**-The appearance of walking, standing, lying down, sitting, eating etc in woman is peculiar. So, if a man behaves like a woman, it. is said that man looks like. a woman in his appearance or attitude. (Abhi-ttha-1-357-358.)

PAGE-59

Pāli Quotation (Abhi-A-1-358)

Itthibhava = Itthisabhava --= The characteristic features which express a person being as a female is known as Female-Sex materiality.

Purisabhava = Purisasabhava = The characteristic features which express a person being as a male is known as Male-Sex materiality. (Abhi-ttha-1-358.)

Ayam kamrnajo patisandhi samutthito. ItthilingSdmi pana itthidriyam paticca pavatte samutthitani. (Abhi-ttha-1-358.)

Sakena sakena kamrnacittddin'a paccayena samutthitanapi itthilingadTni indriyasahifi sarTre uppajjamaanani tar'nta dak'arani hutva uppajjantTti "Itthindriy am paticca samutthahanti" tivuttani. . (Mulati-1-150.)

When living beings developed meritorious deeds in the past life to get the human life in the future time; a woman performed these deeds based on the Cravings or desires for her female-sex-character (*Linga*), female-signs (*Nimitta*)-female manner (*kutta*) and female appearance (*Akappa*). That Cravings are based on the Ignorance (*Avijja*) for existence as female-being. So, all these Volitional actions are the causes of femininity.

Likewise, a man developed; deeds to get present human life, based on Cravings of his male sex character; signs, manner and appearances. So; this Craving is also based on the Ignorance (*Avijja*) for existence as male-being, and all these Actions are the causes of masculinity.

The Volitional actions based on Ignorance, Craving and Clinging (*Avijja, tanha, upadana*) produce female-sex materiality (or Male-sex materiality.). That sex-materiality appears right at the first moment of conception and. continues to appear along the whole life at every phases of mind-moments (ie:- arising, standing and passing-away phases

= *Upada, thiti, banga*), until the arrest of the result of the Volitional action done in the past life.

Although, the Sex-materiality is attained right at the first moment of conception, the female sex character (*Itthilinga*); or the male sex character (*Purisalinga*) etc.. etc occur late in the present life (*pavatti*). Only those who have Female-sex-materiality, will obtain the female-sex-character, signs, manner and appearance. Likewise, only in those who have Male-sex-materiality; male-sex-character, signs, manner and appearance will appear in their physical body. Why? Because, there is difference in the Volitional action. And that difference in the Volitional action is again due to the difference in the Ignorance, Craving and Clinging on which that Action is based. The Consciousness based on the Ignorance, Craving and Clinging which is ambitious to become female or male is very miraculous. Due to this miraculous Consciousness, different Actions are done and the resulting sex-materiality becomes different. The difference in the sex-materiality determines the generation of sex-character, signs, manner and appearance which may be female or male.

PAGE-60

Based on the Ignorance (*Avijja*) and influenced by Craving (*Tanha*); the miraculous Volition action makes differences in the Sex-Materiality. This difference in sex-materiality determines the formation of Female-character, signs etc in those with Faculty of femininity (= *Itthindriya*) or Male-character, signs etc in those with Faculty of masculinity (= *Purisindriya*). That is why it is described as: "*Itthindriyam paticca itthi lingadini samutthahanti* = The female-sex-character, signs etc are the resultants of the causative female-sex-materiality or Female-sex-faculty. (Abhi-ttha-1-357-378. Mlati-1-150.)

Example;—When we plant seeds in the ground. the plants will grow into tree with trunk; branches, almost reaching the sky. Likewise, Female -sex-character (= *Itthilinga*) etc will develop if there is Faculty of femininity (= *Itthindriya*) known as Female sex-materiality (= *Itthibhava rupa*) and Male -sex-character etc (= *Purisalingoj*) will develop if there is Faculty of masculinity (= *Purisindriya*) known as Male-sex-materiality (= *Purisabhava rupa*).

The Faculty of femininity or masculinity are similar to the seeds which have genes. The tree grows from seed. Likewise, the sex-characters (*Linga*) etc develop from Faculty of sex. (Abhi-ttha- 1 -358.)

The basic causative factors of the materialities are the Action, the Consciousness, the Temperature and the Nutriment. The nature of aggregates of these materialities differ in the bodies of male and female in character, signs, manner and appearance. And all these differences are controlled by Sex •- materiality produced by the Volitional action, based on Ignorance and Craving. The Female-sex-materiality controls the production of female-sex-character and not male-sex -character and vice versa. That is why the Female-sex-materiality is known as Faculty of femininity (*Itthindre*) and Male -sex-materiality as Faculty of masculinity (*Purisindre*). (Mulati- 1-150.)

Why the Sex-Materiality is Not Described as Faculty-Condition

Although Female or Male-sex-materialities control the formation of Female or Male sex character, signs, etc; the Buddha does not mention these as "Faculty condition. Faculty-Presence-condition and Faculty -Non-disappearance condition" (= *Indriya paccaya*,

Indriyatthi paccaya, Indriya avigata paccaya). Why ? The answer is as follow:—The phenomenon which takes the role of conditionality(ie:-power of the condition on the conditioned-thing) should have following nature:—.

1. It should be a direct causative factor known as (= *Janaka satti*),
2. It should be a supportive causative factor (= *Upatthambhaka satti*) or protective factor (*Anupalaka satti*)'

PAGE-61

So, it is. to be noted that, the Sex- Materiality can't produce materialities even in the 10 unit-sex-groups of matter (*Bizava dasaka kalapa*) in the same group---ie:-it is not a direct causative factor (*Janaka satti*). *MI* the materialities, including Sex-materiality aggregated in the 10 unit-sex-group of matters are produced by the Volitional action which is the direct causative condition done in the past life, based on the Ignorance and Craving-ie:-these materialities are produced by Volitional action, and so these are Action-produced materialities. (*Kammaja rupa*). Again, the Life-faculty unit (= *Rupa jwitindre*) protects the action produced materialities in the same group with protective power (= *Anupalaka satti*). The Sex-materiality has no such protective function on the matters of same group. Unlike, the Nutriment materiality (= *Ahdraja cy'o*) which has • supportive function on the group of materialities in the seperate groups of matter, (as described in the Meditation of Materiality), the Sex-materiality has no supportive function on the same -unit groups of matter, ie:-the Sex-materiality is not a supportive factor (*Upatthambhaka satti*). So, in conclusion, the Sex-materiality has no. supportive power for the same groups of matter and it is not direct causative, supportive, nor protective factor for the materialities of the seperate groups of matter. That is why the Buddha does not say the Sex-Materiality as Faculty, Presence and Non-disappearance -conditions. (= *Indriya, Atthi, Avigata paccaya*). (Mulati-1-150-151.) (These are already described in the Chapter on Dependent Origination = *Paticcasamuppada*.)

Perceptible with Eye-consciousness—Perceptible with Mind-consciousness (*Cakkuvinnaya—Manovinnaya*)

The Female-sex-materiality (*lithibh'dva mpa*) and the Male-Sex -materiality (*Purisabhava rupa*). are not perceptible with the Eye-consciousness. That is, the sex-materialities are not perceived with the Eye-consciousness (Perceptible with Eye-consciousness = *Cakkhu-vinnana dhamma*). (Try to test whether the sex-materiality which is dispersed throughout the whole body is seen or not seen with the naked eye). The Sex-materiality (*Bhava rupa*) is seen only with the Mind-consciousness-element. But, the 'Female or Male-sex-characters (*Itthi linga, Purisalinga*), etc, etc are perceived both with the Eye-Consciousness and the Mind-consciousness.

As, already described, the sex-characters; etc- are the aggregates of the many groups of matter. And; if one analyse the individual group of matter among the various matter

grouped to form the sexual characters, he will see that there is sense-object of sight (= *Rupayatana*) in every groups of matter.

So, these collections of sense-object of sight (= *Rupayatana*) are perceptible with the Eye-consciousness and the Mind-consciousness-element. That is why these Sex-characters (ie;- *Rthilinga*, *Purisalinga*) etc- are described as the nature which can be taken up by both Eye-consciousness and the Mind-consciousness. (ie:- these are Percept-able with Eye-consciousness = *Cakkhu virineya dhamma* and the Mind-consciousness = *Manovinnaya dhamma*.). (Abhi-ttha-1-358, Mulati- 1-151.)

15. Male-Sex -Materiality (*Purisindre = Purisabhava-rupa*)

Pali Quotation (Abhi-A-1-358, Vs-2-77)

PAGE-62

1. Existence as a male Character,
2. It shows a subject being as a male. (Function) Essence,
3. (a) *Purisa linga* = Male sexual-character,
- (b) *Purisa nimitta* = Male external sign,
- (c) *Purisa kutta*= Male manner,
- (d) *Purisa akappa* = Male appearance. Perception,
4. Four Basic-elements in same unit-group **produced** by Volitional action on which Faculty of Masculinity depends. Proximate cause-.

(A) *Purisa linga*. =(Male sexual-character). . . . Unlike female; the upper part of the body of male is clear. The hands, feet, neck and chest are different. Male has big hands and face.

(B) *Purisa nimitta* = (Signs of male). The breasts of male are not complicated. There are beard and moustache on the face. There are differences in hair style and dressings,

(C) *Purisa kutta* = (Male manner). Man in young age, plays with hoarse cart or ploughing tools; and behave like a business man or ploughman.

(D) *Purisa akappa* = (Male appearance), The male has peculiar attitude in walking, eating and drinking, If a woman behave like a man. it is said that woman looks like a man in her attitude and appearance. (Abhi-ttha-1-358.)

Meditation :— Select the Sex-materiality which is one type **or** unit of matter in the 10 unit-sex-materiality group of matter exists in the 6 Door-matter and 42 Body-parts. Try to discern that sex-materiality in terms of Character, Essence **etc**; with Insight- knowledge.

Like; 10 unit-body group of matters; the Sex-materialities are distributed throughout the body-These do not exist only in a particular part of the body. So, discern the Sex-materiality wherever it exists in 6 Door-matter and various Body-parts (*Dvara*, *Kotthasa*).

Although; the Sex-matters are distributed throughout the body; the Basic-elements on which these matters depend are also different, and so the natural character of these matters differ from the other materialities.

PAGE-63**General Knowledge**

Both kinds of Sex-materiality (*lithmdre*, *Purisindre*) occur in the physical and mental continuum of primitive human occur only in **the** present life in the Early World System. (The Sex-materiality appeared in these early human beings only when they took up fragrant rice or paddy after the disappearance of liquorice and fertile top-soil of the earth. And only at that time, the passages of wastes from alimentary and urinary tracts appeared followed by the development of Female and Male-sex-materialities), But, in case of human beings after the Early World System; the sex-materialities occur right at the time of conception, (Di- 3-70-73.)

The Sex-Materiality which occur at the time of conception =- or the Sex-Materiality - which arises at the time of conception, and occurring continuously after the conception, may change and transform in the present life. (*Pavatti kala j.* The Sex-materiality occurring in the present life may also change and transform in the present life.

Pali Quotation (Vi-1-43)

\

Translation:---At a time; the Female-sex-materiality (*Kthibhava rupa = Rthilinga*) appears in an ordinary monk. At a time; the Male-sex-materiality (*Purisabhdva rupa = Purisalinga*) appears in an ordinary female monk. (Vi-1-43.)

According to that phrase; there may be transformation of **sex** in the present life. The male becomes female and vice versa.

Again; the Male -sex -character is superior in between the two/The Female-sex character is lower. So, the Male-sex-character will disappear due to the action of powerful unwholesome deed; and the Female -sex -character will appear due to the action of weak wholesome deed. The Female-Sex-character will disappear due to weak unwholesome deed and the Male-sex-character will appear due to the result of wholesome deed. So; it should be noted that two kinds of Sex -character, will disappear due to unwholesome deed or appear due to wholesome deed. (Abhi-ttha-1-359.)

In this case, the phrase that "Sex-material is produced by wholesome deed" - is meant for the Happy Course of existence (*Sugati bhava*), In case of Woeful Course of existence (*Duggati bhava*), it is the unwholesome deeds which can produce or destroy the original Sex -character. Why ? — Because the Sex-materiality in the Woeful Course of existence is produced by unwholesome deed (ie:- Unwholesome Volitional action produced). The conception or rebirth in the Woeful Course of existence is due to the nonmeritorious deed in the past life; so the sex-materiality produced at the time of conception is the result of unwholesome deed. Likewise, the Sex-materiality produced in the present life (*Pavatti*) is the result of unwholesome deed. ' (Mulati-1-151.)

PAGE-64**Sequences after the Transformation of Sex**

When Sex -materiality changes from one type to another, the Sex -character (*Linga*) and signs of sex (*Nimitta*); which are the sequential results of the Sex-materiality _also changes from one type to another. The manner (*Kutta*) and the appearance (*Akappa*) changes gradually after sometime. The Sex-materiality; since it is the Action- produced matter, arises continuously at each and every phases of Arising (*Upada*); Standing (*Thiti*) and Passing-away (*Bhanga*) in every Mind -moment (*Cittakkhana*). The process occurs repeatedly in the whole life; except at the moment of passing away of life). At the period near the transformation of Sex -materiality; the original Sex-materiality occurring in succession will stop and the new Sex-materiality will arise due to the Volitional action. After the cessation of original Sex -materiality, the Action, Consciousness. Temperature and Nutriment produced materialities which are related to the previous Sex -character, sexual signs cease to occur. The Action, Consciousness. Temperature and Nutriment produced materialities which are related to Sex -character and sexual signs of the new Sex-materiality again arise as the result of new Sex -materiality. This phenomenon is known as "Transformation of Sex".

Person with Bi-sexual Organ = Hermaphrodite (*Ubhato. byanfana*)

Question: In a person with bi -sexual organ produced by two sets of Volitional action (one can produce Femininity = Female-sex character. the other one masculinity == Male -sex character), does only one type of Faculty of sex or both types of Faculty of Sex occur in that person ?

Answer: In a person with bi-sexual organ (-'Hermaphrodite) there is only one kind of Faculty of sex = (one kind of Sex-materiality). There is Female sex materiality or female Faculty of sex in (= *Itthindre; ItthibhSva rupa*) the female hermaphrodite. So also, there is Male -Faculty of sex or Male-sex-materiality in the male hermaphrodite. ' '

Question: In a hermaphrodite, if there is only one kind of Faculty of Sex = Materiality of sex; there should be no second kind of sex-organ. Why? Because the cause of the respective Sex-organ as already mentioned; is the respective Faculty of Sex = the respective Materiality of sex. And there is no second faculty of sex in the hermaphrodite. If there is no second faculty of sex; Does that hermaphrodite has second sexual organ ?

Answer: In a hermaphrodite, the Faculty of sex =- Materiality of Sex is not the causative factor of sexual organ. Why ? Because; the Faculty of sex in them is. never persistent. Further explanation will be given. At a time when female hermaphrodite has an intense desire to have another woman with lust or greed (*Raga*); the male-sex organ becomes prominent in that female hermaphrodite. And at that time, the female sex-organ is less prominent or obscure. (—*ttthibyanjanam paticchannarhhoti*—).

If; that female hermaphrodite has desire for another man the female •-sex-organ (*Itthibharyana*) will become prominent and the male sex-organ is obscured.

PAGE-65

In male hermaphrodite, at a time when he has desire to have a female partner; the male sex -organ will be come prominent and the female-sex organ becomes obscured, . . Again; if he has intense desire to have a male partner, the female -organ becomes prominent/and male-sex organ becomes obscured.

Again; if the Faculty of Sex = Sex-Materiality is the prime cause of second sex -organ, the two kinds of sex -organs will be persistent the whole time in a hermaphrodite. But

it never occurs. So, **the** Faculty of Sex (*Indre*) (= the Materiality of **sex** = *Bhava rupa*) is not the prime cause of the Sexual-organ (= *Bycmjana*). (Abhi-ttha-1-359)

KammasahUyam pana ragac'itta mevatthe karanam. (Abhi-ttha-1-359.)

Actually; the Volitional action (*Kammasahaya*) which is associated severe desire (*Raga*) **is** the prime cause of formation of second sex-organ. (*Abhi-ttha- 1 -359.)*

Yasrwi tassa ekameva indriyam hoti, tasma itthiubhatobyanjanako sayampi gabbham ganhati. Parampi ganhdpiiti. Purisubhatobyanjanako param gabbham ganapiti, s ay am p ana na ganatiti. (Abhi-ttha-1-359.)

Again, it is to noted that there is only one kind of Faculty of sex = Materiality of sex; in a hermaphrodite, a female hermaphrodite may take conception by herself; (if she has sex with a man) and able to give conception to another woman (if she has sex with a woman). In case of a male hermaphrodite, he is able to give conception to a woman (if he has sex with a woman), but he can not take conception with another man. (if he has sex with a man.) (Abhi-ttha-1-359.)

The Nature of "Not Always Exist" (*Napana titthati*)

The two sexual organs " not always exist at the same time ", probably mean, the obvious non-existence of one of these two organs. It. is known by the following *Pali*- phrase: ——. " *Purisabyanjanam pakatam hoti, Itthibyunjanam paticchannam gurhlham. hoti* " = which means that in a female hermaphrodite, if there is desire to have sex with a woman, the male sex -. organ becomes prominent and the female sex-organ becomes obscured. So, according to this *Pah* -phrase; it is to be noted that in a male hermaphrodite, there is prominent male organ and obscured female organ; and in a female hermaphrodite, there is prominent female organ and obscured male organ, (AtthasalinTbhasatKa-4-10.)

PAGE-66

The Nature of Occurrence of Single Faculty of Sex Only

Tayidam dvayam yasma san. ta. Jie saha na pavattati "Yassa itthindriyam uppajjati, tassa purisindriyam uppajjati ? no" ti adivac-anato, Tasma ubhatobyanjanakassapi ekamevindriyam hoti ti vultarh. (Mulati-1-151.)

The two sex-materialities (Female Sex Faculty and Male Sex Faculty) can not exist together in a person. This fact is known by referring *Indriya-yamaka. Pali* -discourse given by the Buddha; which says as follows:---

Yassa itthidriyam uppajjati, tassa purisindriyam uppajjati ? no. (Abhi-7-117.)

Translation:—Does Faculty of Male sex can occur at the same time with obvious Faculty of Female Sex in the same person ? The answer is " No ".

So, according to this discourse; the two Sex-materialities can not occur simultaneously in the feature of a person. That is why; the Commentary Teacher, based on this discourse mentions that in a hermaphrodite (*Ubhatobyanjana*) there is only one kind of Sex Materiality = only one kind of Faculty of sex. (Mulati- 1-151.)

The Ability of Surgeons

The surgeons of the modern time are able to transform the sexual organs of these hermaphrodites according to their wishes, by surgery. Therefore the concept that "the Sex materiality, since it is produced by Volitional action is only changeable by the Action" — should not always be accepted.

As described above, it should be noted that, only one kind of Sex-organ becomes obvious at a time according to the desire or lust (*Raga*) accompanied by the Volitional action in these persons.

Again, the hermaphrodite, had done Volitional action, based on Ignorance, Craving and Clinging to have two sex organs in the past life. The result of that Action done in the past life, may get chance to occur only when it is accompanied by present-life-causative factory like Time, Existence, Effort and Basis (= *Kala, Gati, Payoga, Upadhi*).

Although that hermaphrodite had done Action which can produce two sex-organs, he may probably had undertaken another Volitional action which can also produce single sex organ after surgical operation. And at a time (*Kala*) when the effect of Action which can produce one sex organ overcomes the effect of action which can produce two sex organs, the effort (*Pa-yoga*) of the Surgeon upgrades the result of that action. That is how, the effect of Action done in the past life to get only one kind of sex organ is obtained in the present life with the many concomitant factors like Time, Existence, Effort and Basic. (= *Kala, Gati, Payoga, Upadhi*). And it should be noted that the Sex Materiality is Real Action produced matter, (*Ekanta kammaja rupa*.); and its nature is always influenced by the Volitional action. After operative transformation of sex; the signs (*Nimitta*), the manner (*Kutta*) and the appearance (*Akappa*) of sex-life will change gradually to new sex-life only after some time of operation.

PAGE-67

16. Life-Faculty Materiality (*RupajTvita*)

Pali Quotation (*Abhi-A-1-359, Vs-2-77*)

1. It **takes care** of Action produced materialities in the same group of matter. . . . Character,
2. It sustains the life of these Action produced materialities in the same group from the arising phase to the passing-away phase. (Function) Essence,
3. The ability to keep alive, _the Action produced materiality in same group of matter before the passing-away phase. Perception,
4. The Action produced Basic-elements, to the life of which it sustains in the same group of matter.

Character; . . . The Life-Faculty materiality, taking care of action produced materialities in the same group of matter, is vital to these materialities. But, it can not take care of the Action produced materialities of different groups of matter. The, consciousness, temperature and nutriment produced materialities can survive in the presence of these causative factors and these materialities need not to be looked after by other factors, somewhat like a baby in the presence of his mother, needs not to be taken care by the wet-nurse or guardian. In case of the action produced materialities, these matters appear sometimes after the cessation of direct causative Volitional action (= *Janaka kamma*) or in some cases, the result is produced after passing so many life -cycles. So, their life is sustained by the Life-Faculty materiality, throughout the Life-span of 17 Mind-moments; somewhat like a motherless baby is suckled by a wet -nurse. That is why the Life-Faculty unit looks after the other 9 types or units of matter in the same 10 unit Eye-group of matter produced by Action. Likewise, the Life-Faculty unit looks after the other 9 types or units of matter in the same 10 unit Ear-group of matter produced by Action. So, it is to be noted that the Life-Faculty materiality looks after the other units or types of matter in the same unit -group produced by the Volitional action. The Life -Faculty unit exists in every Action produced groups of materialities.

(Function) Essence:. *Pavattana-Rasa* — It sustains the life of action produced materialities arising together in the same group of matter from arising phase to passing-away phase. It prevents vanishing of these materialities. Although; the Life -Faculty materiality can look after the action produced materialities arising in the same group of matter (= *Anupalcina lakkhana*), and can sustain the life -span, of these ('= *Pavattanarcisci*), __ it can produce these effect only when the above Action produced matters in the same group are still existing in the group, somewhat like that the water in the pond support the lotus flower only when these are growing in the pond.

PAGE-68

The Action produced materialities in the group are taken care by the Life -Faculty unit of the same group of matter, somewhat like that the wet-nurse looks after the prince born by the other. Like a man who rows the boat reaches the other bank of the river along with his boat. , _ ie:- the effort taken by him carries the boat and himself to reach the other bank __ the Life-Faculty materiality arises-•••in relation with the Action produced materiality in the same group, the life -'span of which is sustained by it. It cannot arise by itself. So, by means of taking care of itself; the Life-Faculty materiality accomplishes its function of looking after the. Action produced materialities arising in the same group.

If there is relationship between the existence of the Life-Faculty materiality and Action produced materialities; Why the Life-Faculty materiality is unable to maintain the life of these Action produced materialities for long time ? Because, both of them are unable to exist beyond the passing-away phase of materiality. Although it can not prolong the life beyond the phase of passing-away, the nature of Life-Faculty materiality to sustain the life of Action produced materiality arising in same group is not lost. This nature is carried continuously by the newly formed Life-Faculty Materialities which can sustain the life of Action produced materialities arising together in the same group in each and every Mind -'Moments from the-arising phase to passing-away phases. (Visudhi-2-77,)

The Nature of Impermanence-Suffering-and Non-self

Why both the Life-Faculty and Action produced materialities which are made vital by the Life-Faculty could not exist beyond the phase of passing-away?

Pali Quotation (Sam-2-20)

"*Bhikkhus* (= 0. . . Monks). . . . The Materialities are impermanence. There is direct causative nature "*Hetu*". (= Root condition = *Janaka kamma*) of materialities. There is also, secondary supportive factor (= *Upatthambhaka* = *paccaya*). All these causative factor and supportive factor are impermanent. 0. . . Monks. . . . Is it possible that the materialities which are produced by the impermanent causative factors are permanent? "No". The materialities are impermanent. (Sam-2-20). The nature of Agony and Non-self are also explained as above.

PAGE-69

The direct causative factor (Root condition = *Hetu*) and the potent causative factor (= *Janaka kamma*) for the materialities are the Ignorance, the Craving, the Clinging and the Volitional Action (= *Avijja*, *Tanha*, *Upadana*, *Sankhara kamma*) done in the various past lives. The supportive factors (= *Upatthambhaka* = *paccaya*) are the Consciousness, the Temperature and the Nutriment. The function of the Life-Faculty Materiality is to look after (= *Anupalaka satti*) the Action produced materialities arising together in the same group of matter.

Because; the causative and supportive factors themselves are impermanent, agonising and non-self in nature; the resultant Life - Faculty materiality and the Action produced materialities which exist with the Life-Faculty Materiality in the same group of matter are also impermanent, agonising and non-self in nature. That is why; the Life-Faculty matter as well as the Action produced matters, the lives of which are sustained by the Life-Faculty can not exist beyond the passing-away phase.

The looking after (= *Anupalana kicca*) and the prolongation of life (= *Pavattana-kicca*) from arising to passing-away phases of the Action produced materialities arising together in the same group is accomplished by the peculiar power of vitality exerted by the Life-Faculty materiality. The difference between the materialities which are in association with various Faculties like Eye-faculty, known as "*Indriya baddha*" as the materialities of dead body known as "*Mata rupa*" and the difference between the Action-produced materialities vs the Consciousness, Temperature and Nutriment produced materialities are the product of the vitality exerted by the Life-Faculty materiality. (= *Jivitindriya*). The differences of these materialities are due to the effect of Life-Faculty materiality. Again; the function of Life-Faculty matter is not only to sustain the Action produced materialities arising together from arising to passing-away phase (ie:- *Khanatthiti*), but also to continuous production of continuum of Action produced materiality. If one assumes that the Life-Faculty matter is. not the factor for continuous formation of continuum of Action produced materialities, there should be no death due to cessation of life - span = *Ayukkhayamarana* (Mahati-2-96.). The formation of new Action produced materialities before the passing-away of previous Action produced materialities is known as "*Pabandhathiti* = *Pabandhanupaccheda*". So, the function of Life-Faculty (*Jivitindre*) is not only to look after

(= *Anupalaka satti*) the Action produced materialities in same group; but also to produce new Action-produced matters before the passing-away of previous Action produced materialities. (ie:-*Pahandhathiti*).

This Life-Faculty materiality is distributed in all Action produced groups of materialities including digestive Fire-element known as "*Pacaka tejo*" which digests the all sorts of foods taken, and the Action produced groups of materiality throughout the whole body except in tips of hair; follicles; nails and the dry scaly skin. So, try to discern the Character, the Essence etc of the Life-Faculty unit selected by analysing the group of Action produced materiality as described above.

PAGE-70

17. The Heart-Base Materiality (The Heart-Materiality) (*Hadaya vatthu*)

Pali Quotation (Vs-2-77)

1. Dependable nature for the Mind-element (*Manodhatu*) and the Mind-consciousness-element (*Mano vinnana dhatu*). Character,
2. The base where the above two elements reside. (Function) Essence,
3. It bears the above two elements Perception,
4. Action-produced Basic-elements **in the same unit-group** on which the Heart-Base Materiality depends. Proximate cause.

The Heart Materiality is distributed in the blood which is of a ½ cupped-hand amount and situated in the heart and it gets

1. Foundation from the Earth-element,
2. Organisation and cohesive function from the Water-element,
3. Maturation by the Fire-element
4. Pushing force from the Air-element.

After gaining above various functional bases, the Heart-element is reinforced by the Temperature, the Consciousness and the Nutriment all of which have the power of reinforcement (*Upatthambhaka satti*) and able to form respective materialities. The life-span of the Heart-materiality is sustained by the Life-faculty materiality (*Jivitindre*) and finally the Heart Materiality exists as a Base-materiality on which the Mind-element, the Mind-consciousness element and Mental concomitants depend. (*Visuddhi-2-78*.)

The heart materiality is support-condition (*Nissaya paccaya*) on which the Mind-element and the Mind-consciousness element are dependent. For this dependable nature; these two element will be perceived as if these are carried on the Heart-materiality in the insight-knowledge of a meditator. (*Mahati-2-98*)

Having discerned the 10 types of matters in the 10 unit Heart-group of matter (*Hadayadasaka kalapa*), proceed to discern the Heart-materiality in terms of Character, Essence etc etc. "*Vasanti citta cetasika etthati vatthu, hadayameva vatthu hadaya vatthu*" _____. Since the Heart-Base matter has the dependable character of the Mind-element and the Mind-consciousness element; it is the residence of the two elements which are also known as the Consciousness and the Mental concomitants. In this instance, it does not like the phenomena in the conventional world where an object can be put on another objected existence of the Ultimate-Realities without any work or function (*Nibbyapara dhamma*) in the

Ultimate-World. This nature is applied to all the other natural phenomena as well. (*Pyi-Visuddhimagganissaya-3-216*)

PAGE-71

The Heart-Base and the Heart-Base Blood

The Heart-base (*Hadaya*) is in colour somewhat like a lotus flower (i.e., faint-reddish hue) and in shape it looks like an inverted lotus flower with peeled off petals. The outer surface is smooth. The inner surface is rough and variegated somewhat like a stringy mass of fibers from the dried fruit of the sponge gourd. In the clever person its upper end is a little bit opened and in a less clever person its upper end is closed. In a small cavity inside the Heart-Base, the Heart-Base Blood is composed of so many 10 units group of Heart-Base Materiality (*Hakayadasaka kalapa*). (As described in Materiality-Meditation, the Heart-Base blood is composed of 6 kinds of unit-groups of matter = 6 *kalapa*, and in this aggregate of unit-groups, there are 54 types or units of materialities.) The Heart-Base materiality = Heart-materiality = Heart-Base = *Hadaya vatthu* is one kind of unit or type in 10 unit-group of Heart-Base Materiality (*Hadaya dasaka kalapa*). The mind-element (*Mano-dhatu*) and the Mind-consciousness-element (*Mano vinnana dhatu*) are produced by depending on this Heart-Base materiality (*Hadaya vatthu*). This Heart-Base blood has various colours as follow;_____

1. It is red in person with severe attachment to sensuous objects (*Raga*),
2. Dark in person with anger (*Dosa*),
3. Looks like flesh-washed water in person with delusion (*Moha*),
4. Looks like boiled-bean soup in person with ever changing initiation of thought (*Vitakka*),
5. Colour of flower (*Mahahleiga*) in person with deep conviction. (*Saddha*),
6. It has color of specially cut, properly polished, bright, pure, clean ruby in person with wisdom. (*Panna*) (***Abhi-A-2-228, Vs-I-248***)

PAGE-71

The Heart Materiality (Heart Base = *Hadaya vatthu*) which pervades. and distributed on the Heart-Base blood associated with above color and hue in individual persons and situated in the Heart is the Base Materiality in Ultimate Truth sense on which the Mind-clement and Mind consciousness-element = (*Mano dhatu, Mano vinnana dhatu*) " (*Citta, Cetasika*) reside. In other words the Base-material (*Vatthu-rupa*) which is dispersed in the Heart-Base blood is also known as the Heart (*Hadaya*). The phrases like above, in which the words or terminology used for two subjects which are in functional relationship (ie:- partially related in function) are known as (*Ekade supacdra*) in. *Pali*-text.

" *Hadayanti hadayarnansah*". (***Abhi-ttha-2-228. Visuddhi-1-248.***)

The Heart, the Heart-base or the whole portion of heart is known as "Hadaya". This collective term, the Heart (*Hadaya*) is given also to the Heart-materiality dispersed in the Heart-base blood situated in the cavity of heart. So, this phrase is known as " *Ekadesupacara*" (also written as *Ekadesyupacara.*)

The Buddha mentions the Existence of the Heart-Base Materiality

There is no discourse, directly using the term "the Heart-materiality in *Pali*-texts. Even in the " *Dhammasangam. rupakanda Pali*: the discourse which describes all the nature of materialities, this term is not found. But, based on clues. in various *Pali* -literatures, the Commentary and Sub-commentary accept the existence of this Heart-materiality. The *Pali* -phrase which points out the existence of the Heart-materiality;—

PAGE-72

" *Yam niparh nissaya mano-dhatu ca mariovifi. ana dhatu ca vattanti, tam rupam mano-dh'atuya ca manovmhanadhatuy'a ca tarn sampayuttakanan-ca dhammanam nissaya-paccayena paceayo* ".

(*Patthana- 1-5.*)

Translation;— Depending on a particular materiality; the Mind-element and the Mind-consciousness-element arise. That materiality is beneficial to these Mind-element. Mind-consciousness-element and associated Mental concomitants as Support-condition (*Nissaya paccaya. satti*)

The existence of the Heart-materiality (*Hadaya-vatthu*) on which the Mind-element and the Mind-consciousness-element depend should be known by two ways. One is recitation from memory (*Agama*) and another is rational thinking (*Yutti*). The above *Pali* phrase shows the existence of Heart-materiality (*Hadaya vatthu*) in the way of " *Agama* = recitation from memory). And based on this *Pali*-phrase;— There should be ———

1. Eye-base (*cakku. vatthu*) on which the Eye-consciousness depends
2. Ear-base (*Sota. . vatthu*) on which the Ear-consciousness depends
3. Nose-base (*Ghana. vatthu*) on which the Nose-consciousness depends
4. Tongue-base (*Jivha. vatthu*) on which the Tongue-consciousness depends
5. Body-base (*Kaya vatthu*) on which the Body-consciousness depends and finally,
6. Material-Base on which the Mind-element and the Mind-consciousness element depend, which is the Heart-materiality ("*Hadaya vatthu*).

Why the Buddha does not Mention the Existence of the Heart-materiality in "Dhammasangani Pali-Discourse"

It is questionable why the Buddha does not mention the Heart-materiality, in "*Dhammasangani Pali*" although there should be a materiality on which the Mind-consciousness element depends.

The answer is to avoid the loss of similarity in the pattern of Two as Unit Phrases in the Discourses of "*Arammana duka*" and " *Vatthu duka*" which are mentioned in "*Dhammasanganirupakanda Pali*".

The Mind-consciousness-element does not have Heat-Base materiality (*Hadaya-vatthu*) on. which it depends in absolute sense (*Ekanta*); like the Eye-consciousness which absolutely depends on the Eye-Base matter (*Cakkhu vatthu*). (In the sphere of 5 Aggregates of existence = *Pancavokara-bhumi*; the Mind-consciousness-element has dependable Heart-

base materiality; but in the sphere of 4 aggregates of existence = *Catuvokara. bhumi*, the Mind-consciousness-element does not depend on the Heart-base-matter = *Hadayavatthu*). This is another explanation for the Buddha's omission of existence of the Heart-base materiality in his discourses.

Again, in the Two as unit phrases of Base-materiality discourses (*Vatthu. duka. desana*) which is described for the dependable natural processes; it is mentioned as follow:—

—.

1. *Atthi rupam cakkhuviFi'fi'amaSsa vatthu^Atthi rupam cakkhu-vrnKanassa na vatthu.*

2. *Atthi rupam sotavmKanassa vatthu, Atthi rupam sotavm. Kana. ssa na vatthu.*

PAGE-73

3.

4.

5.

Pali Quotation (Abhi-1-146)

Translation; ---

1. *Atthi rupam cakkhuvinnassa vatthu* = There is base-matter on which the Eye-consciousness depends, (ie.: *Cakkhu. vatthu*).

Atthi rupam cakkhuvinnassa na vatthu = There are base-materialities on which the Eye-consciousness does not depend, (i.e., all the materialities except the Eye-base matter.)

So, the Buddha preaches the Ear-base, Nose-base/Tongue-base and Body-base on which the Ear-consciousness, the Nose-consciousness, the Tongue-consciousness and the Body-consciousness depend respectively and next in the contrary the various materialities which are not the Base-matters for above respective consciousness. According to this discourse, the Mind-consciousness (ie:- *Manodhatu and Manovinnana dhatu*) depends on the Heart-base matter (*Hadaya-vatthu rupa*) in absolute sense. If so; the next phrase in regard to the Mind-consciousness-element will be:-----

6. *"Atthi rupam manovinnanassa vatthu. Atthi rupam manovinnanassa na vatthu.* = There is dependable Base-matter on which the Mind-consciousness depends. (ie:- *Hadayavatthu*). There are materialities on which the Mind-consciousness-element does not depend. (ie; -All materialities except Heart-materiality).

But, the Buddha does not mention this 6th Two-as-unit phrase (*Duka*).

If the Buddha says ——— *"Atthi rupam nanovinndnassa vatthu* = There is Base-matter on which the Mind-consciousness depends, that Base-matter is Heart-materiality and according to *"Atthi rupam manovinnanassa na vatthu* = "There is base-matter. on which the mind-consciousness does not depend " will mean all the materialities except the Heart-materiality. If so, the discourses in succession (like *Arammana duka* = Two-as-unit phrases

for Sense-objects) will differ in pattern from the above "*Vatthu. duka*" = Two-as-unit phrases for Base-materialities.

Here, will be the explanation why the phrases suitable to be used for one subject are not appropriate for another subject.

1. "*Atthi rupam cakkhuvinnndnassa arammanam,*
Atthi rupam cakkhuvmmnanassa ndrammanam. "
- 2.
- 3.
- 4.
5. "*Alibi riTpam kdyavin^dnassa. drammanam,*

Atthi rupam kdyavinndnassa n a ram man am". (Abhi-1-146-147.)

Translation:.....

1. There is Sense-object for the Eye-consciousness. ' (ie:-Sense-object of sight). There are materialities which are Sense-objects not perceived by the Eye-consciousness. (All the materialities except the Sense-object of sight).
2. There is Sense-object for the Ear-consciousness. (ie:-Sense-object of sound). There are materialities which are Sense-objects not perceived by the Ear-consciousness. (All the matters except the Sense-object of sound).
3.
4.
5. There is Sense-object for the. Body-consciousness. (Sense-object of touch). There are materialities which are sense-objects not perceived by the Body-consciousness. (All the materialities except the Sense-object of Touch).

PAGE-74

The Buddha preaches above 5 two-line stanzas (*Duka*) and after these five stanzas; -the following one:_____

6. "*Atthi rupam manovinnanassa arammanam,*
"Atthi rupam manovinnanassa narammanam" which means:—
= there is Sense-object for the Mind-consciousness-element,
= there are materialities which are Sense-objects not perceived by the Mind-consciousness-element.

..... is not appropriate to be mentioned in his speech.

Why? Because, all the materialities are matters of Sense-object for the Mind-consciousness and, there should be no materialities which are not Sense-objects of the Mind-consciousness-element. Since the second line of the No. 6. Two-line stanza for the Sense-object (*Ararnmana duka*) is being incorrect, the pattern between the two-line stanza for the Base-matter (*Vatthu duka*) and that for Sense-object (*Ararnmana duka*) will become different. With the result; the two discourses will be dissimilar in function and essence. It is the Buddha's will or desire (*Aijhasaya*) to say these two-line sermons (ie; -in this *Rupakanda*-Discourse) in similar pattern of function and essence.

The Buddha foresees, that the second line of unpreached-No. 6. Two-line stanza for the Sense-object Discourse (*Arammana-chattha duka*) is impossible mid that only when the

patterns or sequences of the Base-matter-discourse and the Sense-object discourse are resemble; the beings who are eligible to reach *Nibbana* (*veneya*) will easily understand these discourses. That is why the Buddha omits No. 6. Two-line stanza for Base-matter Discourse which is right for it, but not for the Sense-object Discourse. This is the reason of the omission of the Heart-materiality although it actually exists in nature by the Buddha in the "*Dhammasangani rupakanda Pali*". (Mahati. 2, 96. 97.)

Duka Group of Two-line Discourse = Two-line Stanza

These are the discourses. in which the Ultimate-real phenomena such as Consciousness, Mental-concomitants, Materiality and *Nibbana* ore described in group of phrases which consists of two lines. In "*Rupakanda*"; the Materialities are mentioned in Two-line group. Such discourses are known as "*Duka* " in *Pali*. Now; the explanation for existence of the Heart-materiality in terms of the Pali-texts which are recitation from memory (*Agama*) is enough. Further explanation for existence of the Heart-materiality in terms of common sense will be mentioned now.

PAGE-75

Consideration in Common-Sense

As already mentioned in *Pali* scripture:— "*Yam rupam nissaya manodhatu ca manovinnanadhatu ca vattanti*" — there should be dependable-matter for the Mind-consciousness which consists of. the Mind-element and the Mind-consciousness-element. It should not be 4 Basic-elements; because only the Secondary materialities (*Upadarupa*) depend on the Basic-elements (*Mahahhuta-rupa*). So, it. is better to think which matter among the various Secondary-matters is appropriate to be the dependable matter for the Mind-consciousness. Among the 24 Dependent-corporealities (*Upaddrupa*); the Unproduced-corporealities (*Anipphanna rupa*) have no obvious physical body, and these are not Ultimate-real matters. So, the Heart materiality is not included in these Unproduced corporealities. We have to consider the remaining'14 Produced-dependent corporeality = (*Nipphanna rupa*) which are actual corporeality or Ultimate-real matters.

Again, among the Ultimate-real matters ie:-Produced-dependent-corporeality; the Eye, the Ear, the Nose, the Tongue and the Body-transparent elements are the dependable matters for the 5 Consciousness-elements (*Vinnana. dhātu*) — eg: the Eye-consciousness etc etc. So, these are not dependable matters for the Mind-element and the Mind-consciousness-element. The Colour, the Odour, the Sound, the Taste and the Nutritive-essence (*Rupa, Gundha, Sadda, Rasa and Uja rupa*) are also not dependable matters for the Mind-consciousness, because these matters can occur in the inert, non-living external world as well as in the mind and matter sequences of the living sentient beings. The Mind-consciousness does not occur in the non-living world like, trees. water, earth, forest, mountains etc, etc, where the nature of Faculty (*Indriya*) is absent. So to have the dependable nature of these matters for the mind-consciousness is impossible.

Since the Mind element and the Mind-consciousness-element can occur in the thought or mind-process of persons with-uncertain gender (*Napumsaka pandaka*) who have not both lands of Sex-determining-materialities (*bhdva. rupa*), these 2 elements are not depending on these materialities which are also known as- "Faculty of Femininity and Faculty of

Masculinity" = *Itthindriya and Purisindriya*. Again these two elements do not depend on the Life-faculty matter also (*Jivitindriya*); because this Life-faculty matter is specialised to support the action-produced materialities arising in the same unit-group of matter. It is somewhat like that-a person appointed to do one work is unable to do another work, the Life-faculty matter can't be a dependable matter for other matters except the Action-produced one as described above.

So, by the way of taking the remainder (*Pdrisesa. naya*)', the materiality on which the Mind-element and the Mind-consciousness-element depend is definitely the Heart-materiality. (Mahati-2-97.)

It's right. The Mind-element and the Mind-Consciousness-element are dependent on the Derived-corporeality. Why? because, in the Sphere of Five aggregates, the Materiality and Mentality are arising in definite relationship. That is; the Consciousness arises in relation to the Physical matter, All the arisen Consciousness depend on the Produced-dependent-corporeality (*Nippahanna. upada-Tupa*); (eg:. -The Eye-consciousness-element = *Cakkhuvinnana dhatu*). The sphere of Five-aggregate mentioned here is only for the Mind-consciousness-element. There are no Five-door-consciousness (*Pancadvardvajjana*) and 2 Reception-consciousness (*Sampaticchana dve*) which are collectively known as the Mind-element, does not occur in the Sphere of 4 aggregate (ie:-*Catuvokara-bhumi*). (Mahati-2-97.).

PAGE-76

Question; -In the realm of 5 aggregates; if the Heart-materiality is dependable base for the Mind-element and the Mind-consciousness-element, it will also perform the nature of Faculty-support-condition (*Indriya. nissaya paccaya*) = i.e: it is beneficial to the Mind-consciousness with the power, of being as Faculty -condition and Support-condition (*Indriya-paccaya. satti, Nissaya. paccaya satti*). If so, -Is the mode of conditionality of the Heart-base the same or not as the Faculty condition (= *Indriya. paccaya*) mentioned in the Discourse of 24 modes of conditionality. (*Patthdna desand*)?

Answer:---That statement for the Heart-materiality is not contradictory to the Discourse of Conditionality since the role of the Heart-materiality on the two Mind-elements with the nature of Faculty condition is not mentioned.

Further explanation :-The excessive power of taking up sense by the Eye-transparent-element and the number of these elements determine the power and sharpness of Sense-object of sight perceived by the Eye-consciousness. Even the very small Sense-object will be seen. If the quality and quantity of the Eye-transparent element is reduced, the power of perception by the Eye-consciousness is diminished. Even the obvious Sense-object is a blur. This is due to weakness and less occurrence of the Eye-transparent elements. So, the sharpness in the perceptibility the Eye-consciousness is determined by the Eye-base matter on which the Eye-consciousness depends.

Unlike the Eye-base matter which determine the perceptibility of the Eye-consciousness, the Heart-base-materiality can't determine the sharpness in the Mind and Mind-consciousness-elements. Thus the Heart-base-materiality as Faculty-condition (*Indriya. paccaya*) is not acceptable, That is why the Buddha does not mention the beneficial power of Faculty-condition of the Heart-materiality on the Mind-element and the Mind-consciousness-element, in his Discourse of Conditionality (*Patthana desana*). By doing so the Buddha also denies the effect-of the power of Conscience-Faculty-Support-condition (*Sahajaindriya*).

nissaya paccaya. satti) and Base-unit-pre nascence Faculty-Support-condition (*Vatthu-purejdtindriya. nissaya paccaya*) of the Heart-base-materiality on the Mind and Mind-consciousness-elements. (Mahati-2-97.)

Question: - The Base-matter on which the Mind-element and the Mind-consciousness-element depends, may be the-Heart-base materiality or the Derived-Materiality (*Upddarupa*) are produced by the Volitional-action. (Ie:-Action produced materiality = *Kamma samutthanarilpa*), and always has particular function. (That function, is being, as a support on which the Mind-clement and the Mind; '-Consciousness-element depend.) And that Heart. - base matter is dispersed in the blood of the Heart. . How will you know the above statements in regards to the Heart-base materiality?.

Answer:-The Heart-materiality, since it is. Base-matter like the Eye-base-matter; is produced by the Volitional-action and always has particular function of being as a dependable matter on which the Mind-consciousness depends. (Mahati-2-97-98.)

[Practically, this portion should be discerned by the meditator on his own effort with the Insight-knowledge, and only after then; he will accept the answer of the Major-subcommentary (*Mahatika*)].

"*Atthim kutva manasi katua sabbusetas'a samannahritva. kmci cinatentcissa hadayassa khijjanato tatatheiamavatUdtanti vmayati*". (Mahati-2-98.)

In accordance with the Pali-text and reasonable consideration; it is obvious that there should be a base-matter (ie: Heart-materiality). The existence of that Heart-materiality in the Heart is known by following description: —

If a stressful stimulus (especially an agonizing one) is driving a person to despair; there is strain on the heart and the Heart becomes strenuous. Based on this physiology the fact that, 'the Heart-materiality is situated in the Heart is easily known. (Mahati-2-98.)

If a person considers the unpleasant sense, the Hatred-rooted consciousness produced materialities are continuously arising and the heat from the Fire-elements present, in every unit-group of conscious produced matters is increased. The heat from this Fire-element again heat up the Fire-element of near by groups of matter; Basic-elements and the base matters on which this consciousness depends. In terms of Conventional world (*Samuti sacca*), the heat spreads throughout the 10 unit-heart base groups (*Hadayadasa kalapa* = Heart *decad-kalapa*) in which the Heart-materiality exists and on which the Hatred-rooted consciousness depends. Since, these Heart-materiality (*Hadayavatthu*) are dispersed throughout the blood in the Heart, the heat from them; makes the chest hot.

When a person is frightened or, suddenly hear a loud noise; the mind is excited and there is tremble in the Heart and in the chest.

"When a person is in severe grief; the Heart may burst; somewhat like '*Manopadosika*-Deity; who died from burst-heart due to severe sorrow; and finally if a person is happy, he finds a sort of mentally agreeable feeling.

Based on these statements, it is acceptable that the Heart-base materiality on which the Mind-consciousness depends is present in the Heart. Since, this base-materiality exists in the Heart; it is known as the Heart-base materiality.

(Also refer to *Sangraha bhasa* sub-commentary-400.)

The Heart Transplantation

The surgeons of the modern time are trying to transplant the heart with success; and now it is the time to explain the heart transplantation in the view of the Buddha's *Abhidhamma*.

There are some explanations given in the various books of Venerable Buddhist monks which you have already learnt. From now; the further discussion will be given in this scripture

Pali Quotation (Abhi-A-2-228)
(Vs-1-248)

PAGE-78

Pali Quotation (Mahati-1-306, 307)

= In that heart, there is a cavity of ဖုန့်ညောင်စေ့ size. In this small cavity the blood amounting about half a cupped-hand exists. In this blood, there are so many 10 unit group of Heart-matters (*Hadaya dasaka kalapa*). The Heart-materiality (*Hadaya Vatthurupa*) is one unit of that group. The Mind-element and the Mind-consciousness-element arise, depending on this Heart-materiality. (Abhi-ttha-2-228. Visuddhi-1-2-248. Mahati-1-306-307.)

According to the statements discussed in the Commentary and Sub-commentary, you should keep in mind that the Heart-materiality on which the Mind-element and the Mind-consciousness-element depend is present in numerous 10 unit-groups of Heart-Base-materiality which arise and dispersed in the blood exists in the small cavity of the heart. It is very important to note that the Heart-materiality is not situated in the heart, but it pervades and distributed on the blood exists in the small cavity of the heart,

Lohita = Two kinds of Blood

Pali Quotation (Abhi-A-2-233, Vs1-253)

There are two kinds of blood :.....

1. The blood which is collected and stored in the **pool**, known as "*sannicit*" = Pooled Blood.
2. The blood which is circulating along the vessels, known as "*samsarana*" = Moving Blood.

The Pooled Blood has colors of boiled, sticky sealing wax. The moving Blood has color of clear sealing wax. They take the shape of the place where they exist. The production place of the pooled blood is at the upper part of the body. The moving blood flows along the net-work of vessels and distributed throughout the whole body, which is assumed as self by a person with the Craving, Conceit and Wrong view (*Tanha, Mana, Ditthi*), and known as "*Upadinnaka sarira*", with the exception in the parts of hair, follicle, tooth, nails and dry scales free from skin attachment.

PAGE-79

The pooled blood (*Sannicita*) is about an alms-bowl full in amount and fills up below the liver area. It flows and oozes bit by bit, drop by drop through the heart; tissues; kidney, liver and the lungs, making these organs

moist. It's right. if this blood does not moisten these organs; the person becomes thirsty. (Abhi-ttha-2-233. Visuddhi-1-253.)

According to these statements in Commentary; the blood which exists in the small cavity of the heart is the moving blood (= *samsarana*) flowing or circulating along the network of vessels.

In the detail method of mindfulness of Elements, (*Dhatu kammattana*), 42 kinds of Body-parts are mentioned. (Abhi-2-86, Vs-1-359). Among these 42 Body-parts (42 *kotthasa*) these are 6 kinds of Body-parts in which the Air-elements is predominant Air-element; one type is the Air that pervades through limbs. (i.e. *Angamanganu sarino vata vayokotthasa*)

Pali Quotation (Abhi-A-2-66,67)

The Air that pervades through the limbs (ie- *Angamanganusarinovata*) is the air which flows along the net work of vessels and reaching the various organs small or large in the whole body; making flexion and extension of the body-parts. (Abhi-A-2-66, 67)

The moving blood is circulating along the vessels and distributed throughout the whole body with the energy supplied by the Air that flows along the network of vessels throughout the body (i.e *Abgamanganusarino cata*). This is the explanation given in terms of conventional truth-World (*Samutisacca*).

About the Blood and the Air

From now the explanations in terms of the Ultimate-truth world (*Paramattha sacca*) will be given;.....

Pali Quotation (Vs-2-223)

Among the 24 parts of the Body, there are 44 types of materialities produced and conditioned by 4 causes namely the Action, Consciousness, Temperature and Nutriment. (*kamma; citta; Utu; ahara*) in each part of the body.

In above 24 parts of the body; the blood is one part and known as "*lohitam kotthasa*". As mentioned in the meditation of materiality; try to discern the 4-elements in the blood. You will see the particles of group of matter (*rupakalapa*). These group of matter are as follow;....

PAGE-80

1. 10 units-body-group (<i>Kayadasaka kalapa</i>)	10
2. 10 units-sex-group (<i>Bhavadasaka kalapa</i>)	10
3. 8 units-consciousness produced group (<i>Cittaja attha kalapa</i>)	8
4. 8 units-temperature produced group (<i>Utujaattha. kalapa</i>)	8
5. 8 units-nutrient produced group (<i>Aimraja. attha. kalapa</i>)	8
Total—	44

So, there are 5 kinds of group-matter (*or* unit-matters) and 44 types of materialities in the blood. But the blood in the cavity of the heart contains following kinds of group and types of materiality.

Manodvare hadayavatthukaya. bhava dasakavasena ceva utusamutthanadwasena catupapinasameva. (Visuddhi-2-259)

1. 10 units-Heart-group (<i>Hadayadasaka. kalapa</i>)	10
2. 10 units-Body-group (<i>Kayadasaka kalapa.</i>)	10
3. 10 units-sex-group (<i>Bhavadasaka kalapa</i>)	10
4. 8 units-consciousness-produced-group (<i>Cittaja attha kalapa</i>)	8
5. 8 units-temperature produced-group (<i>Utuja attha kalapa</i>)	8
Total	54

So; the blood exists in the cavity of heart has 6 kinds of group of matter (*KU. pakala. pa*) and 54 types of matteriatities.

In terms of Ultimate real world (*Paramattha sacca*) there are no such things, like the Heart (the Heart organ), the Heart-base and the blood. There are only 54 types of ultimate-real materialities. This 54 types is counted qualitatively. In quantity; there are so many matters and groups in these parts of the Body, and all these Ultimate-real materialities are passing-away very quickly after arising phase. Their life span is very short, exist for only about-1/5000 million of a second (ie:-, 1 second = a twinkle of eyes; = a snap of fingers = a Hash of lightning). In terms of mind-moment; their life-span is equal to the period of 17 mind-moments. So, the life span of the materiality is very short.

Rupadhammapi yattha uppajjanti, tattheva bhijjanti. Na desantaram sankamanti.
(Anuti-1-1. 62.)

Translation : —The nature of the materiality is that, these are passing away at the site of arising. They never move from one place to another. This is the natural phenomenon of the Ultimate-real world.

Again, the Air = '*Angamanganusrino Vata*' that pervades and flows along the **net** works of vessels, reaching the various organs, small or large, in the whole body and forcing the blood to circulate, is composed of 33 types of matters grouped **as a part**,

PAGE-81

'Sesesu catusamutthanesu atthasu jwitanavakanseva tma ca ujjatnamakaruti tettirhsa rupani pdkatdhi honti. (Visuddhi-2-223.)

In that Air-element-predominant body-part (*Vayokotth'a. sa*) exist in the vessels, the unit-groups of matters are **as follows** : —

1. 9 units life-faculty group (<i>juntanavaka kalapa</i>)	9
2. 8 units consciousness produced group (<i>cittaja attha kalapa</i>)	8
3. 8 units temperature produced group (<i>utuja attha kalapa</i>)	8
4. 8 units'-nutriment produced group (<i>Ahdraja attha kalapa</i>)	8
Total.	33.

There are 4 kinds of group matter and 33 types on units of materiality. The meditator should try to discern the Air-element-predominant body-part (*Vayokotthasa*) with insight-knowledge. If you see the Air-element, try to the discern the 4 elements in that body-part. Then, you will easily see the particles of group-matter. On analysing these group-matters, you will see that these are composed of 33 types or units of matter, and in every group-of matter, the Air-element is predominant. But all these materialities follow the nature of impermence (*Anicca*), and these pass away after arising phase. But; —————

1. the materialies moving along the vessels known as Moving blood (= *Samsarana lohita*m) and,

2. The materialities moving along the vessels to various organs, small or large known as *Angarnanganusarino vata*, are occurring repeatedly in the arising and passing-away continuum of the materialities; as far as the causative factors like the Volitional actions, the Consciousness, the Temperature and the Nutrient (*Kamma, Citta, Utu, Ahara*) are persisting, since these materialities are the result of these 4 causative factors.

Those who have not obtained the concept of the Ultimate-reality in the continuum of materialities with the Insight-knowledge, based on the right-view of their own, will see these matters as "the Blood" or as "the Air", That is the view of Conventional truth world, (*samutisacca*). So, further explanation in terms of the words used in the Conventional world will be given as follow.

The blood, in the cavity of the heart, in which the Heart-materiality (*Hadaya. uatthu*) and 10 units- Heart-groups are distributed is the moving blood (*samsarana lohita*) which circulates along the vessels. It does not persistently exist in the heart. But it should be noted that although the moving blood is circulating throughout the body, the Heart-materialities are not following along with the blood. These Heart-materialities in 10 units heart-groups with the nature of impermanence (*Anicca*) exist in the blood only when that blood is in the heart. .

PAGE-82

The moving blood is circulating throughout the body due to pushing force of **the** Air-element which is also circulating along the vessels, and that Air-element is known as "*Angamanganusarino vTita*". These Air-elements which push the blood **are** the Action, **Consciousness**, Temperature **and** Nutrient produced Air-elements. (*-catusamutthamka. vayo. dhatu*)

Among these various causes, the effect of Volitional action which produces the Action-produced matters in the moving blood and the moving air will be explained further.

Pali Quotation (Abhidhammavataaraatthakatha)

The meritorious action done in the past life when supported by:—

1. Time-condition (*Kalasampatti*)-good suitable time to bring the effect,
2. Personality-condition (*Upaddhi. sampatti*) = smart feature to bring the effect,
3. Effort-condition (*Payogasampatti*) = effort and means to bring the effect,
4. Existence-condition (*Gatisampatti*) = good existence to bring the effect, —

The result of that meritorious action will have good chances to occur. But on the contrary, if there are inappropriate time; bad personality, less effort and improper existence (= *Kalauipatti, Upadhivipatti, Pa-yoga-Vipatti, Gativipatti*) the effect of that wholesome deed is obstructed. (Further explanation is given in the chapter on the Mental Formation Aggregate = *Sankharakkhandha*)

When the meritorious deed done in the past life; if supported by above conditions for success (*Sampatti- cakka*), there will be appropriate ratio between the moving blood (*Samsarana lohita*) and the air (*Angamanganusarino -vata*) in the vessels.

If the meritorious deed forms good proportion of Action- produced materialities, and if the remaining causative conditions like (Consciousness, Temperature. Nutrients) produce the respective materialities in appropriate manner, — there will be proper circulation

of the Moving blood and Air in the vessels, which are produced by the above 4 causative factors. For that circulatory process; the heart is very important organ.

The Heart is nothing, but it is a pump which **enforces** the Air-element (*Angamangariuserino vata*) to get the energy which pushes the Moving blood (*Samsarana lohita*) throughout the body.

The Cardiac Surgeons of modern time use a machine which acts like the Heart to enforce the Air-element for energy which pushes the Moving blood throughout the body.

PAGE-83

The so called air which is pushed by the machine = in the collection of the Temperature-produced-nutritive -essence as 8th factor groups of matter, (ie: *-Utaja-Ojathamaka rupa kalapa*). When the Air -element in these matters take the pushing-function (*Samudirana kicca*) the Air known as '*Ahgdmaaha nusdrino vtdt*' which is moving along the vessels becomes continuously powerful to push the Moving blood (*Samsarana lohita*) in the circulation.

Although there is temporary absence of the function of the heart, the pushing force of the air in the vessels and the circulation of the moving blood is still occurring. Due to the power of the Air -element in the Air (*Angamangariuserino vtdt*); the materialities known as Moving blood (*Samsarana lohita*) are arising in the new places.

The Heart-materiality, being as 10 unit- Heart-groups (*Hadayadasaka kalapa*), which is Action -produced matter due to Volitional-action in the past life, still distributed in that blood and arising as new generations. These materialities are continuously arising in the Moving blood which is passing temporarily through the heart, the place where the Moving blood is usually produced. And these Heart-materialities will be continuously arising as far as the effect of the past-life-action is present. So, at the same time the Mind -element and the Mind- consciousness-element will still be occurring, accordingly. •

After transplantation of the heart, the Moving blood will continue to circulate through the new heart due to the pushing force of the Air- element in the Air, (*Angamangariuserino vata*) as far as the effect of Volitional action exists. But; circulation will stop, when the effect of volitional action is passing away. .

1. The time, during which the surgeons can operate and the patient can accept the treatment (known as Time-condition for success = *kalasampatti*),
2. The existence of the patient in a place where such operative treatment may be undertaken (known as Existence-condition for success = *Gatisampatti*),
3. The effort of the surgeon in operation and the coordination of the patient for treatment (known as Effort- condition for success-*Payoga- sampatti*),
4. The strength of the patient to accept the operation (known as Personality- condition for success (*Upadhi- sampatti*))

When the Volitional- action of the past receives above supportive conditions, the Action-produced materialities in which the Heart-base -materiality is included; will arise in succession. And; if there is strong support condition of Action-produced materiality

(*Kammaja rupa*), continuous arising of the Consciousness, Temperature, and Nutriment produced materialities.

According to these explanation, one should understand that the heart is the organ through which the 4 condition-produced materiality (*Catusamutthanika rupa*) known as Moving blood = *Samsarana lohita*) is circulating. So; it is possible to accept the nature that; at that time of operation on the heart, the Heart-materialities (Heart-base = *Hadaya Vatthu nipa*) which are dispersed in the Moving-blood arise not in the original place of production, but in the new places of origin. In conclusion, keep in the mind that the Action, Consciousness, Temperature and Nutriment produced materialities (ie:-*Catusamutthanika rupa*) are arising in new places (eg:-where the walking, extension and flexion of the limb etc-occur) due to the influence of Bodily-intimation materiality (*Kayavinnatti rupa*) in which the power of the Air element is in excess and due to the associated Basic-elements.

PAGE-84

The Alternative View

Pali Quotation (Abhi-A-2-57, Vs-1-351)

(Mahati-1-440)

The heart is situated in the middle of the thoracic cage. There is a depression in the thoracic cage and the heart is situated in the middle of that depression. Somewhat like the joining place of spokes of an umbrella, the depression is the joining place of ribs of the thoracic cage which is known as "*Uratthi panjara* = sternum, (*Abhi-ttha-2-57. Visuddhi-1-351 Mahati-1-440.*)

Based on this introduction of Commentary; the Venerable Mahagandayone Sayadaw of Amarapura gave a remark in his "*Sammoha-vinodane bhasatika*" (Subcommentary) as follow:—

"According to the statement in these *Pali* text; the heart = *Hadaya*" is not the actual heart organ which is known by the modern doctors (medical persons), which is situated in the left side of the chest below the nipple". "But there may be some relationship to this heart organ". (*SammohavinodanT bhasatka-1-178.*)

In the region of depression in the chest, there are large blood vessels which are in connection with the heart. There may be other blood vessels as well. If there is excessive movement of the blood and air in these large vessels, there may be excessive movement of the chest as well. The increase in movement of the blood and air depend on the Action, Consciousness, Temperature and the Nutriment. The excessive movement of the blood and air may be due to the Volitional- action, or the Consciousness or the Temperature or the Nutriment. If there is excessive stimulation of the Mind, the Consciousness produced Air - element (*Cittjavayo dJ-iatu*) which exists in the Consciousness -produced-nutritive -essence as 8th factor groups materialities of the blood in the heart, and of the Air (*Ahgam. anganusan. no v'ata*) in the Vessels;— is excited and becomes strong. Due to the energy exerted by that Consciousness produced Air-element, the blood and the air which are the materialities,

produced by 4 conditions (*catiisarnuttJ-iSnika mpa*) and arising in association (*Sahajata*) with that Consciousness -produced Air-element are excited and stimulated to move. That is how the blood and air in the heart, and in the large vessels of chest are related.

If one accepts the concept; that. the Heart-base materialities are arising, by depending on the blood exist in the large vessels of the chest cavity; the relationship between the heart transplantation operation and the existence of the heart-base materiality becomes difficult to explain. And if so, the argument over the Heart -materiality (*Hadaya Vatthu*) on which the Mind-element and the mind-consciousness-element depend will be far away to explain.

PAGE-85

But; the statement that—the Heart-materiality exists in the middle of a depression in the chest — is taken as a phrase to mention the proximate relationship which is known as "*Samipupacara*" in *Pali*.

For example : ' —

"*Gangayam sassam titthat*" which means "The paddy plant exists at the river Ganga". — How is it? The paddy plants never grow in the Gang'a-river. It grows on the river bank. The name of the river "*Ganga*" near the paddy field is taken as the name for the river banks which is the nearby land. Likewise, the blood in the cavity of the heart in which the Heart-materialities are distributed and the blood in the large vessels of the depression in the chest are the nearby materialities. So, the name "Heart = *Hadara*" which is given for the Heart-base materialities distributed throughout the blood in the cavity of the heart is also given to the blood in nearby large vessels of the depression in the chest. In other words, the term "Heart" *Hadaya*" given to the heart organ is also given to the blood inside the large vessels. This way of presentation is known as "*Samipupacara*" in *Pali* scriptures.

Actually; even the Venerable teachers of the Commentary explain in the "*Sarniriohavinodani*" and "*Visuddhimagga*" Commentaries that the Heart-materiality is distributed in the blood situated in the cavity of the heart which is of 1/2 cupped-hand amount and on which the Mind-element and the Mind-consciousness element, depend. (Abhi-ttha-2-228. Visuddhi-1-248.)

It is to be noted, that there is no cavity in the middle of the depression in the chest, where such amount of blood exist. There are large vessels only. This is one reason to accept the existence of Heart-materiality (*HadayaVatthu*) in the heart-cavity. In assessment of the meditators, the majority of the meditators accept that the Heart-materiality on which the Mind and Mind-consciousness-elements depend distributed in the blood exist in the left lower most chamber, out of 4 chambers of the heart which is nearest to the large vessels. So, in conclusion — the statement that "the Heart-materiality exists in the middle of a depression in the chest" is taken as a phrase to mention the proximate relationship, and it is known as "*Samipupacara*" in *Pah'* scriptures.

The Pagoda and the Building for Pagoda

The remains or relics of the Buddha after his passing away and cremation are known as pagoda (*Cetiya*). The sacred building enshrining these relics is known as the House of Pagoda or building of pagoda. The reconstruction of the pagoda means the reconstruction of

the Pagoda-building in which the Buddha's relics are enshrined. We can't reconstruct the enshrined relics.

The relics are somewhat like the Heart-base-materiality and the sacred building is like the heart. The transposition of the heart is somewhat like reconstruction of the sacred building, (Pagoda-building). You can reconstruct the pagoda-building, but not the relics or remains of the Buddha. So also, you may be able to reconstruct the heart but not the Heart-materiality, since this matter is true-action produced materiality.

PAGE-86

First, try to discern the 10 types of ultimate-matter in 10 unit-Heart-group of matter. When you have succeeded in this, discern the Heart-materiality (*Hadaya vatihu rupa*) on which, the Mind-element and the Mind-consciousness-element depend, in terms of Character, Essence, etc; as mentioned above.

18. The Nutriment-Materiality (*Kabalikara ahara*)

Pali Quotation (Abhi-A-1-368, Vs-2-80)

1. It has the nature of Nutritive-essences (*Oja*) of the food takenCharacter,
2. It carries and sustains the Nutriment-produced materiality (*Ahwaja rupa*).....(Function) Essence,
3. It supports the physical body (*Rupakaya*) by formation of the Nutriment-produced matter. (*Aharaja rupa*.) ——— Perception,
4. Swallowed or taken nutrients (*Ahara*) Proximate cause.

Pali Quotation (Mulati-1-154, Mahati-2-104) (Anuti-1-166)

The nutrient (*Ahara*) is the nutritive-essence (*Oja*) present in the food (eg:-cooked rice) taken. These food are composed of Temperature-produced-nutritive-essence as 8th factor groups of matter (*Utujaojatthamaka rupa*) as already described in the meditation of materiality. These remain as this kind of groups of matter from the time of preparation as meal, to just before the distribution in the body after ingestion as new undigested food. Try to discern the 4 Basic-elements in the swallowed undigested foods (parts of food = *Kothasa*) with Insight-knowledge. The particles of group of matters will easily be seen. These materialities are nothing, but the Temperature-produced-Nutritive essence as 8th factor groups of matter which are continuously formed by the Fire-element = Temperature in the group. To the collection of these Temp-prod-Nutritive essence-as-8th-unit group materialities; the terms like foods, undigested foods, etc are given. The Nutritive-essence (*Oja*) which is included in these collection of groups of matter alone can not be eaten or swallowed. Only the foods (eg., -cooked-rice) in which the Nutritive-essence exists can be taken as a whole. Why? — Because, the Temp-produced-nutritive-essence as 8th unit group of matters are compounded with 8 types of matter, and these different types or units of matter are inseparable one from another, which is known as "*Avinibbhoga-rupa*".

PAGE-87

Idam pana savatthukarh ojam dassetum vuttam. (Mahati-2-104.)

Evam vatthuvaseṇa nUmam uddharitv'a — (Abhi-ttha-1-366.)

So, -----the term "*Kabalakaro ahara*" = (Swallowed foods) does not mean the Nutritive-essence as such; but it means the whole diet (eg:-cooked-rice) which is the compounded Temp-Prod-Nutritive-essence-as 8th unit groups of matters in which the nutritive-essence **exists as** part of the group. To understand this nature, the Buddha indicates and applies the name "*Kabalikara ahara*" on the nutritive-essence (*Oja*). So; the nutriment (*Ahara*) means the nutritive-essence (*Oja*) in the way of "*Thanyu-paccara*" in *Pali* text-presentation. The name of the nutritive-essence (=thani); which is "*Ahara*" in this case is. also applied to the Nutritive-essence-as-8th factor-unit groups of matter (*tthana*) (*Ojatthamaka rupa*) which are compounded in various foods (eg: cooked-rice); and thus the foods are also termed as nutritive essence (*Oja*). That nutritive-essence clement accomplishes it's function as nutriment (*Ahara*), only after it is swallowed or ingested. If it is not ingested or swallowed, it is out of function. That in why, the word "*Kabalikara*" = "swallowed" is used as Prefix to amplify the nature of nutriment (*Ahara*) = nutritive-essence (*Oja*).

[Remark: ——— Further explanation will be given here : ———]

The elder disciples translated the "*Kabalikara ahara*" as "Swallowed nutriment, actually which cannot be swallowed". This translation is very precise one; be-cause the materialities = the Ultimate-phenomena always passes away only at the arising place, There is no such thing; that the arise by shifting from one place to another-So; the nutriment (*Ahara*) which is composed of the Temp-produced-nutritive essence as 8th factor unit groups of matter at the time of chewing or eating, at the time of swallowing and at the time of becoming new undigested food are different; which means that the life span of all the Ultimate real matters can not withstand the duration of the act of chewing, swallowing etc. That is why these Temp Prod nutritive-essence as 8th factor unit groups of matter, (= *Kabalikara ahara*); the life span of which is not long enough as period of the act of swallowing; is translated as "Swallowed nutriment, actually which can not be swallowed". All these Ultimate real matters live to the period which is equal to a twinkle of eye, a flash of lightning or a snap of finger = One by five thousands million of a second. They are not alive or their life is not long enough for the duration of the act of swallowing. But in the continuum of matter in succession Temp-prod-nutritive essence as 8th factor unit-group of matters resemble each other, and get the name as swallowed-food or "*Kabalikara ahara*". (ie:-by way of unity presentation in *Pali* text *Ekatta*). Again as already described, one can not swallow the nutritive-essence alone as such without other units in the same Temp-prod nutritive-essence as 8th factor unit-groups of matter. That in why the elder teachers translated the "*Kabalikara ahara*" as "swallowed nutriment, actually which are not swallowed or which can not be swallowed". In terms of unity presentation, the nutritive-element (*Oja dhatu*) which is also known as "*nutriment*"— *Kabalikara ahara* accomplishes it's function as nutriment, and forms nutriment-produced materiality only after it is ingested as swallowed. If it is not swallowed, it's function as nutriment and production of nutriment-produced materiality *Aharaja rupa* can not occur. So, the nature of nutriment and nutritive essence are amplified by using a prefix "*KabakKkara*" (= swallowed) in front of the word "*Ahara*" (= nutriment).]

PAGE-88

Further clear explanation will be given; — The nutritive-essence-element (*Oja-dhatu*), compounded in the Temp-produced-nutritive-essence-as 8th factor-unit groups of

matter exist in the swallowed food (eg: cooked-rice); when supported by-digestive Fire-element (*Pacaka. tejo. dhatu*)-digestive faculty which is the 9 unit-Life- faculty-as-the-ninth-factor group of matter (*Jwita. navaka. rupa. kalHipa*), exist nearby the stomach;—

— that nutritive -essence-element (*Ojadhatu*) will form newer Nutritive-essence produced groups of matter in which the 8th factor or type is nutritive (Q/a). These new generations of nutritive -essence-as-8th factor groups of matter are known as "Fluid-essence-elements" •- (*Rasa-dhatu*) which carry the nutritive-essence throughout the body-parts, large or small by means of the networks of vessel (= *Rasaharani*). This is the explanation in terms of Conventional-truth world. The core of that Fluid-essence-element is the nutritive-essence (*Oja*). In terms of Ultimate-real world; this Fluid-essence-element is the collection of nutritive-essence-as-8th-faction unit group of matter and these matters are off springs of the original Temperature -produced-nutritive-essence (*Utujā. oja*) of the foods (eg: cooked-rice).

The fluid-essence-element; ie;- Essence-as-Sth-factor unit group of matter, are produced from the nutritive-essence of the Temp-prod- nutri-tive-essence-as-Sth unit group of matter exist in the foods by the support of diges-tive-Fire-element= digestive faculty= Action-produced-Pire-element (*Pacaka. tejo. dHdtu=Kammaja tejo dhatu*), (=produced from the essences of swallowed nutriment) — that newly formed Fluid-essence-element- ie;- newly formed nutritive-essence-as-8th faction-unit-groups of matter are also known as "The Nutriment-produced-nutritive-essence-as-8th-factor groups of matter".

This Nutriment-produced-nutritive-essence exist in the Nutriment-produced-nutritive-essence-as-Sth factor-unit groups of matter which is distributed throughout the body-organ by the networks of Nourishment vessel (*RcisaharanT*). And these Nutriment-produced-nutritive-essence (*Aharajaoja*) can support and gives strength to Nutritive-essences which are present in the following various groups of materialities:—

1. Action-produced-nutritive-essence in the Action-produced-groups of matter. (*Kammajarupa kalapa*).
2. Consciousness produced-nutritive-essence in the Consciousness-produced-groups of matter. (*Cittaja rupa kalapa*),
3. Temperature produced-nutritive-essence is the Temperature produced-groups of matter. (*Utujaurupa. kalapa*),
4. Nutriment-produced-nutritive-essence which is present in the pre-existing Nutriment-produced-groups of matter-(*Afuiraja rupa kalapa*).

(Refer to the chapter of Meditation of Materiality). So, this highly specialised pure type (or) unit of matter; depending on 4 Basic-elements of same unit groups of matter and able to support and give strength to various nutritive-essence described above is known as "Nutritive-essence"

"Yo lake rasadhdtuti vuccati" To that " Nutritive-essence" the name "Fluid-essence-element of Nutriment" is given. (*Mulati-I-154. Anuti I-166.*)

According to these discussion:— The name "*Kabalikarahara = kabalkara ahdra* = the Nutriment- materially is actually given to- the "Fluid-essence-element of Nutriment" =- *Rasa-dhTitu* which takes the-nutrients to various organs, large or small in the body via the nourishment vessels (*Rasaharani*) and — to the Nutriment-produced-nutritive-essence

(*aharajaoja*= which has the power of Nutriment- condition (*Ahara-paccaya satti*) on 4 conditions like Action, Consciousness, Temperature and Nutriment- produced-nutritive-essence (*Catusamutth'unika oja*), which are included in the Nutriment-produced-nutritive-essence-as-8th-factor unit groups of matter. (*Ahdraja-ojatthamaka. rupakalapa*).

PAGE-89

"*Kablikaro aharo imassa kayassa ahara paccayena paccayo*"
(*Patthana-1-7*)

Translation :-- The swallowed Nutriment-materiality is beneficial to this 4 conditions produced physical body with the power of being as a Nutriment-condition. (Patthana-1-7.)
The Buddha teaches like that. The Temperature-produced-nutritive-essence (*Utuja Oja*) which is included= in the original Temperature produced-nutritive-essence-as-8th factor unit group of matter exist in the food (eg; cooked rice) is not directly beneficial to the 4 conditions produced physical body with the power of Nutriment condition. Only **the Nutritive-essence) Oja)** — included in the Nutriment-produced-nutritive-essence-as-8th unit group of matter which is known as "Fluid-essence-element of nutriment" =- *Rosa dhatu*, formed from the above Temperature-produced-nutritive essence under the action of Digestive-Fire-element produced by Volitional action (*Kammaja'paccaka-tejo*) will be beneficial to the 4 Condition produced materialities with the power of being as a Nutriment -condition ('*Ahara paccaya satti*). When the 4 Condition produced matters are supported with Nutriment-condition by the Nutriment-produced-nutritive-essence, all the 4 Condition produced matters become able to form newer generations of Nutriment-produced-nutritive-essence-as-8th. factor of unit groups of materialities. To indicate this peculiar power, it is stated that the 4 Conditions-produced-nutritive-essence is beneficial to the 4 Condition produced-physical body with Nutriment-condition. So, in the "Patthana-commeniary, it is noted as follow:—

"*Kabalikaro aharoti catusantati sarnutthanerumpe oja aharo nama*".
(*Abhi-ttha-3-377.*)

Which means:— The nutritive-essence exists in the 4 condition-produced continuum of materiality is known as swallowed Nutriment-Materiality (*Kabalikara ahara*)

According to above description it is noted that :-----.

1. The Nutriment-Materiality is the nutritive-essence, exist in the Temperature-produced-nutritive-essence-as-8th factor unit group of matter- swallowed foods (eg; cooked rice). (*Thanyupacara Pali* grammatical way to use the term of function on the place of function)
2. The Nutriment -Materiality (*KabalTkara a. htS. ra*) is the nutritive-essence exists in the Nutriment-produced-nutritive-essence-as-8th factor unit group of matters known as "Fluid-essence-element of Nutriment" (*Rasa-dhatu*), which is produced from the Temperature produced- nutritive essence of swallowed foods under the action of Action produced Fire-element. (*Kararmpacara- Pali* grammatical way of -using a term to point out the cause.)
3. The Nutriment-Materiality (*Kaballkara ahara*) is the various 4 Condition-produced-nutritive essence exist in the 4 Condition produced continuum of materiality and which can form newer generation of Nutriment-produced-nutritive essence-as -8th factor unit group of matter when supported by Nutriment-produced-nutritive- essence.
(*Karan'upacara* =Pali-grammatical way of using a term to point out the cause.)

The explanation for *Pali* grammatical way to use the term of function on the place of function (= *Thariyupa cara*) is already described. Now, *Pali* grammatical way of using a term to point out the cause (= *Karanupacara*) will be mentioned.

As already described the Nutriment -produced-nutritive-essence-as-8th factor unit groups of matter which are known as "Fluid-essence-element of Nutriment" -- *Rasa dhatu* are formed by the Temperature-produced-nutritive-essence (= *Utuja Oja*) exists in the swallowed foods when supported by the Action-produced-Fire-element (= *Kammaja-tejo-dhatu*). So, this Temperature-produced nutritive-essence (= *Utuja Oja*) is the causative factor and the Nutritive-essence (*Oja*) which exists in the Nutriment -produced-nutritive essence as-8th- factor unit groups of matter, known as the "Fluid-essence-element of Nutriment" is **the** effect. So, the name of causative Temperature-produced-nutritive-essence (*Utuja Oja*) ie:- *Kabalikara ahara* is applied to the resultant Nutriment-produced-nutritive-essence (*Ahara Oja*). Thus, the Nutriment-produced-nutritive-essence (*Ahara Oja*) is also given the name *Kabalikara ahara* **in the way of using a term** to point out the cause (*Ka. ranupacara*).

PAGE-90

Again, only when there is support from the Nutriment-produced-nutritive-essence (which is the Nutriment- produced-nutritive-essence as 8th factor unit group of matter), known as "Fluid-essence-element of Nutriment" (*Rasa dhatu*) _____ the various 4 Condition-produced-nutritive-essence will give benefit to new generation of the Nutriment-essence as 8th factor unit group of matter as Nutriment- condition (*Aharapaccaya satti*). Only after then, the 4 Condition produced-nutritive-essence will be the Nutriment- condition for 4 condition produced-physical body (*rupa kaya*). Therefore "the Nutriment-produced-nutritive-essence" (*Ahara Oja*) exists in the Nutriment -produced -nutritive-essence-as-8th factor unit groups (*Ahara Ojatthamaka rupa*) = ie:— Fluid-essence-element of Nutriment is the causative factor and the various 4 condition produced nutritive-essence supported by that Nutritive- produced-nutritive-essence is the resultant. That is how the name of the supportive causative factor Nutriment-produced-essence "*Kabalikara ahara*" is also given to the resultant 4 Condition produced nutritive essence. Therefore the 4 Condition produced nutritive essence is also known as "*Kabaliara ahara*" in *Pali*- grammatical way (*Karanupacara*). In other words:-----

"*Kabalam Karitva ajjhoharitabba vattukatta va kabali-karoti nananetam fossa.* "

(Abhi-ttha-3-377.)

Transaction:—— The swallowed Nutriment-Materiality is the name given to the 4 Condition produced-nutritive-essence (*Catusamutthanika Oja*), that exist in the swallowed Nutriment-Materiality only. " (Abhi-ttha-3-377.)

All the description in the Preface of the *Patthana*- Commentary are, metaphorical or figurative expressions (*Upacara*). So, the name "Swallowed Nutriment materiality" (*KabaUkara ah'ara*) of the Temperature produced nutritive-essence which is the functional base of nutriment (T *tJmna*), exists in the Temperature of matters which are swallowed as basic -matters (*Vatthu*) like foods —— is given metaphorically to the 4 Condition produced-nutritive-essence (*Catusamutthanika Oja*) which takes the function of nutriment (ie-. – *Tthani*). The 4 Condition -produced -nutritive-essence is beneficial to 4 Condition -produced

physical body with Nutriment- condition only when it exists in the swallowed foods, (ie- *Kabalikara ahara*). That's why the statement is known as "*Thanupacara*".

The Nutriment -Base-Matter and The Nutritive -Essence (*Vatthu and Oja*).

The Nutritive -essence matter (=7iha. ra=0jdrupa) is the core element of the Temperature -produced-nutritive-essence-as-8th unit group of materiality exists in the ingested or swallowed foods. That Nutritive-essence can not be taken up as such without the foods in which it contained. In other words; it can be taken up along with the Temperature-produced-nutritive-essence-as-8th unit group of matter which are collectively known as foods. So, the matter in which the Nutritive-essence exists in known as. the Nutriment -Base-Matter (*Vatthu*). Alternatively, the collection of Temperature-produced-nutritive-essence-as-8th unit group of matter in the foods (eg; cooked rice) with the exception of the Nutriment-essence is known as the Nutriment-Base-Matter. The living beings take up the Nutritive-essence along with the Nutriment-Base-Matter like foods. If so, there is a question as follow:-
 — **Question:** --- Between the Nutriment -Base-Matter and the Nutritive Essence; what is the function of Base-Matter (*Vatthu*) and what is the function of Essence (*Oja*)?

PAGE-91

Answer:— The function of the Nutriment-Base-Matter is prevention and that of Nutritive-Essence is to look after the physical body. The further explanation are as follow :-
 The foods (Base- matters) can prevent the body; but not look after the body. But the Nutritive essence can look after the body but can not protect it. If both are compounded; both function will be accomplished. —

From what. dangers, does that Nutriment-Base matter prevent? The danger is the action of Action -produced-Fire -element (*Kammajatejo-dhatu*). The Nutriment-Base-matter in which the Nutritive-essence exists prevents the action of Action-produced-Fire -element or Action-produced-Digestive-Fire-element (*Pacaka-tejo-dhatu*). If the stomach is empty (ie:- no foods inside), the internal lining of the stomach will be burnt down by the Digestive-Fire-element which has no substances to digest. The Digestive-Fire-element asks for foods to burn. So, if the foods is taken, being digested, the Digestive-Fire-element stops to burn. the stomach, and it tries to digest the foods taken again. And only at that time; the living, being becomes pleased and satisfied.

The Nutritive-essence, looks after and supports the Action, Consciousness, Temperature produced and pre-existant Nutriment -produced nutritive-essence (which are in the state of Fluid-essence-element of nutriment). With the supportive action of the Nutritive-essence; the above 4 Condition produced -nutritive essence can produce newer generation of Nutritive -essence -as-8th factor unit groups of matter. In this way; by production of new Nutritive-essence-as-8th factor unit group of matter, the Nutritive-essence looks after and give strength to the 4 Condition-produced-physical body. (*Catusamutth'anika-nlpa kaya*). But it *kaya*. . . But it can not prevent the danger of the Action-produced-Fire-element. So, only when the Nutriment --Base-Matter and the Nutritive-essence exist together, the danger of

Fire-element is prevented and at the same time 4 Condition-produced-physical body is kept alive or kept in existence for long period. (Refer to Abhi-ttha-1-366- 367.)

Alternative Statement

"*Rupam va aharatitipi aharo*". (Abhi-ttha-1-366) = An object which can sustain and take along the various Nutriment -produced matter is known as **Nutriment-element**. In this phrase; the words "take along" mean formation of new generation of Nutritive essence-as-8th factor-Nutriment produced -materialities by the Temperature -produced-nutritive essence exists in the swallowed foods and supported by the Digestive-Fire-element of the stomach (*Pacakatezo dhatu*). To this phenomenon; it is described as "*Rupaharanaraso*" = Functional essence (*kicca rasa*) of taking and sustaining the Nutriment-produced matter.

Try to discern the Character and Essence of the Nutritive-essence (known as the Swallowed-Nutriment-Materiality) in terms of 3 kinds of essence as described above.

1. If one discerns the Nutritive- essence (essence) exists in the Temperature-produced-nutritive-essence-as -8th faction unit groups of matter compounded in the swallowed foods, the functional essence (*kiccarcisa*) of that first kind of Nutritive- essence is as described above = ie:— it forms the Nutriment -produced-nutritive- essence as 8th factor-unit-groups of matter (Fluid-essence-element by the action of Action-produced Digestive-Fire-element and kept there in existence for long period. This is the first kind of Nutritive-essence of Nutriment Materiality (ie:- *-Pathama kabalfkara ah'ara oja*).

PAGE-92

2- Second batch Nutritive-essence of Nutriment Materiality: ——— Keep in mind the nutritive-essence exists in the of Nutriment-produced-nutritive-essence-as-8th faction unit groups of matter which are composed to form Fluid-essence-element as described above. The nutritive-essence in the pre-existing Nutriment-produced-nutritive-essence-as-8th unit groups of matter, when gets support from **the nutritive-essence exists in the new generation of Nutriment-produced -nutritive-essence-as-8th unit group of matter**, will form new Nutritive-essence-as-8th factor unit groups of matters and by this phenomenon, this second batch nutritive-essence keeps the Nutriment-produced matter in existence for long period. This is the functional essence (*kicca rasa*) of this second batch Nutritive-essence.

3. Third Batch Nutritive-essence of Nutriment Materiality:———— Keep in • the mind, the Action, Consciousness, Temperature and newly formed Nutriment produced (4 Condition ~produced = *Catusamutthanika*) Nutritive-essence. When there is support from **the Nutritive-essence exists** in the Nutriment-produced-nutritive-essence-as-8th faction unit groups of matter (known as **Fluid-essence-element**),

(a) The Action-produced **nutritive essence will form newer Nutritive-essence-as-8th factor groups of matter**.

(b) The **Consciousness-produced** Nutritive-essence will **also form** newer Nutritive-essence - as 8th factor groups of matter.

(c). The Temperature-produced Nutritive-essence will form newer Nutritive-essence-as 8th factor groups of matter.

(d) Newly formed Nutriment- produced-nutritive-essence, when supported. by the more newer Nutritive-essence exists is Nutritive-essence-as-8th factor group of matter (known as Fluid-essence-clement) will also form next generations of Nutritive-essence-as-8th factor unit groups of matter.

This is also **the Functional-essence (*Kicca raa*) of the** Newly formed-nutritive-essence. So, there are 4 kinds of Nutritive-essence; and discern these separately. The Nutriment -produced-nutritive-essence is present in both second and third batches of Nutriment-materiality. So, note that. the difference is only in the newly formed and pre-existing generations of Nutriment-materiality.

The Nutriment-produced materiality can occur ten to twelve terms or more. So, these are described batch by batch. (Refer to Meditation of Materiality).

Perception (= *Paccupatthana*). — "*Upatthambhana paccupattJidno*"- The Nutritive-essence is perceived in the Insight-knowledge of a Meditator as a phenomenon which supports the all materialities (*Rupa-kaya*) b= production of the Nutriment -produced matter.

—————The Fluid-essence-element of Nutriment are produced by the Nutritive-essence exists in the ingested, swallowed foods, ———The Nutritive-essence included in the Nutriment-produced-nutritive-essence-as-8th faction unit groups of matter (ie:- the Fluid-essence-element) in turn support the 4 Condition-. produced-nutritive-essence (eg:- *Kammaja*, *Cittaja* etc.) and new generations of Nutritive-essence-as -8th faction groups of matter occur in succession. The Nutriment-food taken for one time can produce Nutriment-produced-nutritive-essence as 8th faction unit groups of matter for about 7 days or longer period and able to. support, sustain the materialities of physical body (*Rupa kaya*) for long time.

What about the repeatedly taken well balanced nutrition ?. You can imagine the effect. The whole physical body becomes stout and strong due to multiplication of newer Nutriment-produced-Nutritive-essence-as-8th factor unit groups of matter. So, to the Insight knowledge of a Meditator, the Nutritive-essence is perceived as a phenomenon which support the whole physical body to become stout and strong.

PAGE-93

The Metaphorical Expression of the Result (*Phalupacara*)

If a person discern, the Nutritive-essence-exists in the Temperature-produced-nutritive-essence-as-8th factor unit groups of matter, collectively known as swallowed foods or Nutriment materiality, he will know that, this Nutritive-essence can't support the 4 Condition- produced physical body directly= ie:-it is not beneficial to the 4 Condition produced nutritive-essence with the power of being as a Nutriment-condition. (*Ahlarapaccaija satti*), The Temperature-produced-nutritive-essence, as described above, when supported by Action-produced-digestive-Fire-element, it will form Nutriment -produced nutritive-essence-groups of matter 'known as Fluid-essence-element and distributed throughout the whole body. This nutritive-essence exists in that Nutriment-produced-nutritive-essence-as-8th faction groups, (the Fluid-essence-element of nutrition) only can produce various 4 Condition produced nutritive essence or beneficial as Nutriment condition. Again, these 4 condition produced nutritive-essence- will form new Nutritive-essence-8th factor groups of matter in turn. Then only, all materialities collectively known as 4 condition produced physical body = (*Rupakaya*) becomes stout and strong. So, it; is to be noted that

Nutritive essence exists in the Nutriment produced-nutritive-essence-as-8th factor unit groups of matter in the Fluid-essence-element and the 4 condition produced nutritive essence only are. capable to support the all materialities exists in the 4 condition produced physical body. But the supportive function of these Nutritive essence on 4 condition produced groups of matter can not exist without the supportive action of the Temperature-produced-nutritive essence known as Nutriment Materialites (*Kabalikara ahara*) present in the swallowed foods. (Now, the relationship of these matter are understandable).

Therefore the resultant effect; strength and toughness obtained by the materialities in the physical body formed by the Nutriment-produce-nutritive-essence of the Fluid-essence-element and the 4 condition produced-nutritive-essence is metaphorically expressed on the causative Nutriment materiality, ie : —the Temperature produced nutritive-essence presents in the swallowed foods. That is why, the phrase— "Nutriment- materiality (*Kabalikara ahara*) supports the 4 condition produced physical body-all materialities"— is the metaphorical expression of the result in Pali-grammar. This kind of expression needs not to be considered, if one discern the Nutritive-essence, in the Nutriment -produced-nutritive essence-as-8th faction of group of matter in the Fluid-essence-element and, in the 4 condition produced-nutritive-essence. Why? Because both kinds of these Nutritive- essence can produce the Nutritive-essence-as-8th factor unit groups of matter directly and beneficial to the 4 condition materialities with the power of Nutriment-condition. (*Al-mrapaccaya satti*). Proximate cause (=Pffdatth5na) ————

"*Kabalam katva ahZiritabbavatthu padatthano*"

Transalation:— The swallowed foods and nutriment are the Proximate cause. This Proximate cause is the roost intimate causative factor of the Nutritive essence in the Nutriment-produced-nutritive-essence-as-8th faction unit groups of matter known as Fluid-essence-element distributed to all organs large on small throughout the body by network of vessels of nutriment and 4 condition produced nutritive essence. And all these nutritive essence depends on the Basic elements (*Mahabhuta*) in the same group of matter, so these Basic-elements of the same group are also Proximate causes. But, the term "Proximate cause" is applied to the most peculiar and intimate cause among the many causative factors.

PAGE-94

Again, the Proximate cause for the Temperature produced-nutritive-essence exists in the Temperature-produced-nutritive-essence-as-8th factor unit groups of matter in the swallowed foods is the nearby Basic-element in the same group. Thus only to these Basic-elements in same group are named as "swallowed Base-matter" = (*Kabalam katua aharitabba vattu* " in the Conventional truth world.

That is why the proximate cause of all Nutriment materiality is described as swallowed-Base-matter (eg; cooked rice) in the Commentary. The proximate cause of nutritive-essences in the Nutriment-produced nutritive essence of **Fluid-essence element and 4 condition produced nutritive essence** is mainly the Temperature produced-nutritive-essence exists in the swallowed -Base-matters like cooked rice, matters like cooked rice. Only this **Temperature-produced-nutritive-essence**, when supported by Action produced-

digestive-Fire-element will produce Nutriment-produced nutritive-essence as 8th factor groups of matter in the Fluid-essence-element and that in turn supports the various 4 condition produced nutritive essence.

19. Delimiting Materiality (= *Akasa dhatu* = *Pariccheda-Rupa*)

Pāli Quotation (Abhi-A-1-362, Vs-2-78)

1. It divides the territory of the groups of matter. —Character,
2. It shows clear boundary among the groups of matter—(Function) Essence,
3. (a) It acts as border line among the groups of matter.
(b) It delimits the Basic-elements.
- (c) It is the space among the groups of matter. —Perception,
4. The delimited groups of matter —Proximate cause,
Yaya paricchinnesu rilpesu "Idamito uddham, adho, tiri'ya" nti ca hoti.
(*Abhi-ttha-1-362.*)

When the delimiting materiality divides the territory among the groups of matter, there is definite special relationship among the groups of matter (eg:-one group may be above, below or beside the other group) If there is no boundary produced by the Delimiting Materiality; all the groups of matter will be amalgamated.

Ayam hi akasadhatu tarn tarn mpakalapam paricchindanti viya hoti. pa. "Yaya paricchinne su" ti 5dm5 ak'dsadhatuy'd tarn tarn kalapanam kalapantarehi asankarakSraṇa tarn dsseti. (Mahati-2-101.)

PAGE-95

Character ——— The Delimiting Materiality (*Akasadhatu*) is not the space high above the sky (= *Ajatakasa*), nor the space bounded by frame eg- the doors, windows, (= *Paricchanna-kasa*) nor the unobstructed-empty space (= *kasinugghatimakasa*) obtained after releasing of external meditation device (= *kasina patibhaga nimitta*) and which is the object of the first Immaterial Absorption. (= *Jhana*) described in the sphere of Boundless space (= *Akasanancayatana jhana*). It is the name given only to the nature which keeps each group of materialities from mixing with one another or prevents mixing of materialities in one group of matter with those from another group. And, it is known as boundary space (= *Paricchadakasa*) among the groups of matter.

This Delimiting Materiality prevents mixing of the 10 unit-Eye groups of matter from the 10 unit-Body groups of matter. By doing so; the various types or units of matter in one group are not mixed with various types of matter in other groups of matter. In case of unit or types of matter in the same group the separate own nature and character of the individual units of matter prevent mixing of these unit in the same group. So; keep in mind that there is no mixing together among the various groups of matter and among the various types of matter in the same group.

The Delimiting Materiality prevents the adjacent groups of matter from mixing each other and the groups of matter in turn keep a space among them which becomes Delimiting Materiality. Due to the adjacent groups of matter there is space among these; and that space element (= *Akdsadhatu*) prevents mixing of the groups of matter. By this statement, it shows that the character of the Delimiting Materiality is causative factor to keep each and every unit-groups of matter from mixing each other.

Essence :— Since Delimiting Materiality gives dividing lines among the groups of matter, it shows the boundaries and the relation of the groups, so that one knows which is above, below, front, back or sides of the groups of matter. That is the (Function) Essence of the Delimiting Materiality. However the groups of matter are closely approximated each other, the boundary is still in between them. The Delimiting Materiality indicates that boundary. If there is no boundary of Delimiting Materiality all the groups of matter will be intermingled and amalgamated and there will be no indices like above, below, and sides of the groups of matter. Actually the Delimiting Materiality does not divide the groups of matter by divisions. It is somewhat like; appearance of a potential space when the two fingers are kept together. So, if the groups of matter are kept in close-relation; there will be a potential space among them. That is how the Delimiting Materiality divides the groups of matter. Such statement is known as " *Taddhamupacara* " in *Pali* -texts.

Perception:— (a) *Rupamariyada-paccupatthana* —When a meditator discerns this Delimiting Materiality, he will perceive the boundary-line nature of this materiality for the groups of matters, somewhat like the border lines of different countries. In fact, this Delimiting Materiality is not a real materiality. It is just the perception appears in the insight-knowledge of a meditator who is practising repeated contemplation. (*Mahati-2-101*). It is a mere dividing boundary when the groups of matter come in closed relation, and it is the perception of the appearance (= *Upatthamnakara-paccupatthanaS.*) in the Insight-knowledge of the meditator.

PAGE-96

(b) *Asamphutthabhava-chiddavivarabhava paccupatthana*..... There are two kinds of this perception (= *Paccupatthana*),

1. *Asamphutthabhava paccupatthana*,
2. *Chiddavivarabhava paccupatthana*.

1. *Asamphutthabhava paccupatthana*—(=The perception of the nature of non-touch). The meditator who is trying to discern the Delimiting Materiality ' which is the space among the groups of matter will perceive the nature that the Basic-elements in group of matter are not able to touch the Delimiting Materiality. So, it is perception of the appearance. (*UpatthanaS. ra paccupatthana*).

Pāli Quotation (Muliti-1-152)
(*Anuti-1-145*)

In the paragraph (637) of "*Dhamma sangani*" *Pali-text* the Buddha says— "*Asamphuttham catuhi mahabhutehi*" = The four Basic-elements can not touch the Delimiting Materiality. The Delimiting Materiality prevents mixing of groups of matter. The Basic elements of the group of matter which are separated by the Delimiting Materiality can not touch this materiality which is preventing them to be mixed with other groups of matter. Even the Basic elements which are at the periphery of the groups of matter; adjacent to the Delimiting Materiality can not come into contact with the Delimiting Materiality.

Among the so many groups of matter which exist in closed contact with each other to form solid and bulky masses, the Basic-elements in one groups of matter are in contact with Basic-elements of other groups. In these closely related groups of matter, there is direct contact among the Basic-elements. But there is a place where the Basic-elements are absent and that is the periphery or boundary of groups of matter. That boundary is the Delimiting Materiality (=Akasa dhatu). That is why the Basic-elements can not touch the Delimiting Materiality which is the boundary of these Basic-elements.

PAGE-97

If one accepts that the Basic-elements situated in each and every groups of matter can exist in contact with the Delimiting Materiality; there will be no more boundary among the groups of matter and among the various types of matter in a group. Then the various Basic-elements will be dispersed haphazardly. (= *Byapitabhava*= *Spreading*, nature), (This means that the Basic-elements among one groups of matter and other groups of matter can not be differentiated and all these Basic-elements will be amalgamated, intermingled and form homogeneous solid masses).

Why the Basic -elements of various groups of matter are scattered haphazardly ? Because; the nature that the Basic-elements can not touch the Delimiting Materiality is same as the nature that the Basic-elements in various groups of matter are in touch with each other. The Basic elements do not come into contact with the Delimiting materiality means that the Basic-elements do not spread to reach the Delimiting materiality. If one assumes that the Basic-elements can spread to reach the Delimiting Materiality, it means that the Basic -elements come into contact with the Delimiting Materiality. (The concept becomes totally different from the Buddha's teaching, j So, if (. he Basic-elements reach and spread to the Delimiting Materiality, the function of this materiality to provide the boundary is impossible, and there will be no materialities which are bounded together and the different types of matter or different kinds of groups of matter will be amalgamated. To prevent the wrong concept, it is better to accept the nature that the Basic-elements exist in the various groups of matter are not able to reach or contact with the Delimiting- Materiality.

And only with this concept, one will agree with the existence of the Delimiting Materiality which can separate the groups of matter, and the existence of groups of matter which are separated.

But; it is to be noted that it is difficult to understand the different existence of various kinds of Basic-element in aggregated groups of matter like " this Basic-elements are from this group, and that Basic-elements are from that group ". (Keep in mind that the statement is " difficult to understand " — and not " unable to understand".). Only the different types of matter exist in the same groups of matter are inseparable units (*Avinibbhoga dhamma*), and the Basic-elements of different groups of matter are not inseparable units. For that reason, the Original Subcommentary teacher mentions that the Basic-elements of one groups of unit can come into contact with those of other groups of unit. (Mulati -1-152.).

PAGE-98

Again it is to be noted that the Basic-elements of one group of matter are not mixed with the Basic-elements of the other group of matter. Although these do not mix together, these are able to come into contact with each other. (eg:- If one keeps two palms in contact; these will be in closed position, but not mixed into one unit). Likewise, although the Basic-

elements in adjacent groups of matter will come into contact with each other; there will be a place where there is no more Basic-elements. That place is the Delimiting Materiality. (Anuti-1-165.)

In other words; _ there is Delimiting Materiality (- *Akasa-dhatu*) which separates the various Basic= elements of different groups of matter and thus prevents the mixture of these elements. That Delimiting Materiality is nothing, but the space where the Basic-elements are naturally absent = it is the nature of absolute zero; and since it shows the place where the Basic-elements end; it is denoted as free from the Basic-elements or absolute zero place. That is why, that Delimiting Materiality is out of touch by Basic elements of the various adjacent groups of matter as well as the Basic-elements of one group of matter. (Anuti- 1-165)

This Delimiting Materiality is not real matter since it is not subjected to change in the natural processes. (ie:- *Ruppana lakkhana* = changeable character). But it occurs in association with real materialities which are. subjected to change by alterations in the natural processes. Therefore, this materiality is included in the classification of various real matter due to its interdependent nature (=*AvindbhSva*) with other materialities. That is why the Delimiting Materiality is metaphorically expressed as if, it is subjected to change in accordance with alterations in the natural processes. (ie:- "*Taddhamrripacara* " in Pali-texts. 1.

But the Buddha teaches to discern this Delimiting Materiality in "*MaharahulovSda*"-discourse (Ma-2-86) to Venerable *Rahula*. And again, the Buddha also teaches [<] *Pukkusliti*"-disciple to discern the Delimiting Materiality in the Meditation of 6-Elements which is mentioned in " *Dhlituvibhanga*-discourse. Ma-3-285. The meditation of Delimiting Materiality is also mentioned in " *Abhidhamma dhatu vibhanga* -Pali text. (Abhi-2-86.) Finally; in the Commentary, it is explained as follow :————

Atha. akasadha tum kasma vitth'aresTti, Up'adarpadassana. ttham. .

Hettha hi cotton mahabhutaneva kathitGni, no. upadarupam, Tasma '• iminU mukhena tarn dasseturh a. k'asadhatum vitth'aresi Apica ajjhattikena ak'S. sena paricchinnarUpampi pakatarn hoti.

Akasea paricchinnam, rupam yati vibh'utatam. Tassevam 'Svibh'dvattham, tampakS. sesinaya. ko. (M-ttha-3-97.)

PAGE-99

Pāli Quotation (M-A-3-97)

In this "*Maharahulovada*" -discourse (= *Sutta*), The Delimiting-Materiality is described widely by the Buddha. Why ? Because, the Buddha wants to teach to discern the Dependent- Corporealities (= *Upadd rupa* j. In the first part of his discourse, the Buddha teaches 4 Basic-elements in detail and. does not mention to discern the Dependent-Corporealities. So, based on the Delimiting Materiality; the Buddha wants to teach how to discern the Dependent-Corporealities; he describes the Delimiting Materiality in detail. In other words, if one can see the internal Delimiting Materiality with Insight-knowledge; all tile materialities which are bounded by this Delimiting Materiality will become obvious. That is why, the Buddha who is the leader and master of all kinds of beings, who are eligible to reach "*Nibbana*", teaches his disiples to discern the Delimiting Materiality, so that they will see the all kinds of materialities bounded by that Delimiting Materiality in their Insight-knowledge. (Ma-ttha-3-97.)

This Delimiting Materiality prevents mixture of one group of matter to another group of matter. The meditator who sees that Delimiting Materiality by-himself with Right-view (*Sammaditthi-nnana*) will perceive the group-of matter. And, only when he sees the group of matter; he will be able to analyse various types of matter in the group with the Insight-knowledge and obtains the knowledge of Ultimate-truth. Only when he gets the knowledge of Ultimate-truth, he will get the knowledge of non-self (= *Anatta- nnana*) finally only after getting pure, clean Insight-knowledge of the three characteristics (= *Ti-lakkhana* = 3 characteristics of existence), which are the Impermanence, the Suffering and the Non-self (*Anicca, Dukkha, Anatta*), he will attain the "*Nibbana*", through the Pathway and Fruition Consciousness (-- *Maggacitta, Phalacitta*). That is why the Buddha teaches to discern the Delimiting Materiality.

20. Bodily Intimation (*Kaya Vinnatti*)

Pāli Quotation (Vs-2-78)

1. The supportive, standing and moving ability of the Consciousness-produced Air-element on the physical body arising together, resulting special actions and bodily movements like forward and backwards movements. (ie:- Excessive natural power of the Air-element in the Consciousness produced Basic-elements). Character,
2. Showing thoughts and desires of moving person to another person .. (Function) Essence,
3. . It is the cause of the bodily movements Perception,
4. Consciousness-produced-Air-element *Proximate cause*.

PAGE-100

The Bodily Intimation is the moving materiality, collectively known as the physical body (*Rupa kaya*), the nature of which is taken up by the thought-process (= *Vithi citta*) of another person or that of moving person, by which the thoughts or desires of that moving person is communicated to another person, or the nature of perception of one's own movements by oneself (= *Vikara rupa*), and that the thought process is occurring along with the moving materialities.

That Bodily Intimation Materiality (= *Kaya vinnatti*), which is initiated by the excessive power of the Basic-elements especially the Air-element in the Consciousness-produced materiality will make movements of the associated Temperature, Action and Nutriment produced materialities in the body along with it. That is how the various movements like moving forward or backward etc:-- occur. (Visuddhi-2-78,)

Why it is called Materiality of Intimation : —"*Adhippayam vinnapetiti vinnatti*" = The peculiar action such as gesture of the hand which lets to know the one's thought or desires to another person is known as Materiality of Intimation. This materiality actually doe's not exist as a real matter in the Ultimate real sense. But in the present world; the clever and intelligent person can catch up such special actions ie:— "*Vinnayatiti vinnatti*" = One can know that Materiality of Intimation by seeing and hearing of these moving materialities, and so; it is known Intimation.

Bodily Intimation (= *Kaya vinnatti*) – *Ayanyettha attho-vinnapetiti vinnata, Kirn. vinnapeti? adhippayam, kena? kayena, kidisena? vipphandamanenati. dutiyanaye pana yathavuttana kayena vnnayatiti kayavinnatti* '. (Mahati-2-100.)

Vipphandamanena kayena atthano bhavam = Adhippayam vinnapeti vinnatti:--- The parts of the body used in beckoning (eg:- a gesture of the hand) is named the body or corporeality (= *Kaya*) in terms of metaphorical expression for objects with partially related function in *Pali text* (= *Ekadesupacara*. In other words the name "body" (= *Kaya*) of the whole physical body (= *Rupa Kaya*) is applied to the moving parts of the body (eg:-the hands in this case); and that parts of the body is metaphorically named as the body (= *Kaya*). And with this part of the body, a person shows his thought and desires to another person. So, it is known as "Intimation" (= *Vinnatti*). This phenomenon is seen not only in the human, but in the animals as well. The desire of one animal may be known by other animals or sometimes even by men. And this nature is produced by Materiality of Intimation.

When the various desires (such as; want to go forward; backward, want to flex or extend etc.) occur in the mind, that mind produces, Consciousness produced-nutritive-essence as 8th factor unit groups of matter. In that Consciousness-produced nutritive-essence as 8th factor groups of matter; there is Air-element and that Air-element has excessive natural power. It supports; pushes; pulls; moves forward and backward, flexes, extends or beckons with a gesture of the hand to all the materialities arising together, all of which are 4 conditions produced physical body (= *Catusamutthanika rupakaya*.).

PAGE-101

Thus, it produces peculiar actions. In doing so; the Consciousness of 5 Door-thought-process can't produce the Materiality of Intimation. Only the Consciousness of the Mind door-thought-process can produce the Materiality of Intimation. Among the 7 Consciousness of Impulsion (= *Javana citta*); in the Mind-door-thought-process (=Cognitive Series), first 6 consciousness of Impulsion produced Air-clement can prop-up; support and sustain the 4 Conditions produced materialities in the physical body (= *Rupakaya*), arising together with it. But it can not move these materialities. But the Air-element in the Consciousness-produced nutritive-essence as 8th factor groups of matter produced by 7th Consciousness of Impulsion, which, is supported and reinforced by the Air-elements in the Consciousness produced-nutritive-essence-as-8th factor groups of matter produced by six previous Consciousness of Impulsion, can produce various kinds of movements (eg; flexion, extension, looking forward, sideward, stepping forward, backward) of the all materialities in the 4-condition produced physical body arising together with it. Due to that Consciousness produced Air-element formed by 7th Consciousness of Impulsion (= *Sattama. javana. citta*), one can go, return and able to say, reaching one measure of distance (= *Eka: yojana* = 12.72 miles) or ten measures of distance (= *Dasa yojana* = 10 x 12.72 miles) etc—of the pathway. (Only when so many generations of groups of matter in which the natural power of Air-element becomes enormous, one can say, reaching one measure of distance or ten measures of distance = *Eka. yojana, dasa. yojana* etc. But one can not reach that distance with few generations of matter in which the. power of Air-element is enormous (Abhi-ttha-1-124-125.)

In the 4 Condition-produced materialities; Consciousness-produced matters formed by the Consciousness is not the Materiality of Intimation. There is a peculiar action which supports, pushes and prop-up all materialities arising together (= *Catusamutthanika rupakaya*) of the Basic-elements, especially the most powerful Air-element exists in the Consciousness produced nutritive-essence as 8th factor groups of matter. And; the name "Intimation" (= *Vinnatti*) is given to this peculiar action. (Abhi-ttha-1-115.)

That Bodily Intimation is not produced by Consciousness-produced nutritive-essence as 8th factor groups of matter, (ie:-It is not real matter and it is not Consciousness produced matter = *Citta samutthana-rupa.*). All the conditioned phenomena (= *Sankhata dhamma*) like; Impermanent, Suffering and Non-self, have nature of ageing and dying. So, these natures of ageing and death are also assumed as the Impermanent, the Suffering and the Non-self. Likewise, the Intimation (= *Vinnatti*), which is the peculiar nature (= *Vikara*) of the Consciousness-produced materialities is also assumed as Consciousness-produced matter. (The term "Consciousness produced" (= *citta-samutthana*) of the workplace (= *Thana*)— ie; -Consciousness-produced-nutritive-essence as 8th factor groups of matter in this case--is metaphorically expressed on the Materiality of Intimation (= *Vinnatti*) or Peculiar Materiality (= *Vikara rupa*), which, is the function of these Consciousness-produced materialities. Such expression is known as "*Thanupacara*" in *Pali-text.*). (Abhi-ttha-1-125.)

PAGE-102

This nature which can show the peculiar action (= *Vikara*) is known as "Intimation" (= *Vinnatti*). What does it show?

Ekam kayikakaranam. (Abhi-ttha-1-125.)

Kayadvarappavattam citta-kriyam, adhippayanti attho. (Mulati-1-72.)

The "Intimation " shows the Consciousness produced peculiar action which occurs at the Body-door (= *Kaya dvara*). That special action causes another person to know one's thought or desires.

Perceptible with Eye-Consciousness—Perceptible with Mind-Consciousness
(*Cakkhuvinnaya _ Manovinnaya*)

The various movements such as raising hands, feet, head etc which are in the pathway of Eye-transparent element can be perceived with Consciousness of Eye. But, the Materiality of Bodily Intimation is not perceptible with the Consciousness of Eye. It is appreciated only with the Consciousness of Mind (= *Manovinnana*). That's right. With the Eye or the Consciousness of Eye, one can only see the movements or gesture of the hands which produces moving image. (ie: Sense-object of sight = *Rupa-rammana*). (And that moving hand is the aggregates of matters. The Eye-consciousness perceives the colour-element (= *Vanna dhatu*) exists in the moving groups of matters, which is the sense-object of sight. But in case, of Materiality of Bodily Intimation, only the Consciousness of Mind-door (= *Manodvarika citta*) can perceive and ——— appreciate somewhat like " Some body wants to do this or that thing ". (Abhi-Uha-1-125.)

Pali Quotation (Abhi-A-1-360)
(*Mulati-1-151*)

Note that the Materiality of Intimation is the matter of peculiar action (= *Vikara rupa*) in which there is excessive power the Air-element or the Earth-element.

(A) The movements of parts of the body (eg: gesture of the hand), which is-used to show the thoughts and desires of a person, and taken up by the thought-process (= *Vithi citta*) of the another person (or even by an animal) is known as "Intimation" (= *Vinnatti*).

PAGE-103

The movement of parts of the body of an animal to express its thoughts and desires which is taken up by the thought-process of the another animal or by a human is known as "Intimation" (= *Vinnatti*) (Abhi-Uha-1-360.)

Remark by Venerable Pyay-Sayadaw

That Bodily Intimation is taken up by the another person, only when 4th Mind--door thought-processes occurs in that. person. Further explanation will be given. When sense-object (eg:-"Sight" in this case) is taken up through the 5 doors (Eye-door in this case), there will be 5 Door thought-process with Impulsion-consciousness (= *Javana citta*) which may be wholesome or unwholesome, and that process ends up with Subconsciousness. (*Bhavanga citta*). Next, the same sense-object of sight is taken up by the Mind-door thought-process (= *Tada-nuvattaka manodvarika vithi*) and Impulsion-consciousness of that process passes away with Subconsciousness. Finally, the another Mind-door thought process (= *Suddhamanodvara vithi*) takes up and decide the same sense-object of sight at the 5 Door and passes away again with Subconsciousness after series of Impulsion-consciousness. After the 2 turns of above Mind-door Impulsion-Consciousness (= *Mano-darika javana vara*), the third Mind-door thought-process occurs; and only at that moment, the Bodily Intimation is perceived. So, there are 4 Cognitive Series (= *Citicwithi*) occur successively, starting from the 5 door thought-process. The Bodily Intimation which is perceived by the 4th thought-process is finally taken up by the 5th Mind-door thought-process and by means of which the thoughts

and desires of a person is known to the another person. (Pyay-Visuddhimagga-nissaya-3-217.)

The above remark given by Venerable Pyay-Sayadaw is identical with the following statement given by Venerable Maing Khaing-Sayadaw.

Remark by Venerable Maing Khaing-Sayadaw

The development of the thought-processes which takes up the expression of the Bodily-Intimation is described according to the "*Dvaramula*" -Subcommentary and Chapter of Materiality in *Manimanju* scripture.

1. The present sense-object of sight exists in the moving hands, feet, head etc:- is first and foremost taken up by the Eye-door-thought-process. (= *Cakkhudvaravithi*).
2. That past sense-object of sight taken by the Eye-door is further perceived by the Mind-door thought-process known as "*Tadanuvattaka manodvaravithi*).
3. That past sense-. object of sight is further taken up by 3rd Mind-door thought-process (= *Suddhamanodvara vithi*) which decides the color and light of the sense-object.
4. Then, the 4th Mind-door thought-process which perceives the "Intimation" (= *Vinnatti*) follows.
5. Finally, the 5th Mind-door thought-process which is comprehensive to the thoughts and desires of the another person occur in the cognitive-series. (နိဗ္ဗာန် အာရုံစဉ်???????)

One man is beating another man. Everyone who sees this will certainly know the angry look of the beating man by means of thought-process which takes up the sequence of changing sense-object-of sight. A man is sitting peacefully and meditating, and everyone who see him know that he is meditating. All these phenomena are taken up with one Eye-door-thought-process and the four Mind-door thought process occur in the mind-continuum of the observer. This is the minimal example of occurrence of thought-process. Actually there are so many series of thought-processes. Similarly; when one dog bites another dog, the anger in one dog is known by the other, and everyone who sees the dogs knows the-anger. in these dogs.

PAGE-104

The ability of knowing tills internal nature is due to sequential occurrence of Eye-door and Mind-door thought' processes which can take up the sense-object-of sight and peculiar action (= *vikara*) of all the materialities exist in the moving parts of the bodies of these animals. So:

So : Vinnayati bhavo etayati vinnatti.

The peculiar action (= *Vinnatti*) of the Consciousness-produced-Air-element in all the matters of moving physical body (= *Rupa kaya*); of a person which causes another person to know his thoughts or desires, with the 5th Mind-door-thought-process starting from the Eye-door thought-process is known as "*Vikara*" or "*Vinnatti*".

Kayena vinnatti kayavinnatti.

The peculiar bodily action of one which causes another person to know his thoughts and desires with the 5th Mind-door thought process starting from Eye-door thought-process is known as Bodily-Intimation (= *Kaya vinnatti*).

(B) *Sayam vinnayatiti vinnatti, kayova vinnatti kayavinnatti.*

In this *Pali* phrase, the moving parts of the body is not considered. The peculiar matters (= *vikara-rupa*) of the Consciousness-produced Air-element exists in the materialities (ie: hands, feet--physical body = *Rupa kayo*), taken up by the 5th Mind-door thought-process is assumed as "Bodily Intimation" in terms of metaphorical expression in the *Pali* scriptures of the natural processes which are partially related in function (= *Ekadesupacara*).

(C) *Adhippayam vinnapetiti vinnatti. Vinnayatiti vinnatti. Kayena vinnatti kayavinnatti.* ' (Abhi-ttha-1-360.)

The moving body which shows the thoughts and desires of a person, or with that moving body which makes another person perceive that movement, ie: —

1. The action of bodily movement that causes another person to know one's thoughts,

2. That action is perceptible to another one.

That is why it is known as Bodily Intimation (= *Kayavinnatti*). (Abhi-ttha-1-360)

Essence-Function (*Kicca rasa*)—

If someone is going to beat with. a stick to a man or an animal, that man or animal will be frightened and runs about. The ability to know the thought and desire of the beating man is due to the Materiality of Intimation. So, this Materiality of Intimation has the ability to show the thoughts and desires (= *Adhippayapakascincirasa*) and this is the Function (Essence) (= *Kicca rasa*) of the Materiality of Intimation.

Perception:— Somewhat like a boat, steered to move in a particular direction, the Materiality of Intimation makes physical body or all the materialities of the body to move in accordance with the thought or desire of a person. The Materiality of Intimation guides the 4-Condition produced materialities = physical body to move towards the desirable direction.

PAGE-105

Actually, the Ultimate-real matters never shift from one place to another, and the life span of the matter are not long enough to allow such movements. It is the law of nature, that they are passing-away at the site of arising. But, new generations of matters are arising in new places forming continuum of materialities. At the moment, when one materiality is arising: —

1. There are so many materialities arising at the same time.

2. There are so many materialities which are passing-away, since the life-span of a matter is not longer than 17 Mind-moments.

3. There are so many materialities in standing phase in the period of 17 Mind-moments.

In this phenomenon of Continuum of Materiality, the new generations of matters occur or arise at the new different places. The Materiality of Intimation, produced by the enormous natural power of the Air-element exist in the previous Consciousness produced groups of matter which are in the standing phase controls the arising of newer materialities in the new places. That is why it is said, that the Materiality of Intimation control the various movements. On this account, a meditator will perceive in his Insight-knowledge, that the Bodily Intimation-matter is the cause of movements of the body (ie: — all the materialities =

4 Condition produced physical body). That is the perception of appearance (= *Upatthanakara paccupatthana*).

The Consciousness-produced Air-element exists in the same group is the Proximate Cause of that Materiality of Bodily Intimation.

Try to discern the 9 types or 12 types of Ultimate Materialities by analysing Bodily-Intimation 9 unit-group of matter (= *Kayavinnatti navakakalapa*) and Bodily-Intimation-lightness-12 unit-group of matter (= *Kayavinnatti lahutadi dvadasakakalapa*). Then select the Materiality of Bodily-Intimation and discern its Character, Essence etc. But, in this case, since the Air-element can not perform alone its function without the support of other 3 Basic-elements, it is described that the Bodily-Intimation is the peculiar action caused by the Consciousness-produced Basic-elements in which the power of the Air-element is excessive and enormous.

21. The Verbal Intimation (*Vacivinnatti*)

Pali Quotation (Vs-2-78)

PAGE-106

1. The peculiar action of Consciousness produced Basic-Elements in which the natural power of the Earth-elements is in excess; striking the Action-pro-Earth-element where the sound is produced or where the peculiar voice occurs. -----Character,
2. The communication which causes another person to know one's thoughts and. desires through the sound of speech— (Function) Essence,
3. The causative factor of sound of speech----- Perception,
4. . The Consciousness-produced Earth-element----- Proximate-cause.

About Making of Speech (*Vacibheda*)

Pali Quotation (Abhi-A-1-361)
(*Mulati-1-151*)

The peculiar voice by which one can differentiate among various words like "*Tissa*", "*Phussa*" etc is known as "Making of Speech". (In this case the word "*Vacibheda*" does not mean the passing-away phase" *Banga*). Before, the uttering, one makes movements of lips, thinking what. to say with Initial and Sustained Applications of the mind (= *Vitakka, Vicara*) which are known as Verbal-conditioned phenomenon (= *Vaci sankhara*), -but the sound is as yet not produced or not becoming sense-object of sound to be perceived by Ear-consciousness; and up to this time; the term "*Vaci*" only is given. It is not "*Vacibheda*" at that time. Only when it becomes sense-object of sound perceptible with Ear-consciousness and only when that peculiar sound makes comprehensible voice (ie:-sense-object of sound) taken up by the Ear-consciousness; that peculiar voice becomes or known as "*Vaabheda*" ("Speech).

That kind of speech (= *Vacibheda*) is not "Materiality of Intimation". Actually only the peculiar verbal action which produces that speech, and which causes another person to know the internal thoughts and desires (*Copana*) is known as Materiality of Verbal Intimation (= *Vacivinnatti*). That peculiar action is produced by very proximate arising and rubbing each others of the Consciousness produced Earth-element and 4 condition produced Earth-element (ie:-the Action, Consciousness, Temperature and Nutrient produced Earth-element) especially of the Action-produced Earth-elements exist in the Action-produced

groups of matter at the vocal place, ammounting to the production of the production of the voice. To this phenomenon, the term "Verbal Intimation-Materiality" (= *Vacivinnatti-Rupu*) produced by rubbing and striking (= *Vinnattighattana*) is given.

Pali Quotation

(a)

(b)

PAGE-107

(c) (Abhi-A-1-361)

(A) *Vinnayati bhavo etayati vinnatti.*

By means of speech or voice, the men or animals try to express the thoughts and desires in them, which is taken up by the another man or animal with thought-process (= *Citta-vithi*) to perceive the sense-object of that speech or voice. That peculiar sense (= *ViklHra*) taken up, causing another person or animal to know one's thought and desires (= *Bhava*) is known as "Materiality of Intimation" (= *Vinnatti*) (Abhi-ttha-1-361.)

1. When a person hears the voice (= Present sense-object of sound = *Paccuppana-saddarammana*) produced by another person, the Ear-door thought-process (= *Sotadvava vithi*) arises initially in his mind at the moment he takes up that sense of sound.
2. Next, that past-sense of sound (= *Atita saddarammana*) is further taken up by the Follower-Mind-door thought-process (= *Tadanuvattakamanodvara vithi*),
3. Next, 3rd Pure Mind-door thought process (= *Suddha manodvaaravithi*) which takes up the sense of name, (in terms of Conventional world) arises again which is followed by:--
- 4; The 4th Mind-door thought process which takes up the Verbal Intimation, arises and finally,
5. The 5th Mind-door thought-process which perceives the thoughts and desires of the another one arises.

(B) *Sayam vinnayatiti vinnatti, vaci eva vinnatti vacivinnatti.*

That verbal sound is perceptible to himself (= *Vaci-vinnatti*) or taken up by his (= *Vikara rupa*) own thought-process, thus it is known "Intimation" (= *Vinnatti*)--- *Vacaya samvaro sadhu* = which means "Restraint in verbal action is moral conduct" --- in such *Pali* phrases, the peculiar action (= *Copana*) in saying such words or the voice (= *Copana*) produced in saying such speech is known as Verbal Intimation (= *Vaci-vinnatti*).

(C) *Adipayam vinnapetiti vinnatti, Vinnayatiti vinnatti. Vacaya vinnatti vacivinnatti.*

By means of spoken voice which causes another person to know one's thoughts and desires or to know himself (= *Vikara rupa*) with that voice produced by himself, whatever it is, that peculiar action which expresses the internal desire (= *Bhava*) is known as Verbal Intimation (= *Vacivinnatti*). (Abhi-ttha-1-361.)

**About the Nature of Intimation Produced by Rubbing, Striking or Friction
(Vinnatti Ghattana)**

PAGE-108

Pali Quotation (Abhi-A-1-129)
(Mulati-1-76)
(Abhi-A-1-129)
(Anuti-1-82, 83)

Translation of statements in these Commentary and Subcommentary:-----

The mind arises to say this or that words, produces so many Nutritive-essence as 8th factor groups of materialities (= *Ojatthamaka rupa kalapa*)- which are composed of the Earth, the Water, the Fire, the Air, the Colour, the Odour, the Taste and the 8th the Nutritive-essence types of matter. Among these various matters; the Consciousness produced Earth-element (= *Citta samutthana Pathavi dhatu*) arises by striking or rubbing the 4 condition-produced materialities (= *Catusamutthanika rupa*) which are produced by the Action, the Consciousness, the Temperature and the Nutriment, and all are known as "*Upadinnaka*".

[Remark:----- In this case, "*Upadinnd*" means the Action produced Materiality only. But, the term "*Upadinnaka* " means all the Action, Consciousness, Temperature and Nutriment produced materialities in the whole body iii which the Action-Produced Materiality exists. (*Atthasalini bhasatika-2-158.*) Since all these 4 kinds of materialities are continuously arising, standing and passing-away so long as their respective causative factors are still in action, and at the same time, when the Consciousness-produced-groups of matters in which natural power of the Earth-element is in excess, are formed by the desires to say this or that words in the mind, the associated power of peculiar Verbal Intimation Materiality. (= *Vikara vacivinnatti rupa*) causes friction or rubbing among the previously arisen 4 Conditions-produced materialities— especially the Earth-element, and the Consciousness produced Earth-element.]

As soon as there is friction or rubbing between the Consciousness-produced-Earth-element and 4 condition-produced Earth-element, the sound (= *Sadda-rupa*) arises, somewhat like the sound is produced when the two sticks are striking. each other. This sound (= *Sadda rupa*) which is produced by the Consciousness is known as Consciousness-produced sound matter. (= *Cittasamutthana sadda rupa*). That sound (= *Sadda rupa*) is not the Materiality of Verbal Intimation. (*Abhi-ttha-1-129.*)

PAGE-109

Actually, there is a peculiar action which is the causative factor of friction or rubbing between the Consciousness-produced Earth-element and the 4 condition-produced Earth-element (= *Catusamuttf-iana pathavTdhatu*)----- especially the Action-produced Earth-element---and. that peculiar action only (ie:-to say this or that words) is the Verbal Intimation (= *Vacivinnatti.*) (*Abhi-ttha-1-129.*)

Calana--Ghattana: The different usage of these two terms is given in the Original Subcommentary.

Pali Quotation (Mulati-1-176)

In the chapter of Bodily Intimation (= *Kayavinnatti*) = Body-door (= *Kaya-dvara*); it is stated the terms "*Calana*" is used for moving or shifting of sites of the origin of newer generations of groups of matter due to the effect of the natural power of the Air-element exist in the previously arisen groups of matter. It is to be noted that all the groups of matter which have already arisen, never move from one place to another, ' because these obey the Law of Ultimate truth. So; the movement (= *Guiana*), means continuous "changing places of origin of new generations of matter ".

[Remark:—Only the Impulsion Consciousness of the-Mind-door can produce Materiality of Intimation or (= Materiality of Posture-*Iriyapatha rupa*). And among the 7 Impulsion-Consciousness of the Mind-door thought-process, the Consciousness produced Air-elements resulted by the earlier Impulsion Consciousness can not move the materialities arising together (= *Sahajata rupa*). But these can support the materialities formed by 7th Impulsion Consciousness to arise in newer places. The Consciousness (ie:-7th Impulsion Consciousness) produced Air-elements exist in the Consciousness-produced Materialities; when gets support from Consciousness-produced Air-elements of Consciousness-produced materialities formed by the previously arisen 6 Impulsion Consciousness, are. able to shift the arising places of materialities (= 4 condition produced physical body" *Sahajata Catusamutthanika rupa kayo*.) at newer sites. And the nature of ability to shift the arising at newer places is known as "*Calana*" -ability to keep in motion.

So; ---

"*Sattama attend pana samutthitd wyodh'atii hettha chahi cittehi samttitam vayodh'atum upatthambhanapaccayam labhitva attand sahajdar'n nipak'ayam. pa. wietum. pa. sakkoti. "* (Abhi-ttha-1-124.)

Translation:— The consciousness-produced Air-element formed by the 7th Impulsion-Consciousness is able to keep all the materialities (= 4 condition produced physical body) arising together in motion; when it gets support from the Consciousness produced Air-elements formed by previous 6 Impulsion-consciousness.]

In case of Verbal Intimation, the term "*Calana* " is not used. -Instead, "*Ghattana*" is used, which. means that, due to the action of Verbal Intimation; the Consciousness produced Basic--element and 4 condition produced Basic-element arise in close-relation amounting to produce sound; and that nature of arising of sound by rubbing; striking or friction is known as "*Ghattana*". That is right.

PAGE-110

The peculiar action of rubbing and striking among the Basic-elements should be termed "*Ghattana*" (= Striking or rubbing). The sound is produced at the time of striking. It is not produced after striking, ie:— it is not a sequential phenomenon. (Mulati-1-176.)

Which Mind produces the Consciousness produced-Nutritive essence as 8th factor-materialities?

Here, one may ask, — Which is the causative mind that produces Consciousness produced Nutritive essence as 8th factor matters in which Consciousness produced Earth-

element exists or which is the causative mind which forms the Consciousness-produced Earth-element that in turn produces the Verbal Intimation Materialities? The answer is :----- In the ordinary Noble Learner (= *Puthujjana. Sekkha*); it is the Mind-door thought-process which is composed of wholesome or unwholesome Impulsion-consciousness.

According to the Commentary Teacher, when the Consciousness produced Earth-element formed by the 1st Impulsion-consciousness strikes the 4 condition produced Earth-element (especially the Action produced Earth-element) exist in the pharynx and larynx where the various alphabet are uttered; the sound is produced.

If the above phenomenon is true, (ie:-the sound is produced when the Consciousness produced Earth-element due to 1st Impulsion-Consciousness strikes the 4 Condition produced Earth-element (especially the Action produced), there will be 7 steps of sound or 7 kinds of alphabet for 7 Impulsion-consciousness in each and every thought-process. But, there is no such thing in practice. Therefore, the later Subcommentary teachers ask to accept the concept of the Commentary teacher with careful analysis. . (Refer to AnutT-1-82-83.)

No Need to Get Support from Pre-existing Earth-Elements

Thinking to say something by Impulsion consciousness in past thought-process are known as preliminary conditioned phenomena (= *Pubba-bhisarikhara*). These thought-processes are preparatory steps to utter words. And to this preliminary Conditioned phenomena, the term "Repetition". (= *Asevana*) is given in the *Pali* canonical texts of Discourses (= *Suttanta Pitaka*). In his teaching on the phenomenon of Conditionality (= *Patthana Sutta*) the Buddha does not mention the Repetition condition (= *Asevana paccaya*) in cases of separate thought-processes. So, the term "Repetition" (= *Asevana*) is given to preliminary conditioned phenomena (= *Pubbabhisankhara*) only in *Pali text* of Discourses (= *Suttanta Pitaka*).

"In the chapter on Bodily Intimation ie:-The speech on Actions at Body-door (= *Kayakammadvāra-katha*), it is described that the Air-element produced by the previous 6 Impulsion-consciousness supports the Air-element produced by 7th Impulsion-consciousness. But, in case of the Verbal Intimation, ie; -The speech on Verbal action (= *Vacikamma dvāra katha*), the Earth-element produced by the previous Impulsion-consciousness needs not to support Consciousness produced Earth-element which form Verbal Intimation.

This is the statement described by the Commentary-teacher. In his statement, it means that in the rubbing of Consciousness produced Earth- element and 4 condition produced Earth- element (especially "the Action produced), according to text of discourse, the Preliminary conditioned phenomenon produced by previous Impulsion- consciousness of Mind- door thought process (ie:- Repetition-condition in terms of phenomenon of Conditionality) has already occurred; so that the Earth- element of 1st Impulsion consciousness is able to strike the 4 condition produced Earth- element (especially the Action produced). That is why it is stated, that there is no need to support in-rubbing among the Earth- elements by previously occurred Earth- elements. (Refer to *Abhi- Una- 1- 129.*)

PAGE-111

Accept only after Reasonable Thinking

Upatthambhanam atthTti vicaretvā gahetabbam. (Mulati-1-76.)

Purimacittasamutthan'aya upattharnbhana kiccampi natthi" when one wants to say something, the Earth- element produced by 1st Consciousness strikes with other Earth- element. So, there is-no need to support the Earth-element produced by Consciousness occurring later by the Earth- element produced by previous mind in striking. (Abhi- ttha- 1- 1. 29.). That. is the concept of Commentary teacher. The Subcommentary seems not to accept it. The Subcommentary teacher wants to accept existence of supportive Earth- element prior to striking process. So, he suggests to accept whether there is supportive role or not. of the Earth- element produced by pre-existing Consciousness on the Earth- element produced by later Consciousness, with reasonable thinking. (*Mulati-1-76.)*.

In this discussion; the concept of Original Subcommentary (= *Millatika*) teacher is accepted by the Detail- Subcommentary (= *Anutika*) teacher; and he explains as follows:.....

As already explained, the nature of rubbing among the Earth- elements is accomplished by the 1st. Impulsion-consciousness. But; there may be some differences in the repeated production of a syllable. The precise clear and distinct sound of a syllable is produced by the process of rubbing among the 4 condition produced Earth-element (especially the Action-produced) and 7th Impulsion-consciousness produced Earth-element, and that process is supported by Repetition- condition (= *Asevana paccaya*) from the process of rubbing among the 4 condition produced Earth-elements ax-id the Earth-elements produced by the pre-existing Impulsion-consciousnesses. Therefore, the concept, that the Earth- element produced by pre-existing Impulsion consciousnesses has no supportive role ("*Upatthambhana kicca*) to the Earth-element produced by the following Impulsion consciousness is not acceptable. It means that definitely there is the supportive function (= *Upattharnbhana kicca*). But; all these statements should be accepted only after reasonable thinking. (Anuti-1-82-83.)

The Explanation by Venerable Mahagandayone Sayadaw

It seems that both, Original Subcommentary and Detail-Subcommentary teachers do not want to accept the statement- " that there is **no** supportive function (= *Upatthambhana kicca*) of pre-existing Consciousness -produced Earth-element on the following Consciousness produced Earth-element". given by the Commentary teacher. But, venerable Mahagandayone Sayadaw, explains in his Subcommentary (= *Atthasalwubhasat'lkd*) (2-589.) as. follow:—————

To produce a sound for one alphabet, even the short alphabet may need time-taken equal to a snap of fingers, during which so many Impulsion Consciousness thought-process will occur. So, pre-existing Consciousness produced Earth-elements formed by passing Impulsion-consciousness thought-processes are repeatedly rubbing the 4 Condition produced Earth-elements (especially the Action- produced) exist at the various sites where the sound of. alphabet is produced, and supporting to produce sound before the production of clear and distinct alphabet (or syllable). This phenomenon is basis for the production of clear sound. So; the Commentary teacher mentions that; just for the rubbing process (= *Ghattana*) there is no role of support (= *Upatthambhana kiccā natthi*) by the Earth-element, produced by previously occurring Impulsion- consciousness on the Earth-element produced by the

following Impulsion-consciousness; and the statement. described in the Commentary seems to be suitable. (*Atthasalinibhasatika- tika-2-589.*)

PAGE-112

Although the sound is generally produced, by striking between the Consciousness produced Earth-element of the, speaker and the Earth-elements exist in the 4 Conditions produced Earth-elements (=especially the Action produced Earth-element) at the site of voice-production, the clear, distinct voice is formed by the Materiality of Intimation. In other words; the production of clear and distinct sound of speech is the result of the Verbal Intimation due to the Earth- element (which has excessive natural power) situated in the materialities formed by the mind to speak and Basic-elements. That is why the Verbal Intimation is the communication of one's thoughts, or desires through the sound of speech (= *Adhippayam vrnKapeti*). Somewhat like a person who knows the shop where the alcoholic drinks are sold by seeing the sign- board of the shop; by reading the sign of Verbal Intimation, the another- person knows one's thoughts or desires, ie:- the Verbal Intimation is appreciated by the listener with the thought- process of the Mind- door, (- *Vinnayatiti vinnatti*). That is why, it is described that the Verbal Intimation causes listener to know the speaker's thought or desire and by means of which the listener knows the thought or desire of the speaker.

Remark by Pyay Sayadaw

The Verbal Intimation is the characteristics of peculiar alteration ("*Vikara*") in the Consciousness- produced Earth- element (formed by the 7th-Impulsion-consciousness of a person who wants to speak), when it strikes or rubs the Action produced Earth-element, already existed at the sound sites. (= thana), By means of sound of speech; the living beings (= *Savinnanaka*) make to know their thoughts or desires to another person and at the same time, by means of. Verbal Intimation (= *Vacivinnatti*), they make to know their thoughts to the another person who perceive that intimation with 4th- Mind- door thought- process. So, the Verbal Intimation is the peculiar alteration (= *Vikara*), resulted from the striking and rubbing between the Action produced Earth- element present at the 5 kinds of site of sound production (ie: 1. Throat, 2. Oropharynx, 3. Tip of tongue, 4. Teeth and 5. Lips) and the 7th Impulsion-consciousness produced Earth-element (which, is not connected with the Earth-elements which cause (1) spoken words, (2) devices of sound production and (3) speaking processes.) of a person who is intending to speak this or that words. That is why the Verbal Intimation is produced by special effort (= *Byapara*) to speak, somewhat like the effort exerted by a strong person when trying to lift up a heavy rock. And that Verbal Intimation is not the nature which is heard with Consciousness of Ear. (= *Sotavinnana dhamma*). It is taken up only with the mind (= *Manovinnaya dhamma*). It is (ie:- Verbal Intimation) not present in the sounds of non-living subjects (= *Avinnaka*). It is present only in the sounds of living subjects (= *Savinnanaka*) such as human and animals. What a great wonder.

PAGE-113

In a person who is going to do something, to speak something, Cognitive series or thought-processes develop in his mind which consist of following consciousness in series •=*Manodvdravithi* = Mind door thought-process (ie:-Pre-existing Subconsciousness, Excitation

Subconsciousness, Broken- off Sub-consciousness, Mind-door Adverting Consciousness, seven Impulsion- Consciousness, two Registering- Consciousness and falls to Subconsciousness or Non-cognitive Consciousness, (= *Attha bhavaaga* = *Calana bhavanga*, *Upaccheda bhavanga*, *Manodvaravaravajjana*, *Javana-citta*, *Taddrammana* and *Bhavanga*). Among these sequential minds, the 7th Impulsion-consciousness produces the 8 units or types of matter which are the Earth-elements, the Water-elements, the Fire-element, the Air-element, the Colour, the Odour, the Taste and the Nutritive- essence. Only the Consciousness produced Air-element in these units of matter, can cause Bodily Intimation resulting movement of hand, feet etc. The Air-elements produced by 1st to 6th Impulsion-consciousness can only support the already existing Air-element, and they can not produce movement of hands and ' feet etc. This is for Bodily Intimation. Again, only the Consciousness produced Earth-element among the described units of matter can strike the Action produced Earth-element exists at the sites where various alphabet are produced; and pronouncing the voice of the alphabet like "Ka", "Kha" are sounded. The Earth-elements formed by the 1st to 6th Impulsion-consciousness can only support the Earth-element (which is produced by 7th Impulsion-consciousness) and these can not produce voices of/the alphabet like "Ka", "Kha" etc. And this is for the Verbal intimation. This process is somewhat like following example. If a cart is pulled with seven yoke of oxen, the seventh yoke of oxen nearest to the cart will exert direct pulling force. The oxen of the remaining yoke only give supportive function.

In case of Verbal intimation, the Sub-commentary teachers accept that the sound is produced only at the moment when the Earth element is produced by the 7th Impulsion-consciousness. But the Commentary teacher accepts that the sound is produced even at the moment when the Earth-element of 1st Impulsion-consciousness strikes the Action produced Earth-element.

If the sound is produced even at the moment when the Earth-element of the 1st Impulsion-consciousness strikes, there will be 7 steps for 7 alphabet resulted from 7 Impulsion consciousness in every thought- processes. But there is no such phenomenon. So; the Sub-commentary teachers reconsidered the concept of the Commentary teachers.

1. In this two kinds of Materialities of Intimation, the moving body parts or the spoken words are first perceived by Consciousness of Eye or Consciousness of Ear respectively. (= First Eye-door thought process or First Ear-door thought process-*Cakkhu-dvara vithi*, *Sotadvara vithi*).

2. Then, the second Mind-door thought process continuously takes up the above past sense-object (ie:- moving body parts or spoken words) and consider the nature of that action and sound.

3. Then, the third Mind-door thought -process accepts the nature **of** the action or sound of the present time in relation with above perception of sense.

4. Next, the 4th Mind-door thought-process takes notice **of** the peculiar **action** of that nature and knows that this changing peculiarity **is** Materiality **of** intimation.

5. Only after then, depending on this peculiar changes, the 5th Mind-door thought-process knows the thoughts and desire (= *Bhava*) of the person who makes bodily, movements or speaks.

To appreciate the phenomenon; that the thought or desires of a person is known by the Materiality of intimation, take the statement given in the following *Pali* verse (= *Gatha*).
"Saddam pathamacittena, titam dutiya cetasa. Namam tatiya cittena, attham catuttha cetasa"

PAGE-114

During the summer time, in an 'area where water is scanty, one. may make a mark with a post or palm-leaf at a site where the water is available under the ground. The another person who wants to get water first see that mark and knows with past experience that the present of water underneath the ground is always marked with such action. He also knows at present, that water is available underneath the ground, because of the peculiar action of making a mark to indicate the presence of water. He knows the desire of the first person to use the underground water. By this example, the relation between the nature of Materiality of intimation and the expression of thoughts and desire are easily understandable.

(*Visuddhimagga nissaya-3-220-222.*)

May I Request

Up to now, the explanations given by Commentary, Subcommentary *Pali* text, and the remarks and discussions given by the elder venerable teachers have been described. All these remarks and discussions are not the subject for ordinary philosophers (= *Atakkavacara*). And all these phenomena should be realized by oneself with Knowledge of Penetration (- *Pativedannana*) and Knowledge of Reasoning (= *Anubodha nnana*) and these are based. on the Knowledge of Right-view. (= *Sammaditthi nnana*). So, a meditator who believes that that he has already obtained these knowledges, he should endeavour, to discern these phenomena by himself. Since the teachings of the Buddha have the value of Realization by oneself (- *Sanditthika guna*); try to learn the Ultimate truth with one's own knowledge of Right view (= *Sammaditthi nnana*).

In Verbal intimation:————— There are two statements,

1. The Consciousness produced Earth-element strikes the Action **produced** Earth-element, and
2. The Consciousness produced Earth-element strikes the 4 Condition produced Earth-element,

Are these two statements opposite to each other ? The **answer** is " No ".

The statement that "The Consciousness produced Earth-element strikes the Action produced Earth-element" is tire explanation to state the Action produced Earth-element, as fundamental factor (= *Padhana naya*). Since there is fundamental factor, there are other nondecisive factors such as the Consciousness, the Temperature and the Nutriment produced Earth-elements. So; the above two statements are not opposite to each other.

The nature of good or bad voice is related to the Volitional action of the past. In the Discourse of Characters (-*Lakkhana sutta*) described in the collection of long Discourses, *Pahthika* section. (= *Dighanikaya pathika vagga*) (Di-3-141.)it is stated that the Buddha has the voice similar to that of "*Brahmassara* " the king of *Brahmas* which has 8 characteristic features. This voice is one of the characteristics of the Great Noble man (= Mahapurisa) attained by the basic practices to fulfil ten Perfections (= Parami) in the past lives and these are the foundation to achieve the knowledge of Perfect Enlightenment (= *Sammāsambodhi nnana*). It is obtained by developing the Great Meritorious deeds such as abstaining from telling harsh or rude words (= *Pharusavaca*) lead by Abstention mental concomitant= *Virati* and telling smooth, mild speech lead by Loving- kindness mental concomitant (= *Metta*).

So; the quality of voice (ie:- sweet or husky) is dependent on the past Volitional actions. That past volitional action can form Action produced materialities at the site where the voice is generated.

PAGE-115

1. Action produced Earth-elements are like the hollow wooden block.
2. Consciousness produced Earth element resembles the hammer.
3. The Consciousness produced Air-element which arises together with the Consciousness produced Earth-element resembles beating hand which uses the hammer.

If these 3 factors are in good condition, the resultant sound is good. If one or more of these factors are defective, it is hard to produce good sound. Among these 3 factors; factor two and three are obtainable by every persons. The factor one is related to the past Volitional action. So, the Action produced Earth-element due to past Volitional action determines the quality of voice,

But, the Action, the Consciousness, the Temperature and the Nutriment produced matters are interspersed like rice flour and turmeric flour at the site of sound-production such as throat, and these are intermingled very closely. And these groups of matters are very tiny ones, the size of which may be same or very much smaller than finest particles ever known. (=Paramanumru). In such situation of closely arising groups of matter; if the Consciousness produced Earth-element strikes the Action-produced Earth-element; it will also strike the nearby Consciousness, Temperature and the Nutriment produced Earth-elements, So, along with the fundamental factor (ie:- the Action produced Earth-element), all the remaining non decisive factors like the Consciousness, Temperature and the Nutriment produced Earth-elements are also accounted for the production of sound in the way of *Pali* expression (= *Padhana naya*), Therefore; the phrase that " the sound is produced by striking between the Consciousness produced Earth-element and the 4 condition-produced Earth-element " is the expression known as " *Anavasesa naya* " (=Presentation as no exception) in *Pali* texts denoting all the materialities, may be fundamental or not (= *Padhana, Apadhana*).

Is it Dependent Materiality?

(= *Upada rupa*?)

The Bodily Intimation is due to changes in the Consciousness produced Air-element (=Peculiar action = Materiality as Alteration = *vikara-rupa*) and the Verbal Intimation is due to the Consciousness produced Earth-element (=Peculiar action = Materiality as Alteration= *vikara-rupa*). So, since this twin Materialities of Intimation are not 4 Basic-elements, there may be a question, whether these materialities are Dependent-Materialities or not.

These two materialities are formed and depend on the 4 Basic elements. Movement is due to excessive kinetic nature of the Air-element and speaking is due to excessive kinetic nature of the Earth-element. So, these two elements are leading factor and expressed as leading nature in *Pali* text (= *Ukkattha naya*). But these are inseperable matters (= *Avinibbhoga rupa*), and these two materialities occur in relation with 4 Basic-elements. So the two Materialities of Intimation are Dependent-Materiality. (Pyay-Visuddhimagganissaya-3-222)

Thambhanati vSyodhatu adukanam bhutanam thambhana-khro vinnattiti attho. (Mula-ti-1-151.)

So, the described statements are in agreement with the Original Subcommentary (= *Mulatika*).

Meditation:—Try to analyse the Verbal Intimation 10 unit-group of matter (= *Vacivinnatti dasaka kalapa*), or Verbal, intimation-sound, lightness 13 unit group of matter (= *Vacivinnatti sadda lahuta terasaka kalapa*). in which the Verbal Intimation exist. Then select the Materiality of Verbal Intimation from the respective materialities and discern the Character, Essence etc-of the Verbal-Intimation as described above.

PAGE-116

22. Materiality of Lightness
(*Rupcissa lahuta*)

Pāli Quotation (*Abhi-A-1-362, Vs-2-78*)

1. (a) The lightness of Real matters produced by the Consciousness,
(b) The lightness of Real matters produced by the Temperature,
(c) The lightness of Real matters produced. by the Nutriment, __Character,
2. It abolishes the heaviness of the above materialities, __ (Function) Essence,
3. It accelerates **the rapid shifting** of the above materialities, _____ **Perception,**
4. Above light Real matters _____ Proximate cause.

23. Materiality of Softness
(*Rupcissa muduta*)

Pāli Quotation (*Abhi-A-1-362, Vs-2-78*)

1. 1 a) The softness of Real Matters produced by the Consciousness, (b) The softness of Real Matters produced by the Temperature,
(c) The softness of Real Matters produced by the Nutriment, __Character,
2. It abolishes the roughness of the above materialities, _ (Function) Essence,
3. The agreement **with** the activity **of** all bodily function, _____ **Perception,**
4. Above soft Real Matters, _____ Proximate cause.

24. Materiality of Wioldiness
(*Rupassa fcammannata*)

Pāli Quotation (*Abhi-A-1-362, Vs-2-78,79*)

PAGE-117

1. **The wioldiness or pliancy of the Real Matters produced by the Consciousness,**
the Temperature and the Nutriment, _____
Character,
2. It abolishes non-pliancy of the bodily actions due to (abnormal Air-element.)
_____ (Function Essence),
3. The nature of non-weakness of the above materialities, _____ Perception,
4. Pliancy of the Real Matters in their function, _____ Proximate cause. .

All these 3 Materialities of Lightness, Softness and Wioldiness never occur seperately. If one kind arises; the remaining two also arise. These exist in the Consciousness. Temperature and the Nutriment produced matters and occur simultaneously. So it is difficult

to know the separate nature of these materialities. Although it is difficult to know the separate nature; these have different and separate characteristics.

Dhatukkho vatapittasemhapakapo, rasadidhStunam va vikara vattha. .

Dvidh'a vuttopi atthato pathavuihatvadmam dhatunamyeva wkdroti datthabbo. Patipafckha. paccaya sappwautu = hara lAkkhitta cittata'. (Mahati-2-101)

These materialities occur in the animate subjects, especially in sentient beings of sensuous sphere. Due to desperate or unstable mind, inappropriate weather, unpleasant climatic conditions, and unbalanced nutriment, there will be abnormalities in the wind, bile and phlegm of the body resulting the changes in the 4 Basic elements. If the Water-element which has the function of organization = *Abandhana*) becomes abnormal or excessive, the remaining Consciousness, Temperature and Nutriment produced materialities become heavy and less alert. At that time, there will be no Materiality of lightness.

If the Earth-element which has the characteristic of hardness (= *Kakkhala*) becomes abnormal or excessive, the 3 condition produced matters (= *Tijamphanna rupa*) such as Consciousness, Temperature and Nutriment produced materialities become less firm or more rigid. At that time, there will be no Materiality of Softness. .

If the Air-element which has supportive characteristic (= *Vitthambhana*) become abnormal or excessive, the 3 conditions produced matters (ie:- Consciousness, Temperature and Nutriment produced materialities) become less mobile or freely mobile. And at that time, there will be no materiality of Wioldiness. (The Fire-element in other words, is the Temperature which can. form the Temperature produced matter by itself; it always changes in association with alteration in other conditions.)

At a time, when there is stable, clear mind, pleasant climatic condition and taking well balanced nutrition, all the bodily functions are well done, and at that time there will be normality in the Consciousness, Temperature and Nutriment produced Basic-elements.

At that time; somewhat like the bodily action of a healthy person which is active, and alert; the 3 condition produced materialities will be active; light and aleil. The features of alertness, lightness of the 3 condition produced matter (= *Tijanipphanna rupa*) becomes obvious. And these peculiar alertness, lightness of the 3 condition produced matters is also known as Materiality as Alteration"(- *Vikara rupa*). So, that Materiality as Alteration is the Materiality of Lightness (*Rupassa lahuta*). (Abhi-A-1-362.)

PAGE-118

At that time, when the 3 condition produced matters become soft, and flexible, (like well treated, well washed leather); these are able to accept various treatments in accordance with the desires of a person. (The body of a meditator becomes flexible and soft, so that. it is not necessarily to be supported nor propped up intentionally, like higher psychic power capable of producing many miracles (= *Iddhipada*). To this, peculiar softness and flexibility of the 3 condition produced matters, the term Materiality of Softness as Alteration (= *Rupassa muduta vikara rupa*) is= given. (Abhi-ttha-1 -362-363.)

At that time, when the gold is properly treated; a person is able to make ornaments like gold-necklace, gold-ear-rings. Similarly, when the body of person is smart and powerful, he becomes able to perform meritorious deeds, such as Charity (= *dana*). Morality (= *Sila*) and Meditation (= *bhavana*) without hesitation. This peculiar nature of 3 condition produced

matters being smart and able to perform various actions is known as Materiality of Wioldiness as Alteration. (= *Kammannata-vikara rupa*). These are the differences in character among the three kinds of Materiality as Alteration. (= *Vikara rupa*.) (Abhi-Uha-1-362-363. Visuddhi-2-79.).

1. The Materiality of Lightness (= *lahuta*) is like a person free from diseases'.
2. The Materiality of-Softness (= *Mnduta*) is like a leather; washed and treated with a special process.
3. The Materiality of Wioldiness (= *Kammannata*) is like a properly **treated** gold.

In this case, the Materialities like/well processed leather, and properly treated gold are given here as good examples of the Materiality of Soft-ness and the Materiality of Wioldiness respectively. Actually these materialities do not possess Materialities of Softness and Wioldiness (ie:-there **is no** Materialities of Softness and Wioldiness - Materiality as Alteration *Vikara rupa* in these matters. The Materiality of Lightness (= *Lahuta*); the Materiality of Softness (= *Muduta*) and the Materiality of Wioldiness (= *Kammannata*) are the properties of living beings who possess the various Faculties (= *Indriya-baddha*) like Faculty of Eye, Faculty of Ear etc. These are the features in continuum, of materialities (= *Rupa santati*) of living beings, not in the continuum of materialities of non-livings, which do not possess various Faculty of senses (= *Anindriya baddha*). (Mahati-2-102.)

Patipakkhapaccciya sappayautu-ahara vikkhattacittata. Te ca tam tamvikarassa visesapaccaya-bhavato vutta, avisesana pana sabbe sabbesam paccaya. Yato nesam cmmamnavijahanam. (Mahati-2-101,102.)

1. Fine, temperate climate ____ is the main cause of the Temperature produced Materialities of Lightness, Softness and Wioldiness.
2. Well balanced diet _____ is the main cause of the Nutriment produced Materialities of Lightness, Softness and. Wioldiness,
3. Cheerful, stable, calm mind _____ is the main cause of the Consciousness produced Materialities of Lightness, Softness and Wioldiness,

PAGE-119

But, generally speaking, all these main causes are the major factors for generation of all the Temperature, Nutriment and Consciousness produced Materialities of Lightness, Softness and Wioldiness. (ie:-the causative element of all the materialities). Therefore, all these materialities are intermingled and interdependent among each other. (*Mahati-2-101-102.*)

Non-living World and Volitional Action-Produced Material World

If Materialities of Lightness, Softness and Wioldiness are possessed by the living beings composed of various Faculties of Eye, Ear, etc:-What about the cotton wool and' silk cotton?. These are also light and soft. But these non-living substances (ie; cotton wool and silk cotton) have no Materialities of Lightness, Softness and Wioldiness in terms of Ultimate truth sense. (= *Paramattha*). These substances have no Basic elements which are the causes of Materiality of Lightness, Softness etc. ' Therefore these substances are light and soft only in terms of Conventional Truth sense. (*Paramattha*).

Indriyabaddhepi rupabhava na santi dandhattakaradi-dbatukkhobha bhavato. (Mahati-2-102.)

There are no Materialities of Lightness, Softness etc; in materialities of Fine-material Sphere (= *Rupabhava* = *Rupavacara*), although they have associated Faculty of Eye (= *Cakkhu Indre*) etc; because of lack of abnormal alteration in Basic elements, (MahatT-2-102.)

Kasma pana kamajarupesu lahutadayo na hontiti ? Paccuppa-nnapaccayS. pekkhatta. ATiHathS. sabbaddbhawhi lahatSd'ihī bhavitabbam siyati. (Mah= F-2-102.)

All these 3 kinds of Materiality as Alteration do not exist in the Action-produced materiality. These occur only in' the Consciousness, Temperature and Nutriment- produced Materialities. Why ? Because, the Volitional Action was done in the past (=Atita) and these Materialities as Alteration occur in accordance with present causes. If one does not accept this statement, and assume that these Materialities as Alteration exist in the Action-produced Materiality; the Materiality of Alteration (ie:- Lightness, Softness and Wioldiness) may be always and permanently arising in the body. But there is no such phenomenon. Actually, these Materiality as Alteration can arise only when there is occasion. Therefore, the Materiality as Alteration are present only in the 3 condition produced materiality (= *tija rupa*). (Mahati-2-102.)

Meditation: — Analyse a group of matter (= *Rupa kalapa*) in which the Materiality as Alteration (= *Ldhuta, Mudutd, Kammemnata*) exist; from the Consciousness, Temperature and Nutriment produced groups of matter all of which can occur at 6 Doors (= *Dvara*) and various types of Body parts (= *Kotthasa*) at appropriate occasions. Then discern the Ultimate Real Matters from that particular group of matter. Then discern the Materiality as Alteration (ie:- *Lahuta, Muduta* etc) from that Ultimate Real matters in terms of the Character; Function. (Essence) etc etc. '

25. Materiality as Growth (*Rupcissa upacaya*)

Pāli Quotation (Abhi-A-1-363, 364, Vs-2-79)

PAGE-120

1. (a) The **nature** of appearance of Real materialities at the very beginning of one's life,
(b) The nature of increasing development further to reach completion of the Faculties (= *Indre*) ————— Character,
2. The nature of appearance of materialities in the future- (Function) Essence,
3. (a) The nature of these materiality showing that they are the Materialities Perception,
(b) The nature of complete development of Real Materialities ————— Perception,
4. ' Presently arising Materialities ————— Proximate cause.

26. Materiality as Continuity (*Rupassa santati*)

Pāli Quotation (Abhi-A-)

1. The nature of continuous arising of the Real matters after, the completion of the Faculties _____ Character,
2. It links the continuity of Real materialities _____ (Function) Essence,
3. The nature of linking the development of the Real materialities in continuum _____ Perception, '
4. The materialities arising in continuum _____ Proximate cause.

Arising at the Beginnmg, Arising at the Beginning and Increasing Later and Appearing in Continnum. = Acaya-Upaccaya-Santati)

In this instance, following remark is given in the *Visuddhi magga* Commentary (with reference to *Atthasalini* Commentary):— (Visuddhi-2-79-80).

These two types of Materialities as Growth and Continuity ' (=Upacaya, Santati) are collectively known as "Materiality of Arising (=Jati rupa). But, depending on the peculiarity in the appearance of these matters and depending on the will ("Ajghasaya) of the disciples and beings eligible for *Nibbana* (Veneyya) in the assembly, the Buddha teaches by dividing it (ie:- Materiality of Arising) into two time periods as Materiality as Growth (= Upacaya) and Materiality as Continuity (=Santati) in his concise discourse (- *Uddesa desana*). In terms of Ultimate reality, these two Materialities as Growth and Continuity are not different since these are the terms used for "Arising" (=UppIsda) of the Ultimate real matters. So, in the long discourse (= *Niddesa desana*) of these two materialities; the Buddha describes as follow:— "Yo 'ayatananam dcayo, so rupassa upacayo, yo rupassa upacayo, sd rupcissa santati. " (Abhi-1-171-178.).

PAGE-121

Translation:— The moment of arising phase of the 11. 5 Physical Bases (= K= pa-Uyaland) at the very beginning is known as " Acaya ". To that moment (= Acaya) of arising phase the Buddha says as Growth of Materiality (= Rupassa upacapa), because it is the very beginning of materiality. In *Pali* grammatical expression, it is written as "Adito cayo upacayo" in which phrase; the words "Upa" means "First occurrence". So, this phrase means "the moment of first appearance of real materiality, known as "Upacaya" (= Arising at the Beginning).

Again, the moment of newly arising Bases of sense (=Ayatana) in these 11. 5 Physical Bases (= Rupa ayatana), which is the causative factors for future arising and increasing of matters is known as "Rupassa upacaya" (= Arising at the Beginning and Increasing later). And that Increasing arising moment (= Upacaya) which is the cause of continuous multiplication in future is described as "Santati" (= -Appearing in Continuum). That is; the materialities are arising continuously in successive nature.

This is the translation of above *Pali* phase. Again in the Commentary (Abhi-tta-1-363.), it is stated as follow:- ' "Acayo nama nibbatti, Upacayo nama vadhdi, santati nama pavatti. (Abhi-ttha-1-363.)

Translation:- ' Arising at the very beginning is known as "Accaya". Arising at the beginning. increasing later and multiplication later is known as "Upacaya". Appearing in continuum is known as "Santati". (Abhi-ttha-1-363.)

The above explanation is discussed with following examples:--

"NaditFre khatakUpasmmm udakuggamanakdio viya acayo nibbatti, 'paripunnakdio viya upacayo vadhdi, a= hottliaritua gamanakdio viya santati pavatti, ' (Abhi-ttha-1-363.)

1. When one digs a hand-well in the sands of a river-bank; the moment of the first oozing of water is like the beginning of the materialities (=Acaya).
2. The moment when the water fills up the well is like "the arising, increasing and multiplication. (=Upacaya).
3. The **moment at** which the **water** overflows **the** well is like "**Santati, at which the matters are occurring in continuum.**

And after giving this example, another description is given again:—

"Evam kim kathitam hoti ? Ayatanenahi acayo kathito, acayena 'ayatanam kathitam. . . (Abhi-ttha-1-363.)

Before the study of the meaning of this *Pali* phrase which is described in the following paragraph, refer to the explanations of " *Upacaya*" and = *Santati* in the *Pali* phrase - " Yo ayatananam etc, written in the *Dhammasangarvī*" *Pali* text. (* Refer to page 120 *)

PAGE-122

So, in his teaching, the Buddha uses the word "*Ayatana*" (ie:- "*Ayatana*" m that phase) for Base of Materialities (-*Ayatana rupa*) directly. By doing so, the arising "*Uppada* of these Base-materialities (= *Ayatana*) which is known as "*Acaya*"¹ is already described. This is the metaphorical expression of the name of place (=th5ha) on the work (~= i5'ni). (ie:- the name of work-place where the Real matters are formed = *Ayatana* is expressed on the arising of the Real matter = *thani*). This kind of expression is known as "*Thairupacara* " in *Pali* -text. So, the arising of the Real matter is also stated as "*Ayatana* ". That is why it is described as "*Ayatanena wayo kathito*"= ie:- by using the word "*Ayatana*"; the "*Acaya*" is already explained.

The terms " *Acaya*" (=the Arising at the beginning), "*Upacaya*" (= the Arising and Increasing later) and "*Santati*" (=Appearing in continuum) all are used for the nature of arising and appearing of the materialities, and all are collectively known, as "*Acaya*". So, by using "*Ayatana*", all the nature of *Acaya*, *Upacaya* and *Santati* (and especially *Acaya*= the Arising at the Beginning) are explained by the Buddha. (Refer to *Maliati-2-103*.)

Again, the nature of Arising at the Beginning (=Acaya), is impossible to happen in the absence of place of origin of matters (= *rupa ayatana*). The nature of arising is actually one of the characteristics of three phases (ie:- Arising, Standing and Passing-away = *Uppada*, *Thiti*, *Bhanga*) of the Ultimate real matters; which are the conditioned objects. (= *Sankhata-dhamma*). So, these phases are not Real matters. By mentioning the nature of Arising (=Acaya), the place of origin of matters (= *Rupa-ayatana*) where the nature of arising (=Acaya) exists, is already described. The term "*Acaya*" (=Arising at the beginning) which is *Thani* (= the work) is applied to the Real matters (=Ayatana) which is *Thaha* (= the work-place) in this case. This is the example of metaphorical expression of the *thaha* on thorn (ie:- the name of work place on the work) and is known as "*ThSnupacara*". So, "*Acayena ayatanam kathitam* " = the Real matter (=Ayatana) is mentioned by the nature of Arising (=

Acaya). Since the Arising and Increasing (= *Upacaya*) and Appearing in continuum (= *Santati*) are the nature of arising of the Real matters, both of these natural processes are included in "*Acaya*" (= Arising at the beginning). All these description are re-. marks given, in the Commentaries. (Abhi-ttha-1-363. Visuddhi-2-79.)

So; the first arising of Real matters (which are the place of origin of matters= *Rupa ayatana*) at the time of conception in the new life is known as "*Acaya*". (= Arising at the beginning). In this new life, there are new generations of other matters which are at the arising phase along with the first matter of conception. To the Insight-knowledge of a meditator, these arising of matters are increasing, depending on the pre-existing matters. So, it means that the matters are arising and increasing later (= *Upari cayo vadhdi*) and the term "*Upacaya*" is given for that nature.

Again, following these Materiality as Arising and Materialities as Continuity, (= *Acaya, Upacaya*), there are so many materialities which are at the phase of arising (= *Uppada*). These phases of arising are perceived in the Insight-knowledge of a meditator as the natural process of successive-appearance in continuum of materialities which is known as "Materiality as Continuity" (= *Santati*). That is the appropriate statement. . (Visuddhi-2-79-80.)

PAGE-123

"*Adito cayo acayo, pathamuppati. Upari cayo upacayo. Pabandho santati.* ' * _ (Mulati-1-152.)

The earlist arising is the "*Acayo*". (ie:-The arising at the moment of conception). Repeated arising later is "*Upacayd*". Successive arising in continuum is "*Santati*". These are the peculiar nature of these 3 materialities.

According to this Pali-phrase, there are three categories of formation-of the Materialities, and these are "Arising at the Beginning ", "Materiality as Growth" and "Materiality as Continuity " (ie:- *Acaya-Upacaya-Santati.*).

Materiality as Growth and Materiality as Continuum (*Upacaya-Santati*)

Although there are 3 kinds of arising of matter; the Buddha mentions only 2 kinds (ie:- *Upacaya-Santati*= in his concise- *Dhammasangani* discourse. Why? The answer is as follow: ———

***Tattf'ia uddese, avuttopi dcayo upacaya saddeneva vmn'ayati.* _ (Mulati-1-152.)**

Although the Buddha does not mention "*Acaya*" in his discourse, by using the word "*Upacaya*" in the discourse, one may also know the nature of "*Acaya*". So, the Buddha inserts the word "*Acaya*" in the word "*Upacaya*". (Mulaff-1-152.)

***Acayoti upacayamaha, Upacayoti ca santatim.* (Mulati-1-152,)**

In the word "*Upacaya*" mentioned in *Dharnmasangani Pali-text*, the word "Upa"- has following meanings, .

1. *Pathamattha*= At the very beginning, first appearing (= *Adi*).
2. *Upariattha*= means next-appearance or formation.

So, although these are two words "*Acaya*" and "*Upacaya*";— according to "*Adito cayo uppatti = nibbatti upacayo*"-take "*Upacaya*" as the word "*Acaya*" which means the first arising or arising at the very beginning of Real Materialities. So, in this case the word = *Upaf* of "*Upacaya*" takes the meaning of earliest or first and foremost (ie:- *Pathamattā*).

Uparicayo vadhdi santati — according to this phrase, the word "*Upa*" of the "*Upacaya*" means "*Upari*" (ie:- later multiplications = *Santati*). Therefore, although there are two kinds of word as "*Acaya*" and "*Upacaya*", according to the *Pali*- phrase: ——. •

"*Adito cayo uppatti ocayo, uparicayo vadhdi upacayo*" _take "*Acaya*" for the word "*Upacaya*" and take "*Upacaya*" for the word "*Santati*". By taking _ "*Adito cayo upacaya*" _____ one may use "*Upacaya*" for the word "*Acaya*" ——— although it is mentioned as "*Upacayo santati*" and "*Santati*" for the word "*Upacaya*" according to the phrase "*Sambandho hutva tamyate santati, pambandho*" (= successive multiplication to form Matters- continuum).

PAGE-124

(Refer to Pyay-Visuddhimagga nissaya-3-228.) It is very important to be noted that, if one does not take the meaning of the word "*Upa*" as "*Adi*" (=which means first and foremost arising of the matters) and, if one takes the meaning of the word "*Upa*" only as "*Upari*" (=which means subsequent multiplications of the matters); there will be wrong concept that "the Buddha does not mention the nature of first arising of the Real Materialities = *Attaya*, (=Palhamuppatti). (Mulati-1-152.)

Descriptions from Atthasālini Commentary and Subcommentary

Pāli Quotation (Abhi-A-1-363)

(Mulati-1-152)

(Anuti-1-166)

In *Dhammasāngani Pali-text*, the two terms "*Acaya*" and "*Upacaya*" are described as same nature as follow: ———

"*Yo dyatananam 'acayo, so rupassa upacayo*"

Again, in following *Pali* phrase, "*Yo rupassa upacayo, sa rupassa santati*"— the words "*Upacaya*" and "*Santati*" are described as having, same nature.

But, the Commentary Teacher explains the difference between these three words as follow:_____

Although, the word "*Acaya*" is not mentioned in the concise Discourse ("*Uddesa sutta*"), the word "*Upa*" of the "*Upacayo*" has two meanings like: ———.

1. *Adicaya*--means <<"First" or "first and foremost" and
2. *Upaciricaya*-Later successive multiplications.

1. "*Upacaya*" which is "*Adicaya*"= (= First and foremost Arising of matters)----"*D= nam bikkhave panditu panfattam. -(Pandita-Upcm= attam) 0*—Monk—the offering in accepted as worthy by Noble-wise men even at the very beginning. (Am-1-149.) In this *Pali* phrase, "*Upa*" of the word "*Upannattam*" means "first and foremost". Likewise, "*Upa*" of the word "*Upacaya*" means "first" or "beginning", The first arising of the 10 unit- Body group, 10 unit-Sex-group and 10 unit-Base group (=Kaya, Bhava, Vatthu dasaka) at the moment of

conception of living beings born from the wombs (= *gabbhaseyaka*), and the first arising of 7 kinds of 10 unit- group like 10 unit-Eye group, , 10 unit-Ear group etc, at the moment of appearance of living beings born from spontaneous rebirth (= *Opapatika*,), and moisture-born rebirth (= *Samse-daja*), are known as "*Acaya*" as well as "*Upacaya*" (=Materiality as Beginning and Materiality as Growth), according to the following *Pali* phrase: ———

"*Adito cayo acayo, pathamuppatti = Adicayo upacayo* ——— (Mnau'-l-152.) This is the nature of first, and foremost arising at the very beginning of all the Real materialities, obtainable in the life. The first arising (= *Upacaya*) is similar to first oozing of the water in hand-made well in the sands of river bank.

PAGE-125

2. *Uparicayo upacayo* (= "*Upacaya*" which is "*Uparlattha*")= later, successive multiplication: ———

"*Sammatthe upasitte ca, te nisidimsu mandape*= Those people are sitting in the decorated edifice (= *Manda-pa*)the ground of which is swept with broom and moistened with poured-water later. In this phrase, "*Upa*" of the word "*Upasitte*" means "*Upariattha*" (= next or later) ie: — the water is poured later on the ground which is first swept with broom. And somewhat like that, "*Upa*" of the word "*Upacaya*" means "*Upariattha*" ie:— next or later. So, successive arising= repeated occurrence '= increasing' appearance of all the obtainable materialities in one's life is also known as "*Upacaya*" (= Materiality as Growth). The first, oozing of water from a hand-made sand-well on the river bank is somewhat like the first meaning of "*Upacaya*"= *Adi* = first and foremost arising and filling up of the well with water is like the second meaning of "*Upacaya*"= *Upari* = later arising. According to this example, the development of all the materialities at the beginning of life and successive growth to reach the completion of all the obtainable materialities in that life are collectively known as "*Upacaya*". In case of living beings born after conception in the wombs(=*gabb*)'iaseyaka); only after 11th week ("or 7th week. , according to Subcommentary), the 10 unit- Eye, Ear, Nose, and Tongue groups of matter develop. And only at that time, there is completion of development of obtainable materialities in the life. So, up to the stage of completion of above 10 unit-groups of matter, all the arising of materialities is known as "*Upacayd*".

In case of living beings of Spontaneous rebirth (= *Opapatika*) and Moisture- born rebirth (= *Sarhsedaja*), the first arising of Action produced. materialities which occur simultaneously with the Consciousness of Rebirth(-*Pafasandhi-citta*), is assumed as "*Adi*" = *Acaya* (ie:- first and foremost)= "*Upacaya*" (--arising at the beginning) and the complete development of 4 Condition-produced materialities (ie:- Action, Consciousness, Temperature and Nutriment-produced) is known as "*Upacayd*" with the meaning of later arising (= *Upariattha*".).

3. *Santati* (= Materiality as Continuity) "*Sambdn. dho hu-tvd tamyate santati = Sambandha tali santati*". So, there is increasing growth of matter to obtain complete constituent-matters in one life. Even after completion of development of obtainable matters, there is still further continuous arising of materialities, and this phenomenon is known as "*Santati*" (=Materiality as Continuity). In, Commentary, text; this phenomenon is compared with the nature of overflowing of water from hand-made well in the sand on the river bank.

Therefore, in the living beings, born after conception in the. wombs= *gabbhaseyaka*), after first arising of 10 unit- group of matter, like 10 unit-Eye-group, Ear-group etc, and after

the appearance of 4 Condition-produced materialities (ie:- after complete appearance of Faculty -matters); there is further arising of so many groups of matter until the death of that living being. This phenomenon is known as "*Santati*" ("Materiality as Continuity). Likewise, in the living beings of Spontaneous Rebirth and Rebirth out of foam (ie:- *Opapatika, Samsedajapatisandhi*); after arising of all 4 Conditions produced materialities, further arising of all the materialities in later life is known as "*Santati* (=Materiality as Continuity). (Refer to:--Abhi-ttha-1-363. Mulati-1-152).

PAGE-126

According to these explanation, the words "*Acaya*, "*Upacaya*" and *Santati* are similar in the sense of Arising nature (=Uppada) of the Base-materialities, (ie -. *Ayatana*). But, it is to be noted that the Base-materialities (=Ayatana), where the process of arising (= Uppada) occurs is different. The difference in the sites of origin (=Ayatana) where the arising occurs is as follow: ____

1. The, first and foremost arising Base-matters (= Materiality as First Arising),
2. The arising Base-matters before and after the completion of all materialities (=Materiality as Growth),
3. The continuously arising Base-matters ("*Ayataha*) or multiplication after the completion of obtainable materialities (=Materiality as Continuity).

That is how the sites of arising (ie:-Ayatana) are different. (Refer to Sangaha-bhasa-nka-410-411.-AtAasalm-bhasatTka-4-22-23.)

The Remarks given by Venerable Pyay Sayardaw

1. The beginning of arising of matters which do not exist previously in the new life is " Upacaya " =(ie:- first and foremost arising of materialities in the life) and continuous arising of matters after first arising is " *Santati*" (" arising in continuum). So, in living beings born after conception in the wombs, the first arising of 3 kinds of unit-group of matter (ie:- 10 unit-Body group of matter, 10 unit Base-group of matter and _10 unit Sex-faculty group of matter = *Kayadasaka, Vatthudasaka, Bhavadasaka*), , all of which are Action-produced, is known as "*Upacaya* ". Continuous arising of these materialities is known as "*Santati*" (ie:- Materiality as Continuity).
2. The standing phase of Consciousness of conception (= *Patisandhi citta*) at which the first arising of **Temperature produced materialities** occur is "*Upacaya*" and continuous arising of these Temperature produce materialities is known as "*Santati*".
3. The arising phase (= *Uppadakkhana*) of the first Subconsciousness (= *Bhavanga citta*) which follows the Rebirth Consciousness-Consciousness of Conception (=Patisandhi-citta) at which the Consciousness produced materialities first arise is known as = *Upacaya* " and successive occurrence of these Consciousness produced matteralities at 2nd Subconsciousness etc etc are known as "*Santati*".
4. The first arising of **Nutrient-produced materialities** at the time of distribution of external Nutritive -essence (= *Bahiddha ojd*) in-the body is "*Upacaya* " and continuous arising of "these matters is "*Santati*".

5. The earliest arising of the 10-unit Eye-group, 10- unit Ear-group, 10- unit-Nose-group and 10 unit-Tongue group at their appropriate time is "*Upacaya*". The continuous, arising of these matters is known as "*Santati*".

The above descriptions are given only for "*Upacaya*" ('-Materiality as Arising and Growth) and "*Santati*" (= Materiality as Continuity) in living being born after conception in the wombs. (= *Gabbhaseyaka*).

6. In case of living beings born from foam (= *Samsedaja*) and born spontaneously (= *Opapatika*), the first arising of materialities at the. moment of conception (= *-Patisandhi-cittakkhana*) is "*Upacaya*". After that, successive growing and multiplication of Produced corporeality (= *Nipphanna rupa*) up until the death of that living being is "*Santati*". (Pyay-*Visuddhimagganissaya* -3-226-227.)

The above remarks given by Venerable Pyay Sayadaw are based on the phrase written in the Original Subcommentary in which it is described as:- "*Adicayo upcayo, uparicayo santati*". But, Venerable Mahagandayone Sayadaw of Amarapura points out, that the phrase in the Original Subcommentary should be "*Adicayo upacayo, uparicayo upacayo*" rather than "*Adicayo upacayo, uparicayo santati*". And sayadaw gives following remark:-----

PAGE-127

In the books; one may read = *Uparicayo santati*". Actually, that "*Uparicaya*" is not "*Santati*". Only the continuous arising of matters after first arising is "*Santati*". So;- the phrase should be "*Adicayo upacayo, uparicayo upacayoti*", And, Sayadaw explained further; referring to the Pah'-phrase "*Annatha hi dcayasankhatassa patharnuppadassa avuttata apajjeya*" that if one does not accept the meaning of the word "*Upa*" as "*Adi*" = (ie:- The first and foremost arising) and accept the meaning as " Upari "only = (ie:- later multiplication); there will be misleading sentence (-Laddhadosavakya) like " The Buddha does not mention the earliest or first and foremost, arising of Real Materialities " (=ie:-~ *Acaya=Patharnuppatti*). (Atthasa. Urubh'asaffka-4-343-344.)

All these remarks by Mahagandayone Sayadaw are in agreement with explanations in Original Subcommentary which says:-----

"*Adito cayo dcayo, pathamuppatti. Uparicayo upacayo. Pabandho santati*". (Mulati-1-152.)

=ie:—The first and foremost arising is "*Acaya*" Later multiplication is "*Upacaya*". , Continuous arising is "*Santati*". . (Mulati-1-152.)

And, these remarks by Mahagandayone Sayadaw are also in agreement with the example given above, (ie:- making a hand made well in the sand of river bank to get water). So, all these phenomena of "*Acaya*", "*Upacaya*" and "*Scintati*" are arising phase of Base-materialities.

Now it is enough to discern with **Insight- knowledge, the Character, Essence etc of the one Real materiality at:-**

1. First arising in a life, and

2. Continuous, repeated arising of that materiality in later part of the life.

But, Venerable Pyay Sayadaw, referring to the explanation given in above "*Visuddhimagga Commentary*" wanted to classify the Growth and Continuity of materiality as follow:—

1. In a new life, the first and earliest arising of the Base- materialities (= *Ayatana rupa*) is "*Acaya*" = (ie:- first arising of materialities in the Life).
2. The second- time arising of these materialities is "*Upacaya*".
3. The third- time and later continuous arising of these Base- materialities until death is "*Santati*".

The translation of above Commentary is already given above. (Refer to page 122).
(Refer to Pyay- Visuddhimagga nissaya- 3- 299).

PAGE-128

Perception (= *Paccupatthana*)—— There are two ways of Perception for "*Upacaya*" (= Growth of Materiality) :——

1. *Niyatanapaccupatthana* = The ability of Materialities to manifest being as Matters=perception of this nature by Meditator with Insight knowledge (=ie: *Adicaya*). This is the Perception of " *Upacaya*" = ' with the meaning of "first and early arising.
2. *Paripunnabhavapaccupatthana* = The nature of complete appearance of the Real materialities perceived by the Meditator with Insight- knowledge is al-so "*Uparicaya* " » second way of Perception of "*Upacaya* " with the meaning of growing or arising later.

Meditation:-- If one wants to discern Character, Essence of the Growth of Materiality (= *Upacaya*), analyse the arising of the matters of concern, with Insight -knowledge, at the moment of conception or at every one-week interval, and discern the arising of these Real materialities. If one wants to discern the Character, Essence etc of the Continuity of materiality (= *Santati*), concentrate the mind on arising of materialities in the many groups of matter or the arising of materialities in the one unit- group of matter at the time of present meditation. He can also discern the arising of materialities in the various groups of matter or continuous multiplication of a group of matter after first or second occurrence in one life. If the nature of arising is still not perceived, with the Insight-knowledge, select a group of matter and discern :-----

- 1) Early arising of these matters as sense-object of "*Upacaya*", (2) Successive multiplication of these matter after one or two occurrence as sense-object of. "*Santati*" and try to perceive the Character, Essence, Perception and Proximate causes of the Materialities of Growth and Continuity.

27. Aging or Maturing of Real Materiality. (*Rupcissa jarata*)

1. Aging or maturing of the Real matters ————— Character,
2. It carries the materiality to the stage of dissolution phase (= *Bhanga*) = It carries the matter to death (= *Mardna*) ————— (Function) Essence,
3. Although, the natural characteristics are still present, the nature of being as a new materiality (ie:- the moment of standing as new matters) is lost. (Somewhat like ripened, aged cereal). ————— Perception,
4. The aging materialities ' ————— Proximate cause.

Function-Essence_____ Since, for aging materiality, the occurrence of passing —away (= *Bhanga*) is beyond doubt (= *Avassambhavi*); it is said that the function (= *icca*) of aging

materiality is to carry the matters towards passing-away phase (*Upanayarasa*) = ie:- towards dissolution and death (=Marana).

Perception:-.....

Pali Quotation (Mahiti-2-113)

PAGE-129

The respective characteristics such as hardness (=Kakkhalatta) etc etc are still possessed by the materialities in the phase of standing-ie:-aging moment ("*Thiti*"). In standing phase, the Ultimate Real matters do not release their own characters. But, the nature of arising is already released by the Ultimate Real Matters **at** the standing phase. And up to this moment of arising, it is known as- "**Navabhava**"= **existence as new matter**. At the moment **of** standing =at standing phase, the existence as new matter is lost in the Insight-knowledge of a meditator. When cereal are ripened and aged, although these still possess the nature of cereal, definitely there is a change from new to aged cereal. And, somewhat like that, although there is no changes in the respective own character of the materialities of living and non-living, where the Aging of Materiality (=Jara) occurs, there is a change from the nature of new (=Uppada) to the nature of old (= *Thiti -Jara*). So, although there is no loss of respective character, the nature of loss of being a new matter ("existence as "New" due to the arising phase = *Uppada*), is perceived by the Meditator with Insight-knowledge. (The life span of Produced Corporeality (= *Nipphanna. rupa*) which are the Ultimate Real matters is about 17-Mind moments (= *Cittakkhana*) or 51 phases of Mind moments. If the arising and passing-away phases are deducted the time taken by the remaining 49 phases of Mind-moment is equal to the standing phase of the materialities. And that standing phase (= *Thiti*) is termed Aging or Maturing (=ie:-Jara) of the materialities. These are the explanations about the Aging ("*Jam*"); described in the above Pali-phrase.

Descriptions of Conception (=Rebirth ("*Aging— and Death in Discourses (Jati — Jara —Marana)*")

According to the analysis of various discourses (=Suttantabhajarta-ya), the moment at which a living being is conceived in the mother's womb is known as Conception (=Jati) = *Patisandhi*. The passing away from the present life is death= "- *Marana*). The existence from birth to death is known as aging (-Jara). And, all these terms (ie:- Conception, Aging and Death = Jati, Jara, *Marana*) are not the words of Ultimate Truth world (= *Paramattha sacca*). These terms are used only in the Designated Conventional world (= *Samvutti sacca*). So, these are the terms of conventional world.

In this case, the aging before the appearance of the loss of teeth, white hairs, diminished acuity of vision, defect in hearing and wrinkled skin, is known as "hidden nature of aging" = *Paticchannajard*. When there is whiteness of hairs, loss of teeth etc the aging becomes obvious and known as "obvious nature of aging =" *Pakata jara*" But, it is to be noted that loss teeth. whiteness of hair, diminished acuity of vision and hearing, and finally the wrinkled skin are not the aging, These phenomena are the resultants of the aging or these are the function of the aging process. So; the term "aging" = *jara* used for these various changes is to

highlight the casative aging process by mean? of resultant changes, (ie:- the metaphorical expression of the cause by means of the effects known in *Pali sis= Phalupacara*). Because; the true nature of the aging is not perceived by the Consciousness of Eye:— "*na hi jara cakkhu vinneya*"

All the phenomena described above (ie:-White hair, decreased vision-etc) are the effect of Aging. • (Abhi-ttha-1-364.)

PAGE-130

How the Aging Becomes Obvious in the Old-Persons

Now, there is a question. Why are the features of aging like loss of teeth, whiteness of hair, wrikled skin, more obvious in the older person than the younger ones, although both have the natures of "Moment-aging"= = *Khana jara*" and "Continuity-aging" = *Santati jara*?

Answer:—The assault of aging process is more violent in the later part of the life; so much so that the features of aging like. whiteness of hairs, loss of teeth, wrinkled skin etc are more obvious in the older persons.

Farther explanation will be given:— After conception in the mother's womb or, started from clear fluid droplet ("*Kalcilo.* ");the living being take their existence by repeated arising of the new matters. The arising (= *Uppada*) of, later matters occur at the standing -moment (= *Thiti* = *Jam*) pre-existing matters. The arising new matters follow the usual nature of aging like the proceeding maters. So, the nature of aging is gradually increasing in the severity and subsequently transfered from pre-existing matters to newly forming matters bit by bit. That is why, day by day, month by month and year by year, the newly formed matter arising at the standing -moment (ie:- the aging -time of matters) of progressively aging matters, take the progressive nature of aging process. In this way, newly arising matters finally possess the feature of aging like whiteness of hairs, loss of teeth and wrikled skin etc. So» the features of aging become obvious only in the old age.

All these feature of-aging are seen with naked eye, ie:- these are percived with Eye (= *Cakkhu, -vinneya dhamma*) and these are not true aging of Real materiality. . These are the violent effects of the aging (= *Jara*). The true nature of aging is only perceived with the mind, **ie:-**perceived by Consciousness of Mind (= *Manovinnaya dhamma.*) (That is : the real nature of aging is not taken up by the Thought-process of Eye-door = *Cakkhu dvarika vithi*, but taken up by the Thought-process of Mind-door = *Mano-dvarika vithi.*)

Further explanation:—One may think of the occurrence of natural disaster like flood, or fire at an area by seeing the devastated area.

Likewise, the disaster of aging, occurring in a person is known ' or seen with naked eye by. the resulted damages like white-hairs. , lost teeth, wrinkled skin etc. The flood of aging and the fire of aging is perceived in the mind by seeing the devastations caused by the aging process. (Refer to -Abhi-tha-1-364'. Abhi-ttha-2-92. Mahabuddhavan-5-733-734.)

PAGE-131

The Fuller account of These Explanations

Pāli Quotation (Mulati-1-153)

The life span of the materialities is 17 Mind-moments = 51 phases of Mind-moment. From the arising phase of Consciousness of conception (= *Patisandhi citta*), the Action-produced materialities are forming at phases of Arising, Standing and Passing-away (= *Uppada, Thiti, Bhanga*) of the every mind-moment till the vanishing-time of the Volitional action. The Temperature produced materialities arise at the standing phase of Consciousness of conception=the Standing phase of the Action produced matters which arises at the same time with Arising phase of Consciousness of conception, and these Temperature-produced materialities arise at every Standing phases of matters, under the influence of the Fire-element (= *Utu*) exist in these groups of matter. The Consciousness produced matters arise at the Arising phase of first Subconsciousness (= Consciousness of existence = *Biavanga citta*) which follows immediately after, the passing-away of consciousness of conception; and these occur at every arising phase of the Mind-element (= Man. o-dh. 5tu) and Mind Consciousnesss-element ("Mano-vinnana dhatu). The Nutriment-produced materialities arise after the dispersion of Nutritive-essence and occur at every Standing phase of Nutritive-essence matters, forming Nutriment-produced-Sth factor unit groups of matter (= *Ojattthamaka rupa*). All these materialities live for 17-Mind-moments=51 phases of Mind-moments. So, if one discerning the materiality at a certain moment, he will see that at one phase of the Mind-moment;

1. The first new arising of the matters,
2. The matters at the passing-away phase, since the life span (ie:-17 Mind-moments = 51 phases of Mind-moment) is in expiration.
3. The matters at the standing phases which are previously produced at various Mind-moments or various phases of Mind-moment, and their life-span of 51 phases of Mind-moment is not in expiry. (Try to take up this phenomenon with Insight-knowledge.).

Beginning from the clear fluid-droplet of, conception (= *patisandhi kalala*), the new matters arise at the every moment of aging (= *Jara* ie:-Standing phase) of the pre-existing matters. These new generations of matter occur at the moment of maturing or aging of (= *Thiti*" Standing phase) the pre-existing matters which have already attain some degree of aging. So, the new matters which follows the already matured matters becomes subsequently more and more older. In subsequent appearance of matters; the materialities occurring at the age of supposing 50 years, the period at which a person becomes weaker in all kinds of efforts •= strength (-*Hanidassaka*), will produce features of aging, like loss of teeth, whiteness of hair etc etc.

PAGE-132

Examples in the World

The natural disaster like flood- water destructs various trees and grass-land in an area which is submerged. And the natural disaster of fire, burns all the trees and plants in the forest. Although the disaster is passing away, the devastated area remains there. One may think of the occurrence of the. disaster by seeing the ruins. Actually, the ruins are not the fire nor the flood-water. Likewise, the aging process is known by means of changes in the aging materialities. The feature of these aging are not the Aging (= *Jara*) of the Real materialities. These are the pathways only, on which the aging process is proceeding. So, only the standing phase of the maturing materialities is known as. Aging (-*Jara*). And that nature of Aging(=

Jara) ie:- the Standing phase (= *Thiti*) is perceived with Consciousness of Mind)--*Manovinnana*) or in other words it can be discerned only with the Knowledge of Contemplation by Right view (-*Vipassana-sammaditthi vinnana*). So, the nature of aging (=Jar5=77uft') is known as " *Manovinneya dhamma* "(ie:-the nature taken up only with the Consciousness of mind). (Abhi-ttha-1-164. Abhi-ttha-2-92. Mulatr-1-153.)

So, all these features like wrinkled skin, whiteness of hair, loss of teeth are the long-term effects of the aging. The shortening of life span, decreased acuity of vision and other Faculty-matters are the expected effects of the aging process :---(ie:- the natural phenomenon of aging = *Patcati dhamma*.) and these natural phenomena take some time to occur. A person life span is shortened as he becomes old. The vision, the Faculty of Eye and other various Faculties of sense-organs, which are delicate, clear and can easily take up the various sense-objects in young age, become complicated, blurred 'and diminished in older ones who attain aging process. Even the obvious sense- objects are not perceived by the various respective sense-organs. So; shortening of life spa-n, deterioration in sense-organs are the effects of aging. The Buddha teaches the shortening of life, deterioration of sense- organ also as "the aging process". The terms of the effect are expressed on the causative element and this kind of phrase is known as "*Phalipacara* " (= Metaphorical expression of the cause, using the words of the effects). (Abhi-tthal-364. Abhi-ttha-2-93.)

Again, the aging process is classified into two. These are "the Obvious aging "(= *Pffkatajam*) and "Obscured aging "(= *Paticchanna-jara*). The visible feature like, lost teeth, white hairs etc, are known as Obvious aging (= *Pakatajara*). In the Mentalities, the aging process has no features of loss of teeth, whiteness of hair etc and can not be seen. So, the Standing phase =aging" of mentalities are known as Obscured aging (= *Paticchanna-jara*). In this case, the Color and Light of the various matters which manifest as whiteness of hair, , loss of teeth etc: are perceived with Consciousness of Eye, because the colour and light are easily noticeable, Only after perception of the colour and light with Consciousness of Eye, the Mind-door thought *processi*= *Manodvara vithi*) realises the aging process by means of it's " Violent assault on the teeth, hairs etc, " It is somewhat like setting up an indicator, (eg: Bull-horns) at the obtainable site of under ground water, (ie:-the changes in hairs, teeth are the indicators of the underlying aging process. (Abhi-ttha-2-93.)

PAGE-133

'Next, there is another classification of aging process as "*Avicijara*" (= the subsequent aging process is not easily perceptable and " *Savici jara*" (=the subsequent aging process is easily percerptable). When the aging process between the two successive events is difficult to see and one may think the aging process as continuously occurring nature without any interval; this kind of aging process is known as "*Avicijara*" (= Subsequent aging process, not easily perceptable). This kind of, aging process is seen in the ruby, gold, silver, coral, the moon, the sun etc. The ruby for example, which is the conditioned matter (= *Sankhata*), obeys the law of Conditioned- phenomena (= *Sankhara dhamma*) and possesses the characteristics of conditioned matter such as Arising, Standing and Passing- away phases. But with ordinary Eye, one can not see the interval between the two adjacent aging processes. So, the aging of the ruby is not easily seen. . '

A meditator, who is able to discern the Character, Essence etc of the matters, should try to take up the 4 Basic- elements with Insight- knowledge. He will easily find the particles

of unit groups of matter. If the groups of matter are not easily seen, try to discern the Delimiting Materiality (= *Akasa dhatu*), then he will see the groups of matter easily. On analysing these groups of matter, the meditator will realise that these are composed of Nutriment produced matter. (*Ojattamaka rupa*) in which the Nutritive essence (= *Oja*) is 8th factor of the unit- group. All these matters are produced by the Temperature (= *Utu*), which is the Fire- element (= *Tejo- dhatu*) exists in the unit- group of matter. And the life span of all these matter is 17 Mind-moments = 51 phases of Mind- moment. The Standing-phase (= *Thiti*) is 49 phases of Mind- moment. The standing phase of a group of matter and the standing phase of second group of matter which is produced by the Fire- element of the group, can not be seen with ordinary Eye. These are seen only with Insight- knowledge of Contemplation, based on Right- View (= *Vipassana samma ditthi nnana*). The ruby etc, since these are the Conditioned matters (= *Sankhata dhamma*) and follows the Law of Conditioned phenomena (= *Sankhara dhamma*), has characters of Arising, Standing and Passing- away phases. Although, these substances (ie:- ruby, gold, silver etc) have nature of aging process definitely, the process between the, two successive events is not easily seen. So, these have not easily perceptable aging process.

In human, the difference between 10 year-age group (when the intelligence is not fully developed = *Manda dasaka*) and 20 year-age group (the young age with playful and joyful mood " *Khitta dasaka*) is quite obvious. Similarly, the color between the fresh flowers, fruits, leaves and those of decaying ones is quite different. Due to the differences in age. color etc; the aging, maturing and decaying processes are very much distinctive in these. So, this kind of aging is known as "Savici jara" (ie:- the aging process with easily perceptable interval between the adjacent two aging processes.). (Abhi-ttha-1-364. Abhi-ttha-2-93.)

28. Impermanence of Real Materiality (*Rupassa aniccata*)

1. It is the stage of dissolution of Real materialities as a whole. Character,
2. It makes Real materialities submerged (by destruction at the passing- away phase of matter.) ' (Function) Essence,
3. The nature of exhaustion and loss of Real materialities. Perception,
4. The materialities in the process of dissolution in surroundings. Proximate cause.

Function- Essence:— *Sa pana yasma thitippattam rupam vinasabha vena samsTdantT viya hoffti vuttam "Samsldancirasa" ti.* (Mahati-2-103-104,)

The dissolution(=*Bhanga*), that is the moment of passing away phase of = materialities is not permanent. So, it is known as impermanence (= *Anicca*). This character of impermanence which is the cause of dissolution of matter (= *Anicca*) known as. "Aniccata" = *Rupassa aniccata*-Impermanence of Real Materiality Actually, the nature of Impermanence by itself can not destruct the materialities at the standing phase, but they tetid to have such nature. So, the function of the Impermanence of Real Materiality (= *Rupassa aniccata*) is assumed as destruction of the materialities. The passing matters disappear totally. And this total. disappearance seems that the materialities are submerged by the "*Rupassa aniccata*" (=Impermanence of Real materiality).

Perception;— Since the meditator perceives the nature of disappearance and dissolution of the materialities at the moment **of passing-away** phase; **by** his Insight-knowledge, the phenomenon of Impermanence of the Real **materialities** is perceptible to the Insight-knowledge of the meditator.

How to Discern Materiality

The description about the Character, Essence etc of 28 kinds of Materiality is already given.

1. . *Santati-ghana* = Corupactness of Continuity,
2. *Samuha-ghana* = Corupactness of Grouping,
3. *Kicca-ghana* = Corupactness of Function,

Endeavour to discern the Character, Essence, Perception and Proximate cause of the Ultimate reality of materiality in detail; so as to be able to break down the above three kind's of Corupactness of Materiality. (= *Rupa-ghana*) with Insight- knowledge. In Eye- door (= *Cakkhu dvara*), there are 6 kinds of group of matter (= *Rupa kalapa*) and 54 types or units of matter in each. Try to discern the individual type of matter in terms of Character, Function, Perception and Proximate- cause with analytical knowledge. '

In 10 unit-Eye group, (= *Cakkhudāsaka kalapa*) there are 10 types **of** matter, and try to discern these, starting from the Earth- element to Eye- transparent- element one after another in sequential order. Sequential order means:-starting from the Earth- element, then the Water- element, the Fire-element, the. Air-element, the Colour, the Odour, the Taste, the Nutritive essence, Life- faculty and finally the Eye- transparent element as described in the table.

PAGE-135

After discerning the Character, Essence etc of the 10 types of matter in the 10 unit-Eye-group one after another, similar process is taken out for the 10 types of materiality in 10 unit-body group of matter in the Eye-door (ie:- the eye), starting from Earth-element to the Body-transparent-element in terms of Character, Essence, Perception and Proximate cause. In this way, discern all the 54 types of materialities in the Eye-'door. It is better to include the 9 unit- Life- faculty groups (- *jivitanavakakalapa*) of the Eye-door along with the other types in the meditation, After discerning the Earth- element of 10 unit-Eye-group, don't omit to discern the Earth-element of the 10 unit-Body groups of matter in the same Eye-door (= the Eye). Discern the each and every materialities in terms of Character, Essence, Perception and Proximate cause in the 54 types of matter in which, if the 9 unit-Life-faculty groups is added, there will be 63 types of materialities. It is somewhat like a process to break down the Compactness of materiality ties (= *Rupa ghana*) in each group of matter with Insight-knowledge. And the process is a noble practice. Like a practice of an inspector who is examining a large-beaten wooden block from all aspects with professional skill, the practice of analysing an Ultimate Real nature (= *Paramattha dhamma*) from various aspects with wisdom will purify the Knowledge of Ultimate Truth (= *Paramattha nnana cakkhu*) and also purify more and more the Insight-knowledge of a Meditator who is practising repeated. Contemplation in the Ultimate Real world (= *Paramattha sacca*). . And finally this will become very powerful practice (= *Niyanika*) which helps a person free from the vicious circle of rebirths or relentless rounds of rebirths.

Similar method used in the Eye-door is applied to discern other Doors (= *-Dvara*) like Ear-door etc. Discern in the same way in every materialities exist in the (42) Body- parts (=

Kotthasa), (8) kinds of Consciousness produced-group, (= *Cittaja kalapa*), (4) kinds of Temperature produced-group and (2) kinds of Nutriment, -produced group in terms of Character, Essence, Perception and Proximate- cause. Then, continue to discern the Character, Essence, Perception and Proximate cause of the (4) types of Materiality as Characteristic (*Lakkhana- Rupa*). The Materiality as Growth (= *Upacaya*) and the Materiality as Continuity (= *Santati*) is also discerned in the same way. In the Materiality of Aging (=Jarāt5), try to see the standing-phase (= *Thiti*) of Materialities in a group of matter. And finally, for Impermanence of Real Materiality (= *Aniccata*), try to meditate on the passing- away (= *Bhanga*) phase of the materialities in a group of matter.

After discerning all the materialities (ie:- both Real and Non-real) inside the body (= *Ajjhatta*), with the methods described above, continue to discern the materialities outside the body. (= *Bahiddha*). At sometimes, discern the materialities, inside and outside of the body in turn. It is better; if one is able- to discern the materialities in the past as well as in the future. What an excellent Practice and the resultant Wisdom ! —Like a flagmast erected for glorious pride of a pagoda. . .

Classification of Materialities in Group of Two

1. In *Pali*- texts; there are 28 kinds of Materialities as already mentioned. These are (4) Basic-elements (= *Mahabhuta rupa*), and (24) Dependent Materialities (= *Upaddrupa*) : All these Materialities have one feature in common:— All these 28 kinds of i-natters are non- rooted (*Ahetuka*) in nature like "Greed" (~- *Lobha*). and not associated with concomitants and root-conditions. So, all the materilities are the phenomena, not associated with any concomitants. (= *Hetuvippayutta dhamma*). All these are conditioned and produced by the Volitional action, Consciousness, Temperature and the Nutriment. These are included in mundane world (= *Lokiya- dhamma*); and taken up as sense-objects by the various cankers (= *Asava dhamma*) which are the moral intoxicants. So, these materialities are " *Sasava-dhamma* ".

2. These (28) kinds of Materialities can be classified into two groups as follow:—

- (a) Inside the body, Outside the body (= *Ajjhattika, Bahira*),
- (b) Rough and Delicate (= *Olarika, Sukhuma*), .
- (c) Far-away and Near (== *Dura, Santika*),
- (d) **Conditioned** and Non-conditioned (= *Nipphannd, Anipphanna*),
- (e) Transparent and Non- transparent (= *Pasadarupa, Na pasadarupa*),

PAGE-136

- (f) Faculty and Non- faculty (= *Indriya, Anindriya*),
- (g) Action produced and Non- action produced, (*Upadinna, Anupadinna*)

(a) **The five** Transparent- elements (eg:- Eye- transparent-element etc) exist in. the Physical body (= *Attabhava*), are known as "Matters inside the body"

(= *Ajjhattika-rupa*). The remaing (23) matters are known as "Matters outside the body"

(= *Bahira rupa*). . . (Visudhi-2-81.)

Ahito aham mano etthali atta, attabhavo. Tom attanam adhikicca uddisa pavatta oyhatto, indriyabaddha dhamma', tesu bhavam qjjhattikam, cakkhadi.

(*Mahati-2-106.*)

On the physical body, one assumes as "Self" (= *Atta*) due to conceit (= Mono). And all materialities of Faculty (like Eye, Ear etc), obtained due to clinging of that "Self (= *Atta*) is known as "Matters inside the body" (= *Ajjhatia*). The 5 transparent-elements (like Eye, Ear etc) exist in the body (= *Niyakajjhata*) is also known as "*Ajjhattika*". (Mahati-2-106.) (In Commentary, "*Ajjhatta*" is same as "*Ajjhattika*". The word "*Nika*"— has no meaning).

(b). (5) Transparent-elements (- *Pasadda rupa*) and (7) matters of sense- object (= *Arammana rupa*), altogether (12) kinds of matter are the transparent element and the sense-object (ie;- receiver- element and striking- element = *Visayi visuya*). The meditator takes up the sense-object due to striking between these two-elements. So, these matters are **Rough materialities** (-*Olarika rupa*) (*Ghattanasena gahe tabbato-visuddhi-2-81.*). The remaining (16) kinds of matter are **Delicate materialities** (= *Sukhuma rupa*) since there is no phenomenon of striking between the Door-elements and sense-objects (= *Dvara, Arammana == Visayi-Visaya*). (Keep in the mind, the methods of meditation from the chapter on the Discernment of Materiality; in which the Eye-transparent element is accepted as transparent-element which receives the impingement of the color of sense-object of sight.) (Visuddhi-2-81.)

(c) The delicate matters are difficult to be taken up with Insight-knowledge of a meditator, or in other words;-these are far-away from perception in the knowledge of a meditator. So, these matters are known as Far-away matter. (*Dvara rupa*). The rough-matter is easily seen with Insight-knowledge, or this matter is, near the Insight-knowledge of a meditator; so it is known as Near-matter (*Santika rupa*). (Visudhi-2-81.)

(d) The (18) kinds of Real-materialities are :—

1. Not Delimiting Materiality (*Pariccheda-rupa*) which keeps each groups of matter from mixing with one another,
2. Not Materiality as Alteration (= *Vikara-rupa*) which is the peculiar action of Real-materialities,
3. Not Materiality as Characteristic (= *Lakkhana-rupa*) which is the Arising, Standing and Passing-away of Real-matters.

And these matters are taken up with the Insight-knowledge of a meditator by their own distinct characteristics such as hardness (= *kakhalatta*) and these are produced by four conditions like " Action, Consciousness, Temperature and Nutriment (= *Kamma; Citta; Utu; Ahara.*). So, these are known as Conditioned matter. (= *Nipphanna-rupa*). The remaing (10), Non-real matters are. not taken up by their own disctint characters and not condition-produced; and known as Non-conditioned matter (= *Anipphanna rupa*). (Visuddhi-2-81.)

PAGE-137

The Delimiting Materiality (== *Akasa dhatu*) is the space among the groups of matter. The Materiality of Intimation (= *Vinnatti rupa*) are peculiar nature (= *Vikara*) of the Consciousness produced matters, and Materiality as Alter-action(Lightness, Softness and *Wieldiness* = *Lahuta, muduta, kammannata*) are peculiar nature (= *Vikara*) of Consciousness, Temperature and Nutriment produced(= *Cittja, Utuja, Aharaja*) 'matters. Materialities as Growth, Continuity, Aging and Impermanence(= *Upacaya, Santati, Jarata, Aniccata*) are the arising, standing and passing-away of the Real-materialities. So, all these (10) kinds of matter can not exist without any Real-materialities. They are not produced by the(4)Conditions like Action, Consciousness etc etc. So, the meditator can not take up the Non-real matters with Insight-knowledge by their own characteristic. He can only discern these non-real matters along with the Real-matters.

(e) *Cakkhadipcmcavidham rupddmam gahariapaccayabhdvena adasatalam viya vippasannatta pasadarupam, itaram tato vipantatta nappisa. darupa. m.* (Visuddhi-2-81)
Sotadmampi cakkhuno viya pasannasabhdvatta eva yathasakam visayaggahana paccayataU dassento aha " Cakkhadi. pa. pcisadarupa" nti. (Mahati- 2-107.)

The eye, ear, nose, tongue and body, all (5) kinds of matter take up their respective sense-object; like sight, sound, smell, taste and touch. So, these matters are as clear as mirror and known as " Transparent-element (= *Pasada rupa*). Other (23) kinds of matters do not take up the sense-objects and oughtn't to be transparent and clear. So, these are opaque and Non-transparent-elements (= *pasada rupa*). (Visuddhi-2-81)

Pay Special Attention for Following Facts

Take care of the translation of "*Adatalam viya vippasannatta*" -which means that:- "Transparent-elements are as clear as mirror. It is very important fact in Discernment of Materiality. In the Transparent-elements ie:- (5) kinds of clear matters;

1. Eye transparent-element (= *Cakkhupasada*) exists only in the Eye.
2. Ear transparent-element (= *Sotapasada*) exists only in the Ear.
3. Nose-transparent-element (= *Ghanapasada*) exists only in the Nose.
4. Taste-transparent-element (= *Jivhapasada*) exists only in the Tongue.
5. Body-transparent-element (= *Kayapasada*) exists in the Eye, Ear, Nose, Tongue> Body and Heart-base, ie;- dispersed throughout the whole body. (in all 6 Doors).

PAGE-138

If a meditator takes up the 4 Basic-elements in his body to set up concentration (= *Samadhi*) through the path-way of Meditation of Element (= *Dhatu-kammatthana*), he will see very clear (as clear as a mirror) object when he reaches or near to **reach** the "Neighbourhood Concentration ° Access Concentration (= *Upacara-Samadhi*). Before reaching the Insight-knowledge of Ultimate reality, and before the breakdown of Compactness of Materiality (= *Ghana*), the (5) kinds of Transparent-matter are seen **as** solid block of matters which looks like a clear mirror. Since, the Body transparent matters are dispersed throughout the body, the meditator will see these matter **as** solid clear block, before the breakdown of compactness of the matters. The nature seen by the meditator with the Knowledge of Right view (= *Sammaditthinnana*) is similar to above descriptions written in the Commentary and the Subcommentary (= somewhat like similarity of the water, of the *Ganga* river and *Yamuna* river which can be mixed). And, the nature seen **by** the meditator also coincides with the teaching of the Buddha, the Perfectly Self-enlightened One (= *Sammāsambuddha*) in his *DhammasanganiPali*- scripture" (= like similarity of hot and cold water, when mixed); which is described below:————

Pali Quotation Abhi-1-157-161()

The nature that, all the Eye, the Ear, the Nose, the Tongue and the Body are the transparent-elements = clear matters (= *Pasada-rupa*), arise de-. pending on the Basic-elements (= *Maha-bhuta*) of the same unit-group of Matters, is pointed out by the Buddha in

clear and distinctive way, And these are the solemn utterance (= *Mukhapatha*) of the Buddha after seeing and knowing with Self-enlightenment. If one try to discern the Delimiting Materiality (= *AkSsa dhatu*) in this clear, homogeneous object, he will first **see** the particles of unit-groups of matters. . .

(f) (5) Transparent-elements, 'Female and Male Sex-materiality and Life-faculty matter, altogether, (8) kinds of matter possess the nature of control over the respective matters; these are known as "Control-materiality" (= *Indriya rupa*). (Refer to Faculty- condition - *Indriya-paccaya* as well). The remaining (20) kinds of materialities do not possess the nature of control and known as "*Anindriya rupa*" (=Non-control materiality). (Visuddhi-2-81.)

(g) The-Volitional action considers the materiality as a result of it like "This materiality is the result of my action". So, the Action produced materiality is known as " *Upadinna= Upadinna rupa*". Other matters such as Consciousness, Temperature and Nutriment produced matters are not the result of the Volitional action and known as "*Anupadinna = Anupadinna rupa*". (Visuddhi-2-81.)

Classification of Materialities in Group of Three

1. The sense-object of sight (= *Ruparammana*) is seen and taken up by impingement. So, it is known as "*Sanidassana sappatigha rupa*".
2. Apart from the sense-object of sight, the remaining (11) Rough-materialities (= *Olwika rupa*) are not seen. and these are taken up by impingement. So, these are "*Anidassana-sappatigha-rupa*".
3. The (16) Delicate-matters (= *Sukhuma rupa*) are not seen and not taken up by. impingement-it. So, these are " *Anidassana-appatigha-rupa*". (In this case, seen or not seen are meant for the Consciousness of Eye (- *Cakkhu-vinnana*) and not with the Consciousness of Mind (= *Mano-vinnana*). (Visuddhi-2-81.)

PAGE-139

1. (8) kinds of Faculty-matters (= *Indriya rupa*) and (1) Heart-base matter (= *Hadaya-vatthu*), total (9) kinds of materialities are real Action-produced matters ("*Ekanta-kammaja-rupa*"). The Earth-element, the Water-element, the Fire-element, the Air-element, the Colour, the Odour, the Taste, the Nutritive-essence and the Delimiting materiality;— these (9) Matters are produced by multiple factors rather than the Action. So, these are the "*Anekanta-kammaja-rupa*".
2. The Consciousness, Temperature and Nutriment produced matters are formed • by causes apart from the Volitional Action. So, these are the "*Akammaja rupa*".
3. The 4 Materialities as Characteristic (= *Lakkhana rupa*), ie:- Growth of materiality, Continuity of materiality. Aging Materiality and Impermanence-Materiality (= *Upacaya, Santati, Jarata, Aniccata*) are not produced by any of the 4 conditions like the Action, Consciousness, Temperature and Nutriment. So, these are known as "*Nevakammajam nakammajam rupa*". (Visuddhi-2-81.)

1. The Earth, Water, Fire, Air, Colour, Odour, Taste, Nutritive-essence which are the inseparable (8) kinds of matter (= *Avinibbhoga rupa*) and sound (= *Saddarammana*), the Delimiting Materiality, the Bodily Intimation, Verbal Intimation, Materiality of Lightness, Softness and Wioldiness all together (15) kinds of matter are known as Consciousness produced matter. (= *Cittaja rupa*).
2. The Action, Temperature and Nutriment produced matters are known as "*Acittaja rupa*", since these are not produced by the Consciousness.
3. The (4) kinds of Materiality as Characteristic are known as "*Nevacittajam nacittajam rupa*".

1. The Earth, Water, Fire, Air, **Colour**, Odour, Smell, **Taste**, and **Nutritive-essence** (ie:— (8)-kinds of **inseparable** matters, and the Delimiting Materiality, Materiality of **Lightness**, **Softness** and **Wioldiness**:— all (12) kinds of matters are **produced** by the Nutriment. So, these are = *Ahdraja rupa*".
2. The Action, Consciousness and Temperature produced materialities are "*Anahara rupa*",
3. The (4) Materiality of **Characteristic** are known as "*Nevacittajam nacittajam rupa*".

- 1- The Earth, Water, Fire, Air'-elements, the Colour, Odour, ' Taste, Nutritive essence (ie;- 8 inseparable matters) and the Sound=sense-object of Ear (= *Saddarammana*), the Delimiting Materiality, the Materiality of Lightness, Softness and Wioldiness, all together (13) kinds of matter are known as Temperature produced Matters (= *Utujja rupa*).
2. . The Action, Consciousness and Nutriment produced matters are non-temperature produced (= *Anutujja rupa*) matters.
3. The (4) kinds of Materiality as Characteristic are known as "*Nevautujjam ananutujjam rupa*". (Visuddhi-2-81.)

Classification of Materialities in Group of Four

1. *Rupayatana* = The color-base (= sense of sight) is the sense-object of Eye-consciousness. So, it is known as "*dittha*".
2. *Saddayatana* = The sound-base is the sense-object of Ear-consciousness. So, it is known as "*Suta*".
3. *Gandhayatana-Rasayatana-Photthabbayatana* == Smell, Taste and Touch are the sense-objects of Faculty of Nose, Tongue and Body. So, these are known as "*Muta*".
 - (a) The Nose-Consciousness = takes up the Sense-object of smell which reaches the Faculty of Nose,
 - (b) The Tongue-Consciousness takes up the Sense-object of taste which reaches the Faculty of Tongue,

PAGE-140

- (c) The Consciousness of Body takes up the sense of object of Touch, which reaches the Faculty of Body. So, all these 3 kinds of sense-object are known as'= Muta".
4. The remaining (21) kinds of Matter are the Mind-object-base of the Mind-Consciousness (= *Manovinnana*). So, these are known as "*Vinnata*".
1. (18) kinds of Conditioned Matters (= *Nipphanna rupa*) are known as "*Rupa rupa*"
2. The Delimiting Materiality is known as "*Pariccheda rupa* ". '.

3. The Bodily Intimation, the Verbal Intimation, the Materiality of Lightness, Softness and Wioldiness, all these (5) matters are known as Materiality as Alter action (= *Vikara rupa*).
4. The Materialities of Conception, Aging and Dissolution (= *Jati, Jara, Bhanga*) = . The Materialities of Growth, Continuity, Aging and Impermanence (- *Upacaya, Saniati, Jarata, Aniccata*) All these (4) kinds are known as Materiality of Characteristic (= *Lakkhana rupa*).

1. The Heart-materiality is "***Vatthu-rupa***". It is not "***Dvara-rupa***".
2. . The Bodily Intimation and Verbal Intimation are "***Dvara-rupa***". These are not = *Vatthu-rupa*".
3. The (5) transparent-elements (= *Pasada rupa*) are "*Vatthu-rupa*" as well as "*Dvara-rupa*".
4. The remaining (20) kinds of Materialities are not "*Vatthu-rupa*" nor "*Dvara-rupa*" (Visuddhi-2-81.)

Classification of Materialities in Group of Five

- 1, The Heart-materiality and (8) kinds of Materiality of Faculty (= *Hadaya-vatthu, Indriya-rupa*) are produced by the Volitional Action only. So, these are "***Ekaja rupa***" (ie:- one-condition produced matter).
- The (2) Materialities of Intimation are produced by the Consciousness only. So, these are also "***Ekaja rupa***". (ie: one- condition produced matter.)
2. *Saddayatana* = Sense-object of sound is produced by the Consciousness as well as the Temperature. So, the sense object sound is produced by two conditions, ie:- it is "***Dvija rupa***".
3. The Materialities of Lightness, Softness and Wioldiness :— these (3) kinds of matters are produced by the Consciousness, the Temperature and the Nutriment. So, these (3) kinds of matter are produced by 3 conditions, ie:- "***Tija rupa***".
4. The Earth, Water, Fire, Air- elements, the Colour, Odour, Taste and Nutritive-essence: ie;—(8) kinds of inseperable matters (= *Amnibbhoga rupa*) and the Delimiting-materiality are produced by the Volitional action or Consciousness or Temperature or the Nutriment. So, the (9) kinds of Matters are produced by (4) condition. These are "***Catuja-rupa***".
5. The (4) kinds of Materialities of Characteristic (= *Lakkhana-rupa*) have no. causative condition. So, these are "***Nakutocijata rupa***" = "***Nakutocisamutthana rupa***".

The arising phase of the Real materialities is conception (= *J5t*= which is divided into "Growth" and "Continuity" (= *Upacaya, Santati*). There is no such thing, that the cause of arising (= *Uppada*) is "arising" or the cause of conception (= *Jati*) is conception. The aging of arisen matter is "*Jara*" and the dissolution of arisen matter is "*Marana*". So, all these (4) Materialities of Characteristic have no causative condition. That is why these are known as "***Nakutocijata-rupa***".

Pali Quotation(1-239)

PAGE-141

In these Pali-scriptures, it is described that the Materiality of Conception (= *Jati nlpa*) which is Arising= Growth (= *Upacaya*) and Continuity (= *Santati*) is produced by a condition. That condition (eg:- Action, Consciousness, Temperature and Nutriment) is seen only before the expiry of it's effect on the matter and only' at that moment, the meditator ought to see the nature of conception or arising (= *Jati*),

So, when a meditator is discerning:-----

1. The production of Action-produced-matters (= *Kammaja rupa*) by the Volitional action,
2. The production of Consciousness produced-matters (= *Cittaja rupa*) by the Consciousness,
3. The production of Temperature produced-matters (*Utuja rupa*) by the Temperature,
4. The production of Nutriment produced-matters (= *Aharaja rupa*) by the Nutriment,

——— he will see the arising (= *Jati*) nature of the respective resultant matters with the Knowledge of Right-View (= *Sammaditthinnana*) only at the functional moment of these respective causative conditions before the expiry of their effects. Because a meditator can perceive the nature of arising of matters with the Insight-knowledge at the functional moment; before the expiry of the effect of causative conditions, the Buddha teaches the arising of matters (= *Jati*) is caused by a certain condition. And, when one sees the appearance of the matter due to respective causes with Insight-knowledge, he will also see the Conception= Arising (= *Jati*) of these matters. That is why the Buddha teaches and allows the statement that " the arising (= *Jati*) of the matters is due to the various causative conditions". (Refer to Mahati-2-l 11.)

This is the End of the Speech on the Chapter of Aggregate of Corporeality.

Chapter of Speech on Consciousness Aggregate

Apart from Aggregate of Corporeality, there are (4) aggregates or groups of Mentality:—

1. All Mental phenomena which have Character of feeling the eleven varieties of Sense-object in terms of the Past, the Future and the Present etc; etc-- are grouped as Feeling Aggregate. (*VedanUkkhandh'a*).
2. All Mental phenomena which have Character of perception and **recognition** of the eleven varieties of Sense-object in terms of the Past , the Future , and the Present etc; etc— are grouped as Perception Aggregate. (*S'ah'ridkkhandh'S*).
3. All Mental phenomena which have Character of Active state of effort, Passive state of formation and Endeavour (*Bydpra*); exist in eleven varieties according to the Past, the Future and the Present etc; etc-- are grouped as Mental formation Aggregate. (*Sahkh'Eirakkhandd*).
4. All Mental phenomena which have Character of **taking-up** and realization of eleven varieties of Sense-object in terms of the Past, the Future and the Present etc; etc— and the nature of realization differs from that of **Percep tion** and Wisdom (*ScmKd, PanKa*); are grouped as Consciousness Aggregate. (*Vi^Kdnakkhandha*).

Among these four Mental Aggregates; if someone knows Consciousness Aggregate ; the remaining three mental groups are easy to understand . So, Consciousness Aggregate , will be described first .

(Visuddhi-2-82.)

Character of Recognition (*Vijanana lakkhana*)

<?^> 01-; ^ 8 ->^ 3 - ^ « OJ ^

The above answer is given by Venerable *Ashin SariputtarS* to the question of Venerable Ashin *Mahdkotthika* which is stated in *Mah'Svedalla sutta* .

" O... Venerable *Kotthika* ; It knows the object of sense; It recognises the object of sense. That' why ; it deserves the name " Consciousness " (*VmKana* } . (Ma-1-366.)

1. *ViPtfdna* = Consciousness
2. *Citta* ' = Mind
3. *Mana* = *Mono* = Mind

These three words are synonymous . (Visuddhi-2-82.)

To enforce the condition (*bwasddhana*) that the Ultimate natural phenomena are fundamentally resulted natural events (*Pavattidhamma*) , the term " Recognition-character " (*Vijdnana lakkhanam*) is used. These is no such

thing acting as a subject to recognise the object apart from natural phenomenon. So the natural phenomenon is assumed as a subject and (*Vijñāṇa*) is used for it . The phenomenon that takes up Sense-object is (*Vijñāṇattha*) = Consciousness = which means recognition of Sense-object. That nature is also (*Cintanāṭṭha*) = Thought = which means thinking of Sense-object and (*Mananāṭṭha*) = *Mano* = Mind = which means awareness. These three terms :—

(1) *Vinnanam* = Consciousness ,

(2) *Cittam* . = Thought,

(3) *Mano* = Mind are used synonymously to describe the meaning for " Consciousness ".

(Pyi -

Visuddhimagga- nissaya-3-241.)

The Three Explanations of The Words (*The Three " Viggaha "*)

The terms — *Phassa* (Contact) , *Vedana* (Feeling), *Saṃsāra* (Perception), *Cetanā* (Volition) and *Vinnana* (Consciousness) ; which are used for Ultimate truth phenomena can be explained generally by three ways , such as " *Kattusādhana* " [ie:- explanation to enforce the meaning as a doer or subject], " *Karana sadhana* " (ie:- explanation to enforce the meaning as an act of doing);

" *Bhavasādhana* " (ie:- explanation to enforce the meaning as just natural condition). Among these three ways , explanations to enforce the meaning as a doer (*kattusādhana*) and explanation to enforce the meaning as an act of doing (*Karanasādhana*) are not suitable exact explanations for the Ultimate natural phenomena. The two ways are used as alternative preliminary explanations to abolish the concept of persons with " Ego-belief". (The group of words, grammatically used to explain the meaning of Ultimate natural phenomenon is known as " *Viggaha* ").

Some ordinary person (*puthujjana*), who are unfamiliar with the phenomena of *Ultimates* assume that " there is Ego (personality or self =soul or spirit) in their body which performs (*kāraṇa*) the various actions and feels (*vedaka*) the results of these action. They think that the action of knowing the Sense -object is the Consciousness (*citta*) and the subject who accomplishes the action of knowing the Sense-object is Ego or soul (*atta*). To abolish the above wrong concept; although "Consciousness"(*citta*) has no power of being as a subject (*kattu satti*), the explanation to enforce the meaning as a subject (*kattusādhana Viggaha*)=(ie:-*Vijñāṇatthi vā Hanam=being*, able to know the Sense-object; that nature is termed as "Consciousness") is stated for " Consciousness ". To such most likely explanation: ie- " Ego acts as a subject which feels Sense- object;

although it has no such power",- the term (*Taddhammu-paccara*) is given in *Pali* texts. It is somewhat like words "Rabbit with horns" ;although rabbit actually has no horns. In conclusion ; "Ego (*atta*) can't know the sense-object and Ego (*atta*) by itself does not exist ; only the Consciousness feels the Sense -object and there is no such thing like Consciousness which is able to take part as a subject to recognise the Sense-object."

Some persons assume that; by means of Ego(*atta*), the other mental concomitants, like "*phassa*" (contact) know the Sense- objects and Ego accom-plishes the action of awareness. To abolish that wrong concept; the explanation to

enforce the meaning as an action (*Karanasdddhana Viggaha*)=ie:- " *Vijndnti etendti ViKnanam* " which means " Consciousness is the awareness of sense-object " is given in *Pali*- texts(*taddhmmupacdra*) although the Consciousness (*Citta*) is not awareness of Sense-object. In conclusion; knowing the Sense-object by Mental concomitant (eg: " *phassa* " = contact) is not due to Ego (*atta*); and Ego by itself does not exist ; only the Consciousness (*Citta*) is the mean by which the Mental concomitants (eg: *phassa*= contact) can take up Sense-object.

So, although these two explanations (*Kattusadhana Viggaha* and *Karanasdddhana Viggaha*) are used to abolish the one's Ego-belief since the Consciousness (*citta*) can't act as a subject (*Kattusatti*) and not able to aware the Sense-object (*Karana-satti*), these two explanations are not suitable to express the nature of the "Ultimates". Actually the Consciousness (*citta*) is just a natural phenomenon which merely recognises the Sense-object. That is why to emphasize the power of "Consciousness" (*citta*); another explanation to enforce the meaning as "just natural condition " —ie:- " *bhavasadhana uiggaha* " = " *cintanam cittam = vijananam vmKdr^arh* " which means that the Consciousness is a natural phenomenon which just recognizes the Sense-object - is again given. Only this explanation can really reach the true sense of the " Ultimate" , because all the Ultimate natural phenomena are effortless phenomena (*Nibydpdra -dhamma*) .

Different Modes of Consciousness and Different Kinds p ^, of Meritorious Deed

The **Consciousness** (*Viffiana*) has only one Character of recognition (*Vijdnana lakkhana*); which is awareness and ability to take up the Sense-object. In terms of origin (*Jatibheda*) there are three kinds ; such as Wholesome (*Kusala*) ; Unwholesome (*Akusala*) and Neutral (*Avydkata*) deeds.

- The Wholesome or Meritorious deed is again classified according to the sphere of existence (*BhUmibheda*) into 4 kinds; such as Wholesome deed „„ of Sensuous sphere (*Kamdvacara kusala*), Wholesome deed of Fine material sphere (*Rupavaeara kusala*), Wholesome deed of Immaterial sphere (*Anipd-vacara kusala*) and **Supramundane** wholesome deed (*Lokuttard kusala*). Among these Wholesome deeds, those of Sensuous sphere (*kdmdvacara = mahd kusala* = Great wholesome deed) is again grouped into 8 kinds (Refer to Meditation of mentality.). Now the production of these Consciousness of good deed of sensuous sphere will be mentioned:——

1. Once, a person born with Rebirth-consciousness of glad - mindedness (*Somanassa-patisandhi*), living in a place which favours attainment of merit and prosperity (*patirupa-desav'dsa*) performs charity to noble persons with pure articles of offering at an appropriate time, guided by good parents, wise teachers, honest friends , and he has Right view (*Sammdditthi*) plus Confidence(*Saddhd*) in his charity which is based on belief in Volition (*Kamma*) and it's result ; the conduct of that person is associated mentally agreeable feeling (*Somanassa*) leading to delightful satisfaction =Rapture (*Pih'*) which is a factor for attainment of Enlightenment (*Sambojjhanga*).He performs charity with wisdom of Right-view

(*Sammaditthm'nana*) ie:- "*Atthi dinnam* = belief in obvious effects of donation and he also performs other meritorious deeds (*Punna kusala*) like offering (*Dana*) ; moral conduct (*SUa*), meditation and mindfulness (*Samatha* ;

Vipassana) without any persuasion by other persons or by himself ——— to that particular person with meritorious volition (*PuKfia kusala cetana*); the Great unprompted (*Asankharika*) wholesome consciousness connected with wisdom (*Nhana sampayutta*) and pleasure (*Somanassa sahagata*) arises in his mind or mentality.

(Visuddhi - 2 - 83.)

2. Sometimes, a person performs charity with delightful satisfaction and wisdom of right view, but his conduct is not active and it is done unwillingly. In performing other meritorious deeds like moral conduct, meditation etc; he is less willing and motivated by himself or other. In such cases, the Great prompted (*Sasankharika*) wholesome consciousness connected with wisdom and pleasure arises in his mind .

^^c^c. ^^?^0 " ^0 C^ - ^ < ^ «)

Now; in these statements, what is the underlying conditioned-phenomena (*Sankh'ara*) ? In performing various wholesome deeds; (eg: charity, moral conduct, meditation, mindfulness etc), the *preliminary* promotion of one's willingness to that activity by himself or other is known as " foremost preparation of one's mind =(*pubbapayoga*) and by that preparation; the following Consciousness comes into sharp condition (*tikkhabhava*). These two phenomena (ie:-foremost mental preparation and sharpened- condition of following Consciousness are known as Conditioned-phenomena(*Sankh'ara*). It does not necessarily mean that the Conditioned phenomena occurs before and the *wholesme* deed is performed later. (Visuddhi - 2 - 83. *MahatT-2* -117.)

3. Sometimes, innocent children happily offer articles of charity and pay *p \ u, c hom-age* to monks without hesitation , because they are accustomed to do so, to imitate the manner of offering and paying homage to the monks by their parents and relatives. At that time, third kind of Great wholesome consciousness arises in their mind. (ie:-The Unprompted great wholesome consciousness with pleasure but not connected with wisdom.) (Visuddhi -2 -83.)

4. Sometimes, children offer and pay homage to monks , because they are persuaded by their parents and relatives somewhat like " 0..... children ! do offering, pay homage and give alms to monks "— and at that time the fourth kind of Consciousness = the Prompted great wholesome consciousness with pleasure not connected with wisdom arises in their mind .

5-8. Finally, at sometimes the 4 kinds of above Wholesome deeds (*Kusala*) are performed not associated with pleasure since the articles of offering and the persons who accept these offering are not in perfect condition ,and there is no

delightful **satisfaction** in performance of other Wholesome **debris** like donation (*Efana*), morality conduct (*S^lu*), **mindfulness** and meditation (*SaiffdtSm' VifJassciim* } ; the **remamg** [bur **kinds of** great **wholesome** consciousness with indifferent **mental** feeling (*Upc'kkha ^dhagato* } arises **in the mind** of performer, (So; **in total there** are 8 kinds of Great wholesome consciousness |

Visuddhi - 2 - 83.

Wholesome deed of Fine material sphere | *RiJp^acam kusafa* is classified into five kinds based on associated constituents of mental absorption (*JhaTiarLga*).

Wholesome deed of Immaterial sphere (*Ar^puuucara ku^alu*) is classified into 4 kinds ,based on 4 mental absorptions of Immaterial sphere. (*Aruppa/hwia*), { Refer to **mindfulness of menLaLiLy .)**

The 9upramundane merit (*LokuUara kusdia* } is classified into 4 kinds by means of associated. 4 Supramundane paths (*Anyamagga*), ie:- the Path of ystream - Winning [*Sot^puiti- mayya*], **The Path (if Once Return (*Sakadagami magga*) , The PaLli ol Non - ReLLim | *Anagami magga*) and the Path of Holiness (*AruhaUa- inugya* } ; **respectively .** Therefore, Consciousness of **wholesome deed** { *Kiisala vmf(ana* } are as follow:-----**

1. Consciousness of Great wholesome deed - Wholesome consciousness of sensuous sphere (*Mahfi kusala citta = Kd^vacaro kfi^ala dtf^*).

----- (s] lands ,
2. Wholesome consciousness of Fine material sphere (*Kupavacafa kfisala aiTfa*)

----- ^ 5 (kinds,
3. Wholesome consciousness of Immaterial sphere (*Awp^Svacara kusfllet citta*)
 ----- ^^ . ____ (4 } kinds, 4, **SiipramLindane Wholesome consciousness (*Loku.ttar^i kv^ala citta*)**

Total ----- (21 } kinds, P145 (visuddhi - 2 -83-84.) (4) hindB

(12) Kinds of Unwholesome Consciousness

In terms of the sphere of *existence* (*BhUmibheda*); Unwholesome consciousness is only one . ie:- all Unwholesome deeds are present only in sensuous sphere . But, by means of Root- conditions (*Mula*) , there are classified into 3 kinds ; ie:- Greed- rooted = (*Lobharmlla citta*) , Hatred- rooted = (*Dosamula*) and Delusion- rooted (*Moharmlla*) Unwholesome consciousness respectively . Again the Greed -rooted unwholesome consciousness is divided into (8) kinds. . (Refer to Meditation of *metalit* .)

How (8) Kinds of Greed- Rooted Unwholesome Consciousness are formed.

1. Sometimes, a person with Wrong *Annihilalion-view* (*Uccheda ditthi*) thinks that " Sense - objects are wholesome and it is not a sin to enjoy them " and feels Sensuous objects (*Kamaguna*) willingly with unprompted mind . He believes in auspicious seeing (*Dittha mangala*), auspicious hearing (*Suta mangala*) and auspicious touch (*Muta mangala*), like gamblers of this time.

(He studies in auspicious blessing of the Mundane-world . He believes also in astrology and employs certain means as suggested by astrologers to achieve success and to advert impending misfortune.) At that time , the first kind of Unwholesome greed- rooted consciousness which is unprompted pleasure-associated; and connected with wrong-view arises in his mind.

(*Visuddhi* - 2 - 84.)

" Life starts in cradle and ends in coffin. It ends after death . After dissolution of the body at death in a coffin ; all physical and mental processes will come to be annihilated ." The living beings with above wrong-view:- ie:- annihilation- belief (*Ucchedaditthi*) will enjoy at their best all sorts of Sensuous - object, keeping in their mind that there is no sin in these pleasures and without thinking the ill effects of these; because they do not believe in future life after death and think " *Etdvako jwavisayo yavaindriya gocar* " = the life (*Jwa*) of a living being is limited in an area within the reach of the Eye -faculty.

Some persons believe that - " By seeing children faces and get children will reach fearless celestial realm and *Nibb^na* , seeing the children's faces is the only way to reach celestial realm " , and this pathway is even known by animals ; so the animals may get sexual- *intercouse* even with their own mother .

The person who believes such wrong view that is " seeing the son's face (*Puttamukha* - *dassana*) may bring him to celestial realm, will enjoy sensuous objects at their own wish , and at that time , the first kind of Unwholesome greed - rooted, *unprompted* -consciousness with pleasure ; connected with wrong view arises in his mind . (*Mahatf*- 2 - 120.)

In case of theft , (*Adinnaddna*) only stealing of gold owned by *Brahmana* amounts to theft . Committing stealing of properties owned by other persons is not guilty . In taking away the properties of other persons with this kind of misconception (*micchadgaha*) ; the Greed - rooted Consciousness , with the craving of the objects is also the first kind of Greed - rooted unwholesome Consciousness . Telling lies for teachers , for cattles , for self , for own life and for wedding ceremony of own daughter are not sin . Other lies are guilty . Slandering for teacher is not guilty ; unlike for other . The speeches about battles among *Bharata* - kings , taking away *Sitadevi* etc: can abolish Unwholesome actions . In telling lies , slander , battles of Bharata - kings , taking away of Sitadevi etc -with misconception , (*micchadgaha*) , the Consciousness with mental attachment to all sorts of these verbal action is also the first Greed - rooted consciousness .

(Mahatf-2 - 121 .)

^' 2. At sometime , when a person enjoys sensuous objects happily with wrong - view and belief in the effects of auspicious hearing , seeing etc ; but not willingly , so persuaded by - self or other ; a second kind of Greed - rooted consciousness which is known as " Pleasure - associated wrong - view connected , prompted greed - rooted unwholesome consciousness " (*Somanassasahagata ditthigana sampayutta sasankhdrika lobhamula akusala citta*) arises in his mind. (*Visuddhi* - 2 - 84 .)

3. When a person enjoys sexual misconduct happily , very willingly , so not *persuaded* by other , and not led by wrong - view ; tries to get the properties of others with severe desire to obtain them , using various *unlawful* ways ; takes properties not given by owners through stealing , *robbing* ; and takes bribery — in all these situations , third kind of Greed - rooted unwholesome consciousness , known as " Pleasure associated , wrong - view unconnected , *unprompted* -greed -rooted consciousness (*Somanassasahagata ditthigata -vippayutta asankhdrika lobhamula citta*) arises in the mind of that person . 3147 • (*Visuddhi* - 2 - 84.)

4. Sometimes a person enjoys *unchastity* happily not connected with wrong -view nor wrong concept and unwillingly persuaded by others or by-self ;

he tries to get the properties of others with desire to obtain these by various unlawful ways ; he takes properties what are not given by others through stealing , robbing and he takes bribery (ie: - he may take bribery although not willing to do so). In these situations , fourth Greed -rooted prompted consciousness which is pleasure associated -wrong -view unconnected arises in the mind of that person. (*Somanassa - sahagata ditthigata vippayutta sasankhdrika lobhamula citta*).

(*Visuddhi* - 2 - 84 .)

5 — 8 . At some times , when enjoyable Sense - objects are not in perfect conditions , and there is no delightful satisfactory state ; and although all these Unwholesome consciousness (may be Wrong - view connected or not, Prompted or Unprompted) are devoid of Glad - mindedness (*Somanassa*), some persons may perform Greed -rooted unwholesome deeds. At that time ; the remaining (4) Greed - rooted unwholesome consciousness with Indifferent mental feeling (*Upekkhasahagata*) arise in their minds .

(*Visuddhi* - 2 - 84.)

How [2] Kinds of Hatred-Rooted Unwholesome Consciousness (*Dosa mula citta*) are Formed

There are only [2] kinds of Hatred-Rooted Consciousness .

1. Grief-associated-anger connected, unprompted , hatred rooted Consciousness ,
2. Grief-associated-anger connected, prompted . hatred rooted Consciousness ,

(*Domanassa sahagata patighasamapayutta asankh'arika dosamula citta, Domanassa sahagata patighasampayutta sasankh'drika dosamula citta* .)

When a person kills a living beings = or shorten the life of a living beings , taking away (=stealing) other person's properties , telling lies , slander , rude speech , foolish babble and thinking ill-will to damage or to kill others , if he takes these actions with Grief -mindedness (= *Domanassa vedana*) and connected with severe -anger (= *Patiga*) , and that action is done unprompted by himself or others, the first kind of Hatred-rooted consciousness arises in his mind. If such unwholesome action are done less actively and prompted up by-self or other ; the second kind of Hatred-rooted consciousness arises in this mind .

(*Visuddhi* -2 -84 . *MahatT* -2-121.) .

It is to be noted that in committing above Unwholesome deeds amounting to cause severe anger , that Hatred-rooted consciousness produced by feeble mind is not always real prompted consciousness . (= *Ekanta sasankhdrika citta*) . If Hatred -rooted consciousness is produced , prompted by-self or by other, that consciousness is weak or feeble one. That is why , the Commentary teacher describes that the feeble Hatred -rooted consciousness is usually prompted .

(*Mahati* '2-121.)

How (2) Kinds of Delusion - Rooted Unwholesome Consciousness (*Moha mula citta*) are formed

1. Neutral-feeling associated, sceptical doubt connected , delusion rooted unwholesome Consciousness , (*Upekkhasahagata vicikiccha sampayutta mohamula citta*) ,
2. Neutral-feeling associated , restlessness connected , Delusion rooted unwholesome Consciousness , (*Upekkhasahagata uddhacca sampayutta mohamula citta*) ,

These are two kinds of Delusion-rooted Unwholesome consciousness. When there is sceptical doubt -about the real existence of Perfectly enlightened Buddha (= Universal Buddha = *Samma sambuddha*) ,—about the teachings of the Enlightened one who sees every things (= *Sabbamiu-samma sambuddha*) ; — about the existence of real Noble Ones (= *Ariyasangha*) and about the Conditionality and Dependent nature of natural phenomena (= *Paticca-samuppada* "Dependent Origination") ; the Neutral feelings associated, sceptical doubt connected,

Delusion rooted unwholesome consciousness arise in the mind of a person. The mind that is suspicious about the ability of Buddha's disciples to perceive the nature of Mentality and Materiality taught by the Buddha; who is Enlightened and sees every things (= *Sabban'nu-Samma sambuddha*) and the mind that is suspicious about the meditation of things of past and future. When the mind is restless and taking up various kinds of Sense- objects, the Neutral- feeling associated, restlessness connected, delusion-rooted consciousness arises in the mind.

In Greed -rooted consciousness, there are two Unwholesome roots (= *Akusala mula*) known as Greed (= *Lobha*) and Delusion (= *Moha*). In case of Hatred rooted consciousness, the two Unwholesome roots are Hatred (= *Dosa*) and Delusion (= *Moha*). In (2) kinds of Delusion-rooted consciousness, there is only one kind of Unwholesome root; this is the Delusion (= *Moha*). It is free from the other Unwholesome roots such as Greed and Hatred. That Delusion rooted consciousness, which has only one concomitant Root-condition, (= *Eka hetuka*) i.e.:- Delusion) and free from the other Unwholesome roots, it is indecisive and very **stupidous**. Again, since it is associated with Doubt (= *Vicikiccha*) and Restlessness (= *Uddhacca*), it is very trembling. So, this Delusion-rooted consciousness is not associated with **Mentally** agreeable feeling (= *Somanassa vedana*), but with Indifferent mental feeling (*Upekkha vedana*). That Delusion-rooted consciousness is never decisive and sharp in its own nature. Since; it is associated with sceptical doubt (= *Vicikiccha sampayutta*), its perception of Sense-objects is shifting from one object to another, according to the sceptical doubt. Again; since it is associated with " Restlessness " (= *Uddhacca sampayutta*); that consciousness is fluttering in perception of various Sense-objects. So, in their own nature these two kinds of consciousness are never decisive and sharp in the operation of every functions of them; and prompted by-self or by the others. That is why there is no " Prompted " nor " Unprompted " (= *Sasankharika, Asankharika*) in this Delusion-rooted unwholesome consciousness.

Again, the Restlessness -mental-concomitant (= *Uddhacca cetasika*) occurs in **association** with (12) kinds of Unwholesome consciousness (= *Akusala sadharana cetasika*). Although it occurs in association with other (11) kinds of Unwholesome consciousness; apart from Delusion-rooted-restlessness connected consciousness; that mental concomitant (i.e.-*Uddhacca*) is more strong (= *Balava*) in this Delusion-rooted-restlessness-connected consciousness.

Due to this nature, it becomes essential or a decisive factor (= *Padhana*), among the (16) kinds of associated concomitants. And that is why this consciousness only is specially mentioned in connection with " Restlessness " (= *Uddhacca*) and the name " Restlessness connected,delusion rooted unwholesome consciousness " is given. Only in association with this consciousness, the " Restlessness " (= *Uddhacca*) is given distinctive analysis (= *Sampa*). So; by the nature of :—

- 1 . Sceptical doubt (= *Vicikiccha*), which is not connected with other Unwholesome consciousness, and--
- 2 . **Restlessness** (= *Uddhacca*), which is the decisive factor (= *Padhana*);— the Delusion-rooted consciousness is classified by the Buddha into two kinds as follow: --- '

- 1 .Neutral-feeling associated, sceptical doubt connected consciousness (= *Upek-khasahagata vicikicch'a sampayutta citta*), and

- 2 .Neutral-feeling associated, **restlessness** connected consciousness (= *Upekkha-sahagata uddhacca sampayutta citta*).

The indecisive nature of Mental-concomitant with sceptical doubt (= *Vicikicchā cetasika*) on various Sense -objects is due to suspicious perception. The fluttering nature in perception of various Sense-objects by Mental -concomitant with Restlessness (= *Uddhacca cetasika*) is due to excitement in mentality .

So , as already described, there are (12) kinds of Unwholesome * consciousness . These (12) kinds of Unwholesome consciousness arise , when they take up one of the (6) kinds of Sense-objects at the body ,verbal and mind doors (= *Kāya dvara, VacT dvara, Mono dvara*) with bodily, verbal and mental action (= *Kāya kamma, VacT kamma, Mono kamma*) where the Course of actions (= *Kamma patha*) = eg:- Killing = *Pdndtipatd* , Stealing = *Adinnaddnd* etc, etc — may be accomplished or not. These consciousness occur after Neutral-feeling associated-Rootless-Inoperative-action-Mind-consciousness-element (= *Upekkhāsahagata-Ahetuka-kariya-manovmridna-dhātu*) , kown as " *Vuttho* " at Five-door (= *Pancadvara*) and " *Manodvaravajjana* " at Mind-door(= *Manodvara*). Among the (12) kinds of Unwholesome consciousness, apart from Reslessness connected-consciousness , the remaining (11) kinds of Unwholesome consciousness have effects on " Rebirth " (= *Patisandhi*) and present existence (= *Pavatti*) in the (4) kinds of " Lower Worlds " (= *Apdya*) . In the pleasant plane of existence these have effects in these planes only (= *Pavatti*) . In case of " Restlessness connected-consciousness (= *Uddhacca-sahagata citta*) , it has effects during the present existence in both Lower Worlds (= *Duggati*) and pleasant planes of existence (= *Sugati*) .

(MahatT-2-122 .)

Resultant-Indeterminate Consciousness (*Vipdka Avydkata Vinndna* }

In terms of origin (ie:- *Jatibheda*) ; the Indeterminate consciousness (= *Avydkata vinridna*) is of (2) kinds, known as " Resultant-Indetermina-te-Consciousness " and " Functional-Indeterminate (ie:- *Karmically inoperative*) Consciousness (ie:- *Vipdka avydkata ; Kiriya avydkata*) . And ,the Resultant-Indeterminate Consciousness (= *Vipdka avydkata vmridna*) is classified into (4) kinds , in terms of Sphere of existence (= *Bhūmibheda*) . These are — the Resultant Indeterminate consciousness of the Sensuous-sphere(*JCai7io'L'acara vipdka vmridna*) , the Resultant Indeterminate consciousness of fine material Sphere (= *RUpavacara vipaka vmridna*) , the Resultant Indeterminate consciousness of the Immaterial Sphere (= *Ampdvacara vipdka vmridna*) and the Resultant Indeterminate consciousness of the *Spramundane* (= *Lokuttard vipaka vinridna*) . Again ; the Resultant Indeterminate consciousness of the Sensuous sphere is divided into " Wholesome Resultant Consciousness " and " Unwholesome Resultant Consciousness " (= *Kusala vipdka vinnana , Akusala vipaka vinnana*).Finally ,the Wholesome Resultant consciousness is of two kinds ,known as " Wholesome Resultant consciousness without root-condition " and " Wholesome Resultant consciousness with root- condition " (= *Ahetuka kusala i 149 vipdka vinridna , Sahetuka kussala vipaka vinnana*).

-'So , Wholesome Resultant consciousness are of (16) kinds as follow :-

[Sense -objects among the above (3) signs of " *Kamma ,Gati*" etc— without any effort by-self or by other , these consciousness are unprompted *ie:-Asankharika -citta*; and if appear with effort by-self or by other , these are prompted *ie:-Sasankharika*). Again in case of the Registering consciousness (=*Tadaram -mana citta*) , if the proceeding Wholesome or Unwholesome Impulsion Consciousness (=*Jauana citta*) is unprompted ,that Registering consciousness is also unprompted and if that Impulsion consciousness is prompted , that Registering consciousness is also prompted . Keep in mind like that. (*Mulati* -1-127.)

Non - Diligent and Diligent Nature 3 151 Saussaha)

(*Nirussaha* —

There is no *differece* in the number of associated mental concomitants in between the Great Wholesome and the Great Resultant consciousness . But , the Resultant consciousness is lack of diligence or endeavour (= *Nirussaha* = *Byapara*) and it looks like an image of a person's face in the mirror which is inert . In case of the Wholesome Consciousness , it has diligence (= *Ussaha*) and endeavour (= *Byapara*); somewhat like a person's face which has looks of endeavour ,(= *Byapara*) and diligence (= *Ussaha*) .

Diligence (= *Ussaha*) :—The diligence (=*Ussaha*)is the endeavour *sala vinnana*) , even those formed by Higher Psychic Power or *Supranormal* Knowledges (= *Abhinna*) have endeavour (= *Byapara*) to produce the resultant effect . So , these Wholesome Consciousness are diligent minds (= *Saussaha*) . (*Visuddhi* -2-86. *Mahati* - 2- 127 .)

sala vinnana) , even those formed by Higher Psychic Power or *Supranormal* Knowledges (= *Abhinna*) have endeavour (= *Byapara*) to produce the resultant effect . So , these Wholesome Consciousness are diligent minds (= *Saussaha*) . (*Visuddhi* -2-86. *Mahati* - 2- 127 .)

All the Unwholesome Resultant Consciousness are rootless phenomena (= *Ahetuka*) . Wholesome Resultant Consciousness without root and *Wolesome* Resultant Consciousness with root take up the desirable objects of perception (= *Ittharammana, Itthamajjhattarammana*) . But , the Unwholesome Resultant Consciousness (= *Akusala vipaka vinnana*) takes up the undesirable objects of perception (= *Anittharammana , AnitthamaJJhattarammana*) .

So , there are (23) kinds of Resultant Consciousness in Sensuous ' sphere (= *Kamavacara vipaka citta*) . p 151

1. Unwholesome Resultant without root ————— (7) kinds
2. Wholesome Resultant without root —————(8) kinds
3. Wholesome Resultant with root —————(8) kinds

The Resultant Consciousness in Sensuous Sphere :— Total (23) kinds

pl50 by-self or by other , these consciousness are unprompted ie:- Asakharika citta and if appear with effort by-self or by other , these are prompted ie:-sasankharik). Again in case of the Registering consciousness (=Tadarammaa),ifthe preceeding wholesome Implusion consciousness , that Registering consciousness is also unprompted and if that Implusion consciousness is prompted , that Registering consciousness is prompted . Keep is mind like that.(Mulati-1-127.)

Non-Diligent and Diligent Nature (Nirussaha-pl51 Saussaha)

There is no difference is the number of associated mental concomitants in between the Great Wholesome and the Great Resultant consciousness. But, the Resultant consciousness is lack of diligence or endeavour (=Nirussaha =Byapara) and it looks like an image of a person's face in the mirror which is insert. In case of the Wholesome consciousness, it has diligence(=Ussaha) and endeavour (=Byapara); somewhat like a person's face which has looks of endeavour , (=Byapara) and diligence (=Ussaha). Diligence (=Ussaha):—The diligence (=Ussaha) is the endeavour (=Byapara) which can produce the Resultant - consciousness (=Vipaka vinnana) in the Body and Mind continuum which is still not free from defilements like Ignorance, Craving and Conceit (=Avijja, Tanha, mana), all of which should be eliminated with the 99 Path of Holiness (=Arahatta-magga). The nature of "Byapara" (ie:-the endeavour) is not present in the Resultant-Consciousness. So, the Resultant-consciousness are non-diligent minds (= Nirussaha). In case of the Wholesome consciousness (=kusala vinnana), even those formed by Higher Psychic Power or Supernormal knowledge (=Abhinna) have endeavour(=Byapara) to produce the resultant effect . So, these Wholesome consciousness are diligent minds (= Saussaha).

(Visuddhi-2-86.Mahati-2-127.)

All the Unwholesome-Resultant-consciousness are rootless phenomena (=Ahetuka). The Wholesome Resultant-consciousness-without-root and the Wholesome Resultant-Consciousness with-root take up the desirable objects of perception (=Ittharammana, Itthamajjhataarammana). But, the Unwholesome Resultant-consciousness (=Akusla vipaka vinnana) takes up the undesirable objects of perception (=Anittharammana, Anitthamajjhataarammana).

So, there are (23)kinds of Resultant-consciousness in Sensuous sphere (=Kamavacara vipaka citta) .

1. Unwholesome Resultant without root —————(7) kinds
2. Wholesome Resultant without root —————(8) kinds
3. Wholesome Resultant with root —————(8) kinds

The Resultant -Consciousness in Sensuous sphere:—Total (23) kinds

Like, Wholesome Consciousness of the Fine-material- sphere (Rupavacara kusala citta), the Resultant consciousness of the Fine-material-sphere are of (5) kinds . According to the number of associated Mental concomitants (= Sampayutta-cetasika) and objective sensuality , ie:- Sense-objects, these (2) kinds of consciousness (ie:- Wholesome and Resultant) are similar. But, the Wholesome Consciousness of the Fine-material sphere occurs in the Impulsive -mind moments (=Javana vithi), when one is trying to attain full concentration. The Resultant consciousness of the Fine- material sphere

1. Wholesome Resultant **consciousness** without root = 8 kinds.
2. Wholesome Resultant consciousness with root = 8 kinds.

(Refer to Meditation of Mentality).

Great Wholesome consciousness and Great Resultant consciousness (Mahakusala citta , Mahavipaka citta)

)149 Sampayuttadhammdnanca visese asatipi ddsataldd'isu mukhanimittam viya nirussdham vipdkam, mukhamviya saussaharh kusalanti Veditabbam.

P149 - - - IVisydhi - 2-86.)

Nirussahanti ettha ussdho nama anupacchinndvijjd tanha mana santdne vipdkuppddanasamatthatd sankhdto vyTipdro , so vipdkesu natthiti tarn nirussdham .Kusalesu pana abhinndvasapa vattesupi atthevdti tarn saussaharh. (Mahati- 2-127)

According to some teachers, whether the Great Resultant consciousness are prompted or unprompted (=sasankhdrika, asankhdrika) depend on two conditions:—

1. Condition of Course of Action (=Agamana):— Equal reaction to the action -(=Agamana). This nature means that the Resultant consciousness reflects the causative action . Like an image in a mirror which moves with the moving object, the Resultant consciousness due to unprompted Wholesome deed is equally '98 unprompted one; and the Resultant consciousness of prompted Wholesome deed is prompted one. So, whether the Great Resultant consciousness is prompted or unprompted, depends on the property of the Course of action(=Agamana) .

(MahatT-2-127.)

2. Condition of Preceding Cause (=Paccaya):— Power of Preceding Condition -(=Paccaya). The prompted or unprompted nature of the Resultant consciousness like " the Rebirth consciousness , the Subconsciousness and the Death -consciousness" (=Patisandi citta, Bhavanga citta, Cuti citta) , depend on the level and strength of the causative " Action— Signs of Action done —Sign of Next Existence " (=kamma, kamma-nimitta, Gati. nimitta). Again, the prompted or unprompted nature of Registering Resultant consciousness (=Taddrammana

149 vipaka mnndna) depends on the good or bad condition of Temperature , Nutriment and the prompted , unprompted nature of preceding Impulsion consciousness .

(Mahati-2-127.)

After performing Wholesome deeds with Wholesome consciousness , which may be Unprompted or Prompted and when the effect of that Wholsome action action is bringing about in later period without any effort (but due to the power of that action only) , with resulting appearance of one of the signs like " Action itself- Signs of Action done - Signs of Next existence " (=Kamma,Kamma nimita , Gati- nimitta) , the Rebirth consciousness (= Patisandhi citta) due to that action is effortless and Unprompted one (ie:-

Asankhdrika). If one of the above signs ([e:-*Kamma*, *Kamma nimitta*, *Gati nimitta*) appears due to the effort ; the Rebirth-Resultant consciousness (= *Patisandhi vipaka vanndna*) due to that action is with effort or prompted (= *Sasankhdrika*) . The remaining conscious-

ness like " *Subconsciousness* .and the Death Resultant consciousness (= *Bhavanga vipaka citta*, *Cuti vipaka citta*) are similar to the Rebirth-Resultant consciousness . (= *Patisandhi vipaka citta* = *Vinnana*) . (If the Rebirth, Subconscious-ness and Death consciousness appear by taking up , one of the Sense-objects among the above (3) signs of " *Kamma*, *Gati*" etc :- without any effort

by self or by other, these Consciousness are unprompted (ie'-*Asahkharika-citta*'), and if appear with effort by-self or by other,these are prompted (ie: *Sasahkhdrika*). Again in case of the Registering Consciousness (= *Taddrammana citta*), if the preceding Wholesome or Unwholesome Impulsion Consciousness (= *Javana -citta*) is unprompted, that Registering Consciousness is also unprompted and if the Impulsion Consciousness is prompted, that Registering Consciousness is also prompted. Keep in mind like that . (*MulatT-1-127.*)

Non-Diligent and Diligent Nature (*Nirussdha* — *Saussdha* }

There is no difference in the number of associated Mental concomitants in between the Great Wholesome and the Great Resultant Consciousness. But, the Resultant Consciousness is lack of diligence or endeavour (= *Nirussdha* = *Byapara*) and it looks like an image of a person's face in a mirror which is inert. In case of the Wholesome Consciousness, it has diligence (= *Ussaha*) and endeavour (= *Byapara*); somewhat like a person's face which has looks of endeavour, (= *Byapara*) and diligence (= *Ussdha*) .

Diligence (= *Ussdha*):————— The diligence (= *Ussaha*) is the endeavour (= *Byapara*); which can produce the Resultant Consciousness (= *Vipaka vir^ndna*) in the Body and Mind continuum which is still not free from defilements like Ignorance, Craving and Conceit (= *Avijjd*, *Tanhd*, *Mdna*), all of which should be eliminated with the Path of Holiness (= *Arahatta magga*). The nature of " *Byapara* " (ie:- the endeavour) is not present in the Resultant Consciousness. So, the Resultant Consciousness are non-diligent minds (= *Nirussaha*) . In case of the Wholesome Consciousness (= *Kusala vmridna*), even those formed by Higher Psychic Power or *Supranormal* Knowledges (= *Abhinnd*) have endeavour (= *Bydpdra*) to produce the resultant effect. So, these Wholesome Consciousness are diligent minds (= *Saussdha*) . (*Visuddhi-2-86. MahatT-2-127.*)

All the Unwholesome Resultant Consciousness are rootless phenomena (= *Ahetuka*). The Wholesome Resultant Consciousness without root and the Wholesome Resultant Consciousness with root take up the desirable objects of perception (= *Itth'drammana*, *Itthamajjhdttdrammana*). But, the Unwholesome Resultant Consciousness (= *Akusala vipdka vinndna*) takes up the undesirable objects of perception (= *Anittharammana*, *AnitthamaJJhattdrammana*) .

So , there are (23) kinds of Resultant Consciousness in Sensuous sphere (= *Kamdvacara vipdka citta*) .

1. Unwholesome Resultant without root ————— (7) kinds
2. Wholesome Resultant without root ————— (8) kinds
3. Wholesome Resultant with root—————(8) kinds

The Resultant Consciousness in Sensuous Sphere:—Total ———(23) kinds

Like, Wholesome Consciousness of the Fine-material-sphere (= *Rdpdvacara kusala citta*),the Resultant Consciousness of the Fine-material-sphere are of (5) kinds. According to the number of associated Mental concomitants (= *Sampayutta-cetasika*) and Objective Sensuality, ie:- Sense-objects, these two kinds of Consciousness (ie:- Wholesome and Resultant) are similar. But, the Wholesome Consciousness of the Fine-material sphere occurs in the Impulsive-Mind moments (= *Javana vTthi*), when one is trying to attain full concentration. The Resultant Consciousness of the Fine-material sphere

(= *Rupavacara vipaka vinnana*) in other words occurs in the Present existence
(= *Upapatti bhava*) of respective plane in the Fine-material sphere as Rebirth-Consciousness,
Subconsciousness and Death-Consciousness .

Again ; like, the Wholesome Consciousness of Immaterial Sphere

(= *Aru.pava.cara . kusala . citta*); the Resultant Consciousness of the Immaterial pl51 Sphere (= *Arupd-
vacara vipaka citta*) consists of (4) kinds. These Resultant

Consciousness occurs in the Present existence of respective plane in the Immaterial Sphere as Rebirth-
Consciousness , Subconsciousness and Death-Consciousness. That is, the " *Akdsdnarica yatana vipaka
vinndna* " (== the Resultant Consciousness of Immaterial Sphere-Plane, where the object of meditation is un-
bounded space); which is produced by the Wholesome Consciousness of that meditation ——— occur as the
Rebirth Consciousness , Subconsciousness and the Death-Consciousness in the Present-existence (= *Upapatti-
bhava*) of the Imma-terial-Sphere-plane where the object of meditation is unbounded space. (ie:- Infinity of
space) = (*Akdsdndncdyatana bhumi*) . Try to understand these statements.

Again, since the Supramundane Resultant Consciousness are the effects of Wholesome Consciousness
connected with (4) kinds of Supramundane Paths (= *Any a magga*), these are also of (4) kinds.

1. The Resultant Fruition Consciousness of Stream -Winner (= *Sotdpatti-phala vipaka vmridna*)
realized by the Wholesome Consciousness of the Path of Stream-Winner (= *Sotdpattimagga-kusala citta*) .

2. The Resultant Fruition Consciousness of Once-Return (= *Sakadagami phala vipaka vinri'dna*)
realized by the Wholesome Consciousness of the Path of Once-Return (= *Sakadagami magga kusala citta*) .

3. The Resultant Fruition Consciousness of Non-Return (= *Anagdmi-phala
vipaka vinnana*), realized by the Wholesome Consciousness of the Path-51 of-Non-Return (= *Andgdmi-
magga kusala citta*) .

4. The Resultant Fruition Consciousness of the Holiness or Arahant

(= *Arahatta-phala vipdka vinndna*), realized by the Wholesome Consciousness of the Path of
Holiness or Arahant (= *Arahatta-magga-kusala citta*) .

That is how respective Resultant Supramundane Consciousness occur according to the effects of Wholesome
Consciousness connected with (4) kinds of Supramundane Path. These Resultant Supramundane Consciousness (=
Lokuttard vipdha vinndna) are of two kinds, according to the two -o Supramundane thought-processes which may be
Thought-process of the Paths (= *Magga-vlthi*) or Thought-process of the Fruitions (= *Phala-samdpatti vTthi*) .

So , in summation there are (36) kinds of the Resultant Consciousness (= *Vipdka vinndna*) in four
Spheres of existence (ie:- Sensuous Sphere , Fine-material-Sphere , Immaterial Sphere and Supramundane
= *Kdma , Rupa , Ardpa , Lokuttara*) . (But , it is to be noted that the Resultant Consciousness of Fine-
material Sphere , Immaterial Sphere and Supramundane are not the-meditative objects of the Insight-
knowledge (= *Vipassand nndna*) of a meditator. Because , the Supramundane Resultant Consciousness (=
Lokuttard vipdka vinndna) is not the Sense-object of Insight-knowledge (= *Vipassand nndna*) . The
Resultant Consciousness of Fine-material Sphere and the Immaterial Sphere can occur only in the Mind-
continuum of beings of these Spheres. That is ; these are the

Resultant consciousness which are achieved in the Fine-material sphere and Immaterial sphere . Since, the Resultant consciousness of the Fine-material and Immaterial sphere are the external phenomena {=Bahiddha dhamma} to a medi-tator, he can only take up these, generally as Meditation- object when he is trying to get Insight-knowledge {=Vipassana rirtana} through the Insight -Meditation(=V!passotn5-bh.a'yana) of the (5) External Aggregates (^Bahiddha-khandhd) of Material and Mental Phenomena (=R'upa-nama dhamma). But, it is to be noted that, since the mediator is a human being , he is not able to take up selectively these Resultant consciousness through direct Meditative observation. Labhino eva pana mahaggata cittdni supakatj^ni honti. (MahiitT-2-353.) It means = the developed mental objects (=Mahaggata dhamma) are clearly perceived only in the Mind- continuum of those, who attain these by Absorptions [=Jh'dna).

According to this phrase, the " Developed consciousness " {=Mahaggata. citta) ie: — the Resultant consciousness of the Fine-material sphere and Immaterial sphere (=RHpa.vacara-vip13.ka citta, Aru.pava.cara vipdka citta} in this case; occur clearly ; only in the Mind- continuum of those who attain these Resultant consciousness through Absorptions.

Functional/Inoperative/ Mere-action-Indeterminate consciousness (Kiriya Abyakata Vinnana)

The Mere-action Indeterminate consciousness are of (3) kinds according the Sphere of existence (= Bhilmibheda), like :---The Mere-action Indeterminate consciousness of the Sensous sphere, Fine-material sphere and Immaterial sphere [=Kamavacara kiriyd, Rupdvacara kiriyd, Ampdvacara kiriyd). 1. Five- door Advertence consciousness; Mind -door Advertence consciousness and Mirth (smile) producing consciousness= Rootless-Mere action consciousness of Sensous sphere [=Ahetuka kdmadvacara kiriyd citta) = 3 kinds ,

152 2. Great Mere-action consciousness {=Mahakiriyd citta)= Great Mere-action consciousness of Sensous sphere (=Kamavacara mahakiriya'citta)= 8 kinds,

3. Mere-action consciousness of the Fine-material sphere(= RUpavacara kiriyd citta)=5 kinds,

4. Mere-action consciousness of the Immaterial sphere {=Ampavacara kiriya citta)=4 kinds,

So, there are (20)kinds of Mere-actoin -Indeterminate consciousness. Apart from Five-door Advertence (=Partca- dvdrd-dvaujjana) and Mind-door Advertence (=Mano-dvdrd -avaujjana), the remaining (18) kinds of Mere-action consciousness arise only in the Mind- contiuum of the Holy or Noble Individuals [=Ariya-puggala=Ariya=Arahat).

Summed up; there are:—

1. Wholesome consciousness [=Kusala citta] —————21 kinds
2. Unwholesome consciousness (=Akusala citta) —————12 kinds
3. Resultant Indeterminate consciousness(= Vipaka avydkata citta)———36 kinds
4. Mere-action(=Functional=Inoperative)Indeterminat consciousness [=Kiriya avydkata citta] —————

—————20 kinds

Total —89 kinds

Traditionally, it is said like— "90 consciousness, less one"— since **one** consciousness is less to reach total number 90.

pl52

(14) Functions of Consciousness p 153

(*Vifndna*

Kicca)

The functions of consciousness are of 14 kinds such as :—— Rebirth, Subconsciousness , Advertence , Seeing, Hearing, Smelling , Tasting, Body-consciousness, Receiving, Invertigating, Determining , Impulsion, Registering and Dying function. These consciousness arise to exercise the (14) kinds of function. (Visudidhi-2-87.)

1. Rebirth-Function (*Patisandhi kicca* }

Due to powerful conditions of (8) Wholesome deeds of Sensous sphere (=*Kamavacara kusala*), which are also known as the Great Wholesome consciousness (=*Maha kusia citta*), the living beings are reborn in celestial realm and human world. At the moment near to death:——(8)kinds of the Great resultant consciousness with root, of Sensous sphere (=*Sahetuka-kS.md-vaca.ra mand vipaka citta*),taking up one of the Sense-objects of "Action", " Sign of (previous) Action" , or "Sign of Destiny", [=*Kamma, Kamma-nimitta, Gati-nimitta*], arise in the Mind- continuum of dying living beings, or —(1) kind of the Rootless Wholesome Resultant-Investigating consciousness associated with Neural-feeling [=*Ahetuka kusala-uipdka- upekkhd santTrana citta*],which is the effect of weak Wholesome deed associated with 2 root-conditions (=Dvi-hetuka kusala) arises in the being who are reborn as crippled, blind, deaf or mentally deficient human in Sensous sphere . So, these (9)kinds of consciousness arise due to the effect of Rebirth phenomenon. (ie:—*Patisandhi*).

When, living beings are going to be regenerated in the Fine-material sphere and Immaterial sphere due to the powerful exercises of the Wholesome deeds of Fine-material sphere or Immaterial sphere (^*RUpavacara kusala, Ampdvacara kusala*):——all of which have effect on Rebirth phenomenon:——one of the (9) kinds of the Resultant consciousness of Fine material and Immaterial sphere arises at the very near moment of death, in the Mind -continnum of the living beings who have already attained the Absorptions (^*Jhda*) of Fine-material or Immaterial sphere , by taking up the Sense-object , like Counter- Image of Mindfulness of Breathing (=Anapana *patibh'aga nimitta* } or the Counter- Image of External Meditation device [=*Kasina patibh'dga-nimitta* } etc:—(and these occur as the Sign of (Previous) Action , ie:— " *Kamma nimitta*".

Again; the living beings are reborn in the lower Worlds (=Apya) due to the powerful effect of Unwholesome deeds [=Akusala kamma]. At the near moment of death, one kind of the Rootless-Unwholesome-Resultant-Investigating-consciousness associated with Neutral -feeling [=Ahetuka-akusala-vipaka-upekkha-santTran.a manovinnana dhatu) arises, due to the effect of Rebirth phenomenon

{[^]Patisandhi} , taking up one of the sense-object among the "Action", "Sign of (previous) Action", or "Sign of Destiny". So , in conclusion; it is to be noted in this part of expression of Aggregate of Consciousness , that there

are (19) kinds of Resultant consciousness which **exercise** the Rebirth-function.

(Visudhi-2-87-88).

The process of reunion of— past and present Existence {=*Bhava*}, or — past and present Aggregates of Existence (=*Khandā*) or— the process of relinking of Active side of Existence (=Cause of rebirth= Past-causative Rebirth *process*=*Kamma-bhava*) and Passive side of Existence (=Result of rebirth=Present resultant Rebirth process= *Upapatti-bhava*)— ie:—Causative Action {=*Kamma*) and Resultant Effect [= *Vipaka*]— is known as Rebirth-function (=*Patisandhi-kicca*) .

2. Subconsciousness Function (Bhavanga Kicca)

After passing away of the Rebirth consciousness, and immediately after that moment, the Subconsciousness ; which is the resultant of the Volitional Action {=*Kamma*) that produce the Rebirth consciousness; arises taking up one of the same Sense-object among "Action", " Sign of(Previous) Action" and "Sign of Destiny" previously taken by the Rebirth consciousness; and having same associated Mental concomitants as **Rebirth** consciousness. (The Rebirth-consciousness and the Subconsciousness have similarities, in the Sense-objects taken up by them, in the condition by which they are produced, and the number of associated Mental concomitants) . It is to be noted, that immediately after the Subconsciousness that follows the Rebirth consciousness is broken off, a further Subconsciousness which is exactly same as the Rebirth consciousness arises immediately. Now, it is to be noted, that so long as no other consciousness with concomitants, like Adherence consciousness with concomitant (=*Avajjāna citta, Cetasika*); eg ;—Adherence consciousness of 5 Doors in case of 5 doors thought-process and **Adherence** consciousness of Mind-door in case of Mind-door thought-process (= *Pāncadvaravajjana, Paṭcadvāra v'itthi—Manodvar'avajjana, Manodvara-vTthi*)—— arises to interrupt the continuity of the *Life-stream*{ = *Bhavanga sota* }, the *life-stream*, like the flow of a river, rises in the same way again and again in a living being even during dreamless sleep. In this way, due to the effect of Subconsciousness ; the Resultant consciousness which are exactly same as the Rebirth consciousness arise. (So, the Subconsciousness Function= *Bhavanga kicca*, is the causative condition for the **continuity** of life-stream or Present-existence =*Upapatti bhava*. If there is no Process of consciousness or Cognitive Series =Thought-process =*VTthi-citta* ', to prevent the **interruption** of Mind-continuum, the Subconsciousness =*Bhavanga citta*, which is produced by the same Volitional Action, taking up the same Sense-object, and having same associated Mental concomitants with the Rebirth consciousness, rises again and again. If there is Cognitive series=Thought process , that continuum of Subconsciousness is broken off. And if there is no Cognitive-series or interruption of Thought-process = *VTthi-citta*), the Subconscious- stream =*Bhavariga-sota* , again takes place.) (Visuddhi-2-88.)

3-Advertence Function (Avajjana Kicca)

The various Faculties (=*Indre*) like Faculty of Eye, Faculty of Ear etc; — (and in this case, -Faculty of Eye) are able to take up :— the various Sense-objects like Sense of Sight; Sense of Sound etc:—(and in this case Sense of Sight ^*Ruparammana*) in a living being in whom the Subconsciousness- stream or Life - stream or Mind-continuum (=*Bhavanga-sota*) is already developed. At that moment when the Sense- of -sight (=*R'up7irammana*) reaches the Eye- transparent element, there is a process of impingement of the Sense- of -sight to the Eye-transparent-element. (Visuddhi-2-88).

Ghattan'a=Touching= Striking =Attacking= Impingement:— The process of striking of the Sense-object of sight(=*RHparammana*) at appropriate place, on the Eye-transparent element,resulting the effort (=endeavour= *Vy^lpara*) to produce peculiar gestures [= *Vik'dra*] made by the eye, eye-lids or eye-brow (eg;

—to cast down or up of the eye-lids), and the perception of that Sense-object of sight as desirable [= *^th'drammana*] or non-desirable(=*Anitth'arammana*) by the Eye-transparent-element through the Basic -elements arising together ; is known as "*GhattanS*" (=*striking* =*attacking* =*touching* =*rubbing*) . (Mahat.r-2-132.)

When the Sense-object of Sight (=*R'updrarnmana*) strikes the Eye-transparent element (=*Cakkhu pasdda*) ; the Subconsciousness {=*Bhavanga citta*} is shaken. After two subsequent Subconsciousness, the Thought-process or Cognitive-process which is different from the Subconsciousness stream [= *Bhavanga sota*] occurs. And that subsequent shaky phenomenon of the Mind- continuum is known as Shaky-Subconsciousness (=*Bhavanga ?¹⁵⁴ calana*). That is right. The Subconsciousness is shaky, because of the Thought-process (=*Vithi*) which has different Mind-continuum and the cause of that dif-? ferent Mind-continuum is the Subconsciousness itself. And that is why that

Subconsciousness is known as Shaky Subconsciousness (=*Bhavanga calana*). After cessation of the Subconsciousness (=*Bhavanga citta*), the Five- door Advertence consciousness (=*Pa7!.cadvaravajjana citta*), also known as Mere- Action-mind -element (=*Kiriya mano-dh'atu*) arises to take over the Advertence Function (=*Avaj[]ana kicca*), taking up the same Sense-object which shakes the Subconsciousness and thus interrupt the Subconsciousness -stream. The similar pheomena take place in other Sense-doors like Ear-door , Nose-door etc. Again, in case of Mind-door (=*Mano dudra*), if one of the (6) kinds of Sense- objects appears in the Mind-door; the Mind-door Advertence consciousness, (=*UpekkhHsahagata ahetuka kiriya maovinnana dhdtu*) arises to take over the Advertence-Function , taking up the same Sense-object after cessation of the Subconsciousness, and thus interrupt the Subconsciousness-stream . Try to understand the nature of consideration of (2) kinds of Mere-Action consciousness (=*Kiriya-vinnana-citta*) on the Sense-objects (=*Arammana*) by means of Advertence Function (=*Avajjana kicca*) ..

• [Here, although it is better to describe the Seeing- Function (=Dassana kicca) of the Eye-consciousness after cessation of the Five- door Advertence consciousness , since there is similarity in Advertence Function (^Avajjana

kicca); the Mind-door Advertence consciousness (=Mano-dvaravajjana)is collectively described first . By doing so ; the (14)functions of consciousness are described in order of sequence as first mentioned in the earlier summary of this chapter. (Mahati-2-132)] .

4—8. Seeing , Hearing, Smelling ,Tasting, and Touching Function (Dassana, Savana ,Ghdyana, Say ana, Phusana-kicca)

After the cessation of the Five-door Advertence Consciousness which interrupts the Subconsciousness and considers the Sense-object of sight (=Ruparammana), the Eye-consciousness which (=Cakkhuvinn'ana citta) depends on the Eye-transparent element arises, immediately to take over the Seeing Function=ie:- the function of seeing the Sense-object of sight (= Dassana kicca) at the **Eye-door**. (=Cakkhu- dvdra). The Ear-consciousness which depends on the Ear-transparent element arises , immediately to take over the Hearing Function (=Savana kicca) =ie:- the function of hearing the Sense-object of sound at the **Ear-door** (=Sota dvdra). The Nose-consciousness which depends on the Nose-transparent element arises, immediately to take over the Smelling function (=Ghdyana kicca) = ie:-the function of smelling the Sense-object of smell at the **Nose-door**(= Ghana dvdra). The Tongue-consciousness which depends on the Tongue-transparent element arises, immediately to take over the Tasting function (=Sdyana kicca) = ie:- the function of tasting the Sense-object of taste at the **Tongue-door** [=Jivhd dvdra). The Body-consciousness which depends on the Body-transparent element arises, immediately to take over the Touching Function (=Phusana kicca)= ie:-the function of perception the Sense-object of touch at the **Body- door**. [=Kdya dvdra). [The interval between the Five-door Advertence consciousness and Receiving consciousness (= Sampaticchana citta) is known as a " Pancavinn'dna -thdna " = the place where the Five-door consciousness occur. Here ;these are collectively described since the place of occurrence is the same. But in terms of Cognitive- process(=VTthi); these occur in seperate single Cognitive process. The place in the Eye-door-Cognitive- process (thought-process) where the Eye-consciousness occurs is the same as the place where Ear-consciousness occurs in the Ear-door-Thought-process. That is why these are collectively described in general.]

These Five-door consciousness are Wholesome Resultant consciousness (=Kusala uipdka vinndna) in the perception of the desirable and median-desirable (=Itthdrammana , Itthamajjhattarammana) Sense-objects . These are Unwholesome Resultant consciousness [=Aksula-vipaka virmdna) in the perception of the non-desirable and median non-desirable (=Anitth'drammana, Anitthamajjhattadrammana) Sense-objects. So, (10) kinds of Resultant consciousness =Coupled-Five consciousness (=Dvepcmca vmndna) occur to perform the Seeing, Hearing, Smelling , Tasting and Touching-Functions. (Visuddhi-2-88.)

' 9. Receiving Function ,, (Sampaticchana Kicca)

Cakkhuvinnana dhatuya uppajjitva niruddhasamanantara uppajjati cittam mano manasam tajja manodhatu. (Abhi-2-91.) immediately after the cessation of the Eye-consciousness element

(=Cakkhuvinnana-dhdtu), the another consciousness known as the Mind-element [=Mano -dhdtu] which is appropriate for that Eye-consciousness arises as receiving mind. [=Mdnasa]. (Abhi-2-91.)

According to this phrase mentioned by the Buddha, after cessation of the Eye-consciousness , Ear-consciousness etc ; etc;- a receiving Mind-element (=Mano- dhdtu') known as Receiving consciousness (= Sampaticchana citta); may be Unwholesome Resultant after the Unwholesome Resultant Five-door consciousness or Wholesome Resultant after the Wholesome Resultant Five-door consciousness, arises which receives the same Sense-object taken by that particular Five-door consciousness . So, try to know the occurrence of (2) kinds of - Receiving consciousness (ie:- Wholesome Resultant Receiving Mind-element-consciousness and Unwholesome Resultant Receiving Mind-element-consciousness (=Kusala-vipdka sampaticchana mano- vin'ndna dhdtu; Akusala vipdka sampaticchana mano-vinnana dhdtu) to take Receiving Function(=Saṇṭhāpikāna kicca)=the function of receiving the Sense-object. (Visuddhi-2-88-89.)

These statements are here given, referred to Pali-text for those who do not accept the existence of the Cognitive-consciousness (= Vithi citta) like Receiving consciousness (= Sampaticchana citta) . Similar argument also arises for the presence of Heart-base matter (=Hadaya vatthu). It is not suitable to reject a statement written in the Pali-text. (Mahati-2-132.)

10. Investigating Function (

Santfrana Kicca}

pl56 Manodhatuyapi uppajjitva niruddhasamanantara uppajjati cittam mano manasam tassa manovirm'ānadhātu . (Abhi-2-92 .)

immediately after the cessation of the Receiving Resultant mind-element (= Sampaticchana vipdka mano-dhdtu), the another consciousness (=Manasa) known as Mind -consciousness -element which is appropriate for that Receiving consciousness arises as Investigating mind . (Abhi-2-92.)

According to this phrase mentioned by the Buddha, after cessation of the Unwholesome Receiving Mind-element (=Akusala vipdka sampaticchana mano-dhau.), the Neutral-feeling associated Investigating consciousness (= Upekkhā santTrāna citta), =Unwholesome Resulting Rootless Mind-consciousness-element (=Akusala vipdka ahetuka mano vin'ndna dhdtu) , the result of Unwholesome deed arises taking up the same Sense- object as that Receiving-Resultant Mind-element which is Non-desirable or Median-non-desirable object.— Again, after the cessation of the Wholesome Resultant Receiving mind-element ; Wholesome Resultant Pleasure associated Investigating consciousness (=Kusala vipdka somanassa sanurana citta) =Wholesome Resultant Pleasure -associated Rootless-Mind consciousness-element (=Kusala vipdka somanassa-sahagata ahetuka mano vinnana dhdtu), [the result of Wholesome deed] arises, taking up the same Sense object [as that Receiving Resultant Mind-element] which is desirable object (=Itthadrammana). —Finally, [after the cessation of the Receiving Resultant Mind-element,] the Rootless Wholesome Resultant-Neutral feeling -Inves-

Investigating consciousness (= *Ahetuka kusala vipaka upekkha santTrana citta*) = Neutral- feeling associated , Rootless Wholesome Resultant Mind- consciousness element (= *Upekkha sahagata ahetuka kusalavipaka manovinnana dhatu*) arises taking up the Median-desirable Sense-object (= *Itthamajjhata dhamma*). So, (3) kinds of Resultant Consciousness (ie:- Unwholesome Resultant Neutral -feeling-associated Investigating, Wholesome Resultant Pleasure-associated Investigating and Wholesome Resultant Neutral - feeling associated Investigating) arise to take over the Investigating Function(= *Santirana Kicca*) ie:- to make inquiry about the Sense-object. (Visuddhi-2-89.)

11. Determining Function

(*Votthabbana Kicca = Vuttho Kicca*) • •» »• ' ,

Again, after the cessation of the Investigating consciousness (= *Santirana citta*), the Determining consciousness (= *Vuttho citta*) known as Mind -door Advertence consciousness (= *Mano dvandvajjana*) = the Neutral-feeling associated-Rootless Mere-action Mind-consciousness-element (= *Upekkha-sahagata ahetuka kiriya manovinnana dhatu*), arises to determine the same Sense-object which is taken up by that Investigating consciousness. (= *SantTrana citta*). So , only that Rootless Mere-action-consciousness(= *Ahetuka kiriya vinnana citta*) takes over the Determining Function (= *Votthabbana Kicca*) = to determine and make decision of the Sense-object. (Visuddhi—2-89.)

12. Impulsion Function (*Javana Kicca = Jo Kicca*)

Again, immediately after the cessation of the Determining Consciousness (= *Vuttho citta*), if the Sense-object is obvious or large (= *Mahantdramma*), which sustains many moments of occurrence of consciousness in the Cognitive process (= *Vithi dttuppada*) or sustains beyond the passing-away of Impulsion-consciousness, the various Impulsion consciousness as follow , arise taking up the same Sense-object of that Determining consciousness.

1. The Great Wholesome consciousness ————— (8) kinds
2. The Unwholesome consciousness ————— (12) kinds
3. The Mere-action consciousness of Sensuous sphere (Impulsion consciousness) ————— (9) kinds

Any one kind of consciousness among above (29) , arises very rapidly = feeling the Sense-object swiftly and taking over the Impulsion Function

(= *Javana Kicca*) and occurs (6) or (7) times. This statement is for Five-Sense-door Cognitive- process . (Visuddhi-2-89.)

[Remark:—In this case, the Sense-object (eg: sight) survives for (17) Mind-moments (

=*Cittakkhana*) or (51) phases of Mind-moments. But, the Sense-object is not perceived at the moment of arising . Only after passing (2) or (3) Mind-moments

it is perceived in the appropriate Door(= *Dvara*), (eg ; Eye-door). Since, it can not survive beyond the cessation of the Registering Consciousness (= *Taddramman.a citta*)and survive only up to the cessation of the Impulsion Consciousness (•=*Javana citta*}, that Sense-object is classified as "Large" Sense (= *Mahantdramma*.) } }.

In Mind-door Cognitive-process (=*Manodv'dra vTthi*), after the cessation of the Advertence Consciousness of the Mind-door (=*Maodvdrdvaj[jana citta*), the process is as follow :—— One"the above (29) consciousness will follow and takes over the Impulsion- Function in the Thought- process which ends up with Sensuous-Impulsion Consciousness (=*Kamdjovara maodvTira mthi*) . ——and in the process which ends up with the Full Concentration Impulsion-Consciousness (=*Appandjovdra manodvdra vTthi*), one of the following Consciousness, ie:—— (5) kinds of Wholesome, (5) kinds of Mere-action Consciousness in *Pin*- material Sphere ; (4) kinds of Wholesome, (4) kinds of Mere-action Consciousness in Immaterial Sphere ; (4) kinds of Path- consciousness, (4) kinds of Fruition-consciousness in *Supramundane* ; will immediately follow and take over the Impulsion- Function after the cessation of the (4) moments of Impulsion-Consciousness of Access-Concentration of Sensuous- sphere (=*Kamavaca upacara saniddhijavana citta*) (ie:— Preparation , Access, Adaptation and Maturity moments = *Parikamma* , *Upacara* , *Anuloma* , *GotrabhH*) . So, one of the consciousness among the above (55) kinds of the Impulsion-Consciousness when conditioned by " wise attention " (= *Yoniso-manasikara*) arises as Impulsion-Consciousness . In conclusion , these (55) kinds of Wholesome, Unwholesome, Mere-action and Resultant consciousness [= *Kusala* , *Akusala* , *Kiriya* , *Vipdka- Viri'riana*), arise with speed and energy to take over the **Impulsion-Function**(=*Javana-Kicca*) is to be noted . (Visudhi-2-89.)

13. Registering Function ; (*Tadarammana Kicca* }

After cessation of the Impulsion consciousness, and if the Sense-object is very large (= *Atimahantarammana*) in Five sense-door Thought-process, or if the Sense- object is obvious=clear (= *Vibhutdramma*) in Mind-door Thought-process, the Registering consciousness arises, in the living being of Sensuous sphere [= *Kdmavacara sattaud*] ; taking up above very large or obvious Sense-object, immediately following that Impulsion consciousness of Sensuous Sphere (=*Kdmavacara javana citta*). And, that Registering consciousness is conditioned by the following phenomena:——

- 1.The effect of Desirable, Median-desirable, Non-desirable and **Median-non-desir-**' able, Sense-object.
- 2.The effect of Volitional-action done in the past Existences and • 3.The effect of various Impulsion consciousness . So,due to the effect of these conditions, one of the (11) kinds of Registering Consciousness (= *Taddrammana citta*=*Vipdka vmriana*) arises one or two times following the Impulsion consciousness which takes up the Sense-object different from that of **Subconsciousness** (It is somewhat like water current which follows along the direction of the boat , rowed up the river.).That Resultant **consciousnes** (= *Vipdka vmridna*) although it ought to take up the same Sense-object as the original Subconsciousness,it takes up the object taken by the Impulsion-consciousness.So,it is **kown** as "*tad. dra mmana*" which means "that Sense-object" literally.Thus,(11)kinds of **Resulant** consciousness take over the **Registering Function**= *Tadara mmana Kicca* = taking over the Sense-object of the Impulsion -consciousness. (Visuddhi-2-89-90.)

In above, the (3) causative factors of the Registering Consciousness is described. In which:—
The PaH-phrase " *Tayidam drammanena vedandparivatti dassanattarh vuttarh* ". (MahSti-2-133.)

The occurrence of the Registering Consciousness due to the **effect of Sense-object** is described to show the changes in Feeling (= *Vedanafdie* to the Sense-object . So ,

1.(5) kinds of Mentally agreeable feeling associated -Registering consciousness (= *Somanassa-tadarammana*) arise when taking up Desirable Sense (

=*Itthdrammana* } •» •/

2. (5) kinds of **Wholesome-Resultant-Mentally** indifferent feeling associated -Registering Consciousness (=Kusala vipaka *Upekkha-tadarammana*) arise when taking up Median-desirable Sense. (=*Itthamajjhaddrammana*).

3. Unwholesome-Resultant, Mentally Indifferent feeling associated Investigation and Registering consciousness (=*Akusala vipaka upekkha-santfrana-taddrammana*) arise when taking up Non-desirable Sense (=*Anittharamana*).

So, the Feeling (=*Vedana*) changes due to the effect of Sense-object . Again, the Registering consciousness also arises due to the effect of Volitional action. This phenomenon is described as follow:—

" *Purimakammavasend " ti idam taddrammanavisesadassa-nattham .Na hi patisandhijanakameva kammarh taddrammanam janeti , atha kho annakammampi , tarn pana patisandhiddiyind kammena nibbattetabbataddrammanato visadisampi nibbatte tTti.* (Mahati—2-133-134.)

This PaJi-phrase, which describes how the **Registering** consciousness occur due to **the effect of the past Volitional-action** also shows the existence of various kinds of the Registering consciousness. The Registering consciousness is not only produced by the Volitional action which also cause the rebirth (=*Patisandhi*), but also by various action apart from the Action which can produce rebirth . These **variuos** actions can produce the other Registering **consciousness** which are different from the Registering consciousness , produced by the Volitional action causing Rebirth phenomenon. (Mahati-2-133-134.)

Opinions by some Teachers

Ettha ca keci " Patthdne ku.saldku.sale niruddhe vipdka taddrammanatd uppajjatf ti vipdkadamdamdnam eva anantaram taddrammanam vutta " nti kiriyajavandnantaram na icchanti. (Mah^ti-2-134.)

Some Venerable Teachers stated that the Buddha says the Registering Consciousness arises after cessation of Wholesome and Unwholesome Impulsion **Consciousess** which are known as " *Vipdkadamma-damma* " (=The nature which can produce the result), by **reffering** to the *Patthdna-Dis*-course in which it is described as " *Kusaldkusale niruddhe vipdka taddrammanatd uppajjali* " (Abhi-8-133.)

:—— which means, the Resultant Consciousness (=*Vipdka vinnana*) arises as Registering Consciousness , after cessation of the Wholesome and Unwholesome Impulsion Consciousness . So, these

Venerable teachers do not want to accept, the arising of Registering Consciousness after cessation of the Mere-action Impulsion Consciousness. (= *Kiriya-Javana-citta*). (Mahati-2-134.)

The reason is as follow: — Somewhat like current of water follows the violently rowed boat, the Subconsciousness (= *Bhavana*) follows (=ie:-The Registering Consciousness arises after)-the turbulent Impulsion-Consciousness .

Registering consciousness arises after the turbulent Impulsion consciousness. Again, the current of water does not follow the smoothly floating leaf, and somewhat like that, the Subconsciousness not always arises after the Mere-action Impulsion -Consciousness which occurs in the calm mental continuum of the Holy-one (= *Arahat*) who has Indifferent Feeling on six kinds Sense-objects (= *Shalangupekkh'd*) (=The Registering consciousness does not arise =The Resulting Consciousness which takes up the same Sense-object as the Impulsion -Consciousness does not arise.) —This is reasonable concept; and is given by the Venerable teachers who do not want to accept the arising of the Registering Consciousness after the Mere-action-Impulsion Consciousness (= *Kiriya javana citta*).

(Mahati-2-134.) The Venerable Great-Subcommentary teacher pointed out to consider above descriptions. In *Pali-texts*; the Buddha does not mention some phenomena although these exist in nature . For examples, the Buddha does not mention the Predominant- concomitant(= *Adhipati Cetasika*) in " *Dhamma-sangam Pali*- scripture " in which the Unwholesome deed is extensively described [ie:- *Akusalaniddesa* =Elaborated accounts on Unwholesome deeds). But in case of the examples given above (ie:-the boat and leaf), it should be noted, the leaf and the Mere- action Impulsion consciousness are actually not similar in every aspects and , the nature of the boat and leaf that follow the water-current of the river is also not similar in particular details . And, it is understandable the nature of water-current that follows the boat and that does not follow the leaf. But in case of Registering Consciousness , the Mere-action Impulsion Consciousness and the other Wholesome and Unwholesome Impulsion-Consciousness are similar in nature to take over the Impulsion-Function (= *Javana Kicca*). So, it is better to consider the statement which is not appropriate (ie:- " The Registering Consciousness not always follows the Mere-action Impulsion Consciousness and the Registering-Consciousness always follow the Wholesome and Unwholesome Impulsion Consciousness) (Mahati-2-134.)

All these statements given by the Great-Subcommentary teacher based on the descriptions by the Original Subcommentary teacher, which he does not want to accept. So, the opinion of the Original Subcommentary teacher will be given:—as follows—The **Opinion by the Original Subcommentary Teacher**

>160 $\int \ln^{\wedge} C^{\wedge} S - \wedge^{\wedge} \bullet^{\wedge} 0 C^{\wedge} ? - 3 - \wedge^{\wedge} ? \ll$)

In Commentary (*Abhi-ttha*- 1-323.), the concept of Venerable Monk • *Mahadatta* who lived in *MoravdpT*, is mentioned. In his concept; it is mentioned that:— " In a person who is born with Pleasure-associated -3-rooted Unprompted Resultant Consciousness (= *Somanassa-sahagata-tihetuka-asankhdrika vipaka patisandhi-citta*), the resultant of the Volitional action associated with Pleasure-associated - 3 rooted Unprompted Consciousness (= *Somanassa-sahagata-tihetuka- asankh'arika citta*);— (13) kinds of Impulsion-Consciousness can occur in the Mind- continuum. These are:—
1.Great Wholesome Pleasure- associated Impulsion Consciousness(= *Mahdkusala somanassa javana citta* } =(4) kinds.

2. Greed-rooted Pleasure-associated Impulsion Consciousness (= *Lobamilla somanassa javana citta*)
== (4) kinds.

3. Great Mere-action pleasure-associated Impulsion Consciousness (= *Mahdkiriyd somanassa javana citta*)
.= (4) kinds.

4. Mirth-producing-Mere-action- Impulsion Consciousness (= *Hasituppdā kiriyd javana citta*) = (!) kinds.

If, the Registering consciousness arises after cessation of the one of the above (13) kinds of Impulsion Consciousness one of the following Great Resultant Consciousness (= *Mahavipaka citta*) will take over the function of Registering Consciousness. These are:—

1. Pleasure-associated -Wisdom connected Unprompted Great Resultant Consciousness (= *Somanassa saḥagata 'nndā sampayutta asahkhārika mahdvipaka citta*),
2. Pleasure-associated, Wisdom-non-connected, Unprompted Great Resultant Consciousness (= *Somanassa saḥagata Tindnavippayutta asankharika mandvipaka citta*). (Abhi-ttha-1 -323.)

So, by these description, the Venerable Monk *Mahadatta*, mentioned the possibility of arising of the Registering Consciousness after the (5) kinds of Mere-action Impulsion Consciousness of Sensuous sphere (= *Kdmakiriy'S. javana citta*) enlisted above. Similarly, Venerable Monk *Anuruddha*, stated in his *Sangaha* Scripture (= *Abhidhammattha Sangaha*), as :— " *Somanassa saḥagata kiriyd javan'dvasdne somanassa saḥagataneva taddrammandni bhavanti*" —which means " there is possibility of arising of Pleasure-associated Registering Consciousness after the Pleasure-associated Mere-action Impulsion Consciousness ".

The original Subcommentary (= *Mulatikā*) Teacher asks to consider the above statements given by the Venerable Monk *Mahadatta* and Venerable Monk *Anuruddha*. **The opinion given by the Original Subcommentary {= *Mulatika*} teacher is as follow:—**

In " *Paṭṭhāna-DiscovīTse* — " *Kusalakusale niruddhe vipakā tadarammanatā uppajjati* " = There is arising of the Resultant-Consciousness after cessation of the Wholesome and Unwholesome Impulsion Consciousness (Abhi-8-366) = The Buddha teaches that the Registering Consciousness arise after cessation of the Wholesome and Unwholesome Consciousness (ie:- The nature which can produce the result = *Vipakā dhamma-dhamma*). Also in the Discourses in Three-line for the Wholesome deed (= *Kusala-tika*) (Abhi-8-133) — " The Noble learners (= *Sekkhā-puggala*) as well as the Ordinary persons (= Worldling = *Puthujjana*) discern the Wholesome deeds as being Impermanence (= *Anicca*) Unsatisfactory (= *Dukkha*) and Non-self (= *Anatta*) with repeated contemplation (= *Vipassand*). If the Thought-process of Contemplation is broken off, the Resultant Consciousness arises as the Registering Consciousness after the cessation of the Impulsion Consciousness of the Contemplation (= *Vipassand javana citta*). " — So, the Buddha mentions the Wholesome and Unwholesome Impulsion consciousness and the Registering Consciousness thereafter ;but does not mention the Registering Consciousness after the Indeterminate phenomena or Consciousness (= *Avyākata*). The Registering Consciousness arising after the Mere-action

Impulsion Consciousness is not mentioned, also in the other **PaH-scriptures**. There is no explanation for why the Buddha does not mention the Registering Consciousness arising after the Mere-action

Impulsion Consciousness, although there may be. So, it ought to consider the opinion of the Venerable Monk **Mahddatta** .

That's right. Somewhat like the water current follows the violently rowed boat , the **Subconsciousness** (=**Bhavanga citta**) follows the Impulsion Consciousness . And on contrary,like the water current never follow the floating leaf-cup ; the Registering Consciousness never arises after the **Mere-**

P¹⁶⁰ action Impulsion Consciousness which occurs in the calm Mind-continuum of the Holy-one (=**Arahat**) who has Balanced-Feeling on (6) kinds of Sense-object

- (=**Chalangupekkha**) . So, keeping these facts in mind, it ought to consider the opinion of Venerable Monk **Mahddatta** . (**Mulati-1-134.**)

These phrases are the opinion of the Original **Subcommentary** (=**Mulati'ka**) Teacher; the Venerable Monk **Ananda** . To this concept, the Venerable Great Subcommentary Monk **Dhammapala** did not want to accept and gave rebuttal not only in the Great Subcommentary, but also in the Commentary on the Subcommentary (=**AnutTka**). (**Anuti-1-141**).

Balanced - Feeling on (6) Kinds of Sense -object (**Chalangupekkha**)

J^ e^o"-^ .. o <? ^

L C ^2,-^^)

= " In the Doctrine or Teaching of the Buddha (=**Sascmo**),the Holy One(=**Arahat**), who is Cankers (=**AsaL>a**)-free , never pleased nor sad whenever he sees Sense- object of sight, and lives with the balance of Consciousness and Mental-factors, since he has already attained **Mindfulness** (=**Sati**) and Comprehension (=**Sampajana-'nndna**) ". (Am-2-247.).According to this **Pali-** scriptures , when the (6) kinds of desirable (=**Ittha**) or non-desirable [=Anittha) Sense-objects are perceived in the Mind -continuum through the (6)doors (=**Dudra**) of the Holy One (=Arahat) who is totally free from all kinds of Canker {=Asava), there will be Mental concomitant which is very pure in every aspects and associated with balanced Consciousness to take up the Sense-object. This kind of **Mental-concoini-tant** (=**Cetas!'/ca**)is known as " **Tatra.majjhataatd** "(=Equanimity=Equipoise=Mental Balance), which is mostly known by the name of " **Upekkhd** " (=Idifferent **Feel-**, ing). But only to this particular kind of Mental concomitant arises in the Holy-One , the name " **Chalangupekkhd** " (=Balanced-feeling on 6 kinds of **Sense-**. objects) is given . (**Visuddhi-1-155.**)

The Holy-Ones (=**Arahat**) who realize the Fruition of Holiness (=**Arahatta-phala**), are able to take up desirable(6) kinds of Sense-object/as non-desirable and Non-desirable (6) kinds of Sense-object as desirable. They are able to keep Consciousness (and Mental factors) in balance, wherever they take up (6)kinds of Sense-object through(6)doors.That high ethical quality is known as

"Equanimity=Equipoise=Mental- Balance" (=*Tatra-majjhata cetasika*). And the name " Balanced - Feeling on (6)kinds of Sense-object " ie:— "*Chalangupekkh'd*" is given to that Mental factor .

14. Dying -Function (Cuti

Kicca }

After cessation of the Registering Consciousness, the **Subcon-sciousness** arises to **sustain** the Mental -continuum. (It means only for Present Existence (=*Pavatti*). It does not necessarily mean that after Registering Consciousness only the **Subconsciousness** arises, and not the Dying Consciousness. (*MahatT-2-134*). If that **Subconsciousness** stream is broken off, **Cognitive-** series or Thought-process (=*Citta-vTthi*) arises starting with Adverting Consciousness [=*AvaJJana-citta*]. In this way, the stream of consciousness occurs with rapid succession, like Adverting Consciousness after the Subconsciousness, the Eye-Consciousness which takes over the Seeing Function=seeing of Sense-object of sight after the Adverting consciousness etc; etc; in a single life again and again, so long as the Subconsciousness ceases to occur in that particular life, obeying the Natural Law of Consciousness Process. (= *Citta-niyama*). That is right—the **Subconsciousness** which is the last arising consciousness among other consciousness in a particular existence ceases from one life to other and known as Death '162 Consciousness. (=*Cuti citta*). So, that Death Consciousness (which is similar in nature with Rebirth Resultant Consciousness and Resultant Subconsciousness) is of (19) kinds. So ; (19) kinds of the Resultant Consciousness arise to take over the Dying Function. (*Visuddhi-2-90*.)

Again, in the new life, Rebirth Consciousness arises immediately after the Death Consciousness (of previous life). After cessation of the Rebirth Consciousness, the Subconsciousness (of the new life-stream)arises. In this way, the endless Consciousness-process (=Mind -continuum^ Life-stream) occur again and again in the Life-continuum of the living-beings :——exist in (3) kinds of **Existence** (=*Bhava*)=Sensuous Existence, Fine-material Existence, and Immaterial Existence (=*Kdma-bhva*, *Rupa-bhava*, *Ampa-bhava*):— exist with (5) courses of **Destiny** (=*Gati*)=Hell, Animals kingdom, Ghost-realm, Human and Heavenly world (=*Niraya*, *Tiracchana*, *Peta*, *Manussa*, *Deva*):——exist in(7)

Abodes of Consciousness, where the Consciousness exists (= *Vi^anattthiti*) and ' in (9)**Abodes of Beings** , where the Living-beings exist(=*Sattavdsa*) .

How **Extinction of Round of Rebirths** occurs :——

Among the living beings, relentlessly arising and passing away in the phenomenon of Round of Existences(=Round of Rebirths);— if one realizes the Fruition of Holiness (=*Arahatta-phala*) through the (8) **Supramundane** Paths (=*Magga*), which is known as **the Middle Way =the Practice to Reach Full Extinction of Defilements** (= *Majjhima.patipa.da. = Nibbana- gadminipatipada*) , the Mind-continuum of that Holy One (=*Arahat*) is totally vanished after the cessation of the Death-Consciousness . (*Visuddhi-2-90*.)

- ' Now, the summarized description of the (14) Functions of the various Consciousness arises in one's life from the time of conception to the time of death is already given .

„-K-o

And from now, the Character, the Essence (= *Lakkhana, Rasa*) etc:- of the Consciousness Aggregate (= *Vinnanakkhandhd*) will be described.

1. Consciousness Aggregate (*Vinnanakkhandhd*)

Arammanam cintetTti cittarh, vijndtTti attho. (Abhi-ttha-1-106.)

1. *Vijdnanalakkhanam cittam* ,

2. *Pubbangamarasam* , 3. *Sandahana paccupatthdnam* ,

4. *Namarupa padatthdnarh*,

(Abhi-ttha-1 -155.) *Ndmapadatthdnarh* . (For

Immaterial sphere only.)

1. Awareness of the Sense-object = Taking up of the Sense-object ——— Character,

2. Main factor {*Padhdna*} in awareness of the Sense-object —(Function) Essence,

3. The phenomenon that prevents the interruption of the Consciousness -continuum. _____

_____ perception,

4. Mentality and Materiality , (Only Mentality for Immaterial Sphere)

_____ proximate cause.

Vijananam arammanassa upaladdhi. (MulaT-1-87). According to this original Subcommentary-Pd^phrase, "

Awareness means the ability to take up the Sense -object = phenomenon of taking up the Sense-object.

Character— (= *Lakkhana*-) ———

?c^Ua" ^ ^; ^R'A^ - *Catubhumaka cittcffihi no*

Vijdnanalakkhanam ndma natthi, ^v *lakkhanameva.*

(Abhi-ttha^ 1-155.)

There is no Consciousness in (4) kinds of Sphere , like Sensuous, Fine-material, Immaterial and *Supramundane*, which is lack of "Awareness of the Sense-object " (ie:- *Vijahanalakkhana*). All the Consciousness have the nature of " Awareness of the Sense-object " (Abhi-ttha-1-155.)

Translation of the *Bhavanga citta* (= Subconsciousness) into Imperceptible = Un-noticeable Consciousness or the concept that there is an Imperceptible Consciousness , is inappropriate to the description with the Commentary or in other words , opposite to the teaching of the Buddha . It is the Natural- law that Subconsciousness (= *Bhavanga citta*) perceives one of the 3 kinds of Sense-objects like " Sense of Volitional Action , Sign of Action, Sign of Future Existence (= *Kamma-Kamma nimitta-Gati nimitta*), taken up by the Death -proximate-Impulsion Consciousness of the past life near death . So, it is inappropriate to say that , the Subconsciousness of the present life is Imperceptible Consciousness just only by it's lack of ability to take up (6) kinds of Sense-object in the present life .

Vijananam drammanassa upaladdhi.

(Mula-tT-1-87.)

Tarn dramanupaladdhi sankhdtam vijdhanarh lakkhanam etassati ' wjdnanalakkhanam .

(MahatT-2-112.)

Aware-ness- means taking up of Sense-object. If one takes up sense of Eye-transparent element and perceives it ; it is said that the awareness of Eye-transparent element occurs. If Sense of Eye-transparent can't be taken, it is said that the awareness of Eye-transparent element does not arise . So , the awareness <means the nature of taking-up Sense-object ; and the " Consciousness " (== *Citta*) has the Character(=La/c?ch.an.S) of taking up the Sense-object. That is:-the Con-

-sciousness has ability to take up the sense and awareness of the Sense-object . (ie:-It has **Character of Awareness of the Sense-object=Vi/antrea lakkhand**)

Pubbangama rasa—Purecdrika pubbangama, padhdna pubbangama. n Function) Essence of the Leading Phenomenon^

'*' The leading Phenomeon(=*Pubbangama*) is of (2) kinds. The pheomenon ; that arises prior to other natural processses , thus takes up the role of leader ship is known as " Pre-nascent Leading phenomenon (=*Purecdrika pubbangama*),and the phenomenon that takes up the majopr role in relation to the other natural processes is known as " Major leading phenomenon " [= *Padnana-pubbangama*]. With these facts kept in mind ; if (2) kinds of natural phnomena ; ie:-the Consciousness and the Mental concomitants are considered;

one will realize that the Consciousness does ot occur prior to the Mental concomitants . The Consciousness and the Mental Concomitants arise simultaneously, stand same duration and pass-away at the same time in a single Mind-moment (= *Cittakkhana*). But among these various mental phenomena of Consciousness and Mental Concomitants, the Consciousness takes up the major role (ie:-Major =*Padhdna* = Leading role) in the perception of the Sense-objects. So,it is said that the Consciousness has " (Function) Essence of the leading phenomenon (=*Pubbah gama rasa*) in taking up of the Sense-object ; according to the Discourse, like " *Mano pubbangama* "

The Consciousness is the major leading pheomenon to perceive the Sense-object (like the Sense of Sight taken up by the Eye-door). So;—— Eye-door =Sense of Sight seen with the Eye in known by the Consciousnes. Ear-door=Sense of Sound, heard with the Ear is known by the Consciousness. Nose-door=Sense of Smell inhaled by the nose is known by the Consciousness.

Tongue-door=Sense of Taste taken by the Tongue is known by the Consciousness.

Body-door=Sense of Touch taken by the Body is kown by the Consciousness. Mind-door=Sense of Mind-object-base(=*Dhammarammana*) taken by the Mind-door is known by Mind-Consciousness (=*Manovinnana citta*).

As, described in the appearence of the various senses at appropriate doors (=*Dvdra*) the Consciousness in the major leading factor .So, the Consciousness is the Major (= *Padhana*) leader in the awareness of the Sense- object; or it is the main leader of the function to take up the Sense-object .

(Abhi-ttha-1-155-156.)

**Nagaraguttikassa viya cittassa drammanavibh'dvana mattam
upadnarana mattam upaladdhi mattam kiccam, hrammana
pativedhana paccdbhinndnddi pana kiccam pannd sannddmanti
veditabbam . (*MulatF-1-87.*)**

A guardian of the town (=*Nagaraguttika*), taking place at the central crossing of streets, notes down each and every passing persons in the town, " whether he or she is the dweller or the guest." Somewhat like that, the taking up of the arising Sense-object is the function of the " *Consciousness*" [= *Vinnana*]. Taking -up of the Absolute-nature (^*Paramatta -dhamma*) of the Sense-object is the Function of the

" Insight-knowledge "(=*Panna*) . Awareness of the Sense-object in next time with past -experience is the function of the " Perception(=*Safma*) " Note down like that. (MulatT-1-

87.) *Vijdnaffti sannd pannd kiceavisittham visayaggahanam 'aha.*

(MulatT-1-65.)

/S^/A>— >^<S>— . . . K^U—

Sanna pannakiccam sannana karana

patwiji]hanani,tadubhaya-vidhura arammamipaladdhi "

Vijanaff'" ti imina vuccatHi aha" sanna.pa.gahana"nti.

(Anuti-1-70.)

So, (3)kinds of realization of the Sense-object is noted; known as Realization by Perception, Realization by Wisdom and Realization by Consciousness. May be right or wrong , realization of Sense-object in accordance with past-experience is the Perception(=*Sdnnā*). Realization of the Ultimate Reality (=Paramattha dhamma)of the natural phenomena:— (=From the knowledge of the distinction between the Mind and Body to the realization of the Path and Fruition of Holiness = *Namarupa paricheda nndna* ,*Arahatta-magga*, *Arahatta-phala*) :—is the Wisdom (=*Pan'na*). Just taking up of the Sense-object is the Consciousness (= *Vinndna*). So ; in (3)kinds of realization of sense; the peculiar awareness which is quite different from the Perception and Wisdom is known as "*Vijanana*" or " *Vmnana* " = Consciousness .

Perception (PaccupatthTina) ———

**Tadetam pacchimam pacchimam uppajjamdnam purimam
purimam nirantaram katv'd sandahanameva upatth'd-tHi
sandahana paccupattanam.**

(Abhi-ttha-1-156.)

A meditator who is practising repeated contemplation, associated with Right view (= *Vipassana-sammadditthi 'nndna*), takes up in the Insight knowledge that, the Consciousness is a continuous, non-interrupted phenomena pl64 which occur one after another ie:- the newly arising passing Consciousness, immediately follow the *passig* Consciousness. The vanishing Consciousness which lives just for a Mind-moment (=*Khanika marana*], consisting of 3 phases (ie:-*Uppada*, *Thiti*, *Bhanga*), is beneficial to the newly arising Consciousness with the power of Proximity and Continuity Conditions (=*Anantara Paccaya*, *Samanantara paccaya*) so as to prevent the interruption of the Mind-continuum.

Sandahanam cittantarassa anuppabandhanam. (MulatT-1 -87) *Sandahana* =means " Arising in continuity " ie:—to connect the another Consciousness in continuum. In *otherwords*; the arising of next Consciousness is the ' process which connect the vanishing and arising Consciousness to prevent the pl64 interruption of Mind- continuum. That is ; the vanishing Consciousness, is beneficial to the next Consciousness with *Proximity* and Continuity Condition so as to prevent the interruption of the Mind-continuum .

Proximate Cause (Padatthana) Consciousness never occur alone without any associated Mental Concomitants. So, the associated Mental concomitants are the Proximate causes of the Consciousness. Again, Consciousness (ie:— Mentalities) can not arise without Physical Base (= *Vatthu*) on which it is based, in the *5-Group-Existence* (= *Panca. vokara. bh'umi*) where 5 kinds of aggregates

(= *Khandha*) occur. So , the Physical base is also the Proximate cause of the Consciousness. Finally, if the Sense-object of the Consciousness is the materiality { = *Rupa dhamma* } like Sense- object of sight (= *Ruparammana*), that Sense-object is also the Proximate cause of the Consciousness. The nature of Consciousness can arise only in the presence of the nature of Sense-object to be taken up. The Physical base (= *Vatthu*) are the **Base-Prenascence**. Support Condition. (= *Vatthu pure jata nissaya paccaya*) and the Sense-objects matters are Object-Condition (= *Arammana paccaya*) to the production of the Consciousness. **So**, in the Five-Group-Existence (= *Panca-vokara-bhava = bhumi*), the Proximate cause of the Consciousness is the Materiality and Mentality (ie:- *Nama.rupa*). **In** the Immaterial Sphere (= *Arupa.bhumi*), there is no materiality. So, the Proximate cause of the Consciousness in this Sphere is the associated Mental concomitants (= *Cetasika*).

All the described Character , Essence , Perception , and Proximate cause are the statements for all Consciousness in general , included in the Consciousness aggregate . If a **Meditator** wants to discern individual Consciousness , discern as follow .

2. Rebirth Consciousness (**Patisandhi Citta**)

1. *Kamma- Kammanimittananz- Gatinimittanam annatararammana uijananalakkhanam Patisandhi cittam ,*
2. *Patisandhanarasam ,*
3. *Sandahana paccupatthanam ,*
4. *Nama.rupa padatthanam .*

1. The awareness = taking up of one of the (3) kinds of Sense- object like " The Action " - " The Signs of Action " - and " The sign of Destiny " perceived by the Death-proximate Impulsion-Consciousness (= *Maranasanna javana citta*) of the Past-life Character,
2. It links the two Consciousness in continuum of the two proximate existences (= *Bhava*), Function (Essence),
3. The nature that links the two Consciousness in continuum of the two proximate **existenc**. Perception,
4. The associated Mental concomitants and the dependable Physical Base (= *Vatthu*). Proximate cause.

3. Subconsciousness (**Bhavanga Citta**)

1. *Kamma- kammanimitta- Gatinimittanam annatara rammana vijanana lakhanam bhavanga cittam ,*
2. *Bhavangarasam , •'*
3. *Sandahana paccupatthanam ,*
4. *Nama.rupa padatthanam .*

1. The awareness = taking up of one of the (3) kinds of Sense- object like " the Action " - " the Sign of Action " - " the Sign of Destiny ", perceived by the **Death-proximate-Impulsion-Consciousness** (= *Maranasanna javana citta*) of the past life Character,
2. It exists as causative factor of the Existence (= *Bhavanga kicca*), by preventing the interruption of proximate mental continuum (Function) Essence,
3. The nature that links the continuous Consciousness, so as to prevent the interruption of the proximate mental continuum Perception,
4. The associated Mental concomitants + the dependable Physical Base (= *Vatthu*) P 1[^]5
..... Proximate cause.

Now, it is to be noted that Rebirth Function and **Subconsciousness** Function of the Rebirth Consciousness and Subconsciousness are described in terms of the Function (= *Kicca*). It is also the main leading Essence {=*Pubbangama rasa* } of these Consciousness . Because, the Aggregate of Consciousness is always the main factor= essence , among the groups of associated mental phenomena which takes up the Sense- object in a Mind- moment .

4. Five-Door Advertence-Consciousness=Mere-action Mind Element (*Panca.dvaravajjana Citta = Kiriya mano dhatu*)

1. *Cakkhuvinnana dipurecara rupadi vijananalakkhana manodhatu* ,
2. *Auajjanarasa* ,
3. *Rupadi abhimukha bhava paccupatthana* ,
4. *Bhavanga viccheda padatthana* . (*sa upekkha yuttava hoti.*)

(Visudhi-2-86.)

1. Arising prior to other Consciousness like Consciousness of Seeing (= *Cakkhu vinnana*) and taking up the Sense-objects like Sense of Sight Character,
2. Consideration of Five-senses (= *Pancarammana*) like Sense of Sight (= *Ruparammana*)
..... (Function) Essence,

In other words, to discard the original Sense-object, so as to change the pre-existing Mind-continuum to another(Function) Essence,

3. The nature which directs the attention to Sense-object like Sense of sight -etc Perception,
4. Interruption of the continuum of Subconsciousness = Cessation of Subconsciousness
..... Proximate cause.

Mind- element (= *Manodhatu*) ———

• 166

Ay am *pana manovinnanato uppannapi visitthamananakkicca bhavena manomatta dhatuti manodhatu.* (Mahati-2-129.)

Although the Five-door advertence Consciousness arises after the previous Mind-consciousness (= *Mano-vinnana*) = (the Consciousness arises immediately after passing away of the Subconsciousness and effected by the Proximity-Condition = *Anantara paccaya* -of that Subconsciousness), it can not grasp the Sense-object properly and definitely, ie:- lack of effective taking-up of the Sense. (= *Visitthamanana-kicca*). In other words is can't take up the Sight { = *Ruparammana*) as Sense-object or it can't take up Sense-object . It is just a mere natural element that knows the Sense of sight when that object strikes the Mind-door and Eye-door. So, it is known as Mind-element (= *Mano-dhatu*). (Similar process occur, when the respective Sense-objects strike the Mind-door and other Physical-doors, eg:- Ear-door etc.).

Function (Essence) = Rcisa———Avajjanarcisa.ti abhogarasa , cittasantanassa va purimakarato annatha ono janarasa .
(Mahati-2-129.)

The consideration of the Sense- object in the function of that Consciousness. It's function is just to bear in mind like " What's that ? " , when a Sense-object strikes the Physical door. (= *Dvara*). It is not a complete and effective way of consideration . For those who are not satisfied with this description, further explanation is given by the Great-subcommentary Teacher as follow:——

Before the Advertence- consciousness (= *Avajjana citta*) (ie:- The Five-door Advertence-consciousness = *Panca. dvaravajjana citta*), there is successive occurrence of the Subconsciousness (= *Bhavanga citta*). It is known as Sub-consciousness - stream (= *Bhavanga-sota*). That Subconsciousness takes up the same Sense-object taken by the Death-proximate Impulsion Consciousness (= *Maranasanna- javana kicca*) of the past-life. To this phenomenon, ie:- the Sense-objects, like sense of sight, exist prior to the process of striking between the senses and respective door ; the term (= *Purimakara*) is given . This phenomenon which is **occurring** before the Mind-continuum (= *Purimakara*) is broken off when the Sense-objects strike the respective Physical doors, (ie:- the Subconsciousness stream is interrupted). Immediately after the Subconsciousness is broken off, the taking up of Sense-object perceived by the Death-proximate Impulsion consciousness (one of the 3 kinds of sense ,like "the Action"- "the Sign of Action"- "the Sign of Destiny" = *Kamma- Kammanimitta- Gatinimitta*) is released. The interruption of Subconsciousness stream occurs before the arising phase (= *Uppada*) of the Advertence- consciousness (= *Avajjana citta*), and at the time of passing away phase (= *Bhanga*) of the Subconsciousness which is known as Interrupted Subconsciousness (= *Bhavgupaccheda*). When the Advertence Consciousness arises, the Mind-continuum does not take up the Sense-object of the original Subconsciousness- stream ie:- the Sense taken up by the Death-proximate Impulsion Consciousness;- instead, it takes up the present Sense-object (= *Paccuppannammana*) eg:- Sense object of sight (= *Ruparammana*) which appears in the respective Physical door [= *Dvara*). The Advertence Consciousness changes the Mind- continuum from taking up the previous Sense-object to another new Sense-object . This is the function of the Advertence Consciousness = the function which releases the previous Sense-object so that the Mind-continuum changes from previous sequence to another new sequence. When the Mind-continuum

changes from previous sequence to another sequence, it releases the previous continuum and occurs as new continuum = ie:- it releases previous Sense-object and takes up new Sense-object, But ; the Consciousness that Takes up previous oriRLnal Sense-object and the Consciousness That Takes up The new Sense object are different. The words " Single Mind-continuum " in metaphorical expression of the phenomenon as a unit, which is known as " *Ekafta naya* " in *Poli-te*^.

Proximate Cause (*Padatthana*)—The Advertence Consciousness arises only after the interruption of Subconsciousness-stream. It can not arise, unless there is interruption of Subconsciousness-stream, because, the two Consciousness can't arise simultaneously in a single Mind moment (= *Cittakkhana*). So, the proximate cause (= *PodaCthana*) of the occurrence of the Advertence Consciousness is the interruption of the subconsciousness-stream. In other words, The Proximate Cause is the Subconsciousness which is known as " Interrupted Sub-consciousness [= *Bhawngfipa^hfida*]. That Interrupted Subconsciousness has the effect of Proximity-Condition (= *Anantain, paccaya r,atf*^ on the Advertence-Consciousness, (Refer to *Visuddhi-2-119*.)

Indifferent Feeling (= *Upekkha. uedana*) ———

**Apubbarammana sakidGvapauaitamana sabbaltia vi^ayaru^uifl
anubhautum na sakkolili Wiadi^u aubbuUhu upefvkhcfyuttciva
hoti .**

[Mahati-2-129.)

This Advertence Consciousness is the first Consciousness which takes up the present new Sense-object. Since it occurs once and takes up new Sense-object first, it can't reel the Sense-object in every detail, ^0, it arises in association with the **Indifferent mental feeling (= *Upekkha vettana* }** in all sense-objects like Desirable, Medidrid^irabIc^Non.desirable and Median-non-desirable Sense-objects (-*Itiiiu. itlhumajj^faita, Aftirha.AnitthamQJJhcstta*}, fMahati-2-129.)

These who are intelligent and have some basic knowledge of scriptures of Buddha's Teaching (= *Pamfatti*), will understand how to discern the Character, Essence, Perception and Proximate cause of the Advertence Consciousness, by referring to above descriptions- But, those who are weak in knowledge of scriptures of Buddha's Teaching, especially in the canon of Ultimate Realities [-

p167 *Abhidhamma*] may not be able to understand these facts. So, for them, further explanation will be given ,

p168 This Five-door Advertence Consciousness takes up the five kinds of Sense-object f •-

Panwamfnniia }, like Sense of Sight, Sense of Sound, Sense of Smell, Sense of Taste and Sense of Touch] = *RLiparammana. Suddarummana . , Gan.i-Shnrfunmfiiifa, Ra^arammana , Photthabbarammana* }. But, all these five

kinds of sense are not taken up by the 5- Door Advertence Consciousness simultaneously in respective Door in one Mind- moment. The Advertence Consciousness only take^ up one of the five senses in the duration of its three phases of existence (ie:- Arising phase. Standing phase and Paasing phase [= *Uppada, Thiti. Bhanga*]. So', each and every individual Sense-object should be discerned separately. Now, how is it^eem the Character, Essence, etc:— of The Advertence -Consciousness-

-ness when taking up Sense-object of Sight will be mentioned as an example.

Five-door Advertence Consciousness—Taking up Sense-object of Sight, (*Panca dvaravajjaTta*. - *Ruparammana* }

1. It arises before the Eye-consciousness] = *Cakkhu uinnana* } and Perceives -knows the Sense-object of Sight Character,

2. It considers the Nature of Sight (Function) Essence,
in other words — It tries to discard the Sense-object or the Subconsciousness, so as to change the pre-existing Mind-continuum to another continuum-

3. The nature which directs attention to Sense-object of Sight Perception,
4- Cessation of the Subconsciousness- Continuum - *Bha.va'n.gii.pac^hedn*
- Interrupted- Subconsciousness Proximate cause.

Method of Discernment ——— Take up in mind the tables mentioned in the chapter of Mental dilation of Mentality, *Pancudvuruujjusiu* • = Five-door Advertence-Consciousness consists of (11) kinds of Consciousness and Mental Concomitants, Try to discern the Character, Essence etc, of the Consciousness selected from these groups of Mentality. But, in practice it is better to discern the Character, Essence, Perception and Proximate cause of the associated 110) kinds of Mental Concomitants at the same time ; so as to break down the compactness (= *Ghana*] of mentality in every Mind-moment. The similar method of discernment can be applied to the Five-door Advertence Consciousness arising in taking up of Sense of Round, Sense of Smell, Sense of Taste and sense of Touch. So, apply same method. Finally, it is better to discern all Mentalities, compacted as Consciousness and Mental Concomitants in single Mind-moment of Thought-process (= *Vithicittakkhano*.) eg: Eye consciousness (- *Cakkhuvinnana* } at the same time.

5. Eye Consciousness (*Cctkkhu vinrtetrtet*]

168

1. Cakkhiisafimssita rupavijanana lakkhanam cakkhuvinnanam ^

2. *Rupamattaro.mman.arasam* ,

3. *Rupabhimukhabhauapaccupatthanam* , 4> *RupQtaminana kiriyamanodhatuyQ ap a gamapo. da tfhanam*
. ^g ' (Abhi-ttha-1-^03. Visuddhi-2-85,)

1. Depending on the Eye-base (- *Cakkhuuaitu* }, it has the Nature of taking up and realisation of the sense-object of sight Character,

2. It has the nature of merely taking up and realisation of the colour or appearance of the Sense-object of Sight [Function) Essence,

3. The nature which directs toward the Sense-object of Sight Perception,

4. Oration of the Mere action Mind- element (= *Kiriya mwiu dhatu*) which considers the Scn[^]-object of Sight I - The Advertence Con&ckiLianeas - *AuajjmadUa* } Proximate cause.

How it gets the name as Eye-consciousness | = *Cikkhu iHnnana*

There are past and present causative factors in the development of the Eye-consciousness. (Keep in mind the Doctrine of the Dependent Origination = *Pfsticca samuppada*). The Eye- Iran sparcnL element, **Reuse-object of Sight, Illumination and Mental advertences** [= *Cakkhzi pasada, R[^]parařimcina, Ahka, Man-asikara* } arc prescuL causative phenomena, Among these causes. **Sense-object of Sight is not only Lhe causative sense for Eye-consciousness; but also for Five-door Advertencoc-coiiseiuLianess, Receiving- consciousness** (` *Panca dvuravajjana r[^]ifTa, Sarnpaticc[^]iana citta* } of the Eye-dour Thought process [- *Cakkhu dvain vithi* } and various Consciousness of the Mind-door **Thought-proeesaes** which may or may **noL follow** the Eye-door tloug[^]IL process (ie:

Manoduara uithi, Sfiddhamatwdvara vithi). So, to give the name or Eye consciousness in relation to Rpnse-obiec-t of Sight is not. suitable, since that name is common for oLher Consciousness as w[^]ll . In case of Eye-ti-anspai\;nL element; it is related ki Eye Consciousness only , That is ; the Rye-transparent element is dependable base (ie:- *Vatthu*) and Support-condition (ie:- *^iissayu paccaya*) only for Eye eohacEousness. So , the name Ey[^]-Lranaparent element ; the causative factor which it> not related to other phenomena apart from Eye ConsciuiLianess is used for this particular Consciousness . That is why it is stated that the Eye Consciousness (- *Cakkhu vinnarso*) is :—

1. The Console LI aness of the Eye-t ran spare ill element, depending on which that Consciousness aritifST
2. The ConsciousnctiS which arises due to the Eye-Lransprent element,
3. The Consciousness which arises by depending on the Eye-tranapa rent element.

The drum-sound (=*Bheri saddo*). Although the word "sound"|= *Radda* } is used for all sorts of sound; when the word "Drum" is added in front of it, it is taken [^]s the sound produced by beating the drum or the Dmm-sound (- *Fihe'i sodda* } = { *Bhen* = d.rum'i'Sddda - sound). Likewise, Lht; word "*Ankara* is us[^]d for all sorts of sprout ; if the wurd " *Yava* " is added in front uF it, (ie:- <[^] *Yavn.nki.iirf*) it is taken as the " Barley sprout ". So, thf* name Ey e-con sciOLEti ness is given to that particular Consciousness which is not related to other phenomena apart from the Eye-transparent element. That ia, Lhe name " Eye consciousness is given by exciLiaion of the non-related phenomena (- *Asadhamno* }. In Original Subcommentary (- *Mulatika*); apart fi-om the way of exclusion of the non-related phenomena f= *Asadhyruna* }, the name Eye consciousness ia also given by

reterri.n.s the predominant nature (= *Adhika*) of the Eye-tram; parent element. If the power of Eye e -T ran s parent element is sharp, Lhe a-warenciS of the Eye Consciousness is also sharp and powerul. If the Eye-trana parent element is weak, the Eye Consciousness is also weak and blur. So, the Ey^transparent element is the predominant factor for the development of Ey^ consciousness. The word ^{ft} Eye = *Cakkhu* " is used in front of thai particular Consciousness, so it gets the name Eye Consciousness - *Cakkhu ifiinanana* . So, this name is based on the predominant nature (= *Adhika*). The similar method is used in giving the names for other Consciousness, like Ear Consciousness, Nose Consciousness etc.

[Abhi-ttha-1-303. *Mulati-1-124*. Anuti-1-132,]

PI 69

Character— CakkhusatimssiTanca Tain n/pas/ijanaR Lancati cakkhusannissita

**rupavijananarn., cakkhusannissita fUpasfijananarn lakkharLam
etassati cakkhusannis^ila nipavijanaria lakkhanam.**

Cakkhusannissita- The Consciousness which arises hy depending on the Eyc-base (*-Cakkhu vaiithu*) - by this phrase; apart from Rye Consciousness which takes up the Scns^ object of si^ht, the remaining Consciousness of Lhc Eye door though!-proems and Mind door thought-process are excluded . Apart From the Eye Conscit-n-issness, the other Consciousness of Eye door the ughL- process and follower Mind door thought- process , although they take up the Sense object of sight , they do not depend on the Eye base (- *Cakkhu uatluhu*) - Eyc-tras parent element I - *Cakkhu pasada* }. Only the Eye Consciousness ariacs by depending on Lhe Eye base = Eye transparent element { *Cakkhu vaiihu- Cukkuhu pasada* } . So ,by aaym^, " ti-ic Consciousness which arises by depending e^l tlic Eye base "-- the other Consciousness not depending on the Eye baac are excluded .

Rupavijanaana = The awareness or realization of Senye object of sitght— hy means of this phrase ,all rhe Menral concomitants like ^{lt} Contact "(= *Phassci*) which occur in association (^ *Sampayutta dPsamma* } \with t3ie Eye Consciousness and depending the Eye rransparent element are excluded , These Menal concomitants like Contact = *PhaK^o* . although they are taking up the Sense object of sight in association with the Eye consciousness ; they are not able to realise and aware of the Sense of sight. They arise by conLact with the Sense of sight ie: they have Character of Contact or Touch l- *Phu^ana lakkhana*}. So .the " Arising by depending on the Eye-base " (= *Cakkiisaimiwilu* } and the " Awareness or realization of Sense-object of sight " (= *RLipasAjcinn7iu* } are the natural characters of the Eye consciousness only - Again, by Lhfae two statements ie:- " Arising by depending on rhe Eye base ' -i " Awareness of Sense-object of sight " (= *Cakkhu sannissiTa* * *Rupavijanaana* l, Lhe nali-irc lliat the Eye-base (- *Cakkhu ualthu*] is pl70 the Support condition l - *Nis^ayu paccat/a* } and Sense-object of sight {= *Rupara-ffimana* } is rhe Object condition (= *Arammana paccoya* } for the development of Eye Consciousness is very obvious . (Refer to *Mulati-1-124J*

i (Function) Essense — Rupamattassa arcunmana gahfinam kicca-

metassati mpnmaUarammanaruswii.

(MulaLi-1-124.)

The function of Eye-Consciousness is n-ierply to take up Lhc Impression (or appearance l and light of the Sense object of sight. Apart from taking up of

impression; the Eye consciousness does **not** know **the other** nature , **Like** Wholesome, Unwholesome etc. By **means** or **Lhe** word " **Merely** " ¹¹ **just** " **f** ¹¹ **Mn** » o) , the taking **up of other** Sense-objects apart from **Lht** Sense of **sight** by **the Eye** consciousness is excluded and **Lhf** ability **Lo** take **up** the **colour**, hue etc , of the Sense of sight by **Lhe Eye** consciousness is **also** ruled out. That's **right** , The Eye **consciousness** can take **up only** **the impressioi-i** or appearance (= *Vanna*) of the Sense of **sight** and it **can** not take up the - ;pec]Fil details **like** colour, hue of the Sense object of **sight**. So, **the Buddha** states **about that** nature as follow:—

" Pancahi umnanehi na hand dhfimmom patiuujanati annatra abhinipatamatta".
(*Abhi-2-323,*)

- Apart from mere taking up of the respective sense ; the Five consciousness (*-Pan-ca Vtrmana*) do not know or realise **any** detail account of the Sense-objects . (Abhi-2-

323J *Net kcinci dhammam pecttivija.n.ati*

= **Do not** know any detail account— means " **do not** know whether it is Wholesome or Unwholesome etc, etc ,(*-Manopubbangamet dhamma*) **iyQ** Amiatra abhmipatamattalL **annatra apatamatta,** (Abhi-2-333,)

Apart from taking up or striking the various sense , the Five consciousness [= *Panca Vmnana*] are not aware of the **oLiiLT** phenomena like Wholesome, Un-^p 171 wholesome etc. In this case , the **Laking Lip of** Sense (eg:- Sense object of sight) means the meeting or striking of **Lhe** Five (*-unaeiousness* and the respective senses. This mere meeting or striking is known as " *Abhmtpatamatta* ".

In shorts—Even in the very wise man, apart from the striking the respective senses , the Five consciousness are not aware of other accounts of the various senses; like good or bad or Wholesome or ill etc. So, **Lhe** role of Five consciousness are :—

1 .The Eye consciousness can merely (*-Malta*) see the Sense of sight , 2/The Ear consciousness can **mtrely** (*-Malta*) hear the Sense of sound ^ S.The Noae **conHciousneati** can merely (=*Matfa*) smell **tne** Sense of **fimell** ,

4.The Tongue consciousness can merely (*- Malta*) taste the Sense of taste ,

5.The Body consciousness can merely (*- Malta*) feel the Sense of touch .

AparL irom mere taking up of Senses [eg:- Sense of sight), the Five consciousness **do not** know or realise the other particular accounts | eg:- good or **P** bad, Wholesome deed or Unwholesome deed etc , etc) of these Senses. ¹⁷¹ (*Abhi-ttha-2-387-388.*)

.

According to the descriptions in these Subcommentaries, although it is stated that the Eye consciousness knows the color- or impression, actually it does not know the real natural states (- *Dhamma sabhava* } in detail like, Sense object of sight, the various colour such as brown, golden etc etc. It is only the nature of meeting or merely picking up the yense object of sight by the Eye-consciousness. Apart from that nature of picking up the Sense of sight; the Eye consciousness does not know further. Similar phenomena is applied in other Consciousness like Ear-consciousness, Nose-consciousness etc,

(MulaTi 2 20 L Anuti 2 202. I

Perception — Since the Eye-consciousness arises by taking up the sense object of sight ^ it appears as a phenomenon which aims towards and pick up the Sense object in the Insight-knowledge of a meditator who is discerning the Eye-consciousness. In other words it is perceived as natural phenomenon which is directed towards and taking up the Sense object of sight in the Insight, knowledge of a meditator (= *Ri^pahhimffkl^rf bh/ivapar.aipfJTthananz* = A natural phenomenon which is directed towards the Sense object of sight).

(Mahati-2-125.)

Proximate cause -- " ——— In this case, the Mere-action Mind element (= *Kinyamano-dhatu*) means the Five-door AdvcrLence conscioLLtiieys (= *Pwca-duaravajjan.a ciitta* } . This is the first Consciousness which considers (- *Auajgwa-dtta*) the Sense object of sight reaching the Eye transparent element and Mm.d-basc (^ Eye-door and Mind-door - *Cakkhu dvara, Manodvara*) pl72 All the completely passing away Mental phenomena, immediately arising

pl71 cessation of them, give chance for the uccLiren-r-e of the following Mental phenomena, with the power of ProximiLy, CunLigLiiLy, AuBcencf and DisappeaJ'ance CondiLiona eLc (= *Anurduru, Sumwmuittru, NuUhi, Vigata paccaya* } . So, the Baee-maLLerH [- *Valthu*] and Sense-objects (= *Arcifttmana*) are the proximate causes of the respective mental phenomena, Likewise; the Eye-consciousness can arise immediately after cessation of the Advertence Consciousness, So ^ the cessation of the Advertence Consciousness is the proximate cause of the arising of the Eye consciousness. This nature is also applied to the Kar, the Nose-Consciousness etc. (Mahati-2-125.)

Among the present causative factors of the Mental phenomena:-(eg:- the Eye-consciousness — which is transparent element, (9.) Sense object of sight, (3) light, (4) Mental Advertence consciousness (= *Cakkhnepasada, ^172 RuFURammuna. Aloka. Mmasikafa* } -, onEy the Mental advertence (- *Manasikara*) is described as Proximate cause (= *Padaft^ictna* } . 1, in the dissolution of the Eye transparent element — The Eye-transparent element of a dead person is already mined, So also the Eye-transparent element of a living person which has already passed if life Rpan like " Arising phase, Standing phase and Passing-away phase " = *Uppada, Thiti, Dhaizga* }

— is already dead. Again, the Eye transparent element which is interfered by disorders in bile, phlegm and blood (= *pittam, semham, lohitaṃ*) is also ruined, since it is not able to be a dependable cause for the Eye-consciousness. The Eye transparent element which has capacity to become dependable cause for the Eye consciousness is known as non-dissolved (- *Aśumbhinu*) Eye transparent element. Similar nature is applied to other Transparent- elements as well / like Ear transparent element etc etc ,

2 Impingement of the Sense-object of Sight — If the external (= *Bāhiddha*) Sense-object of sight (= *Bāhiraṅga*) does not strike the Eye-door; the Eye consciousness does not arise even in the normal, non-dissolved Eye transparent element.

3. The propagating media for Sense object of sight (ie:- light) — Again, the Eye consciousness does not arise, if there is no propagating media (ie:- light in this case) which carries the sense, even when this Sense objects of sight is directed towards the Eye-door and (Mind door).

pl72

4. The arising of the Mental advertence (- *Manasikara*) —

Even when the *Iṇdriya* is present sufficiently, if the mere action Mind element { ? - *Kiṇṇamānāsa* } which is also known as Five-door advertence Consciousness (= *PañcādvaraVajjana citta*) ie:- Five door advertence consciousness and its Mental concomitants do not interrupt the Subconsciousness

(= *Rūpīya dhammā*) of the Mind-continuum; the Eye-consciousness can not arise - Only when the Subconsciousness is not off; and the Advertence consciousness arising as the functional mind-element { - *Kiṇṇamānāsa* } grasping the object and breaking through the Subconsciousness stream, the Eye consciousness will arise. To this Five door advertence consciousness = *Pañca-dvārāVajjana* } The term " *Vithipatipadaka* " or " *Mañāsikara* " (ie:- Mental pl72 advertence) is given .

That Eye-consciousness always arises in association with Mental concomitants, So, the Eye consciousness (= The Eye consciousness and related Mental concomitants) arises due to the effect of above (4) causative factors. [Abhi-ttha-1-32 1.] Here, about The Mental concomitant like " Contact " = *Phassa* in less mentioned, since the Eye consciousness and associated phenomena are being discussed. (Refer to the doctrine of Dependent Origination- *Puliccu vumuppada*).

Meditation — There are (8) kinds of Mentality, including the Eye consciousness, arise in a Mind-moment [= *Cittavikkhāna*] of the Eye-consciousness¹¹². Among that (8) kinds of Mentality, select the Eye Consciousness and discern it .

In "*Niddh^avara* "of *DhamrrLasangam* " Pali- text (Abhi-1-105-), based on the dependable Base matter , the Eye consciousness is stated by the Buddha as *innicent nature** | = *Pandara*}. It is to be noted that the wholesome deeds | - *kusala dhamma* } are innocent in comparison with the Unwholesome deeds . *BuL* in case of the Transparent-elements and Heart-Base matter (- *Pasada rupa* , *Hadaya Vatthu* |, on which the Mentalities depend , these are not opposite nature of Unwholesome deeds [= *Akusala-dhamsna* } , which are ill *ibu.nd^d* pro-cessea (*ie*;- *Kanrsa dhamma* }. These Batic *inalLfra* are innocent in Lheir original nature . So, the ResulLanL contiek) nances (- *Vipaku <^itta* } , since these depend on the innocent Transparent.-Baa e and H^arL-Base , are *iimocent* as well ;

somewhat like a Myanmar proverb which sLaLes as " A *parroL* resting on a gilded tree ia gilded as well ".

The Wholesome deed (- *Kusala dhartvna* } is innocent { *Pandara* } because it is pure and simple in iL's own naLure . The Unwhole^unn; dceel (- *A^usalo. dhamiria*) is innoccnL { = *Pundara* } because iL is the result&uit of yubeonsconscious' nesB . Thv Resulting Conacieuusness (- *Vipaka vinriana* } is innocent (= *Pandara*) because iL's dependable Base matter is innocent in it's original nature.

lAbhi-ttha-1-303.) The above csplanatic described in the Commentary i^ not applied in (4 [Groups or Aggregate of existence | - *Catat?okQra bhunn* } - Immaterial Sphere (= *Ampa bhwii*). There is no such thing as " Innocent Dependable Base " = *Vatthu pandurci* in Immaterial ypherc since there is no Base matter in this sphere, IT is to be noLed thai there are Resultant consciousness (- *Vipaka mnnana* } su^h as Rebirth Conaci-ousncss, Subconscioiisness and Death Consciousness *Pati-^andhi citta. Bhavanga citta. Cuti citta* } in the Immaterial Spliere and also that the innocent nature of the Resultant Consciousness is due to the inno^nf nature of the Base matter as described in the above Commentary [= ie:- *Vipakam vatthu pandarataya* }. So, according to this Commentary, tne iiiiiio^nt nature (- *Pandara* \ of the "Resultant Consciousness (ie.- the Suhronsciousness) of the ImmaLerial sphere is impossible since there is no Dependable Base matter in the Immaterial sphere. So also tlie innocent nature of tb^ Unwholesome deed i^ doubtful, since this is the resultant ^fSubconaciousness. So, further study should be taken about the ^aue of the Innocent nature { - *Pandara* } ol Lh-c Resultant consn^usneas (= *Vipaka dhamma*) and the Unwholesome deed of the Immaterial sphere (= *Anspa bhiimi* } where there are 4 kinds | - *Ayyrfyates* } of Mentalitips only. (*MLilau-1-125,*)

The Remark of the Venerable Original- Subcommentary Teacher

PtJbhassaramdam bhikkJTave dttam. Tanca kho agan.tukeb.i upakkilesehi upakkilittbom .

(Am'1-9.)

Translation: ^{rf} 0 —, Monk „-, the Consciousness shines brightly with glittering flashes of Tight. It is faded and polluted by rhe dirt of the Unwholesome deeds acting as Guest Concomitants "

(Am-1-9.)

According to this teaching hy the Buddha, the Consciousness is .^^ innocent in i^s own nature . It is contaminated by the dirt of the Guest-Unwhole-' "" some deeds. So, Lhe term " Innocent " f - *Pai'idara*} is given to the Consciousness according Lu iL's original nature, and not due to the dependable Base-matters, on pi 74 which the Consciousness depends. This is the concept of the Original Subcommentary teacher. |Mulati-1-125,)

About the Feeling (*Vedana*) at the Five

pi •77

w .

Consciousness (= *Panca vinnana*)

The Buddha mentions the Indifferent mental feeling (= *Upakkha vedaria*) in relation to the Eye, the Ear, the Nose and the Tongue consciousness (*Cakkh vinnana, Sotavinnana, Ghana vinnana, Jivha umnana*) . But, in case of the Bodily consciousness, The Buddha mentions the Bodily agreeable feeling (*Sukha vedana*) for Desirable Sense-object (- *Ittharanimana*) and the Bodily disagreeable feeling (- *Dukkha vedana*) for the Undesirable Sense-object, The different feeling (= *Vedana*) in relation to the Bodily consciousness is due to the different nature of impingement between the

various yensc-objccts and the Sense-doDr.

In case of the **Eye**, **Lhe Ear**, **Lhe Noae** and the **Tongue Doors**, the **Sense objects of Sight**, **Sound**, **Smell and TasLe wliich** are the **Derived** (=Depen-dent) Corporealities strike the **respective Transparent elements** lie;- *Eye*, *Ear*, *Nose* etc.) all of which are also " **Lhe Derived CurpyrealiLics** ", Since the impingement **ia** between the **two Derived** or **Dependent Corporeaiities**, the striking nature is weak. **Somewhat Like** Lhe force, **ui-'cLiring ^hcn** hammering **the four** cotton-wool **baLLii**, placed **on Lhe luLir anvils with** another pieces of cotton-wool, the **Rtrik-ing** force **beLween** Lhe **Derived. Corporeaiitic&** is weak , So, **in** taking up of **The feeling of reypeclive** Sense-objects **by the Eye, Ear, .Nose** and **Tongue conKcious-ness**, **that** feeling **ia** weak; known as **the Indifferent mental** feeling (= *Upekkha vedana*)..'

Tn Body-door, the **Basic-elemenLi** (like the **Earth**, the **Fire** and **rhe Air** elements) in the external (° *Bahiddha*) **Sense-objects of touch** , **which**, exist in the **seperate groLip of matLer** **From** the **Body transparent element** (on which the **Body cunseii-mynesti** depends), **strike** the **Basic elements** **which** are the support condition tor the **Body transparent elemenr** and exist m the same **uniL group** with internal **Body transparent element** {=*Aifhatfika kciiJfi po^add*}. When a **cuLLon-wool baU** placed on **Ehe** anvil is beaten with **iron** hammer, the hammer as **well** as the **beating** force **exerted** passes beyond the **cotTon** find reaches **the anvil**, **sinc^** the **striking force** is enormous. Somewhat like **this** example, the striking lurge of

the **Sense-object of touch** (= *Phothabbarammana*) on the **Body transparent element** is enormous, so much so **that**, the **sinking power** exerted not **only** in the **Body transparent element**, **hut** down to the **Basic-eleinity** on **which** the **Body transparent clement** depends So, the **Body cunscEou.Biiesa** connected with the **Bodily agreeable** feeling [° *Siskhasahagcila kuyuvinTiana citta*] arises **when taking up the** **Desirable Sense-objecL** (- *Rthura'fii'Kmci* } and the **Rody consciousness conncpfed** with the **Bodily disagreeable** feeling (- *Lh^kkh^ahagata kayauinnario ^tt.n* } arises **when taking up the** **Non-desirable** **Sense object** (- *Afiitthaf-ammana*). (Ahhi ttha-1-304.)

In this section, **Lhe Commentaly** teacher **by** using example H78 (° *Nida^ naya*) and discriminative **points f** = *Upalakkhna naya* |, explain simply **thai-**, " the **External Sense-object of Basic element** (- *Bahiddha -mahabhutctrammanaTn*) **strikes** Lhe **Body transparent element** " so as to get clear understanding of these **natural** processes. Actually **there may** be striking among **The Earth, Fire** and **Air elements** of **Internal units group of matter** [*^AjjhafS.o nipa kalapa*] and **Lhe Internal Body transparent element** (= *AjjhattG kaya panada*) as well. |MuLaLi-l-125.|

Alternatively——The **Body consciousness element** {=*kayavmnancf dhctrzi*} flmes , depending **un** Lhe **Body transparent base matter**. (- *Kayupasada vatf>iu*). Again, since the **Body transparent base matter** is **Derived** (**Dependent**) **Corporeality**, it arises **by** depending on the **f4**(**Basic-elements** in the **same unit** group of matter. **Dut il** is **Lo** be **noted** that **th^se** **Basic elements** in the same unit group-on **which** the **Bod^ Lransparcnt element** depends —is **not** the **Baaie-cle-ments** acting as **Sensf-object of touch** . So, **except** the **Basic elements** on which the **Body consciousness depends**, **all** the other **Qasic etementa-Sensc** object of touch | - *Mahcibhlta photfhabbarciininana* } in the **seperate units group** of matter which may be **inLemal** or **external t^** the **physical body** is known as " **External Basic-elemenL of acnsc-object of Touch** " (- *Bahiddha mahabhuta phoithabbciJ-aiiimuna*). In other words, although **these** are **kno^h** as **Basic elements**, the **Basic element** of the **Body Transparent element** depending on **which** the **Body consciousness arises** and the **Rasn'-element** of **Sense object of touch** are in [he different **unils group** of matters. (= *Rupa kalapa*). [Mulati.-l-1.25.)

^^

Long Persistence of Feeling (= *Vedana*)

The striking and rubbing between the Body transparent element and Sense object of Touch is **poweri'LLL Due to this energetic touch**, when **titri-king with** Desirable Sense-object of touch {•- *Itthaphotthabbararrimma*} eg: **touching** the **pleasurable** objects; the causative **lacLors** of **Lhe Bodily agreeable feeling** {- *Sukha vedana*) such as—[1] Body **transparenL** element, (2) Desirable **fiense-objfet of Loueh**, (3| Associated Mental **concumiLanLs** like "Contact" [- *Kayapasada*, *ItthaphotthabbGrainmana .Sampayulta dhamfna* = "*Pha^a*"], **an** of which **are** supportive **elemftnt** (= *Nissaya dhatu*) **amon^** each **others**, arise **En** succession, **So**, due **To** The action of **theae** supportive **eLemenTs**, the Bodily agreeable feeling arises for a **long time**. That is due **to the** longer **dur-irion of actiun by Lhc** supportive causes for the **development** of the **Bodily agreeable feeling**, the resultant Bodily agreeable feeling arises **lor long duration**. (Keep **m** mind **Lhai**, among the causative

factor, the past causative elements are also in eluded,).

Again, **m striking with Non-desirable Sense-ubjct of touch** f= *Anittha phott^obbarammana*), the **causative factors of the** Bodily disagreeable feeling (= *F^ikkha ucdana* } **SLK;L as—**(1) Body transparent **elemenL**, [2J Non-desirable **Sense object of Louch**, [3) Associated. **Mental concomitants like** ^{tl} **Contact** ", (= all of which are supportive **causative elements** for the **developrn^nl of the** Bodily disagreeable **reeling**, arise for **lon^** duration. (**In this cas^**, note also that among the **causative facLors**, the **past causative elements** are also included. Keep in mind, that the Bodily **disagrcabic feeling** = "*Koyika dukkha rcduna* "— like severe **headache**, **bEick-ache** etc , occur **even** in the Buddha which arc due to **the** past causative elements). Due **to the** longer duration of **supportive** causes **on** the development of the Bodily disagreeable feeling , the resultant **Buddy disagreeable** feeling also arise fur **lony** duration , **IMuiati-1-125.)**

The Nature of Striking (== Rubbing = Friction) (*Ghattana*)

The **striking** between ;—the Sense-object of sight and **Lhc** Eye-transparent element, **S^anse** of sound and Ear transparent element, **^ense** of smell and Nose transparent element, Sense **uf** taste and **Tongue transarpni:** element. Sense of touch **and Body transparenL element—** means the taking of proper direction of the Sense-object (= *Visaya* } towards the Transparent element) = *Visayi* }. *Qo*, it is **lirpomint to note that Lhe phrase** " the Sense-object of touch **after sLrikmg** the Body transparent **ciem^nl**, also **strikes down to rlie** Basic elements **on winch the** Body **transparenL** **depciida** " —does **not** necessarily means the **acLual sLriking** of the Sense of **Luuch** by itself to **another** object in **lltim-ite truth-Sense**. **Similarly**, the **other** objects can not **perform** striking **proress**. Because, apart **Iroili** the **Senip nbjct of touch**, **Lherc** is **no** phenomena **whieli** have character of Sense of Touch | = *Photthabbu sublmua* } - **or** in other words ,**theiR phenomenn**. have Character of Sense of **Non-touch** (-*Aphotihcibha sabhava* } only .

Acruallv , **Lhc** respective Consciousness **anafis** due to taking of proper direction **between the Senac-obicet matter** (= *Ainminana*) which is " *Visaya* " and Transparent **maLter** (= *Pasada nlpa* } **wliich** is " *Visayi* ". **Tu this** peculiar cause of arising **ul** Consciousness (= *Vm^nr}.a*), the term " **SLriking** "- "**Rubbing** " - " the **naLurc o!" btrikinf** " — is **^iven** . **So** , to all these **materialities**, the Buddha uses the term " **Matcrialiities talcen up hy** Impingement " (- *Sapp atig* } *Vt n^pQ* } in his *' *Dhammu mingaiti-PaH-T^t* " (*Ahhi- i* -214.). lie:- **Lhc** Buddha teaches as " **Materiality** which is seen and taken up by Impinge men L " - *Sanidossann sappatigpu.i J-upu*

—and *' **Materialit;**' which is **not** seen but taken up by Impingement " ³ *Amduss^ita sappatiff^a nipa* } .

A@,ain, it is to be noted that phrases like " the Derived Corporeality **strikes** the Derived Corporeality " and " **the** Basic element strikes **the** Derived Corporeality " etc ere — are used for these **phenomena** although thes **tLave** no ability to strike each/others. These are the: metaphorical, expressions in the "Pali-text, known as " *Tadd}iafnumpacara* " { = Expression of a nature **whicri** **realy** does **norexi**^tl . . (Anuti-1-132.)

>

In case of the Body-dour (- *Kaya dfwra*}, it is mentioned **En Lht** commentary that. the **exTernal** Basic-element-sense of Touch (-*Bahiddha MahabhuiQ-phorrhahhommmana*); **sLriks** the Basic-elements on which the Body transparent element depend and **En Lhe** same unit s;roup with **ir;** only afLer striking with that internal Body transparent **element**. (**Abhi-tTha**-1 304.l. **Actually**, the striking process **between** the Basic **figment** on which the **Body transparent clement** depends and the **Body-transparent.L** element occur at the same time (- *Samciwkaki*}, That is , the sense of lunch (- *PhoUhabhan-ammina* | strikes the Body-transparent **element**, and the Basic -element on which the Body transparent clement: depends, at the same Lime, **Sr^**, in the **Commentary**, the **example of striking** a cotton-wool ball placed on an **anvil** with an iron hammer in **given** just to express the process occurring on boLh sites [**ic:-** the **anvil** and **The** cottonl. (- **Abhi-ttha**-1-304.). **Tt** does **not necessarily** mean that the striking process aL the cotton-wool ball and **The anvil** are **uceLiring oric** after another, (**M^ilati**-1-125,)

In conclusion, when the **B ay k;** -element- sense of touch **su-ikes** the pl79 Basic elements in the same unit group wiLh the Body-transparent element , it means that the Body-transparent element is already struck by it. This is the remark ^iven by aubcomirenT;iry teachers Lu ^unyidcr the striking process be-Lween the Transparent element and the Basic-element . (Anuti 1-133.)

All the above descriptions **are given** lo take up in the consideration of discernment of the **Five-door consciousness-Mental-i-ties** in terms of Character-Essence- **Perception-** and Proximate -caLitic ,

Uenerally, the CommRnTary teacher does **not mention** the Proximate cause (- *PadaStharva*) for some natumi phenomena in this Chapter on **Four** kinds of Charaeier { - *Lakkhanddi cal^ikka*}. And, aL tliat time, **so as to able** to consider **rationally**, some facts about the Present causative factors of various **Mentalities** | - *Manovimiuna dhamnia* } will be further mentioned,

pia
o

III*

The Present Causative Factor of the **Mind-coiiBciuousness** = Mentality

(*Mano vin.na.TiQ* | There are two causative **factors** , Present and Past for the **Resultant** Consciousness which **are known** as **Mind-consciousness** { - *Mano-wnona*}. In ease of **Wholesome; Unwholesome**

and Mere-Action (ie:- **Functional**) Conscious-**ncss**^ **there** is no Past **causative factor**. **There** is only **Present** cause for these Consci**ousness**. **En the Commentary**, all **abuuL Lhc** Present **causative factors** for **all** Mind-consciousness | - *MarLo-uiimuna*} in the " **Five-^i-oup** existence " (" *Panca vokcira bhai?ci* } is described as **follow** ,

,

y

1. **Non-dissolution** of the Subconsciousness (-*Bhavan.ga citta*) - Mind-door (= *Manodvarci*) ,
 2. **Striking of Mind-object-base** = Mind object element (- *Dhammarammana*) to the **Mind-door** (- *Manodvara*) ,

3. Existence of dependable Heart-base = *Hada^fa vatThu*) ,

4. **Arising of Mental advertence** (= *Manasikfii*)-.—

So, **there are (4)** kinds of causes for the development of Mind-Consciousness (- *Mano-mnnana*) with assorted **Mental concomitants**. In **this** case, ^M Mano - Mana " = " Mind " means Subconsciousness (- *Bhavana cilia*). or **Mind-door** [- *M^no-dirara*], The Subconsciousness **which** passes away beyond the **life span I ic;-** passes away beyond the **Arising, Standing and Passing away** phases I , is impossible to be **Proximity-condition** for the Mind door advertence Consciousness (-*Munodvaravajjana citfa*). So, also the Subconsciousness, arising in its natural Mind-continuum, **which** is feeble in **original nature**, is **not able to support For Lilt;** development of Mind-door advertence consciousness [= *Mano-dvaravu*] *ana* } **by Proximity condition** [= *Anaritaru paccaya ^atti*]. To such Sub-consciousness **which** is **not able** to support for the arising of Advertence-consciousness [= *Auojjana citta*] **by Proximity condition** (- *Ananiara paccuyu Gatti*) , the term " *SambhinnG* " [= Broken up Subconsciousness SUCKS) is given .

Ma nd a t h ama gatam nama kiriyn^rta^a paccayabhavain
(.inupagantva pl81 sayuJii.eua pavattammafn .
[Mulati-1-134.)

Somewhat like, Subconsciousness { = *Bhavaricfa citffi*) arising in Sub-consciousness **hrc-stream** during sleep , the Subconsciousness arising during waking **which** are not able to raise **Advertence consciousness** are known as "*ManduHiumcigata* " { - feeble consciousness } , **That's right**. Occurrence of many **Subconsciousness**, [= *Bhaviga citfa*] between one Cognitive Series - **ThoughL-** process - Process **of Consciousness** (- *Citta-vvthi*)--and another is **due to** inability of these Subconsciousness to raise **Advertence consciousness** . The **Subconsciousness** which has **ability** to raise up the **Advertence consciousness**, (= *Avajjana cilia*) by means of Proximity condition (- *AnantarG pofWifa*) is **known** as non-dissolved Subconsciousness (- *Asambhinn.a bhauanga dttm*) .

So, **Lhe striking of Mind-object-base** or element (- *Dhammarammema*) to the non-dissolved **Mind door** (ie;- *Asawbhimo mo^odvara*) is **also** one cause of Mind-consciousness (= *Mano- wnana*) .

Again , the groups of Mentalities - Mind consciousness arise only in the presence of **Dependable Heart-base**, (- *Iladaya ratlhu*) . **Without the Heart-base**, Mind-consciousness **can't** arise , **NoLc that ;** the **Heart-** base causative

, factor exists only in the " **Five - groups-Existence** " (= *Panca ^okara bhfvn*) .

. • Again ,the **Mind-door advertence consciousness** (- *Mo^odvorravajjana*)- also known as **Mere action** or **Functional Mind-consciousness** element is here mentioned as **Mental advertence = Mental aUction** (= *Mona^nra*) . Only when **this Mind-door advertence consciousness** [**ic:- Mental advertence** - *Manarkara*) arises in the Subconsciousness stream, **tl-ic** groups of **Mentality** | ie:- the Mind-consciousness and associated **Mental concomitants**) will arise . So , these are the (**4** | kinds of **causative factors** for the development of Mind-consciousness and associated Mental concomitants - (**Abhi** - ttha-1-322-323,))

p
i
s
o

All These causes **are possible** as the Proximate causes (- *Padaiihana* } for the Mind consciousness (- **Mentality groups**) in appropriate occasion , But, these **phenomena** are concerned with all the Mentality group | ie:- Mind-consciousness = *Mano uiimanu* and associated **Mental concnmi.tan.ts** | especially in Five-group Existence ("*Pufica vokwa bbava* } , and the **Proximate** caue of **soirie merits**] phenomena **is noL mentioned** in some Comanentaries .So,3l is lo be noted, that omission of Proximate cause in some Comirent;mps is not due Lo the absence of that nature .

10, Receiving Consciousness = *Sampaticchana Citta* (Resultant Mind Element - *Vipaka manodhatu*)

1. **Cakkhuvinnona^inanf anantaram mpadwijawiafak.khana martodhatu ,**

Mind-element (- *Manodha.tu*) ———

SahhdvasunrLatanissaliaU^siu iriunuyeva dhatu manodhatu.

(Abhi-ttriQ-1 304.) *Atfano ^abhauam dharetiti dhatu* —ie:- The ^{ri} Element " is The phenomenon which possesses its own original nature = which exists as its own natural phenomenon . So, The mining of " Element " is " the nature which really exists in Ultimate Truth sense, the nature which is free from " Personality ' (= *Atta* ^ and the nature which is not living being (- *Satta* } . The Five-door Advertence consciousness (^ *Pmcaduaravajjana* } and the Iwo Receiving consciousness 1 = *Sanipaticc-hana ciTfo dvfi*) are the phenomena which definitely exist in Ultimate Truth sense , These are free from " Personality " (= *Alia* } (ie;- these are not- self l. These are not living being (- *Satta* } . So, these (3) kinds of Consciousness fiet the name " Element " (^ *Dhatu* } . But, these (3) kinds of consciousness are merely aw^re of the respective Sense-object, and these are icss powerful in realisation of Senses in comparison with other kmda of Consciousness , These elements just take up the Senses, and get the name " Mind-element ° (= Mono *dhatu*) according to *Pah* phrase — " *Munoycuu dfiatu mwodbatu* . " .

Question:——In Commentary, it is stated that these[3)kinds of Consciousness (ie:- Five-door Advertence consciousness and two Receiving consciousness - " *Panca duaravajja'n.a, SampaticcJiana citta* } are known as Mind-element which Just merely realise the Rense object, bearing the nature of delmite existence m Uitimate Truth sense f = *Sabhai/a ^hamma* }, the nature of Non-sell (- *Su'triata dhamma* } and the nature of Non-living being (= *Nissalla d^n.iirima* } . IF so , the question is— Should other Consciousness , like Five Consciousness, Mind-consciousness (- *Panc-a v'rtrnina, Mano mnnana* } which also possess the nature of definite existence in Ultimate Truth sense , the nature uf Non-self , and the nature of Non-living being (- *Sabhaua dhamma, SunnuUi dhanma, Nissatta dhamma*) be appropriate to get the name as " Mind-elemtnl " ?

Answers— The ° Mind element " which isjusL ordinary nanic l = *Samarina iwna* } is not suitable to give for Five consciousness, Mi rid-consciousness, because these have more peculiar realization-funcLiun Lhail Lhc Mind-element ,

Broader Answer:— Depending on the respective Physical-Base = *VafThui* { eg:-Eyc consciousness depending on the Eve-Base (- *C-akkh^t uiiman-a. Cakkhu ifCltthu* } = Five consciousness depending on respective Physical-Base l = *Panca viwnrKi, ViHhu* }, and taldng up thi; respective Sense-nhject (ie: always perforin-ing The See ing-function lo Sencs-object of si^lit - *Rvparamma.na* } are Lhc peculiar features of Five-consciousness (= *Panaa mnnana* } which cire dillcrent from . the Mind-eleiiiK; iU ,

' 'J Five-consciousness (eg: Eye-consciousness) is preceded by Five-door

Advertence consciousness which has different dependable Base-matter (ie:- Heart-base = *Iludaya vatthu*). The Receiving consciousness | = *Sampaticc!sari(i cilia)* is preceded by Five consciousness **fe^:- Eye** consciousness } which has different dependable Base-matter Like Eye-base (= *CaWw votThu*}. Other various Mind-consciousness^ (- *Mario-iwinafia* } like Investigating consciousness [= *Suntirana -citta* IT is preceded by various consciousness (eg:- the Receiving consciousness ^{r2} *Sumpaticchana citta* } which has same dependable Heart-base , So, the Mind-P¹¹⁻² consciousness gets powerful Condition (= *POC.C.OIJO ^otfi* } like Proximity condition (- *Ananiara-puccayu* } from the proceeding consciousness which has similar dependable Heart-Base matter. That is why the various Mind-consciousness [eg:-ol83 Investigating consciousness etc; etc —) possess distinctive realisation function superior EC **thaL** of **Fivf** consciousness and the Receiving consciousness .

The arising of Five consciousness and the Receiving consciousness are beneliLed From Five-door Advertanee consciousness and Five consciousness respectively which has different dependable Base-matter, by means of various Condition- power (- *Paccaya satti*) like Pro^nmity cnndition(- ^*Anantara puccaya* } etc. But, in case ul" Mind-consciousness (e^:- Investigating consciousness); the beneficial effect is exerted by means of Proximity-condition only on thft Consciousness which has the same dependable Base-matter , fe^:- Heterrmning consciousness - *Votlhapanu citta* } . That is why, the various Mind consciousness like Investigating L'cn.sciousness etc, possess distinctive real isfl lion-power, superior to that offive-ducr Advertence consciousness and Five-consciousness .

In this easy. Mind-door (= *Mono- duara* } means the Subconscious-ness f = *Bhchwariga citta* } . At the begining of the process of Sense-perception (» *Vithi cilia* } eg:- Five-door-mind process (- *Pani'odvara virhi-aitta* } , the Five door Advertence r-'c ns icy uy ness arises first . yo,the Five door Advertence consciousness (= *PuncadvaruvUjjana citta* } is the first starting Consciousness from the " gate of the Mind-door " (- *Maiiodvara-'uggamQrtamukha* } . Unlike, the Advertence consciousness, the Mind-consciousness-elements (- *Mano mnrsona dhatu*), like the Envestigating conscieLianettS 1 - *Santirana citta* } are not the starring consciousness of the Mind-door. So, th^se have ability to realize the Sense-object superior to that of Five-door Advertence consciousness .

As already described above , yinec the Mind-consciousness-element is more distinctive, powerful and peculiar, in taking up the Sense- object —

Mano | = Mind | - Awareness , Realisation

Vmnana (= Consciousness j - More powerful awareness and realisation

By combination of these two words: ie:- Mind + Consciousness f = *Mono + umnana*), the lerm —

Mind consciousness element[- *Mavzo uiniiiana dh^s* } which means " the eleiiitnt v^hich ia vciy powerful in the realisation of Sense-object " is appropriate to be used for the Mind-consciousness element . So, the Mind-consciousness element has special, function to take-up the Sense-objects. This is how it differs from the Mind-clement , and the Five-consciousness-elements .

So, the element (= *Dfwtn* } which cnn merely take-up Lhc Sense and without any special power of awareness is known as Mind-(;lement (= *Mono-dhatit* } . So, the (3) kinds of Consciousness (ie:- Five-door Advertence consciousness and two Receiving consciousness - *Pancadvaravajjat^a citta*, *Sampaticchana citta d^e* }

are called as Mind-element only. These are not known as special mind (= *Mana*). So, in *Pali-phrase—Mano eva dhatu manodhatu*—the word " *eva* " means " *mere* " or = " just " (= *Malta*). The word " *mere* " is used to suppress the special, powerful awareness-function of the Consciousness. In other words, the specially power of awareness, possessed by Five-consciousness and other Mind-consciousness

(= *Panca vinnana*, *Mano-vinnana*) is lack in the Mind-element (= *Mano-dhatu*).

Again, the Five-door Advertence Consciousness (= *Pacadvavajjana citta*) is the Exit-mind from the Mind-door (ie:- the *Subconsciousness*) at the *begining* of the process of Sense-perception and the Receiving Consciousness

(= *Sampaticchana citta*) is the Entrance-mind to various *Mind-consciousness* (= *Mano vinnana*) like Investigating consciousness (= *Santirana citta*) etc, etc. So, since these (3) Mind-elements are the Entrance and Exit gate-consciousness, these are lack of special power of realization and awareness (= *Vijanana kicca*) of the Sense-object .

Since, these (3) Mind-elements are lack of *sepecial* power of awareness, these are not suitable to be designated with the word " Consciousness " (= *Vinnana*) to become Mind-consciousness (= *Mano vinnana*) or "Consciousness " (= *Vinnana*) like Eye-Consciousness (= *Cakkhu vinnana*). That is right. Although the Mind-element (ie:-Five-door Advertence *Consciousness=Pacadvavajjana*) arises, conditioned through the Subconsciousness (= *Bhavana citta = Mana*), it does not *neccessarily* support the Subconsciousness (= *Mana*), it has effect only on the Five-consciousness (= *Panca vinnana*). Again, the Receiving *Mind-element* (= *Sampaticchana citta*) although it has effect on the Investigating Mind (= *Santirana*), it is not conditioned by the previous mind (= *Mana*), but it is conditioned by the Five-consciousness (= *Panca-vinnana*).

In conclusion, the Five-door Advertence Consciousness (= *Panca dvavajjana citta*), has beneficial effect on the various Five-consciousness (= *Panca vinnana*) performing various function like *Seeing-Function* (= *Dassana kicca*) etc, etc; and the Receiving Consciousness (= *Sampaticchana citta*) is caused by the these Five-consciousness . So, among the Mind-elements the Five-door Advertence consciousness is the leading mind and the Receiving Consciousness in the follower-mind of these Five-consciousness . That is why, since these Mind-elements have no special realization power to the Sense-object (= *Visesa vijanana kicca*), these elements are designated simply as " *Mana*" (= Mind).
(Mulati-1-126.)

11. Investigating Consciousness (*Santirana citta*) Rootless Resultant Mind-Consciousness-Element (*Ahetuka Vipaka Manovinnana Dhatu*)

1. *Ahatukavipaka salarammana vijananalakkhana duvidhapi santiranadikicca manovinnana dhatu* ,
2. *Santiranadirassa* ,
3. *Tathabhava paccupatthana* ,
4. *Hadaya vatthu padatthana* . (*Abhi-ttha*-1-305. *Visudhi*-2-85.)

The Rootless Resultant Mind-consciousness-element which takes over the Investigating Function, consists of two kinds:---- the Pleasure associated

(= *Somanassa*) and Neutral feeling associated (= *Upekkha*) has the nature of:—

1. Realization = Taking up of (6) kinds of Sense-object Character,
2. Investigation of Sense-object (Function) Essence ,
3. Ability to investigate the Sense-object Perception ,
4. Dependable Heart-Base Matter Proximate cause .

The Buddha mentions the Rootless- Wholesome- Resultant Mind-Consciousness Element (= *Ahetuka kusala vipaka manovinnana dhatu*) into two kinds , ie :— Pleasure associated and Neutral Feeling in " *Dhamma sangani-Pali-Text* ". Based on this *PaH-Text*; in the Commentary where Character- Essence etc are described, that Consciousness is classified as two kinds (= ie:- *Duvidha*). In " *Abhidhammattha sangaha* " Scripture, these two kinds of Consciousness are named as " Rootless Wholesome Resultant Pleasure-associated Investigating " (= *Ahetuka kusala vipaka somanassa santirana*) and " Rootless Wholesome Resultant Neutral-Feeling-associated Investigating " (= *Ahetuka kusala vipaka upekkha santirana*) Consciousness. The above name is well known for all. So,for simplicity's sake only the name " Investigating consciousness " (= *Santirana citta*) is given above. Actually, it has more than one function ie:- Investigating Function (= *Santirana*) .

The Rootless Wholesome Resultant Pleasure-associated Mind-Consciousness- Element (= *Ahetuka kusala vipaka somanassa sahagata manovinnana dhatu*) = Pleasure-associated Investigating Consciousness certainly (= *Ekanta*) arises when taking up the Desirable Sense-object (= *Ittharammana*), it always associated with Mentally agreeable feeling (= *Somanassa vedana*); not only performing Investigating Function , but also the Registering Function after the Impulsion *Consciousness* in case of Five-door Thought-process (= *Panca dvaravithi*). So, it has two functions , performing at two places ie:- Investigating Department and Registering Department (= *Santirana thana , Tadarammana thana*).

The Rootless Wholesome Resultant Indifferent mental feeling associated *Mind-consciousness-Element* (= *Ahetuka kusala vipaka upekkhasahagata manovinnana dhatu*) = Neutral Feeling associated Investigating *consciousness*, arises when taking up Median-desirable Sense-object [= *Ittha majjhata rammana*], it is associated with Indifferent mental feeling (= *Upekkha vedana*), performing (5) kinds of function known as Investigating, Registering, Rebirth, Subconscious-ness and Dying . So, this consciousness arises to perform it's respective function at appropriate places known as Investigating, Registering, Rebirth, Subconscious-ness and Dying departments (= *Thana*).

There is another kind , known as the Rootless Unwholesome Resultant Mind-Consciousness-Element (= *Ahetuka akusala vipaka manovinnana dhatu*). In the " *Sangaha* " scripture , this Consciousness is named as Unwholesome Resultant Neutral Feeling associated Investigating Consciousness (= *Akusala vipaka Upekkha santirana citta*). This Consciousness performs Rebirth Function,

Subconsciousness Function and Dying Function in the 4 Lower Worlds

(= *Apaya*). In case of Present existence (= *Pavatti*),in (11) Sensuous Worlds, it performs Investigating Function and Registering Function appropriately .

In discerning the Character-- the Essence of the above Wholesome and Unwholesome Resultant Neutral feeling associated Investigating Consciousness, in performing the Rebirth and Subconsciousness Function, refer to the method, applied for the Rebirth and **Subconsciousness-consciousness**. In this part, the discerning of the Character and Essence of these (3) kinds of Investigating Consciousness when performing the Investigating and Registering Function will be mentioned . First, discernment of the Character and Essence at the time of •performing Investigating Function will be mentioned again . In Commentary, all the Investigating consciousness , similar in nature, and taking up (6) kinds of Sense-object are collectively described . In practice , the Wholesome Resultant Investigating Consciousness takes up the Desirable Sense-object, and the Unwholesome Resultant Investigating consciousness takes up the Non-desirable Sense-object . It is to be noted , that single Investigating Consciousness can not take up both kinds of Desirable and Non-desirable various (6) kinds of Sense-object in one particular Mind-moment (= *Cittakkhana*) simultaneously. So, discernment should be carried out **seperately** for a single Sense-object. The method of discernment will be described , taking the Sense-object of Sight

(= *Ruparammana*) as an example .

Ahetukavipaka santirana kicca Manovinnana dhatu -----

1. *Ruparammana uijanana lakkhana* ,
2. *Santiranarasa* ,
3. *Tatha bhava paccupatthana* ,
4. *Hadaya vatthu padatthana* . It means that:-----

The **Mind-consciousness Element** which is performing the Rootless Resultant Investigating Function has following nature :—

1. Taking up and realization of the Sense-object of Sight Character ,
2. Investigation of Sense-object of Sight (Function) **Essense** ,
3. Ability to investigate the Sense-object of sight Perception ,
4. The Heart-base matter on which it depends Proximate cause .

Similar method of discernment is applied for other Investigating Consciousness which take up the Sense-object of Sound, Smell **etc** , etc . These (3) kinds of Investigating Consciousness, when performing the Investigating Function (= *Santirana kicca*), take up the appropriate Sense among the (5) kinds of Sense-object from Sense of sight to Sense of Touch. When performing the Registering Function (= *Tadarammana kicca*), it takes up appropriate Sense-object among the (6) kinds of senses . If the Investigating Consciousness is associated with Mentally agreeable Feeling (= *Somanassa vedana*), it is connected with " Rapture " (= *Piti*) and there will be (12) kinds of Consciousness and Mental concomitants (= *Cetasika*) (ie:- One Investigating Consciousness and eleven Mental Concomitants) . **If**

it is associated with Indifferent meili feeling, it is not connected with " Rapture " = *Piti* ; there will be eleven kinds of Consciousness and Mental Concomitants (= *Cfffi^kn*) i.e.: One Investigating Consciousness (dilett Mental Concomitants). From above group of MenLaliLy , select the Consciousness and discern the Character— Essence etc. The discernment of the ChdracLer-Essence at the time of performing the Registering Function will be described later in the part of Kepis' tering Function . Now , the Character- Essence of the Determining Consciousness (- *Votthapana cilia*) which sequentially follows, the Investigating Consciousness in the Thought: process (- *ViLht*) will be described first -

12. Determining Consciousness (*Votthapana Citta*) (- Mind-Consciousness-Element Associated with Mere-Action) (= *Sadharana kiriya MaMvinnana. Dhatu*)

{ Mahali-2-129-130.)

Thqt Consciousness is said to have **DeLermining** Function-Essence, **since it has ability** to Determine the **Senae-objecL** (**whether it is Desirable or Non-desirable**) already taken up by **Llic InvetiLigaung Consicousness**. **It is a natural process** in which **there is nifrc** striking between **the Five-senses** (like **Sense of Sight**) and the group of **Fiv^-door** Thought- **process MenraEities** (like **Eye-door** Thought-process) .**There w riL**) defmitc realization of **tbe ^ense-object**. There **is** no perfecL **Iceling** <JIL **the Sense- objects** (like **Mind-door** Thought -process). S(J, Lhc

Determining **Consciousness** included in **The Five-door Thought-process** can not definitely determine **The Sense-objecT as Desirable** or Non-desirable . Like **Eye -con sci HUSHES** which can just **Take up the vague image** , the **Determining** consciousness can **mke up vague iinagt^l** only. So, since **rhe DeTermining Ccon scions ess** can not **surely deTermine** the **Desirable or Non- desirable nature of The fiense-object** ,, The **Rnhcommenrary Teacher** **explains** that " It can **just determine the Sense-nhjecT** whether desirable or not which is already **examined by the Investigation consciousness** : ——— ° *Vavaftbafwili ifiyn pi^vnir^nitri^* " . **Ruf**; it is important To note, **Thrill** an these facts should he .**iccepted** by **Inrelligent Noble persons** only **after wise consideration** and **judgement** -

Next Question

In this case, some **nobEe** persons put on **anoTher** question. **The Determining Consicousness** is composed of (12 | **kinds of Mind and Mental conco mi tents including** ' < Energy ' (- *Viliya cctasika*}. If so, which one (**ie:- the DeLermining Consciousness or associated concomitant ^ Determination** " - *Aciliiniokkha cclcmiki.i*) **decides the nature of the Sense-objects into desirable or no n-desirable** .

Catubhurfiakuciltuithi no vijanana lukkhunam nama nallhi. Sabbam ifijanana takkhunumeru .

{ Abhi-LLhti-1-155.) **PI 87** There is no **Conyicousnca^ whi^h ducy not possess** the **Chy.riicLer** (?r awareness or **Sense-object** [- *Vijananaldkkha.na*) in (4) **classes oF ExisLence like acnsuous sphere , Fine maLenal sphere, Imm^Leria] **yphtrre and Suprainundane** . All kinds of **Cunseiouyneas** possess the **Character ur Aware rn**; as **urSense-DbjccLa** [= *Vijananaktktana*]. (Abhi-LLha-1-155.)**

The **Determining consciousness** has **Lhe CharacLer ul LAkmg up - Lir Realization of yense-object only-** The Mental **eoneuiiilani** ^{tl} **DetermiJiaLiun** ° (- *Adhunokkha cetasika* } which **occurs in association with** (**tie DeLei-mining Consciousness** has **Character of Decision** { = *SwiniUhunu lukkhaii.a* } or the **Sense-o bicct**.

As. already **described in above Great Subcommmentaiy**, the **Determining Consciousness** actually does not **decide the Desirable or .Non-desirable nature of Sense-object** already taken, **up by the Investigating Consciousness** . **it just determine the va^ie nature of Sense-object** . **It merely takes up - realises the**

Sense-object . Only the **Determining concomitant** (- *Adhiniokkha cetasika*) **decides** the nature of Sense-object. But^ the Determining Concomitant **does not arise without Determining**, Consciousness. All the various kinds of **Consciousness** perform **the essential** role——**Deciding** Function (- *Pubbhottaravajrasa*) in taking up of Sense-objects by associated Mental Concomitants . So, in This case the awareness of **Desirable** or **Non-desirable** Sense object by the Determining **Consciousness** is also the **essential** leading factor for the Mental consciousness in **Liking** of **Desirable or Non-desirable** Senses, That is why , it is **stated**, in the way of Connected Conduct "(- *So.haccarana nosso*) " that the Determining **Consciousness** **decides** the Sense-object whether it is **Desirable** or **Non-desirable**

• -Actually, the **decision** on

the Sense-object is performed by the **Determining Concomitant** (- *Adhimokkha-cetasika*) which has **Character** **Decision** (- *Sannitthana*), The **Determining** Consciousness is leading the function of the **Determining** Concomitant , That is why it is **stated** , that the **Determining** consciousness decides the **Sense-object** ,

But, as already described by the **Great** Subcommentary teacher, **actually**; both kinds of Determining consciousness and Determining concomitant can not **definitely** decide whether the sense is **Durable** or not. It is just a **simple decision** only. The definite deciding factor is the **Determining** Concomitant included in the groups of Mental-activity forming the Mind-door Impulsion Thought-process (- *Mcittiqdvartakajcu'ailu mihi*), which is like **Lip** **Like** respectively (6) kinds of Sense-object ,

Method of Meditation :——There are (12) kinds of Mental-activity in the **Determining** process, (- *Vultho*). Select the **Determining** **Concomitant** among **Like** , and discern the Character—— **Kasine** —etc , etc -

What Does the Wholesome Deed Mean ?

The nali-irc which can delete the guilty UnmeritorioLly (- Akn&ala dhamma) is known as Wholesome deed, (It refers to The Wholesome ConsicouHnesa and all it's associated Mental concomiTnnts.) These Wholesome Mentalities can abandon and delete momeiltarily [- Tadanga pahanu} Lhe guilty and inferior Unwholesome actions by mean-; of Momentary abandoning | = Tadanga pafimnu } ; or elimination by discarding (= Vikkhambhanu pahana) 01- relinquishing by extirpation (- Sanw^a pohana}. So ,due Lo ability to give Lip the Umnrciluiius phenomena by (3) ways of abandoning (= Puhana }. these groi-ips of MenLal-ies are known as Wboleson-iR deeds . (Abhi-LLha-1-ai.)

Next explanation'— —Unwholesome phenomena exist in the life curiliimum of living bciiLg;-; as loathsome or detestable nature . So, these Eire known as " Kusa ^p -Evil - Sin. Some gi^ups of Mental phenomena dpstory the Unwholesome phenomena which arc known as " Ki/^i ", exist in the life conlinumn oJ" liviri^ beings aa loathaonic or detestable nanire . fto, there MentaEitiea Lire Imown as " Kusafa " | = Meritorious deeds]. The Unwholesome phenomen-a are asaucial^cl wil-li loathsome , Hatred , Delusion , Conctfir | ^ Roga, Dosa. MoS-iti, Muna} CLC, and these are the causes of Various sufferings like ,Existence in Lhe IUWLT Works(^Apaya} Round of Existences 01- Rehinths (- Samsara vaiia}. So, theye ai<; the Loatl-isome phe^iomena. These loathsome Unwholesome deeds are cuL oil" by riK.an.s of Mo-menrary abandoing , Discarding and Extirpation (~ Tadunyu puhana , Vikkhniribbana pahana . Samuccheda pahana } m apprupriaLc instances. The Gi-pat WhnlesomF deed (= Maha knsula cilia} whk;h is led by Insight knowledge, The Wholesome deed ol' Developed

Lxial^{iici-} [- *Mahaggata kusaia dfta* } and the Wholesome deed of SupramLiiLdanc, (- *Lokuttara magga kusola citta*) cut off the loathsome **UnmeritorioLii** deeds by (3) **kindti** of abandoning like **Momentary, Discarding** and Extirpation respectively , (Abhi-ttha-1-yi.)

Alrematively, the **nsight** knowledge **whic^I** lessens the loathsome Unwholesome phenomena by **means** of MomcriL^y **etbancloiiing**, Discardm[^] or the **Insight knowledge** which LuLally abolishc-s, the Un-wholesome phenoniena by **Extirpation** iire known as " **Kusa** ", The In.sii;ht knowledge which is associated **with** the GreaL Whok-s^{m^} **deed** of con.templation (- *Vipa^{aiin} innfiakusala cilia* } leaaen[^] Lhe ioalhtiomc Unwholesome deeds momentarily . The Insight knowledge which **ia** asaoeiaLCLL with the Wholesome **deeds of the** Fine M^{aterial}-Sphere-AbaurpLiun (- *Rupavacara jhana kf^{sala dTTa} }* and **rhfi** Wholesome **deeds** of the ImmaLeriaL-Spli^{ie}-Absorption (= *Afitpavaara J^{ana kn^{cila citta}}*) can **CLIL** off the loiithscme Unwholesome deeds for somelm-ies by **means** of discarding (= *Vikkhambhanu pa^{na}* }, The Insp.ht-ki-LOWled^e or rhe **Consciousness** of Path of llolinea[^] (- *Ar^{amagga unario} }* associated with the Wholesome **deed** of SLLpramimd-an-c [- *Lokuttara magga kfi^{nfo citta}* } can totally abolish Lhe Loath' some **Un-wholsome**

debris by **Extirpation** (= *Sumuccheda pahana* 1. So, these **various kinds** ur Insight knowledge **are** known as " **JCnaa** ". These Insight knowledge; known **fis** " **Kusa** " ought t'o be attained or desimbie Lo **arise**. ^{^o}, these Mentalities **are** **Meritorious deeds** [= *Kusah* }. In this case, " **desirable to arise** " means, the **effect** of Insight-knowledge on the Wholesome deedti associated with **Wisdom** (- *Nnana - sairtpf]/siT!n lai^{ala dhammu} }*, by way of **Co-naseence-Condition** (- *Sahajuta-paccaya ^{ofti}* } ^nd on Lhe Wholesocmc **dr-cds** not as^{nciated} with **Wisdom** (= *Nnfiana vippayuuta kimaii.i dfiamma* } by way of Original **Support-Condition** [• = *Pak/s^{pa nissaya-paccuyu}* }. (Abhi-ttha-1-81,)

Next explanation:—If, someone grasps the long and sharp hiaded graay wi.th the hand?., his or her palm wdl be cut by the sharp blade of 1-hc grass —and somewhat like that, these WhoLcyomc deeds cut the varioiJis classes oF ddik-mciits (= *KHe^a* } which have already **uccured or not> The^e Wholesome deeda **behave P^{^^}** like sharp hiaded grass, HO known as " *Kzzsala* " (= *Meritorious deeds*) ,**

2. *Uppflnnaiiam papakimwi akusalanam dhaTiin^{^nnm} pahanaya chund^m janeti vayamaii viriyuifl afdubhati ciltonf fWfgn-flhfi[^] padahati. { Ma-l-89> }*

1. To proven L **occurence** of loathsome Unwholesome deeds which **are not yet done**, try Lu keep ^{ood} wiU f - *Cha^a* (, have **endeavour**, be **energetic**(- *Viriya*), upgrade Lhc Mind, and have diligence .

2. To abandon the Loathsome Unwholesome **deeds** which arc already **done**. Try to

keep good will (- *Chanda* }, have endeavour, be energetic [= *Viriya* }, upgrade the Mind and have diligence . 1 Ma-1-89.)

Amon[^] lie f 4) kinds of Right R[^]ertion f - *Sammappadhana* } take care of these (2) kinds of Right Exertion . Between these Right Exertions, the Energy of EribrL (- *Viriya* } which reaches the stage of the Path of Right Effort (- *Sammu-vuifUina-fiiaggci* } can abandon the Unwholesome deeds which are already done , and prevent The Unwholesome deeds which are not done as ypt. Somewhat like that , the Wholesome deeds can cut off all various, states of De-filement [- *Kilesa* } , which has already arisen and which [^]LiU does not arise -

(Abhi-ttha-]-81.) p190

Further Explanations

**Apica arocyatflTena, anavajjuU}icfLu , kosallasambhutatthasna
ca knsulaift .**

[Abhi-Ltha-l-IU5.)

Arogyattha ——— Aeeorelini; to " A *roga.^tt hhavo arogyarn*" — a licalthy state' free from disease is known as " *Airnfyt[^]* ". In this case Lhe di-sease or illness¹, means (1) *Aturalu* = Ache and pain ; like stiffness, LooLbaclic, earache, h[^]cknche etc,etc (2) *C^ktnfia* = Vanoufi ailments with fever; like malaria, plague and other febrile illness. (3) *Uffadhi* ~ having various sores and ulcers. So, the disease or illness consists of 3 kinds. That is why in Lhe Ft[^]-phrase

—^{ft} *Anaturalaya, agelartnena, iibifdhstas/a* " = -^{lt} Free from disease " { = *Aro'Jyfi* } means free from above all (3] kinds of illness ie;- Lack of ache and pain» lack of febrile illness, lack of sores and ulcers .

^v *Kacci tin bhoto kusalam* " { *Khu-5-327. Khu-6-77. l = 0* monk .., have you good state of health ? f =- Are you In [^]ood health?)" — in this *Pafi*-phrase mentioned In *Mahahamsa jaiaka --Pafi* text, the Buddha f.iv[^] the meaning of Lhe Aurd " *Kusata* " as free from above (3) kinds of illness like ; ache. and pain; fever, and vaiiuLia across of the physical body (=• *Rupmkaya*). Similarly, in Mentality, like Iruni (3 j kinds of illness (= Defilements = *Kifesa* } Like Defilement of ache and pain. Defilement of fever- and Defilement of sores Is mentioned as¹ *Kusuki*". {• In Lhis case various Defilements = *Ktiesa* are expressed as dis-easey.). Su ,Wh(Jkaumc de[^]d [- *Kusala*) means the phenomenon which is free From Lhe DefilementⁿLa (- *Ks^l^a*}. (Abhi-ttha-1-105.1

Anavajjattha { = Noii-gLiilLy phenomena) —Th<- ' Wholesome phenomena are free from defilement[^] lai-'tor like misdeed, hatred, mental impurity, and anxiety . So, these are Lhe non-guiltLy phenomena^Liia , For this non-@,uilLy nature these phenomena are known as MerikJriuLia ur Wholesome deeds (- *Kusa!a* } .

Kosallattha ——" *Kusala* " - the word "Wholesome" has following meanings:—

1. **Arogya** = healthiness, lack of disease
2. **Anavajja** = free from guilt,
3. **SukS-savipakfi** = giving good and pleasant effect,
4. **Chefca** - Clevc-rnesa

Kusala ^{Li} **bliiuo kv^uUufn** ——— in this, **Pafi** -phrase, the word " Wholesome " - " **Ko^{al}Ui** " is Lit>cd lbr the state of healthiness | - **Arogi.fG** }, **non-guiltiness** (- **Anavajja** } and giving pleasant, effect (- **Gukhaupaka** }, By the **wDrd** ^{ic} **Cbeka** " = Ck-vernaa, iL **.llao** give[^] **nieanin[^]**, of Wisdom - Knowledge - Intelligence: . So, in the- CummenLary iL is sLatcd as " **Kosaftam i'uccati Panna** " { ~ **Wisdom** is clove me as). [**Abhi-ttha-1-105** -]

The **Nature** which has ability to make a person intelligent is known as " **Kosalla** " (= **WiBdom**), All **Lhe** Wholesome Mentalities are produced by the **WiB-dum** which i[^] knoⁿ as. " **Kosalla** ". Due to the meaning ' properly produced by the **WiadDm** or **liiLelligence** " these groups of Mental phenomena are known as " **Kuauiu** " { = Wholesome = Meritorious Deed?), (**Abhi ttha-1-105**.)

Ekadesiipacara-- f = Metaphorical expi-e[^]tion of phenomena which are partially related In function (———The Term " **K'o.^a!!a** " which is used for all kinds of Wholesome deeds is also used for the Wisdom which is partit.i.lly included in **Lhe Whoktiome phenomena** . This kinds of expression of phenomena which are parLiall[^] related in function is known as " **Ekfi^{^^^}ipGcara** " in **Pali** -text .

It is agreeable to [^]ive the **tftrm** " **Kusala** " (- **Wholesome d[^]cd**) for the Meritorious action **a- isoomted** with Wisdom (= **Nn.afici-Gampa'yulla** } wlin-'h Is properly **produred** hy that Wisdom, known d.s " **Ku[^]alla** ". BLLL, wliat about the Wisdom **no-n** nssociaTed Wholesome deed (- **Nnwia vippatfutia**. }, which is also n[^]med as **Whuleaume dee[^]**. That is a question, f This question **Em[^]es** , **beeaLise** the **Wisdiom-**

191 non associated Wholesome deed is lack of Wisdom and not properly produced by Wisdom,).

Example:—The name " **Tata-ranta** " { = **Palm- frond -fan**) **IK** given to the **hand-fan** made from the **Palmyra** palm (= **Toddy-palrri** } **fronri**. The other hand-fan made from **bamboo strips** whcih looks like the palm-fan is al'so given the name " **Taiu-uanlu** " { = **Palm-Frond-fan** }. aomewhat like that, the Wisdom non-associated **Wholesume** deeds (- **Niicinanippayiutta kusala dhamma** } are also given the term. " **Wholesome** " (= **Ku[^]da** } . [**Abhi-tthal-105**,)

ni92

Definite Note to be Kept in Mind

Not usin[^] indirect reference (- **Pnnnyoyo**), **defmiEely** the Wisdom-connected Who Ie some deed (- **fVnona [^]ainpayvf.ta kn[^]ala** } hys following Facts,;

1. **Arogyalt[^]iu** - free from iitnesa ,
2. **AnuuuJJi-tStha** = free from fiuilt ,
3. **Ko&ali-cf sambhidotfho** = **Pr[^]dnc[^]d** hy the **Wisdom**, known as *' **Kosalfa** ^f Due to these { 3 }

fact[^] ; it is known as Wholesome deed (= *Kusaia* } . In ease of Wisdom non- *ns'sor.mtcd* Wholesome deed {=- *Nnana vippayiitta kusala*}:— It has only (2 } facts:—1- *Arog[^]cif[^]ha* - free from illness , 2, *Anat/ciffattS[^]ii[^]* = free from guilt ,

So, due to only these { 2) facts, it gets the name " Wholesome deed " (- *Kusata* } .

lAbhi-ttha-l-105,f

Anavaijasukhauipaka lakkhana (= Character of Guiltlessness and Giving Good Effect)

In *CommentaTy*, the *Character-Eyaenec* etc of the Wholesome deed is mentioneri in l 2) w[^]ys. In the first way, the Lwo w[^]rds known as " Guiltlessness " | - *Anvaja* \ and " Good Effect " (- *Sulchavipaka*) arc mentioned in relation with Character ofthp Wholesome deed .

• These Wholesome deeds have the nature of Guiltlessness^P (= *Anavajja* }, sinfe the[^]e arc free from blameworLhy[^] 3n . In (Jther words these are free from dishonourable riiiTi.ire and various delilemenis (- *KiSesa* }.

By using the term " *Anavajja* ", liic naLLire or blamcless[^]iess is indicated - But, it is to be noted that the term " GuilLleysn.css " is used not simply for blame lessnes;[^] There are many phenom[^]iid. like Resultant Indetermin[^]re Nature;

Functional (or Mere-acrion) -1 ndcLcn innate Nature ;(- *Vipa[^]a-ahyakata cfhomrna*, *ksriya obyakata d!'samma* } v\hie[^] arc ai&o free from various defilements | = *Kilesa* }, apart from the Wholesome deed , So, by usin[^] the word " *Anavajja* " only, for the " *Ar[^]ovaljo lakkhana* " { - *CharaeLer* of duiltlessness) of the Wholesome deed , there i[^]; a doubt for MeriLorioLi[^] nalzirc of the Indeterminate conscicousness (- *Abynkata Citta* } which are also guiltless (- *Anauajja* }. That is, there is doubt whether rhe IndeterminaLe Cunseiouaness arc Wholesome or Unwholesome For this reason, the CommciiLary Leaehcr add another word " *Sufchctvipetka* " (= Giving good effect] for the Wholesome deed so as to differentiate the nature of iL froiri Lhat of Indeterminate Phenomena (- *Ab[^]akutu -dhomma* } . {Mulati-1 -31,)

Next:— In " *BaWka S[^]Tta* " of " *Ma[^]hiiftv puimasa* " Pn[^] text f Ma-2-318>), the Venerable Monk *Arsnn[^]a* mentions the Bodily good conduct, Verbally [^]ood conduct and Mentally good conduct (= *Kaya[^]aJnacara*, *vacisamac.mn*, *Mnnn sama cura* } of Lhe Buddha as - *Anavajja* ". The " *Anarajja* " mentioned in that

discourse ia not opposite of •[^] A/wj;n ". The noble Menially good conduct known aa ^{ct} *AfiyG phala* " { ~ Noble Supra m-un dan e Fruition) among lh<-[^] MenLal.Lv good conducts (= - *Manosanwcara*) which is attained by extirpation with Noble

supramundane PaLh (- Am/a *maggā* } - Effect of Kxtirpation alL[^]r Complete seeing by Knowledge (- *Patipas[^]ac.Jd[^]ii pn[^]na satti* } ———and other {3} guiltless ordinary good eonducL (- *Samaca[^]-a[^]amn[^]a* } are [^]iven the UTm " *Anavajja* ". In this section ic'-abyuL (he Unwholesome deed (- *Akusda*), the term " *Anuvajja* " is not similar to thai merLuoned in the " *Bn[^]hnkn* discourse ". On the conLrary,

" A " f = Na } of lhc " *AkLisala* " ([^] Unwholesome) de[^]iotcs the oppoaik- naLLire (= *Patipakkha* } ,

Simil^{riy}, ¹ Na " of the " A-n^{vqija} " indicates the **uppositi**; **ridlLire** of guilt { - At?aija puupakklsn } = **Guiltlessnftas** whifh is opposite to CrUiLL , **Sinct'**, all the opposite **nature** (- *Pahpukkha* } of Guilty phenoi- iiena f - *Arajja dhamma* } are known as Non.(;uiity **ph^{num}(?nd** (- *Anavajjo*), thfi word " *Anaua'!Ja* " (- Non^{JilTy}) is used for Wholesome de-eds which **has** The **nature** of cutting off, natui-fi of ah]1]Ty to cut off aii sorts ol upprⁱⁿ? **phenomena** (- *Patipakkhn*). Hence, the ahiliry of Wholesome deeds **k**) diacard Lhe " *Avajja* " - " *Aks^aSa* "

(- **Guilty nature** = Unwholesome deeds) is already **described** . | **Mulati-1-31.** [

Again, by usms the word " *Anavujja* " (- No ng Hilly/Opposite nat-ure), the character of rhe Wholesome deeds are sUiUxi aa (he phenomena which oan **cut off** the Unwholesome **deeds** . So. the sepeaLf L- haracLer of Wholesome **deed**, which is not related to the Unwholesome **deeds** and rndcLermiia.te phenomena

j ~ *Akusala dhomina[^] Abij^k.cit.a dhammo.* } is alrcadv given. If so ; Why is " *Sukhavipaka Lakkhana* [- Character of Giving good Effect) " of the Wholesome **deed is further described ? The Character of " Ability Lo give effect " - " E I II'e livenea a " - *Savipaka I.akkbaⁿ*, although it is not prcsncl in Lhc **Indelermi-pl⁹³ naLc plienomena** , it is related to both **kinds** of Wholesome and Unwholesome **phenomena** . In this case, the Character of **giving** ^{ood} effect (= *Sukhavipaka LakkhaiKi*) of the Wholesome **deed** is **different from** the Character of giving **ill eirecL** of Ihe Unwholesome **deed** . To inentjon that special **character**, Lhe word**

¹ *Sukhavipaka* " |=good effect | is added for the Wholesome deed , (MulaLi-1-31.)

The desirable (- *Itffin* } good **effect** of the Wholesome deeLLd tire obvious - **So, Lhe** Wholesome **deeds** are known as **phenomena** having ^{ood} **desirable effect** (- *5-akhavipaka* } . " Abie to give effect " =• " **Able to anse effect** " is the **ordinarv** plieuuiiK-Tia [- *Samumia sabhava* } which **is related** to both **Wholesome'** and Unwholesome **dc^{ads} . DirecLly**, Lhe word [^] *Sukhaupak.fi* " means " **Able to give good durable** (= *Illhu*) **effecL**. AcLuijUy, **t.hilt** word is used not only for —

" **Ability to give good desirable effect** " --hut it also **indicates** the nature of **having** " **Power of Action** " (- = *Kominfi[^]ni* } which can produce ?;ood desirable **effect**. In conclusion, it is to be noted, by usin[^] the word " *S-sikha-uipoka* ". it indicates that the Wholesome **deeds**, even **at**. the time of their arising have " **Power nf Action** " (- *Ka7itina[^]aUi* } which can give **rise** to later effect. (Although the Wholesome **deeds** expire **afler corn pie** Lion of **Lneir lite-ypdn** ie:—Arising **phase--Standing phase**" Pass infi phase

- *Uppada-Tftifi-Bh anga* \ their power of Action = *Kamrria[^]fifr* , persists generally in the Mmd and Body Continuum - *Kupa nama santana*, until their effects are taken place **aL** some time later) . |Mulati-1-31.)

So, the Wholesome deed? are **guiltless**, and these have good **effect ie:-can** give rise to ^{ood} **effect** - **Due to rhese twn- Characters, the Wholesome deeds are known as Guiltless and Good effect giving phenomena** (= *AnacaJfa sukharifwka dhamma*}. Th[^]t is , the **Wholesome deeds** have Character of **Guiltlessness** and **Giving** ^{ood} **Kffect** .

Between the two words ie:-Guiltlessness and Giving good effect, (= " Ar>avajja " , " *Ss/k-.hompaka* " | the " Guiltlessness " means ability to p,lvc pleasant **effec^r Il-ie** Tilne when rhe Wholesome deeds are arising (= **Present good P¹⁹³ effect - *PavaWstikha* } . By rhe word " Giving good effect [= *Sukha-mpaka* } it means that whⁿ the Wholesome deed gives effect, it. gives good **desh'ablel = *Ittha*** } effect = **Pleasant****

effect (- *Vipaka sukha*).

That is right. The word " *Anavajja* " { = Guiltlessness } indicate the innocent or guiltless nature of the Wholesome deed. by itself at the time of it's arising - Character of the Wholesome deed at the time of arising. The word " *Svksi.aupaka* " (- Giving good effect) indicates the nature of giving good desirable effect in Later period after arising of the Wholesome deed (= *Kusaia cic^sppada*) = Character of Wholesome deed having Power of Action (- *Kmnmma saiti*). (Mulati 1-31.)

Again, by the word " *Anavajja* " (= Guiltlessness), it means that the wholesome deeds are innocent in it's own original nature (= *Atta suddhi* | = free from various dirty defilements [= *Kilesa*). And, by the word " *Sukhavipaka* " (= Pleasant effect), it indicates that the wholesome deeds have clean and pleasant effect.

Again, by the word " *Ariavajja* " [- Guiltlessness], the Unwholesome nature is exposed in the Wholesome deed . | When the Wholesome deeds are arising with "Anym", a landing and "Passing Phase" (= *Uppada. Thili, Bhanga*), the occurrence of the Wholesome Consistency (- *K^saSa ciltupada*) is associated P194 with various Mental concomitants coming (34 s^3 32 j etc . and these Mental

concomitants are free from ^i-ilty, loathsome defilements (= *Kil^u*] like "Greed" (= *Ruyu*) etc. - Ho, the Unwholesome nature is lessened in the Wholesome deeds even at the time of their occurrence .

Next, by the word " *Sukh^aupaka* " [= Pleasant effect], it means that Wholesome deed can give good desirable effect (= *fittha vipaka*) and in this respect it differs from the Indecent nature (= *Avyakata dhammu*) which has no such effect . f Multit-1 32. }

Again—by the word " *Anavajja* " (- Guiltlessness), it shows the opposite nature of the Wholesome deeds to the guilty defilements (= *Kilesa*) and in Functional essence of - *Kicca Rasa* it has the deviating effect on the Un-wholesome deeds. By the second word " *Sukhaupaku* " { = Pleasant effort). it shows the accomplishment with good effect as " Associated Essence " (- *Sampa-ttirasa*).
• ' (Mulati-1-32.)

Next, —by the word " *Anuvajju* " { = Guiltlessness }, it indicates the Impression (= *Uponhanakara*) and Perception (- *PQ^fpnttha^a* | to the Wholesome deed in the Insight knowledge of a meditator as clean and pure nature which is free

from the defilements of - *Vodaw dhamma* }. That is the Perceptible Impression (- *Upatthanakara pttcupatthanci*) of the Wholesome deed in defilements free pure phenomenon . (- *Vodano dhammG*). By the next word " *Sukhavipaka* " { - Pleasant effect], it denotes the Perception [= *Pawipatthana* | to the Wholesome deed as having effect (= *Phata*) = or Perceptible Effectiveness (- *Phalapacc-upatthana*) of the Wholesome deeds. [Mulati-1-32-1 is having good desirable effect (= *fitThampaka*).

Further more = —By The word " *Amsvajja* " it indicates the prominent cause (= *Pacc^lthann*) of the Wholesome deeds is ° the Wise attention (= *YorLisomana*

-':ikara}. By Wise attention which takes up the Sense-object with **preper** and right view, the Wholesome **deeds** becomes Defilement free phenomena . By **Lhe** next word "*S[^]ikbn[^]pokn*" (- Pleasant effect) it **indicates** that Wholesome **deeds** (= *Kff[^]a![^] dhnmmns* \ are **rhe** Proximate Cause (= *Padatthana*) of Whole so me-Resn Iran f-phenomena (= '*Kusala uTpaka dSiam.m.a* } . That is right. These Wholesome deeds **are** The **Cfli-ises** of Pleasant, good Resultant **phenomena**. (MuliALi-i-3[^],,}. So, **hy** usin[^] Two words -ie'^c Guilrlessness ", and " PTeDsant effect " (=Anava-jjit, *Ssikh[^]iaipnka* } the natural Character of the **Wholesome deed** is **explained** by **rhe** Commentary teacher .

In two ways of explanation of Character—Essence **eLc:"** of the **Wholesome deed** in the Commentary Lhe Character En **u'n-** second, way **indicates** "*Anavajja lakkhana*" { = GLLLILkssiii-'ss (**uii-ly**. For ^{lt} *Sukhai[^]ipaka* " [= Pleasant effect) EL is **described** as " Perc[^]pLbl[^] ELTccUvcnss " [= *Phalo. pciccupatthana* } which **has** Lhe meaning as ^h having good., pleasant, desirable effect"[== *ftthampoka-paccLipaUhiinum*}. In **liic** lirHL way " **ihc** Essence " (- *Rasa* } is stated as "Ability to destroy the Unwholesome **deeds**" (- *Akissala viddhcunso.n.a rosam* 1; and that Essence (- *Kicca rasu* } of **Ihe** **Wholesome** deeds , In Lhe second way " the Essence " is described as InnucenL and piirc **nalurc** f - *Vodanabhaua rasam* } and that Essence is Associated Essence (- *Sampatit rasa*}, That **essence** in the **qual** ity **obiained** **due lu** the FLiiiCLional Essence (= *Kicca rcisa* } .

-)

{ *AnutL-1-126*,

1. The nature associated with guilt and having bad effect --,---,---,---, Character ,
2. The nature of giving ill effect { Function) Essence ,
3. The nature which pollutes the Mind continuum { Impression) Perception ,
4. Taking up the Sense-object with Unwise Attention (- *Ayviisvmanasikara*)

..... Proximate cause ,

Next — Since the Unwholesome Deeds are not praiseworthy phenomena —

1. These occur with ^uilt Character ,
2. These pollute the Mind-continuum { Association) Essence ,
3. Give bad undesirable effect (= *Anittha vipaka*) (Effect) Perception ,

4- Take up the Sense-object with Unwise Attention (= *Ayonisomanasikara*)

..... Proximate cause -

Since these Unwholesome deeds are associated with ache and pain (- *KUesci*) , These are nor free from diseases like **Defilements** [ie:- Defilement!! are assumed a-^, diseases | or these ^re " *A^m-^gyn dhnmma* " - Infected phenomena . Since these are infected wrth Defilements , these are also known as " *Savajji*] *d'hnmma* " - **Guilty** phenomcn;]. Like " Wisdom " | = *Panna* } in the " *K^nHa libfun.ana* " [- Intelligence) in cfiRe of Wholesome deed , — the " Ignorance " (- *Avijjn* = *Moh/i*) is in the " *Ako^nHa dhamma* " { = **DeluRion** | in pl95 ^-ie [Inwholesome deed- Tl-ie Jgiiorance { - *Avsijn* } is trie priinary root Ctiuse of the all ev-ils . It is rbe fonndation of rill evil deeds, fio^ all the Unwholesome deeds are produced by Ignorance (- *Avijja*), which is known as " *Akn^nUa* " . hence these get the name " *AkosaHo fJhamma* " { = **DeluRion** rooted dhamma) .

Unwholesome deeds are associated with **Dfilements f = Kilffsu** which are acting like, diseases of ache and pairi, or acting like ly.LilL> pE it'ii.iiiK.iid (- *Sauajja d^iamma* = guilty nature | aiLd Lhese are produced by " Ignr-n^ancc " (- *Avijja*) which is the " *Ako^allu dS'u.uiima* " (= DeLLsiun ruuled ptn- 'iKJiilcnon) , So, the Unwholeiome deeds are known as " *Akusala* . " - **DemeriLoriuLis acts** .

**Sovnjfn d^kkha mpak/i lakkhana H ettha ca vuitavidhi
anusarcnu cittho ca yajaTia ca yatha sambhavam. vcditabba .
[*MulaLi* -1-32 ,).**

In this phrasf, Lhc Original Subcommentaiy teacher stated that in **descripLiun** (JF Lhc CharaclcJ- of Unv,'holcsomc deed, apply the sequences used in the Whulesome dt^d to (-^ntiidcr the meaning and comparative analysis of the meaning [- *Yojanci*). lie alac pumLed ULL.L appruprialc comparison (= *YaTho^am.bJ'iauam*. } of the meaning in. the | **Ai3LELik.d-l-33.-32-**), *fiavajja dukkhavipaka lakkhana akiisula*. { Abhi-ttha-1-85.) The **Rub** corn men tary teacher explained LhaL Lhe Unwholcaomc phenomena occur with guilt, and give Ell eITects. In Lhis (-aye, by Lhc **tirst** word " *Saua* { } < l "

(- Guilty IT it shows the Unwholesome *deeri-^*, having Defilements like **Greed I - *Raga*** etc , which are not praiseworthy **phenomena** . There -ire *ReHulLanL Indeieimin.aie* Unwholesome phenomena (- */Mai^ola vipaka avyakala dhamirm }* apart from **the** Unwholesome **deeds**, All these Resultant Indeterminate Unwholesome phenomenei are **iNon-desirnhle** ill effects (= *Amttha* } and **HUL praiseworthy phenomena** . So, if only the word " *Savajja* " | = Guilty) is uyed LD mention the Character of the Unwholesome deeds, these Unwholesome Ri^aullant Endetermi-natc **plicnomena** (- = *Akusafa wpnko nvyakata dhamma* } will bc^cilue Unwhole-some **deeds**. To avoid suoh **mistake**, The Suhcommentary teacher add **anuLher** word " *Dukkhatnpaka* " { = Unpleasant effect) in the further **explanation** of the Unwholesome deeds . | Anuti-1-31,)

Next:—The word " *Avajja* " in the *Sovajja* indicates real Unwhok'yome nature like " Greed " (= *Raga* } . So, only the natural precedes which arc associated with there Unwholesome phenomena (eg:- **Greed = *Rayu* } are known as " Guilty " plicnomena (- *Savflfja* } . **Ry rhe** word " *Savajja* " ^{Ti}, Lhe diflerciicc of Unwholesoine **deeds from the Wholesome deed**^ from the Wholesome **IndeLerminalc Phenomena** is aLready stared . But, there is Char^ct-Rr of **Ability to give EflcL-t \vhieli is rcalated to both Wholesome and Unwholesome deeds** | - *Sauipakala-lakkftunu*) . but not related to Indeterminate **phenomena** | - *Avyakata dhamniu* | . So, to differentiate that Character of Ability to ^ive **Effect** between the **Wholeaonn; and Unwholesome deeds**, the word " **Giving 111 effect** " = " **Having ill effect** " (- *Du kkhavipaka lakkhanam*) is adried m the description of l}i<^ Unwholesome deeds,(AnuTi-1 -31 .)**

Again, although the direcL meaning of the " *Dukkhof'ipakn* " is **Having bad non desirable** effect ,that word **noL** only mentions the **presence of non-desu-able effort** , b-i]t also indicates Lhe **POW<JI- or action** | = *Kamnici salli*] to **produce ill non-desirahle** effect by the **Unwholeaume deed** Jn conclusion, by The word " *Dukkhacipaka* " [~- III Effect), it **indi^atea** LhaL thi.

Unwholesome **deeds liavc Power of Action** (= *Kciirrna satti* } ie:- **ability to produce non-desirable** (- *Amttha* } effect **En the later period** even at the linn; of their **arising** .

Sati sams^roppavaS.tiya ahosi kammam nuntu no. hoti . {

Sci, by the first word

" **Swajja** ", iL dirien;nuate the nature of Wholesome deeds from thaL of Lhc Un-whulesume deeds.

Again, by the second word " **Df/kkha vipaka** ", which means the various ill eHcets , it **differentiafe** the Unwholesome deeds **Ironi** the Indeterminate naLLire (- **Avyakaia dimmma** } **whirh** is lack of giving any **clleel** - At some time, Lhe UifLv Mental factors ('•= **Sci[^]oii[^] C[^]To[^]ika** } occur in astioCJauen with some Mere-acLion Resultant Indeten-ninate nature | = **Kinya vipuka-uvifakata dhamma**).But, all Lhe **Indeterminate phenoniena** (= **Auyakala dhamrna**)» al-pl97 though these **occcLir** in association with Lt[^]fty Mental **concomiLants** (- **Sobhana cetasika**), **Lhese** do not give any effect , { Anuti-1-32,)

Essence-Perception- Proximate Cause (**Rasa-Paccupatthanci-Pada.tthaTia**.)

Alternatively —By the first word ' **Surujju** '. iL obviously shows the ill ef-fecLa, ic:-Defilements [- **Kf[^].[^]a** } of the Unwh^e^{mc} deeds. So, ir indicates the **funcLion** of **^Ivin[^] ill effe[^]t-[^]** which is the **Functional Essence** . By me[^]ns of second word " **Ds/kkhn i/ipaka** ", it showy Lhe accompaniment of **undesirable iU** effects (- **AwTfhti vipaka**}. So, it indicates the **associated** phenomena ie:- it is the

" Associated Essence ",

(Anuti-1-32-) Next , by the first word " *Sovajja* " it indicates the Perception

(= *Paccupatthana* } of Impression (- *Upat^anakaro*) in the Insight-knowledge of Meditator that Unwholesome deed are the phenomena which ccintamlrLaLe

(= *SankHesa dhamn^a* } The Mind-continuum . So, it is the **Perceptible Impression** (= *Upctttha.na.fca.ra. paccupatthana* } . Oy the second word " *Dilkkhwipaka* " it 'shows The Effect (= *Pbala* } of the Unwholesome deeds . So the Unwhoicsoe deeds are percieved as phenomena, which can. ^ivc Hl-ciTeeLs (- *Dttkkha mpaka* } This is the **Perceptible Effect** | - *Phala-paccupatthana* } (Anuti-1-32.)

Next, hy The first word " *Savajja* ", it obviously shows Lhe Unwise attention [= *AsfOf^oTinnai^ikara*] which is the **Proximate cause 1= Padatthana** } of the Unwholesome daeds . Due to this Unwise attention, Lhe Unwholesome deeds become Umrienforioiis phenomena .By the second word " *D'.tkkhu vipaktf* , it shows obviously that Unwholesome nature ore the **Proximate cause**

(= *Pa.dattha.no.* } of the other Unwholesome **Re^LilLinl Phcri.OJicna** . [- *Akitsala lApaka dhamfna* }; **heca.'uae** these Unwholehomt phenonigna by them self are the **causative** factors of the Ill-enects [- *Dukkhn Vipaka* } . 9o. in conclusion, the Commentary' teacher used. to explain. Lhi; natural character- *Sabh^w fnkkiui'na*)

of the Unwholesome Phenomena (= *Aku^uki* } by using these two words, [e:- " Cruit iissociated " and " ILL-elTecLLVfencbh " (- *Sa^ajja, Dukkhaupaka* }..

(Anuti-1-32.)

Meditation of Perception

The Mcditator should already **attain** partially, the Knowledge of the cause of Physical and Mental Phenomena | - *Faccaya pariggafia itiianci*) by means of Knowledge of Ki^ht ^view (- *Sormnaditthi n.nai'ia* } , so as **Lo** discern the Perception of the effect (- *Pha.f^ pnca.ipatt.bana* } of Lhe ^ood and desirable result of **LiL!-' Wholesonic deeds** [- *Sfthci mpokfi Paccfspatthana*) and Lhe bad and Non-desirable elleeL [- *AniUfiQ mpaka par^ipnnhana* } of the Unwholesome deeds. **Only after** dLLamiiiig the Knowledge of Ri^ht View [- *SammadiUhinnuna* } on the good elffeLs Whylesome deeds produc'.ed hy the Ignorance, Craving and **din-sm^** (= *Auijju, Tafiha, Upadcrno.* } in the 3 periods (ie:- Past, FutLire and present) and on the bad effect of Unwholesome deeds **producing** rebirLha in the Lower Worlds {•= *Apuyu paTtSimdhs* } in the vflrous past lives, the MediLalor wili a^ree to accept these **pliciLomena** by himself- **Only** after partial obLalmii^ of the Kowled^e of the Cause of the Physical and Mental Phenomena (= *Puccaya patigqaha winn* |, the MediLator will sec by hin-iselfthe **Perception**. of the Effect [- *PhaSa paccupailhanu* } using knowledge of Right View (- *Samrfia dttlhi nnana* } . For these reasons, it is advised to **discern** rhe **C ha racLer-E^e nee** -Perception and Proximate Cause only after **partial attainment** of Lhe ECnowledge of the Cause of Physical au-d Mental **Phenomena** [= *Paccaya puri^guh'-i 'sriana*) .

The Character and Essence | *Lctfchhana-Rasa }*

All the **Consciouyiffss** have the **Character of taking up and realisation of the Sense-object** ([^] *Vijananu lakkhana*}, **The Wholesome and Unwholesome Implosion coiisicousness** (- *Ku^ala jovano citta, AkLisola jsivana citta*) **also have the Character or talcing up and realisation of the Sense-obfect** . BuL, above **descriptions about: the natural character?** of til c Wholesome and Unwholesome **Consicousness** are **superadd^d** so as to **signilieantly express the peculiar Actional Effect f = Kumma ^nfti]** possessed by **these Consicousness in conLrast to other remainin& Consciousness** ,

In the Absolute Truth **acnce** (- *Paromattba succa* |, **there is no such thing that — "** Should it be **Subconseiousneas**, or should iL be Advertence Cone 101.1?; n ess or should it be Eye-consciousness which **lakes up the Sense- object of ai^ht** or should it be **Receiving Consciousness** or **should]T be J^ivcatigating C on soi outness** or should -it be **Determining ConsicoutinesH** or should it be **Impulsion consciousness** etc ,**eTi-**' ,", There is **no person** who **can give command iikc** above by himscir or **ysk to the** another person to **^i-vo command** like that ,

fAbh]-nha-l-3l2>)

There is **no person** who can do by **himself**, or **urge** (.he **other** persons **to give command** like " Should it be **Advcrlenoe consciousness** or should it be **linpLiision consicousnesa e[c**, etc , " in the development of various **Consciousness** When **Sense obfect** is **striking the respective Transparent-clement** . In. **contrast when the Sencs-objeeL attack The Transparent- element**, naturally the **5 Ooor** Advertence ConaenioLisness - **The Merc-a.etion Mind-element** | ^c *Fancadi'af'Qt?Q_(fuit(i citta = Kin^a maitu dhatu)* e^ites the **Subconsciousness stream** ([^] *Bhavanga sola*), and **interrupLs** (.he **Suhcor-iscioustie^s**. The **Eye-Con-scioLisne^s** performs (.he **Seeing Function** (= *Dassona kicca* } . The **Resultant** Mind element (= *Vipuka inann dhahf*} performs **the Receivmg FuneLion** (= *Sam.-paticcna kicca*}. The **Resultant Mmd-Consciousness-ElmcenL** (= *Vipo^o Ma'io vinnaw-dhcd*u } performs **Investigating FLinction** (=

Sardiwf.u kicca). The Mere-action Mind-consciousness element (= *Kiriya mar^o ninnana dhciUi* = *Mano dvaf-avojjanG citta*. - Mind Door Advertence Consciousness) performs the **Determining** function [= *Votthabbana idc^ii -- Votthi^ kicca*] and classifies the Sense ¹ object as Desirable or -Non desirable (- *IfTha. AniUhu*). Finally, the **Ji-impulsion** *conseio* Lioness (= *Jaucma ciSta*) takes up the taste "1" the Sense object. All these sequences are known as **Natural Law of the Process of Consciousness and Mental Concomitants** (- *Citta niyama*), [Abhi ttha-l-314>)

Actually, only The Impulsion Consciousness (- *Jauana citta*) can perceive the essence of the Sense-object. The Resultant Consciousness (- *Vipaka ci,tta*) like the Eye consciousness are only the- good or bad [= *^ikha, Dukkha*] effort of the Wholesome and Unwholesome deeds . So, these Consciousness can not properly differentiate the desirable or non-desirable (= *Rtha,Amtthd*) nature of The Senses . Only the Impulsion Consciousness is able to classify the Sense- objects as Desirable Sense { = *Rajjana* } or Non-desirable sense { - *Virajjanri* }, ap, The i-afte may be . So. only the Eye up nisi on consciousness can definitely feel the proper sensation of the sense- object, A^ain, among the various Impulsion Consciousness , the 5 Door Impulsion consciousness only directs the all Lion towards the 5 ^en^es (= *Pancaimmanci*). So, these 5 Door Impulsion Consciousness (- *Panaa dl'anka jaucma citta*) do not take up the sense definitely like Mind-door Impulsion Consciousness which can take up the Sense-object, perfectly and completely . Only the Mind-door Impulsion Consciousness [= *Manf>cSswiika jivcmo citta*) can take up perfectly the various Senses^ and feel Desirable or No n - desirable nature as the case may be . These take up the Sense-object with great n-i omen turn. Such nature of taking. Like the Sense-object with great momentum i^ known as Impulsion-Function [^ *Juvviti kiccu*]. The Wholesome and Unwholesome Impulsi-ori consciousness can take over this Impulsion-Function . This Impulsion Function is the one included in the (14) Functions of the Consciousness or Mentalities [- *Vinnfnci kic-c-a*], The Meditator, who is dis-. covering the WholeisoniR, ^nd Unwholesome deeds with the Knowledge of Right View [= *Sninma f^lthi nnanii*] will perceive the nature of these Impulsion consciousness as the phenomena which take up and feel the Sense-object with great momentum .

Proximate Cause (= *Padatthana*) —The (12) kinds of Determining consciousness and its Mental concomitants in (5) Door Thought-process and (12) kinds of Advertising Consciousness and its Mental concomitants in the Mind-door Thought- process are known as <^ Wise attention " or <^ Unwise attention ^t (= *Yoni-so vnanasikara, , Ayoni^orncinQ^i kara*) . A Meritifier who is discerning the Proximate Cause (- *Podottho^a*) should try to perceive the nature of these (12) kinds of Mentalities known as Wise attention giving Meritorious nature and another 12 kinds of Mentalities known as Unwise attention giving the Unmeritorious nature .

So , a Meditator who is discerning the Character-Essence-Perception-Proximate Cause of above Wholesome and Unwholesome deeds should select the Consciousness required to meditate among the Impulsion Consciousness occurring with these Wholesome and Unwholesome deeds at appropriate Sense-Bases (= *Ayatana*) .

Five Door Impulsion Consciousness (*Pancadvarika*

Javana Citta }

It is the right way, to describe the Determining mentalities | = *Vuttho nama dhamma*) in the Five-door Thought-process (- *Pancaduara uithi*) as Wise attention or Unwise *iM[.t:n[.ion^Yoiit^vmufiu^a'-ct, Ayomsomanci-sskaf-a }*. Again, the Five-door Advertence *Mema.Mes[=Pancadvarai/ajjana nama dhamma }*

are the causes of Wholesome or Unwholesome Impulsion-consciousness? in Five-door Thought-process- Read the following statements of the Commentary;—

Translation; — Which factor decide the Impulsion Consciousness to become Wholesome or Unwholesome Impulsion consciousness ? Which nature always decide the occurrence of " Wholesome, or Unwholesome phenomena " ?

The Five-door Advertence consciousness | = *PfncadvuruuajjarLO.*) and
3200 the Determining; Consciousness (- *Votthapanno catv*) always decide the occurrence of " Wholesome or Unwholesome deeds".

201 That's right ——— The Five-door advertence consciousness
(- *Pfmcadvam.ia^an^* }, excites the yLibconRciousnc&^aLream (-- *Bhavwit3a. citta*) in proper way to get the pleasant feeling ; and if the Determining Consciousness (- *Votth^pana citia*), dereritines the Sense-object in proper way to get the pleasant effect, it is unlikely that impulsion Consciousness (- *Javana citta*) is Unwholesome in nature. If the Five-door advertence Consciousness excites the Subconsciousness-stream in a wrong way to get the ill effect ; and if the Determining Consciousness decides the Sense-object in a wrong way to get the ill effect, again, it is unlikely that the Impulsion-Consciousness in Whole Home Impulsion in nature. It is proper to say ——— Doth of the Five-door advertence and Determining Consciousness excites the Subconsciousness-stream in a proper way or decides the y^nae-object in a proper way to get the pleasant effect, the Impulsion Consciousness will produce Wholesome deed, in contrary it is to be
201 noLfd that, if the yubconHeiousness is excited in a wrong way or if the Sense-object is decided in a wrong way to get the ill effect, the Impulsion consciousness will produce Unwholesome deed.] *Ahlii-ttha-1-3157.*)

According to this explanation in the Commentary, in Five-door Thought-process, both the Five-door Advertence Consciousness and the Determining Consciousness are known as Wise and Unwise Attention. In

case of the Mind-door Thought process, namely the Mind-door Advertence Consciousness is known as the Wise or Unwise Attention. In this case, if the Five-door Advertence Consciousness and the Determining Consciousness take up the Sense object of sight merely as - Sight or Color, there is proper excitation of the Subconscious-stream and proper decision of the Sense of sight. Such Attention is known as Wise Attention (= *Yamsoma^a^ikQfG*). If the Five-door Advertence Consciousness and the Determining Consciousness take up the Sense as desirable, amounting to cause greediness or 11021-desirable 'mouitinn to cause anger, it is the improper excitation of the 'Subconsciousness' stream and 'wrong' decision of the Sense object, such kind of perception of Sense is known as Unwise Attention (= *Ayoni^omn^a'=ikcifa*). Similar process of perception is applied to Sense-object of Sound etc, etc, as well.

In the section, of Dependent origination (= *PQicc-a-sam.nppada*). [12] classes of Determining Consciousness and its; Concomitants are taken in *coritiid-erflion* and the method of discernment of the cause and effect of These is mentioned. It is the fundamental way of description for the less intelligent *MediL^Lor*, But, in the tables used in the section of Meditation, (-in Mentality (= *Nama kairimnSfhana*), both of the Five-door Advertence Consciousness and Determining Consciousness - are mentioned as Wise or Unwise Attention (= *Yonisomonastkura, Ayortisoirtano^ikara*).

Again, in the Commentary, and Subcommentary, the Character -Essece, etc, of the Registering Consciousness (= *Tadaran^i.mana ritta*) which sometimes follows the Impulsive consciousness; the Dying consciousness (= *Cuti dttef*), which is the Lasi Consciousness in the *LEE* and is mentioned 'especially'. In such a case, 'Apply the method of discernment of Character-essence etc of the Consciousness' Aggregate (= *Viniawkkhi^iniJha*) which is written for all kinds of Consciousness. There may be some 'changes' in the Essence (= *Rn. ^a*). Hence the 'Consciousness' performs the Registering Function (= *Ta^orammana kicca*) and the Dying Consciousness performs the Dying Function (= *Cult kiccu*) a 'non' various (14) Functions of the Consciousness (= *Viwnno kicca*). Similar changes are present in the Perception (= *Pacc-stp^t^fita*). In a case of 'Immediate Cause', the Commenting teacher explained with the first consideration on the Proximity-Levels, 1 = *Ananrara* of the Consciousness in the The Light-process (= *Vi-fhi citta*). So, discern the Character-essence of the Registering Consciousness etc, as follows. Taking the Registering Consciousness which arises by taking up the Sense-object of sight (= *Ruparammana*) as an example, and applying the method of discernment on the Involution-Consciousness (= *Santirana* ^etal, further explanation will be given according to (Abhi-Lha-1-305),

Senses like Sense-object of Sound etc etc-

²⁰³ 1. The Eye door The Light-process ! = *Cakkhu duara fithi* } which takes up Present Sense-object of Sight (= *Paccuppnramniana* }, { First Thought-process)

2. " *Todori-nvattaka manudf/afa uirhi* " [- Follower- Mind -door thought-process) which follows the Eye-door Thought-process and takes up the Past Sense-object of sight already taken by the above Eye-door Thought-process ,

| Second Thought-process 1

3. " *Sn-^a manodura uirhi* " (= Rperate, pure Mind-door Thought-process) which decides colour like brown, yellow, blue; etc, etc, of the Past-Sense-object of Sight which is already taken up by the Eye-door Thought-process and Follower Mind-door Thought-process . (Third The

Light -process) 4- * *RvddJia manvdat-a nti* " { = Separate, pure Mind-door Thought-process) which takes up and designates the features like man; woman, pot , clothing etc etc ; of the Sense-object of Sight, already **acquired, realized** and classified by above 3) kinds of Thought-process , [

Fourth Thought-process | 5. " The Mind-door Thought-process | - *Maii^dwicivithi* } which realises the definite nature of the Sense-object, already taken and **designated** the feature by the previous (4) kinds of Thought-process . (Fifth Thought-process |.

So, only after this fifth Mind-door Thought-process , Taking up of designated feature (= *AWia pa^naUi*) like man, woman, pot, clothing etc, etc is finished and definite realization of Sense-objects like man, woman, pot, clothing is possible. And, only after this final decision of the Sense-object, the nature like " reflected ", " love ", " affection " etc , etc to the Sense- object of sight arises. The awareness of the Mind-door Thought Processes following this fifth Mind-door Thought-process is more and more precise and definite. The ability of determination by the

" *Adhimokkha r^tn^ika* " { = Determination concomitant } associated with Mind-door Adherence Consciousness (= *Manoduarauajfana citta*) and Impulsion Conscience { = *Javana CiTta* } occurring in the various Mind-door Thought- processes starts from the above fifth one, becomes more and more precise and finally reaches the highest quality .

The Mind-door Adherence Consciousness arising in the Mind-door Thought-process is similar to Impulsion- Consciousness in the nature of Wise and Unwise attention [= *Yoisciniariastkarci, Alfaiisofnawsikai'a*]. { Refer to Meditation of Mentality]. The Unwholesome impulsion Consciousness takes up the Sense-object as " Permanent " " Pleasant ", " Self ", and " Attractive - Pure - Beautiful " (= *Nwa , Sukha , Apta , Subha*) with Unwise Attention, Similarly; the Mind-door Adherence Consciousness, not only considers the Sense object, but also takes up and decides the Sense-object as " Permanent ", " Pleasant ", " yei" » P^ and " Attractive = Pure = Beautiful " = *Nicca, Sukha, Atta , Subha*) with Unwise Attention (= *Ayoniso-tanasikara*). In case of Impulsion

Consciousness of the Insight Meditation (= *Vipassana bhauafia jaiwna citta* }, those Consciousness take up. consider and decide the Phenomena of Formations and Changes in the 3) Spheres of Existence f = *Tebhumaka safikhafa dhan'na*) as "Impermanent ^B, " **Suffering** ", " **Impersonal** " and " U^{ly} ^ Loathsome - Impure " f = *Anicca, Dnkk!^a, Anatta , Asubha* } with Wise Attention [- *Yoniso-mariasikfira*]. Likewise, the Mind-door Advertence Consciousness which arises prior to the-^ **Impulsion** Consciousness of the **Insight** Meditation takes up; **considers and decides** these Phenomena of Formations and Changes (- *Sarfkhm. dhowrio*) as Impermanence. **Suffering** , Impersonal and U^{ly} (- **Impure == Loathsome**) with Wise Attention. So, that Mind-door Advertence Consciousness, not only considers the object, but also decide the **Sense-object** although the decision may be right or wrong[^] That is why, the Commentary teacher gave The Remark of that Consciousness as follow; —

**The Consciousness Which is Similar In Nature to the Husky,
Full-grown Male Elephant (Mahagaja Citta)**

2 ' This Mind-door Advertence Consciousness arises in all the living-beings of { 3 } Spheres of Existence
0 like " Sensuous Sphere, Fine Material Sphere and Immaterial Sphere " (- *Kama, ^aupa, Arf^apa*] where the
3 **Consciousness occurs** . It is important that , it does not arise in the Mind continuum of any living-beings where Consciousness occurs . If This Consciousness arises, it performs the ' **DeLerniinin** ^ Function in Five-door Thought-process and. Advertence Function in the Mind-door Thought-process^E ! . Even the (6) kind of Unique wisdom (- *Asadbaiana nncina*) possessed only by the Perfectly Enlightened One with Perfect Wisdom { = *Sabbannu samma sambuddha* } which are not shared by the Disciples , can take up ,

only the Sense-object, already realised by the Mind-door Advertence Consciousness. This Mind-door Advertence Consciousness is known as the Consciousness which is similar in nature to the Husky, Full-grown Male Elephant (- *Mahagaja dttⁿ* }. There is no Sense-object , nor able to be taken up by the Mind-door Advertence Consciousness if someone asks - " Which is the phenomenon, similar to the Perfect Wisdom (= *Sabbannu. nmana*), but it actually not Perfect Wisdom ? " The answer is:— "This Mind-door Thought-process only". | Ahhi-ttha-1-133- |

Since, [his Mind-door Thought-process [^ *Manodvnnvajjana* } precedes the Perfect Wisdom, and because of being such Like the strong husky, full-grown male elephant known as '• *Mahagaja* " it

i^ able to take up the all kinds of Sense-object like Llie great Perfect Wisdom . So, Lhe nature this Consciousness is similar to that of husky full-^rown male elephantL in strength. ,

16. Mirth Producing Consciousness (*Hasituppada citta*]

The **Hoiy One is happy and** smiles **with** this **Mirth** producing **Con-scTousness** (= *Has^ppada cilia* } , after **thinking in mind that " I have already** extirpated Llie indecorous **Craving** which **ia the chief root of greed** for lour kinds of

offerings ", "when he hears The loud voices like (- Give me ^T . Rive To my first teacher ^r or Give to my Dependable Leachi-r cLc, etc] at a place where the offerings reiatLil[^] to all monks (- Sang[^]dku} are distributed among the monk . How it arises at the Nose-door ———

The Holy One (-^o A^uruhat] is happy and smiles with this Mirth Producing Consciousness (=[^] Hasiluppu^udu d^{tt}a } , when he offers the fra[^]ranct; and flowers with sweet [^]mell to the pagoda. .

How it arises at the Tongue- door ———

The Holy One is happy and smiles with this Mirth producing Consciousness after thinking in the mind thaL " I have done food moral conduct which should be kept in mind (=- Saraniya} until my death ", when he is sharing the collected tasty pure Eil-ms -Tood to the companion-monks in residence . How it arises at the Body door ———

The Holy One is happy and smiles with this Mirth Producing Consciousness[^] after thinking in the mind that¹ I have done food practice of conduct with Body-door^{??}, when he offers fresh water for face-washing; two[^] frayed aL one end LU ck-an the teeth to his first teacher (= Uppujjhaya acanija} find that is Lhe Noble prach[^] (= Abhisamaacii'ikn } and noble dLity to aLtend one's preceptor iind menLor (= Uppujjhaya vatta , Ar.nnyfJ vatta} performed by a Hoiv-disciple according to the Buddha's prescription or ceminandmenL, written in the " Khandhaka " Pa[^]-LcxL .

In the Mind-door—— this kind of smile occurs when taking 13? the Past and Fullirc acnsc-objects , eg'-- Kxistence as " Jolipata " lad (Ma[^]-236.), Existence as " May[^]deva" Kin[^] [Ma-2-262.), Existence as " Kanha" hermit (Khu 5-202.». The Buddha smiles , considering the practices done in these Past-e[^]iKtencea. These Mirth are produced by the functions of " Pubb[^]iniwsanussati 'iffd^{na} " { = Power to remember past-existences of oneself -[^] well as of other.), and " Sfibbonn-Liia nnariu " [- Perfect Wisdom). After attaining and repeated practising of these two kinds of powerful Wisdom, this Mirth producing Consciousness arises making pleasant effect in the Mind continuum of Lhc Buddha . p206 Again, the Buddh-i smile, when he foresees the " Appearance of Tantisara Lesser Buddha (- Pacceka Budd}m }, Appearance of MucSmgassara Lesser Buddha etc etc ; in the Future-time. The Mirth are produced by the Functions of " AnagaTam[^]a nnana " (- Puwfr to foresee the Future) and "Sabbwila nnana" { = Perfect Wisdom ^ After attaining and repeated practising of these two kinds of Powerful Wisdom , this Mirth producing Consciousness arises , making pleasant effect in Lhc Mind-continuum of the Buddha .

(Abhi-ttha-1-332-333.1

Explanation in Original Subcommentary

AIE the Bodily Actions (Verbal Actions and Mental Action as well) follow the Wisdom possessed by the Buddha , and it consists of [3] kinds, like . Lhe Wisdom not obstructed to consider the Past-phenomena , the Wisdom not obstructed to consider the Past-Lire -phenomena and the Wisdom not obstructed to take up the Present phenomena . According to this statement, the Original Subcommentary teacher is doubtful about the " Existence of this Mirth producing Consciousness not associated with the Wisdom " - (MulLi-1-137.)

In this Mirth Producing Consciousness, there are (12) Icinds (-if associated Mental concomitt^{nis}, likp: -Contact - Menial ImpressLon). Feeling, Perception., Volition , Om poinledness of the Mind, Menial Vitality, Attention , Thought Conception, Discursive Thinking Determination, Energy and Rapture. (-Phassfi, Vedana, Snnna. Celm/i, Ekaggata. Jiuia, Mann^{ikara}, Viwkku. Vicarn, Adhimokkha . Viriyil , Pili}. Lf Mirth Producing Consciousness is added , Lhere are altogether (13) clasps or Mentalities , But, it is to be notfrd lhat, the Wisdom (- Panna l, also known ay Faculty uf Wisdom (= Panfyn^{riyu} } , If-, not included. Since» the Minh Producing C oil scion sues?; is not associated with Wisdom, the Original fl ub commentary teacher men.uoried to reconsider the explan.aLions given in the above Commentary ,

Consideration of Detail- Subconumentary Teacher

The Deaiil-Subcummentary tyacher explained as follow :— The Holy One l - AruhGt}, just merely feels happiness and pleasant senRe wiith thiR Mirth producing Con^{sciousnc}'s^a [- JIawtuppada CUUf}; when lie see[^] the desirable yense-[^]bject o< sighL , which is Lhc [^]undu.mental Rfinse 1 [^] Pndhimv } at the Five' door (= Pwic[^] dvara}. But th[^]re is no acLiun of smile ', bc-cause the yodily Intimation (- Kayflmnaiti } ~ M,iL<.Tiairy of Inllmarion (= VinnfTti rupa} for smiling prooess can not be Formed by Lhc y'w. door Con[^]iouancast - Pcm[^]a[^]uarika citta} only. So, iu the Commentary (= Att[^]akatha}. { Abhi-ttha-1-332. l iL is stated as " Sornana[^]ito hots" = " feels happy and pleaaan.t ° only ; at thfi Five-door. Then., in thp Mind-door, it is stated as " Haswffmanuin sUnm puti[^]ka[^]i" = " the nction of smile occurs ". So, allhou[^]li the action of Smile is produced by the Mii-th Producing Consciousness , Lhc Bod]]y action of smile of The Bud-dl-iii follows rhp se-queioes ur" the Pow[^]r to remember Past-existence 5 " [[^] Psibbctiiaa&a[^]is[^]uti -niian[^] }', " Lho Power Lo l-oresce Lhe Kuture " (= Ancigahim.w nnaici} ; and " the Perfect Wiadom ° { - Sabbarmula nnana }. That i[^] why Lhe Mirth producing Consciousness is led fundamen Tally ([^] Padhana} by the Wisdom. (= [^]nana -pubbongamv }. It [^] the nature \which alhays fonow?, the Wisdom . [- NrLcma-nuparivfitti dhaTnina}. In conelLisioi-i. since Lhe Mirth producing Consciousness always - irisca , following the Wisdom [Filthui[^]h it is not as social. Led with Wiadom), there is no eonflor. between the Original Pa[^]-text and the Commentary. That [^] why in the Cgmmentary (= Abhi-ltha-1 333,) , if is stated as :— " This Mirth Producing Consciousness arises after attiiinmu complete practke oi" fhe Po[^]er To Remmenber l[^]asi "Rxisience, the Power to Foi'L'-see the P'urure u.[id the Perlcet Wisdom " l =• Pubbcrürasa[^]ssuti nnanci , Aiaa[^]S-am[^]a unana , Sabhannuta nnana} . Th& concept oi this nature should certainly be like these factH. 11 nor so, -¹ ic;—ifone accepts that all the Consciousness , noL associated with Wi[^]Ll-om do nut ari[^]R in the Mind-continuum of the Budclha . the arising ot" lhe Mind-door Advertence Consciousness [which is [^]Iso non-Wiadoin a[^]oci[^]Led) in the M-md-Contm[^]um [^]f the Buddha, hecome¹ doubLlui and inLposslble , That ia right— it is accepted Ltia the Mind-door Ad[^]errence Consciou[^]LCss has ability to produce MaterialiiLy 'of IntimaLion (= ViniiGrti ni.pn} , like Mirth- So, note thai it is impossible to prevent the Bodily a.c.-tion (= Knga kamma } requited fi-on-i the Materiality of It-irimaLion (- Vim-taW ntpn} which ia the product of the Mind door Advertence Consciousness , v/hcn It's n[^]Lural energetic

power | - *SatH*) to produce the **Materiality** of Intimation becomes obvious . (Anuti-E-144.). In **conclusion ; it is** To be accepted that the **Mind-door** Advertence Consciousness which considers the Bodily action etc ,etc, should arise in the Mind- con rimmm of the Buddha ,
 This **Mirth** Producing Consciousness arises **only in** the Mind-continuum of the Holy One!; (- *Ainhnr* } . So , the **Medirator** will be able to discern the above nature, only when he attains the Realisation of **Fruition of Holiness** | - *Arohatta phoki* } , through r-he **Path of Holiness** { = *ArahctTTa m/5/?r?o*) in accordance with The practice of Perfection (= *Parami* } :— or in other words, only when he becomes The Holy-One [= *Arahat*) ,

The Various Mirth Producing Consciousness

PAGE-209

The Chapter of Speech on Aggregate of Feeling
(*Vedanakkhandha katha*)

1. Bodily Agreeable Feeling
(*Sukha vedana*)

1. *Itthaphotthabbanubhavana lakkhanam sukham,*
2. *Sampayuttanam upabruhana rasam,*
3. *Kayika assada paccupatthanam,*
4. *Kayindriya padatthanam.*

(Visuddhi-2-91)

1. The nature of taking up the sense of desirable tactile object ----- Character,
2. The nature which promotes accumulation of associated phenomena -- (Function) Essence,
3. The pleasant nature arises in the Body ----- Perception,
4. Faculty of Body = Body transparent element ----- Proximate cause.

Kusalavipakena kayavinnanena sampayuttam sukham. (Visuddhi-2-91)

It is the Bodily agreeable feeling which arises in association with Wholesome resultant Consciousness of the Body (= *Kusalavipaka kayavinnana*) at the time of taking up of the Senses of Desirable tactile object and Moderately desirable tactile object.

(= *Itthaphotthabbarammana, Itthamajjhatta photthabbarammana*). In that Pleasure associated Body-consciousness (= *Sukha sahagata kaya vinnana*) there are (8) types of Mentalities, Consciousness and associated Mental concomitants. Among these, select the Bodily agreeable feeling (= *Sukha vedana*) and, discern it.

Character-----The natural Character of the Ultimate phenomena are the separate natures which are not shared with other various phenomena. **Taking up and feeling the Sense-object (= *Anubhavana*)**; is present in every occurrence (= *Sadharana lakkhana*) of all kinds of Feelings. (= *Vedana*). So, to mention that taking up of the Desirable tactile object is the separate natural Character owned by the Bodily agreeable feeling, the Commentary teacher stated as:-“*Itthaphotthabbanubhavana lakkhanam sukham*” which means “the Character of the Bodily agreeable feeling is the nature of taking up the sense of Desirable tactile object”. There is no doubt that taking up of the Desirable tactile object = the Character of Bodily agreeable Feeling is the nature of taking up the Desirable tactile object. (= *Itthaphotthabbanubhavana lakkhana*).

(= *Itthaphotthabbarammana, Itthamajjhatta photthabbarammana*). In that Pleasure associated Body-consciousness (= *Sukha sahagata kaya vinnana*) there are (8) types of mentalities Consciousness and associated Mental concomitants. Among there, select the Bodily agreeable feeling (= *Sukha Vedana*) and, discern it.

Character- The natural Character of the Ultimate phenomena are the separate natures which are not shared with other various phenomena. **Taking up and feeling the Sense-object (=**

Anubhavana); is present in every occurrence (= Sadharana Lakkhana) of all kinds of Feelings. (= Vedana). So, to mention that taking up of the Desirable tactile object is the separate natural Character owned by the Bodily agreeable feeling, the Commentary teacher stated as: "Itthaphotthabbanubhavana Lakkhanam sukham" which means "the Character of the Bodily agreeable feeling is the nature of taking up the sense of Desirable tactile object". There is no doubt that taking up of the Desirable tactile object = the Character of Bodily agreeable Feeling in the nature of taking up the Desirable tactile object.

(= *Itthaphotthabbanubhavana Lakkhana*).

(*Mahāṭṭi-2-137*)

Essence of Augmentation (= *Upabruhana rasa*)-----This kind of (Function) Essence ie:- Augmenting the accumulation of associated phenomena is also possessed by the Mentally agreeable Feeling (= *Cetasika sukha vedana*). But, in case of Mentally agreeable Feeling, the accumulation of associated phenomena is due to consideration. So, it is the effect of conditioning forces to which mental phenomena are subjected.

(= *Cetobhisankhara*). In case of augmenting the accumulation of associated phenomena, it is a natural process without any kind of consideration. So, the effect of augmenting the accumulation of associated phenomena occur more excessively than in case of Mentally agreeable Feeling. That is why the Commentary teacher expressed like "*Sampatyttanam upabruhana rasam*" = Having (Function) Essence of Excessive augmentation in accumulation of associated phenomena. (*Mahāṭṭi-2-137*)

Perception----- The Bodily agreeable Feeling is pleasurable in nature. So, it is known as Enjoyment with satisfaction (= *Assada*). That's why the Buddha says as follow:___

Yam bhikkhave pancupadanakkhandhe paticca uppajjati sukham somanassam, ayam vuccati bhikkhave pancupadanakkhasu assado. (*Sam-2-23-24*)

PAGE-210

O---Monks---A certain kind of pleasure, enjoyment and satisfaction ie:- Mentally agreeable feeling (= *Somanassa = Cetasika sukha vedana*) arises depending on the (5) types of Clinging = (5) groups of existence which form the objects of Clinging (= *Upadanakkhandha*). So----Monks; to this Mentally agreeable Feeling (= *Somanassa vedana*), it is suitable to say as Enjoyment with satisfaction (= *Assada*) to (5) groups of existence which form the Object of Clinging. (*Sam-2-23-24*)

Since, the Bodily agreeable Feeling arises by depending on the Body transparent element, it is known as Bodily Feeling (= *Kayika*). And, since it is pleasurable phenomena, it is also known as Enjoyable phenomenon (= *Assada*). So, to a meditator, who is discerning that Bodily Agreeable Feeling, it is perceived in the knowledge (= *Nana*) as a pleasurable phenomenon, arises by depending on the Body Transparent Element (= *Kaya-pasada*). (*Mahāṭṭi-2-137-138*)

Proximate cause-----The Bodily Agreeable Feeling arises by depending on Body transparent element which is also known as Faculty of Body or Physical Base of Bodily sensations (= *Kaya pasada, Kayindre, Kaya vatthu*). It can't arise on other Physical Bases (= *Vatthi*). That is why, the Faculty of the Body = Body transparent element is the Proximate cause of the Bodily Agreeable Feeling. (*Mahāṭṭi-2-138*)

2. Bodily Disagreeable Feeling (*Dukkha vedana*)

1. *Anitthaphotthabbanubhavana lakkhanain dukkham,*
2. *Sampayuttanam milapana rasam,*
3. *Kayikabadha paccupatthanam,*
4. *Kayindriya padatthanam.*

(Visuddhi-2-91)

1. The nature of taking up the sense of Undesirable tactile object ----- Character,
2. The nature which can lessen and fade the associated phenomena. ----- (Function) Essence,
3. The nature which arises in the body and causes suffering----- Perception,
4. Faculty of Body = Body transparent element ----- Proximate cause

To understand the detail accounts, refer to above described Bodily agreeable feeling. This Bodily Disagreeable Feeling (= *Dukkha vedana*) is the Feeling which arises in association with Pain associated Body-Consciousness (= *Dukkha sahagata kayavinnana citta*). So, select the Bodily disagreeable Feeling among the (8) types of Mentalities at the time of arising of Pain associated Body-Consciousness which takes up the sense of Undesirable tactile object (= *Anitthaphotthabbarammana*).

3. Mentally Agreeable Feeling (*Somanassa vedana*)

1. *Ittha rammana nubhavana lakkhanam somanassam,*
2. *Yatha tatha va itthakara sambhoga rasam,*
3. *Cetasika assada paccupatthanam,*
4. *Passaddhi padatthanam.* (Vs-2-91)

1. Taking-up of the natural + assumed Desirable-sense object ----- Character,
2. Taking-up of the sense-object as Desirable one by natural or assumed ways. (Function) Essence,
3. The pleasant nature which depends on the mind ----- Perception,
4. Tranquility = Tranquility of Consciousness and Mental concomitants --Proximate cause.

PAGE-211

Character-----The natural Desirable sense (= *Sabhava ittharammana*) = The sense object which is desirable originally in it's own nature, is known as Natural Desirable sense. When a sense is undesirable in it's own nature, but it is considered and treated as desirable sense, and then it is taken up as Desirable sense. ie:-Assumed desirable sense. (= *Parikappa-ittharammana*). (For example:-preserved salty fish-paste is originally undesirable sense. But, if it is properly treated, cooked and taken as meal; it will become desirable sense. That is, it become Assumed desirable sense). Mentally Agreeable Feeling takes up the sense of both Natural Desirable sense and Assumed Desirable sense. So, taking up of the desirable sense, both naturally and by assumption is the Character of the Mentally Agreeable Feeling. (*Mahāṭṭ-2-138*).

Essence-----If a person takes up and feels the Natural Desirable sense as desirable, it is the right feeling. When a person takes up Assumed Desirable sense as a desirable sense, it is the wrong feeling. The Mentally agreeable Feeling always takes up the sense as desirable one (= *Ittha*), whether it may be Natural Desirable Sense or not. That is, it always takes up the sense repeatedly. (*Mahāṭṭ-2-138*)

Proximate cause:-----

Passaddhakayo sukham vedayati. (Sam-3-135) = A person with tranquil body has quiet and peaceful feeling ----Referring to these words taught by the Buddha; the Commentary teacher explained that the proximate cause of the Mentally Agreeable Feeling is the Tranquility (= *Passaddhi*). But it is to be noted that in the words “*Passaddhi padatthanam*” (= Tranquility of Consciousness and Mental concomitants as Proximate cause):-that feeling is Mentally Agreeable feeling which is not related to sensual desires ie:- it is free from sensual desires (= *Niramisa somanassa vedana*).

(*Mahāṭṭ-2-138*).

In the “*Atthasalini* Commentary”, the Character, Essence etc etc; of the Mentally Agreeable Feeling is described as follow:_____

Vedayatiti vedana,

1. *Sa vedayita lakkhana,*
2. (a) *Anubhavana rasa,*
3. *Cetasika assada paccupatthana,*
4. *Passaddhi padatthana.* (*Abhi-A-1-152*)

The nature which recognises and takes up the taste of Sense-object is known as Feeling (= *Vedana*).

1. The nature which takes up the taste of Sense-object ----- Character,
2. (a) Feeling of Sense = taste of the Sense object----- (Function) Essence,
(b) Next----Consumption of the desirable nature of the Sense-object --(Function) Essence,
3. The pleasant nature which depends on the Consciousness ----- Perception,
4. Tranquility = Tranquility of the Consciousness and Mental concomitants ----- Proximate cause.

PAGE-212

The Essence of taking up and feeling of the Sense-object (= *Anubhavana rasa*)---

The nature which feels the taste of Sense (= *Vedayita*) and the nature which takes up and feels the Sense-object (= *Anubhavana*)----In this Mental concomitant; the Character and Essence (= *Vedayita, Anubhavana*) are similar in nature. The consumption of the Sense-object is the Character of that Mental concomitant Feeling (= *Vedana cetasika*). It is the (Function) Essence as well.

There is no Feeling in the (4) kinds of sphere like, Sensuous sphere, Fine material sphere, Immaterial sphere and Supramundane world (= *Kama, Rupa, Arupa,*

Lokuttara) which is lack of the Character of feeling the taste of sense (= *Vedayita lakkhana*). The assumption that only the Bodily Agreeable Feeling (= *Sukha vedana*) has the Essence of taking up and feeling of the Sense-object (= *Anubhavana rasa*) is rejected again. So, it is appropriate to state that, all the Feelings (= *Vedana*) which may be Bodily Agreeable feeling or Indifferent mental Feeling (= *Sukha, Dukkha, Adukkhama sukha vedana*), have functional essence of taking up and feeling of the Sense-objects (= *Anubhavana rasa*).

Actually, in the main function of taking up the taste of Sense-object, other associated mental phenomena apart from the Feeling-concomitant, can only partially take up a little bit of the taste of that sense. The Contact (= *Phassa*) can just only touch the sense. The perception (= *Sanna*) can just recognise the sense. The Volition (= *Cetana*) can just urge and put up the associated phenomena to the sense and finally, the Consciousness (= *Vinnana*) can just aware of the sense. So, just only touching the sense by the Contact, just only recognizing

the sense by the Perception, just urging and putting up the associated phenomena to the sense by the Volition, and just awaring the sense by the Consciousness, are partial taking up and feeling of the taste of the Sense-object. Actually, the Feeling (= *Vedana*) only is the deserving lord with full authority which can accomplish in taking up of the taste of the sense-object with the best of it's ability. So, that nature is known as the Essence of taking up and feeling of the Sense-object (= *Anubhavana rasa*). (In this explanation----- both the Character and Essence are same. ie:--taking up and feeling of the Sense-object) (*Abhi-A-1-153*)

Another Example

The Feeling (= *Vedana*) is like a King. The remaining associated phenomena apart from the Feeling are like royal chef. After cooking the various delicious foods, the chef prepares the meal in the ornamental container to serve the King. Before serving the meal to the King, the container is properly sealed (So as to prevent adding of poison to the foods). Then, the ornamental container is taken to the King, and the seal is removed after putting the container near the King. The lid of the container is opened. Then small amount of each and every foods in the container is taken as sample and put in a bowl. The chef eats these samples of foods first, so as to ensure the King that these are not poisoned. Only after then, the chef serves the King, various delicious foods. Then the King partakes of foods as a deserving monarch with full authority and accomplishes to feel the taste of the required food one after another with the best of his ability.

In the above example, the chef eats samples of food to ensure the King that these are not poisoned, is similar to partial feeling of various associated phenomena to the taste of the sense-object. That's right----- the chef takes up only small amount of the foods is similar to the partially taking up the sense by associated phenomena, apart from the Feeling (= *Vedana*). In contrast, the King partakes of foods as a deserving monarch at his own desire is somewhat like the Feeling (= *Vedana*), which perceives the Sense-object with the best of it's ability. So, that nature is explained as---the "Essence of taking up and feeling of the Sense-object"(= *Anubhavana rasa*). (*Abhi-A-1-153*)

PAGE-213

Next Explanation

The Mentally Agreeable Feeling = Bodily Agreeable Feeling (= *Somassasa vedana*, *Sukha vedana*) of the Momentary Concentration (= *Khanika samadhi*) before the Attainment Absorption (= *Appana jhana*) = Preparatory concentration (= *Parikamma samadhi*), Neighbourhood Concentration (= *Upacara samadhi*) and the Mentally Agreeable Feeling of the Insight Knowledge---will be specially explained in regard to the meditation of their Character-Essence etc;-as follow:-----

1. *Satalakkhana sukham* (= *Somanassam*),
2. *Sampayuttanam upabruhana rasam*,
3. *Anuggahana paccupatthanam*,
4. *Passaddhi padatthanam*.

(*Abhi-A-1-160*)

1. The nature which makes the living being in which it exists and the associated phenomena, to be pleased in taking up the Sense object----- Character,

2. The nature which promotes accumulation of associated phenomena ----(Function) Essence,
3. The nature which praises the associated phenomena ----- Perception,
4. Tranquility = Tranquility of the Consciousness and Mental concomitants- Proximate cause,

Sukhayatiti sukham, yassa uppajjati, tam sukhitam karotiti attho. Sutthu va khadati, khanati ca kaya cittabadhanti sukham, somanassa vedanayetam namam. (Abhi-A-1-160)

The nature which gives pleasure is known as Bodily and Mentally Bliss (=Sukha). If the nature of Bliss (= Sukha) arises in the body and mind continuum of a living being, it is able to please that living being. In other words, it has ability to bite and excavate both kinds of Suffering (= Dukka) known as Bodily Suffering (= Kayika abadha) and Mental Suffering (= Citta abadha). In this case, the Bliss (= Sukha) is the name of Mentally Agreeable Feeling (= Somanassa vedana). (Abhi-A-1-160)

The above mentioned Character-Essence etc;-of the Mentally Agreeable Feeling are the Character-Essence etc;-of the Great Wholesome Mentally Agreeable Feeling of the Sensuous Sphere (= Kamavacara maha kusala somanassa vedana). This kind of Mentally Agreeable Feeling is explained by the Commentary teacher in the Section of Aggregate of Constituents of Mental absorption (= Jhananga rasi) as described above. So, this statement is especially indicated to Mentally Agreeable Feeling in association with Impulsion consciousness of Neighbourhood Absorption (= Upacara jhana javana citta) arising at the time of Neighbourhood Concentration (= Upacara samadhi), and the Mentally Agreeable Feeling in association with Impulsion Consciousness of Meditation (= Vipassana javana citta) in the section of Meditation. In case of Wholesome Consciousness of Fine-material Sphere (=Rupavacara kusala citta), the Mentally Agreeable Feeling is in association with First, Second and Third Meditative Absorptions, according to classification of (4) types of Mental absorption.

In the "Atthasalini Commentary" (Abhi-A-1-213), it is stated that--"These (56) types of phenomena, stated in the Section of First Consciousness of Great Wholesome deed in sensuous Sphere (= Kamavacara pathana mahakusala citta)---from the Contact (= Phassa)--ellipsis..... to the Concentration (= Avikkhepa = Samadhi);--- are also stated in first Absorption of Fine-material Sphere (= Rupavacara pathama jhana). The only difference is the Sensuous Sphere and the Great Fine-material Sphere (= Kamavacara, Mahaggata rupavacara). Note also that other remaining phenomena, are similar to these phenomena, explained in the First Consciousness of Great Wholesome deed in Sensuous sphere ".----So, note that method of meditation for Character-Essence etc; of the Mentalities of Sensuous Sphere and those of Fine-material-Sphere are generally same. If there is difference, explanation will be given again.

PAGE-214

So, keep in mind that the Character-Essence etc; of the Mentally agreeable feeling, finally described above concern with the Mentally agreeable feeling associated with both kinds of the Great Wholesome deed in Sensuous Sphere and Wholesome deed in Fine-material Sphere. That is why these are the method of Meditations for the Feelings (= Vedana) associated, especially with Neighbourhood absorption (= Upacara jhana) and Attainment absorption (= Appana jhana) in the fields of Neighbourhood Concentration and Attainment Concentration. (= Upacara samadhi, Appana samadhi).

The Feeling (= *Vedana*) is generally associated with the Rapture (= *Piti*) at the time of Neighbourhood and Attainment Absorptions. So, the Commentary teacher continued to describe the special accounts on the Rapture and the Happiness. (= *Piti, Sukha*).

Rapture and Happiness (*Piti-Sukha*)

Although the Rapture and Happiness occur simultaneously when the Rapture associated Consciousness arises, the nature which evokes in taking up the Desirable Sense (= *Ittharammana*) eg:-The Desirable Sense like Counter-Image of Mindfulness on In-and Out Breathing (= *Anapana patibhaga nimitta*), is known as the Rapture (= *Piti*). The feeling of the taste of already attained Desirable Sense is known as the Happiness (= *Sukha*). If the Rapture arises in association with a certain Consciousness, the Happiness arises in association. On the contrary, if the Happiness arises in association with a certain Consciousness, the Rapture not always exists in association. The Rapture is included in the Aggregate of Mental formation (= *Sankharakkhandha*). The Happiness (= *Sukha*) is included in the Aggregate of Feeling (= *Vedanakkhandha*). Note the Rapture is like hearing and seeing by an exhausted visitor in the desert about the forest where the Great “*Zatassara*”lake is situated. The Happiness is similar to the drinking of the cold, clean water of the lake by that visitor.

One man, was going on a very difficult long journey, uneasy to reach the end. Under severe heat of the sun, that man was very much tired and thirsty. On the way, he found another man and asked where the drinking water was available. The another man replied like” O.... my friend..... just beyond this forest, there is another large forest, in which is a great “*Zatassara*” lake, where you will get water”. On hearing that, the tired visitor was very much pleased.

After going further, he felt very happy on seeing the petals, stalks and leaves of lotus flowers discarded by the other visitors. Further, he found men with wet cloths and hair. Next, he heard the crow, cry and sweet songs of common moorhen, peafowl and other birds. Again, he saw a large verdant and gloomy forest which looks like network of rubies surrounding the great lake “*Zatassara*”. In the lake, there were various lily flowers like blue lotus, sacred lotus, fabulous white water lily etc; (= *Uppala, Paduma, Kumudra*) and very clean water.

That man with much pleasure, took bath in the lake and drank the water. After bathing and drinking enough, all the sufferings caused by hot sun, tiresome journey and thirst were relieved. He also ate stalks and stamens of lotuses.

PAGE-215

He adorned his hair with lily flowers and got on the bank after taking some aquatic herbs. Then he changed the wet cloths and dried up these in the sun-heat. Finally, he took rest by lying on the ground and breathing gentle breeze. At that time, he was able to utter like “O... what a good pleasure”(= *Ahosukham*). Take this example in the mind.

The object of comparison and the subject of comparison (= *Upamana, Upameyya*) in the above example will be explained as follow :---The enjoyment felt at the time of hearing about the forest where “*Zatassara*”lake exists, and seeing of the clean water in the lake, is similar to the Rapture (= *Piti*). After bathing and drinking the water; feeling of the pleasurable sense; when lying on the ground in the cold shade of a tree with full strength,

breathing the gentle breeze and uttering like “O... what a good pleasure... O... what a good pleasure” is similar to the Happiness (= *Sukha*).

It is obvious that the Rapture and Happiness occur at the time of hearing the forest where *Zatassara* Lake is situated, at the time of entering the forest, at the time of seeing the water and at the time of bathing and drinking of water. So, late Subcommentary teachers explained as:--“The Rapture is the nature of having pleasure at the time of taking up the Desirable sense and the Happiness is the nature of feeling the taste of already attained Desirable sense.” Actually, it is suitable to state that “The Rapture is associated with a certain Consciousness; and to that Consciousness the Happiness is associated too”.
(*Abhi-A-1-160-161*)

Greed Rooted Mentally Agreeable Feeling (*Lobhamula somanassa vedana*)

The above mentioned Method of Meditation of the Character-Essence etc; are the method for Wholesome Mentally Agreeable Feeling of the Sensuous and Fine-material Spheres. For Unwholesome Greed rooted Mentally Agreeable Feeling, the Method of Meditation for Character-Essence-Perception etc; are same as above for Wholesome Mentally agreeable Feeling. But, in Proximate cause (= *Padatthana*), the Tranquility, (= *Passaddhi*) is concerned only with the Mentally agreeable Feeling free from sensual desires (= *Niramisa somanassa vedana*) which is not related to Sensual pleasures (= *Kamaguna*). So, that Tranquility is not the Proximate cause of the Greed rooted Mentally agreeable Feeling.

1. The Heart as a physical Base (= *Hadaya vatthu*) is the Proximate cause of the Mentally disagreeable Feeling (= *Domanassa vedana*). So, also, the Heart as a physical Base may be

the Proximate cause of this Greed-rooted Mentally agreeable feeling.

2. The Desirable Sense (= *Ittharammana*) which may be the Natural (= *Sabhava*) or the Assumed (= *Parikappa*) may also be the Proximate cause.

3. According to the doctrine that, the Feeling arises due to the arising of the contact = *Phassa samudaya vedana samudayo*;----the associated mental phenomena led by the Contact which arise with that Mentally agreeable Feeling may also be the Proximate cause.

So, among these (3) kinds, may be only one or all (3) kinds, is the possible Proximate cause of the Greed rooted Mentally agreeable Feeling. Consider in similar way in case of the Mentally agreeable Feeling which arises in association with the Rootless Glad mindedness Investigating Consciousness (= *Ahetuka somanassa santirana citta*).

PAGE-216

4. Mentally Disagreeable Feeling (*Domanassa vedana*)

1. *Anittha rammana nubhavaner lakkhanam domassam,*
2. *Yatha tatha va anitthakara-sambhoga rasam,*
3. *Cetasika badha paccupatthanam,*
4. *Ekanteneva hadaya vatthu palatthanam.* (*Abhi-A-1-298. Visuddhi-2-9*)

1. Taking-up of the natural and assumed Undesirable-Sense-object----- Character,
2. Taking-up of the Sense-object as Undesirable one by natural or assumed ways -----
----- (Function) Essence,

3. Unpleasant nature depending on the mind = The nature which depends and tortures the mind-----Perception,
4. The Heart as a Physical Base definitely -----Proximate cause.

The Natural Undesirable Sense is the Undesirable sense object in it's own natural way. The Assumed Undesirable sense is originally the Desirable sense, but taken up as Undesirable due to the Unwise Attention (= *Ayonisomanasikara*). The heretics who are against the teachings of the Buddha, assume the Buddha who is actually Extremely Desirable sense (= *Ati ittharammana*) as Undesirable one. If someone takes up the Natural Undesirable sense as undesirable way; it is the proper way of sensual uptake. If someone takes up the Natural desirable sense as Undesirable one by assumption in undesirable way, it is the improper way of sensual uptake. To this phenomenon---the explanation that “Whether it is right or wrong, taking up of the Natural Undesirable or Assumed Undesirable Senses, in an undesirable way is the **(Function) Essence of the Mentally Disagreeable Feeling**”--- is given.

Perception:-----If someone is angry with others, that person usually says like “It is very hurtful to me “. It's a kind of grievous mentality. To this kind of grief, the statement as the unpleasant nature depending on the mind or the nature which depends and tortures the mind; is given. That is, it is conceived as mental grief in the knowledge of a meditator, discerning the Mentally Disagreeable Feeling.

Proximate cause-----Since, Mentally Disagreeable Feeling occurs in the Cosmic entity of sensual pleasures (= *Kamaloka dhatu*), also known as the (11) realms sensual pleasure (= *Kamabhumi*) or planes of existence where craving for sensual pleasures is intrinsic (= *Kamadhatu*), it definitely depends on the Heart as a physical Base (= *Hadaya vattu*) for it's occurrence. So, the Heart as a physical Base in the most important Proximate cause of the Mentally Disagreeable Feeling. **(Mahāṭṭ-2-138)**

Select the Mentally Disagreeable Feeling among the various mentalities of the group of Hatred, group of Hatred-Envy, group of Hatred-Stringiness and group of Hatred-Remorse. (= *Dosa, Issa, Macchiriya, Kukkucca*). Then discern the Character-Essence etc etc; of that Mentally Disagreeable Feeling.

5. Indifferent Mental Feeling (*Upekkha vedana*)

1. *Majjhata vedayita lakkhanam upekkha,*
2. *Sampayuttanam natiupabruhanamilapana rasa,*
3. *Santabhava paccupatthana,*

PAGE-217

4. *Nippitika citta padatthana.*

(Visuddhi-2-91)

1. The nature of Neutral feeling of the Natural and Assumed Moderately desirable object -----Character,
2. The nature which neither promotes accumulation nor lessen the associated phenomena -----(Function) Essence,
3. The nature of calmness and quietness -----Perception,
4. The Consciousness lack of Rapture = The Consciousness which is not associated with Rapture -----Proximate cause.

This Indifferent Mental Feeling has the Character of taking up the Moderately desirable object which may be natural or assumed. In other words it has the Character of taking up the sense with equanimity. That is, the taken-up Sense as well as the feeling are neutral in nature. So, the Indifferent Mental Feeling has the Character of taking up Moderately Desirable Sense (= *Majjhataṛamaṇa*) which may be natural or assumed with equanimity (= *Majjhataṛavedayita lakkhana*).

Since, it has the feeling of Moderately desirable sense which may be natural or assumed with equanimity; it also has the nature which neither promotes accumulation nor lessen the associated phenomena as it's **(Function) Essence**.

The statement that "It is perceived in the Insight knowledge of a meditator as the nature of calmness and quietness" (= *Santabhava paccupatthana*)---is meant for the pure, sinless Indifferent Mental Feeling (= *Upekkhavedana*) which is not concerned with sensual pleasures (= *Kamaguna*). The statement is not meant for all kinds of Indifferent Mental Feelings. (*Mahāṭṭi*-2-238)

The Concept of Venerable Maharsi Sayadaw

Venerable Maharsi Sayadaw who wrote "*Visuddhimagga Mahāṭṭika nissaya* Scripture" gave following remark in the Section of *Mahāṭṭikanissaya*.

If one assumed that, although it is Unwholesome Indifferent Mental Feeling (= *Akusala upekkha*), it is more calm and quiet than Unwholesome Mentally Agreeable and Disagreeable Feeling (= *Akusala somanassa, Domanassa*).

So, it is appropriate to perceive all the Indifferent Mental Feeling (= *Upekkha*) in the Insight knowledge of a meditator as the nature of calmness and quietness (= *Santabhava paccupatthana*). (*Visuddhimagga Mahāṭṭikanissaya*-3-316)

Absorptive Indifferent Mental Feeling (*Jhanupekkha*)

1. *Majjhata lakkhana jhanupekkha*,
2. *Anabhoga rasa*,
3. *Abyapara paccupatthana*,
4. *Pitiviraga padatthana*. (*Abhi-A*-1-218)

1. The nature which is in the middle way ----- Character,
2. Not feeling, even the excellent pleasure (= *Panita sukha*) ----- (Function) Essence,
3. The nature not anxious for excellent pleasure.----- Perception,

PAGE-218

Next-----It gives benefit of not being anxious about the excellent pleasure by the associated phenomena ----- (Fruition) Perception,

4. The nature of dislike of happiness = The nature which overcomes happiness = Rapture (= *Piti*) -----
Proximate cause.

This Absorption Indifferent Mental Feeling is not Indifferent Mental Feeling (= *Upekkha vedana*) associated with Fourth Mental Absorption (= *Catuttha jhana*). It is the Equanimity Mental concomitant (= *Tatramajjhata*) which is associated with Third Mental absorption. That Equanimity Mental concomitant, known also as Indifferent equanimity (= *Tatramajjhataupekkha*) arises also with First and Second Mental

absorptions. But in these occasion, the function of that Indifferent equanimity Mental concomitant is not distinct.-----So, Buddha does not mention as “accompanied with Indifferent equanimity mental concomitant”= *Upekkhako ca viharati*----Only in this third Mental absorption, Buddha says as “accomplished with Indifferent equanimity mental concomitant”= *Upekkhako ca viharati*. Since, the Thought conception (= *Vitakka*) and the Discursive Thinking (= *Vicara*) are overwhelming in First absorption and the Rapture (= *Piti*) is overwhelming in Second Mental absorption, the function of this Indifferent equanimity Mental concomitant is not distinct. But, in the Third Mental absorption, the nature of Thought conception, Discursive thinking and the Rapture (= *Vitakka*, *Vicara*, *Piti*) are not overwhelming, but the Indifferent Equanimity is arising like a leader. So, the Buddha specially mentions the Indifferent Equanimity mental concomitant. (**Abhi-A-1-218**)

In this instance, the Indifferent Equanimity keeps the associated mentalities in the middle ignorant way so as to prevent enthusiasm or retreat in taking up of the sense object of Image of Tranquility meditation (= *Samatha nimitta*) such as Counter-Image of Mindfulness on In-and Out-breathing (= *Anapana patibhaga nimitta*), and Counter-Image of Meditation device (= *Kasina pannatti patibhaga nimitta*) etc. Select that Indifferent Equanimity mental Concomitant (= *Tataramajjhata cetasika*) among the mentalities of Third mental absorption (= *Tatiya jhana*) and discern its Character, Essence----etc.

Essence of no feeling even to Excellent pleasure (= *Anabhogarasa*)-----Since, it has no interest in the Craving (= *Tanha*) even in the precious excellent pleasure of the noble Third mental absorption; it is opposite in nature to that Craving = It is opposite in function to the Craving. So, it is stated that, it has the function of not feeling even the excellent pleasure (= *Panita sukha*) like the pleasure of Third mental absorption.

(Mulati-1-103). This pleasure of Third Mental absorption is the top-most pleasure among all kinds of Mundane pleasure (= *Lokiya sukha*); so it is known as Excellent pleasure (= *Panita sukha*).

Again, the Character-Essence etc;-of the Indifferent Mental Feeling (= *Upekkha vedana*) is further described in the section of Fourth mental absorption of fine-material Sphere (= *Rupavacara catuttha jhana*) as follow:-----

Indifferent Mental Feeling (***Adukkha ma sukha = Upekkha vedana***)

1. *Itthanittha viparitanubhavana lakkhana upekkha*,
2. *Majjhata rasa*,
3. *Avibhuta paccupatthana*,
4. *Sukhanirodha padatthana*. (**Abhi-A-1-222**)

1. It has the nature to take up the Moderately desirable object (= *Itthamajjhata rammana*) which is opposite to Desirable object (= *Ittharammana*) and Undesirable object (= *Anittharammana*), (= It feels the taste of Moderately desirable object)
----- Character,

PAGE-219

2. It keeps in the nature of middle way (= *Majjhata*) = Ignorance ---(-Function) Essence,
3. The nature of non-conspicuous Feeling ----- Perception,
4. The extinction of bliss (= *Sukha*) = (Neighbourhood Concentration = *Upacara* of Fourth Mental absorption where the Bliss is totally extinct) ----- Proximate cause.

In this Fourth Mental absorption there is no suffering (= *Adukkha*) as well as no pleasure (= *Asukha*). With the word no-suffering nor-pleasure (= *Adukkha-masukham*), it mentions the Third Feeling (= *Vedana*) which is opposite to suffering and pleasure of the Fourth Mental absorption. It mentions not only the absence of both suffering and pleasure but it mentions the Third Feeling (= *Vedana*), named Feeling of no-Suffering nor pleasure (= *Adukkha masukha vedana*). It is known also as Indifferent Mental Feeling (= *Upekkha vedana*). That Feeling of no-suffering nor-pleasure has the Character of taking up the sense of Moderately desirable object which is opposite in nature to Desirable Sense and Undesirable Sense. (*Abhi-A-1-222*)

According to this nature; note that the Sense object of the Indifferent Mental Feeling in the Fourth Mental Absorption is the Moderately Desirable Object. Again, the Feeling exists in the middle way (= *Majjhata*) and has the Function of ignorance. So, taking up the Sense is also with the Middle feeling. That is, both the Sense-object and the Feeling have the nature of middle status.

Further explanation will be given so as to avoid confusion. This Fourth Mental Absorption is reached,---according to discourse in quadruple (= *Catukka*), by practising step by step, based on the First, Second and Third Mental Absorptions. If you, noble meditator set up the Concentration (= *Samadhi*) according to the discourse in quadruple, from the First to Fourth Mental absorption by taking up the very pure clean and glowing Sense of the Counter-Image of Mindfulness on In-and Out-breathing (= *Anapana patibhaga nimitta*); it is to be noted that the sense objects of the First, Second and Third Mental absorption are also clean and glowing Sense of the Counter-Image of Mindfulness on In-and Out Breathing. The sense object of all four kinds of mental absorption is clean and glowing Sense of the Counter-Image of Mindfulness on In-and Out-Breathing only. So, the Sense-object is similar in all.

But, that Sense of the Counter-Image of Mindfulness on In-and-Out Breathing in the First and Second Mental Absorptions is Desirable object. On the contrary, that sense is Moderately Desirable object in the Third and Fourth Mental absorptions. In the Third Absorption, as described in the Section of Absorptive Indifferent Mental Feeling (= *Jhanupekkha*);--due to the power of the Equanimity Mental Concomitant (= *Tatramajjhata cetasika*) associated with Third absorption; all the associated mental phenomena connected with that Third absorption can keep that Sense of Counter-Image of Mindfulness on In-and Out Breathing, in the Middle moderately Desirable status (= *Itthamajjhata*). That is; the Sense is in the middle status (= *Majjhata*), but the Feeling has the nature of pleasure (= *Sukha*).

On the contrary, in case of Fourth Absorption, the Sense object as well as the Feeling are in the Middle status (= *Majjhata*) Why ?-----

The Pleasant Feeling (= *Sukha vedana*) arises by taking up the very clean and glowing Sense of Counter-Image of Mindfulness on In-and Out-Breathing before reaching the Fourth mental absorption. But, from attainment of Neighbourhood Concentration (= *Upacara samadhi*) in Fourth absorption, that Pleasant Feeling (= *Sukha vedana*) is abolished. The Indifferent Mental Feeling (= *Upekkha vedana*) begins to arise. Due to the support of the Equanimity Mental Concomitant (= *Tatramajjhata cetasika*)-----which gains sharp and energetic power at the time of Third absorption----the Indifferent Mental Feeling and associated mentalities in connection with the Fourth Absorption are gaining full power and able to keep the Sense of Counter-Image of Mindfulness on In-and-Out Breathing in the Middle status (= *Majjhata*). So, the Fourth absorption and associated mental phenomena;---

supported by the power meditation based on the Equanimity Mental concomitant and Indifferent Mental Feeling;

PAGE-220

---are able to keep the Sense object in the Middle status and feels the taste of the Sense object in the middle way. That is why, both the Sense-object and Feeling are middle in nature.

Perception as Non-distinct Nature (= *Avibhuta paccupatthana*)

The pleasure (= *Sukha*) and the Suffering (= *Dukkha*) are distinct feelings. These Agreeable and Disagreeable Feelings (= *Sukha vedana, Dukkha vedana*), are very distinctly perceived in the Insight knowledge of Meditators. But, the Feeling of no-Suffering nor pleasure (= *Adukkha ma sukha vedana*) is not so conspicuous as in case of the Feeling of Pleasure and Suffering. So, a meditator who is discerning the Indifferent Mental Feeling; that Indifferent Mental Feeling is perceived in the Insight knowledge as not distinct feeling, like the Sense taken up by the Feeling of Pleasure and Suffering (= *Sukha vedana, Dukkha vedana*). It is somewhat like foot prints of a deer which runs on the stone slab. So, in *Pali* text; that nature is expressed as knowledge obtained by the method of searching the foot prints of a deer on the rock slab(= *Migapada valanja naya*).. (Mulati-1-104)

Proximate cause-----

Sukha nirodho nama idha catutthajhanupacaro. (Sarttha-1-379)

The extinction of Feeling of Pleasure (= *Sukha vedana*) begins at the time of Neighbourhood concentration (= *Upacara samadhi*) in the Fourth absorption. Only after the extinction of that Feeling of Pleasure, the Indifferent Mental Feeling can arise. So, the Neighbourhood Concentration of the Fourth mental absorption (= *Catuttha jhanupacara*)---- when the Feeling of Pleasure no longer exists is the Proximate cause of the Indifferent Mental Feeling.

Again, the Character-Essence ---etc; of the Equanimity of the Sublime or Divine States of Living (= *Upekkha brahmavihara*), included in the (4) kinds of Sublime or Divine States of Living (= *Brahma vihara*), occurring in Mental absorption of Fine-material Sphere (= *Rupavacara jhana*), are described in the “*Atthasalini*”Commentary and “*Visudhimagga*”Commentary. The basis of the Equanimity of the Divine States of Living (= *Upekkha brahma vihara*) is the Equanimity Mental Concomitant (= *Tatramajjhata cetasika*). See, the Character-Essence etc-etc; of that Equanimity of the Divine States of Living (= *Brahmaviharupekkha*) in the Chapter of the Equanimity Mental Concomitant of the Divine States of Living (= *Brahmavihara cetasika*).

This is the end of the Chapter of Speech on Aggregate of Feeling.

PAGE-221

The Chapter of Speech on Aggregate of Perception

1. *Sanjanana lakkhana sanna,*
2. *Tadevetanti puna sanjanana paccayanimitta karanarasa,* (*Darudesu tacchakadayo viya.*),
3. *Yathagahitanimitta vasena abhinivesakarana paccupatthana,*
(*Hatthidassaka andha viya*)
4. *Yathaupatthi ta visaya padatthana.* (*Tinapurisakesu migapotakanam purisati uppanna sanna viya*) (*Visuddhi-2-92.*)

1. *Sanjanana lakkhana sanna,*
2. (a) *Paccabhinnana rasa,*
(b) *Puna sanjanana paccaya nimitta karana rasa* (*Daruadisuttacchakadayo viya*)
3. (a) *Yathagahita nimitta vasena abhinivesakarana paccupatthana,* (*Hatthi dassaka andha viya.*)
(b) *Arammane anogalha vutti taya aciratthana paccupatthana va* (*Vijju viya.*)
4. *Yatha upatthi tavisaya padatthana.*
(*Tina purisakesu migapotakanam purisati uppannasanna viya.*) (**Abhi-A-1-153-154.**)

1. Awareness of various sense objects like brown, golden etc, etc; by noting down = the nature of knowing by noting down -----
Character,
2. (a) Knowing again by initial mental note ----- (Function) Essence,
(b) Making record which is the cause of reknowing the noted memory like " That is that " ----- (Function) Essence,
(It is somewhat like a carpenter's mark on the wooden objects.)
3. (a) The nature of perception of Sense object in accordance with the remark (= Note) kept in the mind. ----- Perception,
(Bear in mind like a blind man feeling the elephant.)
(b) The nature which won't last long since there is no deep consideration to Sense object = Sense object is not deeply taken up -----
----- Perception,
(Bear in mind like a flash of Lightning.)
4. Taking up of Sense object as such ----- Proximate cause,
(Bear in mind like perception to a scarecrow as a person by animals.)

PAGE-222

Perception Based on Wisdom
(Nanasampayutta sannna)

Pāli Quotation

(Abhi-A-1-154)

(Mahāṭṭ-2-139)

Structural Earth element -----

In (6) Doors and various Body parts where the naturel power of Earth element is excessive, the materialities in the respective groups of matters like Water elements, Fire elements, Air-elements, Appearance, Smell, Taste and Nutritive essence which arise together with Earth element are known as **Structural materialities** (= *Sambhara*). The

Earth element arising together with these structural matters is known as **Earth element of Structural matters** (= *Sasambhara pathavi dhatu*). In the field of Conventional truth; using the words of mundane world, the Earth element of structural matter is the soil or ground which you can see. It is the Earth elements. In Ultimate truth sense, this earth is nothing but, it is the collection of groups of Temperature-produced nutritive essence-octad matter (= *Utujaojatthamaka rupa kalapa*); in which natural power of the Earth element is in excess. Since the natural power of Earth element is excessive in each and every groups of matters (= *Rupa kalapa*), the earth or ground has character of hardness (= *Kakkhala lakkhana*). Since, the remaining materialities apart from the Earth element in the groups of matter follow the nature of Earth element which natural power is in excess, the whole earth or soil which is formed by groups of Temperature produced octad matter (= *Utuja attha rupa kalapa*) also follows the Earth element which has the nature of hardness. So, the earth or soil also has the nature of hardness. (In this instance, it means that in the earth, the natural power of hardness owned by the Earth element which natural power is in excess is obvious. It does not mean that the Character of Water, Fire and Air element change into the Character of hardness. There is no such thing that the natural Character of the Ultimate phenomena transform. Only the level of the natural power may increase or decrease. So, it means that, in this earth, the natural power of hardness owned by the Earth element is in excess and the natural power of Water, Fire and Air element are less.)

The fire is the Fire element of structural matter (= *Sasambhara tejo dhatu*). Discern to conceive the (4) Primary elements in the fire. For a meditator like you noble one, who is able to discern materialities and mentalities in both livings and non-livings of external World, discernment of (4) Primary elements in the fire is not difficult task. If (4) Primary elements are perceived with knowledge, particles of Nutrive-essence octad groups of matter (= *Ojatthamaka rupa kalapa*) will be conceived soon. Fire is nothing but collection of Sound-nonad groups of matter (= *Sadda novaka kalapa*) where there are sound of Nutritive-essence octad groups of matters. When the remaining matters apart from the Fire element in respective groups of matter have less natural power, they follow the nature of Fire element with excessive power.

The Air also is the Air element of structural matter. (= *Sasambhara vayo*). Discern to conceive the (4) Primary elements in the air. You will see only the paricles of groups of matter. The air in the non-living external world is the collection of Nutritive essence octad groups of matter and Sound-nonad groups of matters.

[In the air that rises up (= *Uddhangama vata*) known as Air component of body (= *Vayo kotthasa*) etc, of living beings are, as described in Meditation of materiality, composed of (33) types of materiality.]

PAGE-223

In these various groups of matter, remaining materialities apart from the Air element, follow the nature of Air element which natural power is in excess.

The water is the Water-element of structural matter (= *Sasambhara apo*) (which means the water in the non-living world.) Discern that water so as to see the (4) Primary elements. Particles of groups of matter will easily be seen. In these groups of matter, the matter apart from the Water element will follow the nature of the Water element which natural power is in excess.

Pāli Quotation

(*Mahāṭṭ-2-139*)

Similar to above descriptions, if the Perception (= *Sanna*) is based on Wisdom (= *Nnana*), ie: --- Wisdom associated Perception (= *Nnana sampayutta sanna*); that Perception always follows the Wisdom. Since, it always follows the Wisdom, that Wisdom associated Perception never bears in mind the Sense-object in wrong way (= *Abhinivesa*), and never recognises the the Sense-object in abnormal way (= *Viparitaggaha*). (*Abhi- A-1-154.Mahāṭṭ-2-139*.)

According to above explanations, note that the Perception which is associated with Insight knowledge (= *Vipassana nana*) always follows the Insight Knowledge. Insight knowledge deeply knows the actual nature of the Sense-object which is the Ultimate true phenomenon. Due to the power of that Insight knowledge, the Perception also recognized the actual nature of the Sense-object, in it's memory.

If the Perception is associated with Great Wholesome deed without Wisdom (= *Maha kusala nanavippayutta sanna*), since it is not associated with Wisdom, it always follows the Consciousness (= *Vinnana*). All the Consciousness take the function as main leader of the(4) Aggregates of Mentality (= *Namakhandha*) (= *Pubbangama -rasam*), it is explained that Perception probably follows the Consciousness. In case of Resultant and More action, note in similar way as Great Wholesome deed.

Again, since all the phenomena of Fine-material Sphere and Immaterial Sphere are the works of Concentration and led by Concentration as main leader, the Perception associated with these Concentrations of Absorption in Fine-material and Immaterial Spheres always follow the Concentration. According to this description, if the Impulsion consciousness of Insight meditation is without Wisdom (= *Nana vippayutta*), the Perception always follows the Concentration in association with taht Impulsion consciousness of Insight-meditation. Since, the Perception based on Concentration (*Samadhisampayutta sanna*) always follows the Concentration, that Perception never fails to take up the Sense object or Sense of Insight meditation. So long as the Concentration keeps on the Sense of Tranquility (= *Samatha arammana*) like Counter-Image of Mind fullness on In-and-Out-breathing (= *Anapanapatibhaga*)

nimitta) or Sense of Image of Formations (= *Sankhara nimitta*), the Perception also keeps on the Sense of Tranquility and Sense of Image of Formation for long duration. (*Mahāṭṭi*-2-139.)

In Supremundane World, since all the Consciousness of Supramundane Path and Fruition are certainly associated with Wisdom; these Knowledges of Path and Fruition certainly take up the Sense of *Nibbana*. So, the Perception also certainly takes up the Sense of *Nibbana*. Since, the Knowledge of Path and Fruition deeply realize the pleasant and peaceful nature of *Nibbana*, the Perception also deeply recognises that pleasant and peaceful nature. This is how the Perception is valuable and useful in the practice of Wholesome deeds.

PAGE-224

But, Perception (= *Sanna*) is a Mental concomitant associated with both Wholesome and Unwholesome deeds. So, it occurs not only in good actions, but also in evil actions. That is why the Unwholesome Perception (= *Akusala sanna*) associated with Greed, Wrong view and conceit (= *Raga, Ditthi, Mana*) always occurs following these Unwholesome phenomena of Greed, Wrong View and Conceit. (*Mahāṭṭi*-2-139.)

Among the (12) types of Perversions (= *Vippallasa*), the (4) Perverted perceptions (= *Sanna vippallasa*) based on wrongly recognizing Perception are groups of Unwholesome mentalities and perceive truly right Formative conditions (= *Sankhara dhamma*) like Impermanence, Suffering, Not-self and Impurity in wrong way as Permanence, Pleasure, Self and Purity. Based on Perverted perception which wrongly recognises the Sense-objects as Permanence, Pleasure, Self and Purity, the Perverted Consciousness (= *Citta vipallasa*) which also wrongly thinks as Permanence, Pleasure, Self and Purity arises. Next, Perverted View (= *Ditthi vipallasa*) continues to arise, which wrongly conceives as Permanence, Pleasure, Self and Purity. All these Unwholesome Perversions are able to deeply sink down the beings to the bottom of ceaseless cycles of sufferings (= *Samsara vatta dukkha*) like ceaseless cycles of Lower Worlds (= *Apaya samsara vatta*) without any chance of escape. According to the explanation described in the Great Subcommentary, this wrongly recognizing Perverted perception also is leading to Unwholesome phenomena like Greed, Wrong view, Conceit and Delusion. In other words, it is a phenomenon which is always following these Unwholesome deeds.

Character ----- If one perceives brown, yellow, white, red as brown, yellow, white red or; long, short as long, short or; father, mother, aunts, uncles as father, mother, aunts, uncles or; sweet, sour as sweet sour or; designated names of Ultimate realities like Contact, Feeling etc, as Contact, Feeling or; nature of striking (= *Phusana sabhava*) and nature of feeling (= *Anubhavana sabhava*) of these Ultimate realities like Contact, Feeling as the nature of these etc etc ---- what so ever it may be, if a meditator becomes able to take up the real nature of Ultimate truths with Insight knowledge or, if one realizes these as Contact or Feeling, somewhat like children just remember various object as such:--- such kind of recognition is known as " Character of Recognition of Sense by memory "

(= *Sanjanana sabhava lakkhana*). Note that, recognition of the true nature of Ultimate realities follows, as described above, the Wisdom.

Essence -----The carpenters usually make marks on wood blocks with pencil so as to remember the correct sites to work again when they are making or repairing wooden objects and structures. They remember again by seeing these marks. Making marks so as to remember again is the function of Perception. Recognition in accordance with these marks is the natural power or natural Character of Perception.

If these two Character and Essence (Function) are considered in connection --- ---- it is to be noted that Perception notes down for future remembrance. It also recognises according to that note. In knowing again that note, Perception further notes down again the marks for better recognition in future ----. So, that kind of the nature of Perception will be obviously seen. Preceding Perception notes down the Sense-object so as to remember again. Similarly, following Perception also notes down the Sense-object so as to remember again.

PAGE-225

So, note equally that all Perceptions make marks so as to remember again.

Such awareness by repeated recognitions may be right or wrong. The Perception which arises in connection with Insight Knowledge is right perception and since having some natural power to attain *Nibbana*, it is beneficial to associated phenomena like Right view of Insight meditation etc; etc; with Conditioning powers (= *Paccaya satti*) like conascence condition, Mutuality condition etc. If Insight Knowledge deeply knows the materialities which are real Ultimate truth phenomena, the Perception also recognizes these Materialities as real Materialities. Again, if Insight knowledge deeply knows the mentalities which are real Ultimate truth phenomena, the Perception also recognizes these Mentalities as real Mentalities. If Insight knowledge deeply knows the nature of cause and effect, the Perception also recognizes these nature as cause and effect. If Insight knowledge deeply knows the Formative conditions as Impermanence, the Perception also recognizes as Impermanence. If Insight knowledge deeply knows the Formative Conditions as Sufferings, the Perception also recognises these as Sufferings. If Insight Knowledge definitely knows the Formative conditions as Not-self, the Perception also recognizes these as Not-self. So, the Perception always follows the Insight knowledge which deeply and definitely knows the signs of Impermanence, Suffering and Not-self. That kind of Perception is very valuable. It doesn't mean for Perception which recognizes the Materiality, Mentality, Causes, and Effect etc; etc; by hearing the teachings of others or masters.

Again, deep and wrong remembrance due to repeated Perception in wrong way may cause Perverted perception (= *Sanna vipallasa*). That kind of Perverted perception can not be abolished even by the teachings of successive Omniscient Buddha.

In conclusion, just remembrance of Sense object, may be due to previous awareness or awareness of new one; is the natural power of Perception. That remembrance may be right or wrong.

Perception ----- In this instance, it is explained by giving an example of six blind men feeling the elephant. (= *Hatthi dassaka andha viya*). Six blind men, after feeling the elephant, perceived the appearance of the animal in different ways in accordance with the parts they felt. So, first blind man who felt the trunk noted and said that the elephant looked like a snake. Second man, who felt the tusk, perceived and said that the animal looked like a pestle. Third man, after feeling the ear of the elephant said, it looked like a mat. Fourth blind man who felt the body, noted and said that elephant looked like a wall. Fifth one who felt the leg, said the elephant looked like a house pillar and finally the sixth blind man after feeling the tail of the elephant, perceived and announced that the elephant looked like a broom. So, the Perception is accepted in the Knowledge of a meditator discerning it as the nature that conceives the Sense-object according to the note taken up by the mind and which may be right or wrong.

Proximate casue ----- The wild deer living in a jungle near the hill-side cultivation, on seeing a scarecrow resembling a watchman, wrongly thinks it as a real man in the mind.

PAGE-226

Similarly, the Perception, without any consideration, usually note down the Sense-object striking the respective Sense-Door as such in the mind. So, all kinds of Sense-objects are the Proximate cause for Perception.

Since, the Perception conceives every kinds of Sense objects without any further consideration, all kinds of Sense-objects are the Proximate Cause for Perception.

The Perception in connection with Wisdom (= *Nana sampayutta sanna*) always follows the Wisdom. Since, Wisdom is the Right view (= *Samma ditthi*), and the Right view has the nature of endless penetrating knowledge without any mistakes to perceive the Right view of belief in Actions and their results, Right view of Absorption, Right view of Insight knowledge, Right view of Path and Right view of Fruition. So, in other words it is also able to comprehend

the four Noble Truths. That is why the Perception which always follows that Knowledge of Right View (= *Sammaditthi nana*) recognizes properly and there is no such thing as wrong taking up of the Sense (= *Micchabhiniवेश*) or improper taking up of Sense (= *Viparitaggaha*). If the Perception is connected with Concentration

(= *Samadhi sampayutta sanna*) like Neighbourhood Concentration, Attainment Concentration and Wisdom not associated Insight Concentration (= *Upacara samadhi, Appana samadhi, Nana vippayutta vipassana samadhi*) etc; etc;- the Perception always follows that Concentration. So, there is no such thing that Concentration connected Perception has the nature of short fixing of Concentration on a single Sense object. So long as the Concentration exists, the Perception also

exists. If the Perception is associated with Greed, Wrong view, Conceit and Delusion, ie:- if it is Unwholesome Perception (= *Akusala sanna*), note that, it always arises following the Greed, Wrong view, Conceit and Delusion.

(*Mahāṭṭi*-2-139.)

This is the End of the Chapter of Speech on Aggregate of Perception.

The Chapter of Speech on Aggregate of Mental Formation
(= Aggregate of Mental Concomitants excepting that of Feeling and Perception)

(*Sankharakkhandha katha*)

(On the whole Meditation

Method)

1. *Abhisankharana kakkhana sankhara*,
2. *Ayuhana rasa*,
3. *Vipphara paccupatthana*,
4. *Sesakhandhattaya padatthana*.

(Visuddhi-2-92.)

1. Accumulation = the nature of formation to accumulate, the nature of effort to form, the nature of service to form (= *Vyapara*) ----- Character,
 2. Endeavour to accumulate ----- (Function) Essence,
 3. Service to form and accomplish the effect -----
- Perception,
4. The remaining (3) Aggregates of Mentality (= *Namakhandha*) ----- Proximate cause.

Pāli Quotation

(*Vs-2-98*)

(*Mahāṭṭi-2-139*)

(*Vs-2-22*)

(*Mahāṭṭi-2-112*)

Character of Formation (= *Abhi sankha lakkhana*)

----- It is the Character of working in Accumulation (= *Rasikarana lakkhana*)
= It has the Character of Organisation (= *Sampindana lakkhana*). So, it has the function or essence of organisation. (= *Ayuhana rasa*). It is due to the Volition (= *Cetana*) which is the fundamental factor in the organisation of the Aggregate of Mental Formations. That Volition (= *Cetana*) has the function of organizing the associated mental phenomena to gather in taking up the Sense which is the cause of Wholesome or Unwholesome phenomena in respective occasions of Wholesome or Unwholesome deeds. To that function of organization, it is known as Essence of organization (= *Ayuhana rasa*).

If so and so phenomena are conditioned, the effect of groups of mentalities led by the Volition will be well accomplished. It means the looking after of various causes which can give rise to various effects. So, the performance to organise the associated mental phenomena, in taking up together the Sense of Wholesome or Unwholesome

deeds, is the setting up of various causes for respective good or evil effects. That nature of organization or accumulation is the mark for the phenomena which are

PAGE-228

known as Aggregate of Mental Formations and it is the Character of these as well. These Aggregate of Mental Formations (= *Sankharakkhandha*) also has the nature of accomplishment in various aspects and note also, that is the (Function) Essence of these.

Perception ----- *Vipphara paccupatthanati ettha vippharo nama vipphara vantata, tasama savyapara paccupatthanati attho. (Mahāṭṭi-2-139.)*

It is perceived in the knowledge of a meditator as a phenomenon which has the nature of endeavour (= *Vyapara*) to condition, setting up and accomplish the various causes to attain various effects.

Proximate cause ----- Since, the Aggregate of Mental Formations can not occur without the groups of associated phenomena like the Aggregate of Feeling, Aggregate of Perception and Aggregate of Consciousness = Since the groups of Mental Concomitant known as Aggregate of Mental Formation do not occur by themselves alone; and since the Aggregate of Mental Formation can occur with the effect of Co-nascence and Mutuality conditions (= *Sahajata paccaya, Annamanna paccaya*) exerted by the Feeling, Perception and Consciousness, the remaining (3) Aggregates of Feeling, Perception and Consciousness are the Proximate Cause (= *Padatthana*) of the Aggregate of Mental Formation. This kind of Proximate cause should be noted in every mentalities where the Proximate cause is not specially mentioned.

According to above explanations, it is to be noted that only the person who has ability to meditate with his own penetrating Knowledge and Knowledge of Right view (= *Samaditthi nnana*) will perceive the nature of Present effects caused by the Past causes, the nature of Future effects formed by Present causes, the nature of relation between the Causes and effects (ie:- Dependent origination = *Paticca samuppada*). And that kind of person only, will properly know the Character, Essence etc etc; of the Aggregate of Mental Formation with the present Knowledge (= *Paccakkha nnana*).

The phenomena, that the Effects are produced by organisation of various causes and that, the Aggregate of Mental Formation led by the Volition (= *Cetana*) has the nature of Endeavour (= *Vyapara*) to accomplish the various effects are perceived with satisfaction only when one sees the relation between the Cause and Effect = the nature of Dependent Origination (= *Paticca samuppada*) with own penetration present Knowledge (= *Paccakkha nnana*).

Example of Meditation ----- Discern the above Character-Essence-Perception - Proximate causes after meditating the Cause-and Effect relation = Dependent Origination; with Knowledge; taking the example that (30) types of materialities, = (3) kinds of group of matter = Corporeal unit (= *Rupa kalapa*) arise in the embryo at the moment of conception (= *Kalala*) of a person in this present life are caused by the Ignorance, Craving, Clinging, Formation and Volitional action (= *Avijja, Tanha, Upadana, Sankhara, Kamma*) done in the Past life of that person. Discern the

Resultant Mentalities (= *Vipaka nama dhama*) in the same way. Try to understand the successive past and successive future in similar way. So, the meditation of the Character, Essence, Perception and Proximate cause this Aggregate of Mental Formation are the phenomena, understandable only by noble persons who partially attain the Knowledge of the cause of physical and mental phenomena (= *Paccayapariggaha nnana*).

In this instance, the Volitional action (= *Kamma*) or the Ignorance, Craving, Clinging, Formation and Volitional Action, give their respective effects only when these get support from the (4) kinds of Attainment (= *Sampatti*), or these will get chance to give their effect only when these are in association with (4) kinds of Attainment like Desirable Existence, Perfect Personality, Being born in and era of prosperity and Having Diligence (= *Gati, Upadhi, Kala, Payoga*). In regards to these facts,

PAGE-229

since it is not fully discussed about the Chapter of Dependent Origination as yet, it will be discussed in fuller account in this section.

Five Endowments for Accomplishment (*Samangita*)

To understand the Volitional action (= *Kamma*), giving its effect in association with Desirable existence, Perfect personality, Being born in an era of prosperity and Having Diligence ie:- (4) Attainments (= *Gati, Upadhi, Kala, Payoga*); (5) kinds of Endowments for Accomplishment (= *Samangita*) should be known ahead. So, (5) kinds of Endowments will now be mentioned again briefly according to “*Sammohavinodani*” Commentary (Abhi-ttha-2-419-420); “*Uparipannasa*” Commentary (Ma-ttha-4-87.); and “*Anguttara*” Commentary (Am-ttha-1- 364). (The wide explanation was given in the Section of Dependent Origination.).

When performing, good and evil conducts, the Wholesome Volition and Unwholesome Volition (= *Kusala cetana, Akusala cetana*), respectively which are known as Volition of resolution (= *Sannitthana cetana*) exerted before these conducts, and which are the factors needed for accomplishment of these conducts are known as “**Endowment of Endeavour for Accomplishment**” (= *Ayuhana samangita*).

When performing, good and evil conducts, the Wholesome and Unwholesome Volition which are known as Volitions of resolution and which can accomplish these conducts are known as “**Volitional Endowment for Accomplishment**” (= *Cetana samangita*).

Next ---- When, performing a good conduct, the Wholesome volition which gives successful fulfillment for that conduct, and when performing evil conduct, the Unwholesome Volition which fulfills that conduct occurs respectively. The existence of these Wholesome or Unwholesome Volition continuously at Present time is known as accomplishment of endeavouring Wholesome conditioning forces or endeavouring unwholesome conditioning forces = **Endowment of Endeavour for Accomplishment** (= *Ayuhana samangita* = *Ayuhanasamangi*). The definite existence of these Volitions at

short moment of Present time is again known as accomplishment with urge = **Volitional Endowment for Accomplishment** (= *Cetana samangita* = *Cetana samangi*).

When these Wholesome or Unwholesome Volitions vanish after living for their life span of 3 phases of a Mind-moment (ie:- Arising phase, Standing phase and Passing- away phase = *Uppada*, *Thiti*, *Banga*,) these are not totally abolish like other Resultant Consciousness (= *Vipaka vinnana*) in the Material and Mental Continuum of a person. In stead, these insert a force or special power after their expiry in the Material and Mental Continuum, so as to arise as a Resultant Consciousness when conditions are favourable. This special force exists in Material and Mental Continuum all the time as a latent power, unless it disappears as an Ineffective Action (= *Ahosi kamma*) or unless that person expires as a Holy One (= *Arahat* = *Arahanta*). The present of such special power is known as **Endowment of Powerful Action for Accomplishment** (= *Kamma samangita*) or Accomplishment with Powerful Action (= *Kamma satti*) or in short, it is the “ction” (= *Kamma*).

According to these explanations, note that two kinds of Endowments for Accomplishment (= *Samangi*) ie:- **Endowment of Endeavour for Accomplishment** (= *Ayuhana samangita*) and **Volitional Endowment for Accomplishment** (= *Cetana samangita*) are known as **Conditioning forces** (= *Sankhara*) and the **Endowment of Action for Accomplishment** (= *Kamma samangita*) is known as “**Action**” (= *Kamma*) or “**ction-process**” (= *Kamma bhava*).

PAGE-230

It is the natural phenomena that the Wholesome action or Unwholesome action (= *Kusala kamma*, *Akusala kamma*) done with desire to have future existences by an ordinary person = Worldling (= *Puthujjana puggala*) or by a Disciple in one of the 7 Higher Trainings (= *Sekkha puggala*) who has to follow Rounds of rebirth (= *Samsara*) further, will produce with their special power (= *Kamma satti*) and when the conditions are favourable, one of the three Signs (= *Nimitta*) like Action, Sign of Previous Action, and Sign of Destiny (= *Kamma*, *Kamma nimitta*, *Gati nimitta*) in the respective Door (= *Dvara*) of six kinds of Sense-door just before death. It is the natural phenomenon which occurs at the time of death from one existence and reborn in next existence of every living being unless they attain the fruition of Holiness or *Arahat* (= *Arahattaphala*). And it is also the natural phenomenon that the Dying Consciousness (= *Cuti citta*) of the Present life occur only after firm, and definite uptake of these Signs as mental objects of the Rebirth Consciousness, Subconsciousness and Dying Consciousness (= *Patisandhi citta*, *Bhavanga citta*, *Cuti citta*) of the new Future life. The power of the Sense of these Signs are so great that these are very obvious as Sense-objects of the proximate next life. The perception of one of the (3) kinds of Signs like Action, Sign of Action and Signs of Destiny as Senses is known as “**Endowment of Signs for Accomplishment**” (= *Upatthana samangita*).

After death from the present life, Rebirth Resultant Consciousness (= *Patisandhe vipaka vinnana citta*) arises in the next respective existence. [In Five-Groups Existence (= *Pancavokara bhava*), the Action produced Corporeality (= *Kammaja rupa*) also arise simultaneously]. After conception in new life, the

Resultant Consciousness (= *Vipaka vinnana*) which is the effect of Actions (= *Kamma*) done in the past, repeatedly occurring to take the Subconsciousness function (= *Bhavanga kicca*) which is the cause of persistent existence in new life in newly manifested time or life (= *Pavatti*) as long as no other Consciousness of Thought processes (= *Vithi citta*) arise to interrupt the continuum of the life-stream. To that repeated occurrence of the Rebirth Resultant consciousness and Newly Manifested Resultant Consciousness (= *Patisandhi vipaka vinnana*, *Pavatti vipaka vinnana*) the term “**Endowment of Effects for Accomplishment**” (= *Vipaka samangita*) is given.

The Action (= *Kamma*) can give rise the result only when it is in association with Desirable existence, Perfect personality, Being born in an era of prosperity and Having Diligence (= *Gati*, *Upadhi*, *Kala*, *Payoga*). So as to understand these phenomena, continue to read the account on **Second Physical and Mental power** (= *Dutiya bala nana*) of the Buddha; which knows the moral and immoral nature of the Action (= *Kamma*) and its Consequences (= *Vipaka*) (= *Kammantara vipakantara jananannana*).

Second Physical and Mental Power = Wisdom of the Buddha (*Dutiya bala nana*)

Pāli Quotation

(*Abhi-2-351*)

(a) Among these powers (= *Nana*) = Wisdoms; which Wisdom perceives definitely the nature of the Effects (= *Vipaka*) truly caused by the Actions (= *Kamma*) which are done in the Past, Future and the Present time.? To that fact, only the Buddha definitely knows in this world.

1. Some demeritorious Unwholesome actions (= *Akusala kamma*) done in the past do not give bad effects when a person is born in good desirable existence (= *Gati*) = Happy course of existence (= *Sugati*) like (Human world, Celestial realm of gods, Fine-material Sphere and Immaterial Sphere). Truly, there are such kinds of Actions.

2. Some demeritorious Unwholesome actions done in the past do not give bad effects when these are hindered by Perfect personality (= *Upadhi*) attained by a person. Truly, such kinds of Actions exist.

PAGE-231

3. Some demeritorious Unwholesome actions done in the past, do not give their bad effects when hindered by an era of Prosperity (= *Kala*) like presence of good kings or Noble persons. Truly, such kinds of Actions exist.

4. Some demeritorious Unwholesome actions, done in the past do not give bad effects when these are hindered by having proper Diligence (= *Payoga*). Truly there are such kinds of Actions.

(*Abhi-ttha-2-351.*)

Pāli Quotation

(Abhi-2-251)

(b)

1. Some demeritorious Unwholesome actions done in the Past give their bad effects, if a person is born in the (4) Lower Worlds (= *Apaya*) = Unhappy Course of existence (= *Dugati*) where their effect is favourable. Truly there are such kinds of Action.

2. Some demeritorious Unwholesome actions done in the Past give their effects based on being born with bad, ugly personality (= *Upadhi*). Truly such kinds of Actions exist.

3. Some demeritorious Unwholesome actions done in the Past give their effects based on bad era (= *Kala*) with the presence of the cruel kings, immoral persons. Truly such kinds of Actions exist.

4. Some demeritorious Unwholesome actions done in the Past give their effects based on lack of Diligence (= *Payoga*). Truly such kinds of Action exist.

(Abhi-2-

351.)

Pāli Quotation

(Abhi-2-351)

(c)

PAGE-232

1. Some meritorious Wholesome actions done in the Past do not give good effects, if a person is born in the (4) Lower Worlds ie:- bad unhappy existence (= *Gati*) hinders their effects. Truly there is such kinds of Actions.

2. Some meritorious Wholesome actions done in the Past do not give good effects, if a person is born with bad and ugly personality (= *Upadhi*) ie: that bad personality hinders their effect. Truly there is such kinds of Actions.

3. Some meritorious Wholesome actions done in the Past do not give good effects, if their effects are hindered by the presence of bad, cruel kings and immoral persons. Truly there is such kinds of Actions exist.

4. Some meritorious Wholesome actions done in the Past do not give good effects, if these actions are hindered by lack of Diligence (= *Payoga*). Truly there is such kinds of Actions exist. (Abhi-2-351.)

Pāli Quotation

(d)

(Abhi-2-351, 352)

(d)

1. Some meritorious actions done in the Past give their good effects based on rebirth in the Happy course of existence like Human-world, Celestial realm of gods, Fine and Immaterial Spheres. Truly there is such kinds of Actions exist.

2. Some meritorious actions done in the Past give their good effects based on having good perfect personality by that person. Truly their is such kinds of Actions exist.

3. Some meritorious actions done in the Past, give their good effects, if that person is born in an era of prosperity like presence of good kings, and Noble persons. Truly, such kinds of Actions exist.

4. Some meritorious actions done in the Past, gives their good effects if that person has diligence and try with good effort. Truly such kinds of Actions exist.

(Abha-2-351-352.)

PAGE-233

Among the (10) perceptive powers (= *Nana*) of the Omniscient Buddha; the above Stated Mental power = Knowledge = Wisdom (= *Nana*)... ellipsis.... the Non-delusion (= *Amoha*), the Doctrinal Investigation (= *Dhamma vicaya*), the Right View (= *Samma ditthi*) is included. That Right view is the Knowledge (= *Nana*) which definitely perceives the Wholesome or Unwholesome Consequences of various Actions done in the Past, Future and the Present time.

(Abhi-2- 352.)

Fulfilment = Attainment and Nonfulfilment = Dissolution (*Sampatti, Vipatti*)

1. **Fulfilment with Destiny** (= *Gatisampatti*) is the attainment of desirable destiny such as, being born in human world, celestial realm of gods and Fine or Immaterial Spheres. **The Dissolution of Destiny** (= *Gativipatti*) is the attainment of undesirable destiny such as being born in the (4) Lower worlds (= *Apaya*).

2. **Fulfilment with Perfect Personality** (= *Upadhi sampatti*) is the attainment of good qualities, character and appearance of a person seen as a whole. **The dissolution of Personality** (= *Upadhi vipatti*) is the attainment of bad, ugly and deformed appearance of a person.

3. **Fulfilment with Fine Period** (= *Kala sampatti*) is the attainment of an era of good kings, noble persons and prosperity. **The Dissolution of era of prosperity** (= *Kala vipatti*) is the presence of cruel kings, and immoral persons.

4. **Fulfilment with Diligence** (= *Payoga sampatti*) is the attainment of good and right bodily effort (= *Kaya payoga*), right verbal action (= *Vaci payoga*) and right mental actions (= *Mano payoga*) like good will and right view. **The Dissolution of Diligence** (= *Payoga vipatti*) is the Wrong effort (= *Miccha payoga*) where a person perform bodily, verbal and mental action which are immoral in nature.

(Abhi-ttha -2 -241.)

The Unwholesome actions done in the past, when get support with (4) kinds of Dissolution (= *Vipatti*), these become favourable to give their effects. On the other hand, if these get support with (4) kinds of Fulfilment (= *Sampatti*), these are not favourable to exert their effects. So also, if the Wholesome actions done in the past,

when get support from (4) kinds of Fulfilment, these are favourable to give their effects and when there are (4) kinds of Dissolution, they can not exert their effects.

Above Actions (= *Kamma*) are grouped in four as (a-b-c-d) as described above. There are (4) kinds of Actions in each group. So, there are total (16) kinds of Action (= *Kamma*) all of which will be mentioned in detail as follow:-----

Four Kinds of Action in Group (a)

1. There are many Unwholesome actions done by a person in the past, and the powers of these still exist in the body and mind continuum of that person. The Unwholesome actions exert their effects when that person attains Dissolution of existence (= *Gati vipatti*).

[= The Unwholesome action will exert their effect, it that person is born in the (4) Lower Worlds.]. But; if that person is reborn in the Human world, Celestial realm of gods,

PAGE-234

and sphere of Higher beings ie:- that person is attaining the Fulfilment of Existence

(= *Gati sampatti*) which is the effect of some Wholesome actions done, then the Unwholesome actions do not get the favourable situations to give their effects. Actually, it is the turn of the Wholesome action to give it's effect. So, the Unwholesome action done by a person are hindered by the Fulfilment of Existence (= *Gati sampatti*), to exert their effect. In other words these are not mature enough to give their effects. The Buddha clearly knows these phenomena.

(Abhi-ttha-2-421.)

2. In next one, there are so many Unwholesome actions in the body and mind continuum. The Unwholesome actions will exert their effects, if that person get Dissolution of

Personality (= *Upadhi vipatti*) like ugly face, deformed body parts and loathsome features. But, if that person has” Fulfilment of Personality” , like good looking face, smart physical body, well formed body parts like a noble high class of beings (= *Brahma*) all of which are due to the effect of some Wholesome action in the past, the Unwholesome action are not in favour to give their effects. Again, if a person is reborn as a slave, but he has

Fulfilment of Personality, he will not be appointed as elephant keeper, hoarse keeper or cowherd;-instead, he is provided with good clothes and rank of treasurer. If that person is a woman, she is provided with good clothes and appointed as higher house keeper or appointed as an intimate personal assistance like” *Sama devi*”.

Next--- Once;- people who ate beef were arrested and taken to the king “*Bhatika*”. for punishment. The king *Bhatika* asked his royal servants, how to punish these people. Since, royal servants could not give any idea of punishment, the king appointed the arrested people as dustmen and ordered to collect all the rubbish in the palace ground. A daughter of one of the arrested people was very pretty and could please everybody. When the king *Bhatika* saw that girl, he took the girl to the palace and appointed as an intimate personal assistance. All the relatives of the girl became

wealthy due to the power of Fulfilment of Personality possessed by that girl. That's right. The Unwholesome actions are not favourable to give the effects in such kind of person who has good personality. That is how the Fulfilment of Personality hinders the effect of Unwholesome actions. The Buddha precisely knows like that.

(Abhi-ttha-2-421-422.)

PAGE-235

The Principle (= Upadesa) ----- According to the statements, described in above *Pali* texts and Commentary, ----- It is to be noted that the effect of the Fulfilment of Personality due to the Wholesome action is attained by the person who had done that action. The other effects of newly manifested time or life (= *Pavatti*) are attained by person who had done the Action as well as other persons related to that person. So, due to that Action, both the person and the related persons of that Action will attain in newly manifested time or life.

3. There are so many Unwholesome actions in the mind and body continuum of a living being. The effects of these Unwholesome actions will manifest; if that person exists at the Dissolution-period (= *Kala vipatti*) like the presence of cruel king or immoral persons. But if that person is reborn due to a certain Wholesome action in the era, when the Buddha attains enlightenment or when the monarch rules the universe or when the good kings rule the country or when there are many noble persons, the Unwholesome actions are not in favour to give their effects in such time of Fulfilment (ie:- Fulfilment with good period = *Kala sampatti*). Actually it is the turn of Wholesome action to give it's effect. So, the Fulfilment of good Period (= *Kala sampatti*) hinders the effect of the Unwholesome actions. The Lord Buddha, precisely knows in that way. (Abhi-ttha-2-422.)

Ekantam kusalasseva okaso = Actually, only the Wholesome deed will be in favour to give it's effect -----To this statement, it is to be considered as follow:--- If some enemies torture or kill a noble person like (Venerable *Mahamoggallana*, Venerable *Mahāṭṭissa*, *Khantivadi* hermit) who is practising Tranquility meditation, Insight meditation, and good conducts like Bodily good conduct, Verbal good conduct and Mental good conduct, it is due to the jealousy or Envy (= *Issa*) arising in the mind of these enemies which makes them to have illusions. It is not due to the Wholesome conducts, practised by these noble persons. Actually the Fulfilment of Diligence (= *Payoga sampatti*) is, by the natural law, can give good effect only. It is not the cause of ill-effects.---- Aiming to this meaning, the teacher of Commentary, mentioned as above. (Mulati-2-210.)

Four Kinds of Action in Group (b)

1. There are so many Unwholesome deeds in the body and mind continuum of a person. The Unwholesome actions can not give effects, if that person exists in the Fulfilment of Destiny (= *Gati sampatti*) like human world, Celestial god realm or Sphere of Fine and Immaterial High beings. But, he may be reborn in the Lower worlds due to Unwholesome action done at sometime

PAGE-236

= He will be born with Dissolution of Destiny (= *Gati vipatti*). In that Dissolution of Destiny ie:- the Lower Worlds; the Unwholesome actions done by that person in the past will give their ill effects in turn. He will suffer in the Hell (= *Niraya*) at a time or He will be reborn in various animal worlds at a time or he will be reborn in the ghost-world at a time. He can not escape from suffering in the Lower Worlds for a long, long time. So, the Unwholesome actions which are hindered to give their effects by the Fulfilment of Destiny, will give their effect when that person unfortunately reborn with the Dissolution of Destiny (= *Gati vipatti*). The Lord Buddha precisely knows that nature.

(Abhi-ttha-2-422.)

2. There are so many Unwholesome actions done by a person. These can not give their effect when that person has Fulfilment of perfect personality. (= *Upadhi sampatti*). But, at a time when he attains Dissolution of Personality (= *Upadhi vipatti*) due to a certain kind of Unwholesome action, he will be ugly, possesses loathsome features and deformities like a fearful ghost. If that person is born by a slave- woman, he will be employed to perform all kinds of dirty works like to remove rubbish or excreta. If that person a woman, she will be employed to perform dirty works like cooking the rice for elephants or other animals. If she lives in a house of good family, she is looked down by other peoples in royal service; like a slave woman of the rich man of *Kotalavapo* village. So, all the actions which are hindered by the Fulfilment of Personality (= *Upadhi sampatti*) give their effects when a person is in the state of Dissolution of Personality (= *Upadhi vipatti*). The Buddha precisely knows in that way.

(Abhi-ttha-2-422-423.)

3. A person has so many Unwholesome actions in his mind body continuum. These can not give the effects if that person has Fulfilment of good Period like he exists at the period when the Buddha attains enlightenment or when the monarch rules the universe or when the good kings rule the country or when there are many noble persons. Although the Unwholesome action can not give their effect at that period, and due to some Unwholesome action if he is born at the period when the cruel king's rule the country or presence of many immoral persons; or when the life span of human are shortened to 10 years or when the human has to earn his living as other animals, and at that time, ie :- at that period of Dissolution (= *Kala vipatti*), since the Wholesome actions are not in favour to give their effects, only the Unwholesome actions will give the effects.

PAGE-237

So, all the Unwholesome actions which are hindered by the Fulfilment of Period will give their ill-effects when a person is reborn in a Period of Dissolution. Like this, the Buddha precisely knows.

(Abhi-ttha-2-423.)

4. A person has so many Unwholesome actions done in the past in his body and mind continuum. These can not give their effects, if that person has good diligence in bodily, verbal and mental action; ie:- that person has Fulfilment of good Diligence

(= *Payoga sampatti*). Although these Unwholesome action do not give their effects at that time, and if that person has Dissolution of Diligence in turn by performing Unwholesome action (= *Akusala kammamapatha*) = 10 kinds of Evil-conducts (= *Ducarita*) like killing the other's life, he will be arrested with properties stolen and, carried to the king. Then the king will sentence him to death after torturing. So, the Unwholesome action do not give their effect when these are hindered by having Fulfilment of Diligence. But, they will give their ill-effects when that person in a state of Dissolution of Diligence (= *Payoga vipatti*).---- In this way, the Unwholesome actions will not give their evil effects if these are hindered by (4) kinds of Fulfilment (= *Sampatti*) and these will give the evil effects only when these get support from (4) kinds of Dissolution. (= *Vipatti*).

(Abhi-ttha-2-423.)

Stop and Think for a Moment

In all living beings, there are Unwholesome actions done in various past existences to some extent. You, noble meditator may also have these in your body and mind continuum. The (4) kinds of Fulfilment have the power to hinder the effects of these Unwholesome actions. But the (4) kinds of Dissolution are inviting the Unwholesome actions with opened doors, so as to be able to give their ill effects.

If, you noble meditator do not want to suffer from the effects of Unwholesome actions, done in the successive Past-rounds of rebirth (= *Atitasamsara*), you should try to fill up the (4) kinds of Fulfilment in your body and mind continuum which are strong enough to prevent these Unwholesome actions in giving their ill-effects of suffering.

Among these (4) kinds of Fulfilment, now in your body and mind continuum, there are:-----

1. Fulfilment of Destiny ie:- you are being born in human world (= *Gati sampatti*),
2. Fulfilment of Perfect Personality ie:- having more or less good appearance and lack of deformities (= *Upadhi sampatti*), and
3. Fulfilment of Fine Period ie:- you attain an era influenced by the Doctrine of the Buddha and presence of noble disciples (= *Kala sampatti*).

Although these (3) kinds of Fulfilment are not in level with those of the period of formation phase of a world cycle (= *Vivatta kappa*) or the period of attainment of Enlightenment of the Buddha or the period, when the monarch rules the Universe; these have some values in their own right.

PAGE-238

So, the only Fulfilment you, noble meditator need is the Fulfilment of Diligence (= *Payoga sampatti*). That is why try: ---

1. To have pure bodily action.
2. To have pure verbal action.
3. To have pure mental action.

So, as to have full purity in all bodily, verbal and mental actions, you have to follow and practise the pure Noble Eight Fold Path (= *Magga*) of the Noble Disciples (= *Ariya puggala*) at your best.

1. Try to have purity in the Path of Morality (= *Sila magga*), like Right Speech, Right Bodily Action and Right Livelihood.
2. Try to erect the Path of Concentration (= *Samadhi magga*), like Right Effort, Right Mindfulness and Right Concentration.
3. Try to have the Path of Wisdom (= *Panna magga*) like Right View and Right Thought. Try to attain the Knowledge of Right View in the (4) Noble Truths. (= *Catusacca sammaditthi nana*).

If you, a Noble Meditator have: -----

1. Purity in Morality (= *Sila*),
2. Clear “Neighbourhood Concentration” (= *Upacara samadhi*) and “Attainment Concentration” (= *Appana samadhi*), and
3. The Knowledge of Right View (= *Samma ditthi nana*) which has true penetrating perception of the (4) Noble Truths ----- Then, these (3) kinds of Noble Training (= *Sikkha*) ie:- Morality, Concentration, and Wisdom (= *Sila, Samadhi, Panna*) is the clean water of the Noble Path (= *Ariya magga*), which will purify your Bodily, Verbal and Mental action. The effort to purify the Bodily action, Verbal action and Mental action is known as Bodily Diligence, Verbal Diligence and Mental Diligence (= *Kaya payoga, Vaci payoga, Mano payoga*). Having such kinds of Diligence is known as the Fulfilment of Diligence (= *Payoga sampatti*). If you attain that Fulfilment of Diligence, you meditator will have complete set of all (4) Fulfilments (= *Sampatti*) like Existence, Personality, Period and Diligence. All these (4) kinds of Fulfilment will prevent the effects of Unwholesome actions done in Past-successive rounds of rebirth. So, if you meditator do not want bad and miserable consequences, try to erect the (3) Noble Trainings in Morality, Concentration and Wisdom which are able to purify your Bodily, Verbal and Mental action. Transform the mind. According to Burmese proverb like “The god never help a man with no diligence”, if the Diligence is less or lost, the Unwholesome actions will take over to give effects and the Wholesome action will not be in favour to give effects. So, take care of this nature.

Explanation with Example

A man pleases the king by performing a work which will give benefit to the country. Then king employs him as a person entitled to a portion of revenue collected from a village or town. But, that man is not satisfied on legally having a portion of revenue collected;

PAGE-239

similar to a monkey which does not know how to open the packet of rice and curry, and discards at a place by cutting into pieces. Similar to that monkey, the man does not know how to collect and use the entitled revenue he collected and he does not follow the general rules. That makes him dissatisfied.

So, that man takes away forcefully all the carts, man-servants, woman servants and the farms of farmers who lives in the village from which he gets revenue regularly. The villagers, thinking that “He is the intimate person of the king” dare not to tell against him.

Again, that man insults the another high official of the royal Court who is the intimate friend of the king. Then, the royal official captures, beats and takes the man to the king and tells the king like “Your majesty,- this fellow destroys your village”. On hearing that, the king sends him to the prison and announces by beating the drum across the town so as to know the persons from whom that man forcefully takes away the properties. The villagers came to the king and complaining about their properties taken by that man. The king is very much angry on hearing the villager's complaints and order to torture that man and finally sentence him to death; and discard the dead body to cemetery. The king also order to take back the handcuffs which fastened round the wrists of that prisoner. Take this example in the mind.

(Abhi -ttha-2-423-425.)

The Explanation in Compared with above Example

If an ordinary person (= *Puthujjana*) reborn in the Celestial realm of gods, due to some Wholesome deed done in the past; that occasion is somewhat like the man employed by the king as the ruler of the village, in above example. If that ordinary man is reborn in the realm of gods, the Unwholesome action does not get opportunity to give ill-effect. That occasion is like, that no body dare not tell against the the man when he forcefully takes away the properties of them in above example. That ordinary person dies in the realm of god and reborn in the hell. That is somewhat like, the man is sent to the prison and tortured by the king. Like the villagers complain of the ill-conduct of the man in the above example, the person in the hell is effected by all kinds of Unwholesome deeds. Removal of handcuffs after death in above example is like the nature that a certain kind of Action passes away, after giving it's effect

PAGE-240

and the effect of another Action will set in the person who is in the hell. That's right. There are so many living beings suffering in the hell for the whole complete world cycle due to the Unwholesome action done which can give its effect for the whole complete world cycle. So, there are numerous and uncountable number of living beings suffering in the hell.

(Abhi-ttha-2-424.)

Four Kinds of Action in Group (C)

1. In this world, some person have done so many Wholesome actions in the past. These actions can give their effects if that person exists in the Good existences = Fulfilment of Destiny (= *Gati sampatti*) like Human world, Realms of god or Spheres of Fine and Immaterial beings. (ie:- If that person exists with Fulfilment Destiny, these Action can give their effects). But, if that person reborn in the Fulfilment of Dissolution (= *Gati vipatti*) like in the Hell or Demon world (= *Asurakaya*) due to a certain Unwholesome action, the above Wholesome actions can not give their effects. Certainly only the Unwholesome actions will give their effects in that situations. That is how the **Fulfilment of Dissolution can hinder the effects of Wholesome action** done by a person in the past. The Buddha precisely know in this way.

2. The next person, has done so many Wholesome actions done in the past. These Wholesome action will give their effects, if that person has good appearance with

Fulfilment of Perfect Personality (= *Upadhi sampatti*). (ie:-These will give their effect, if that person is in the state of Fulfilment of Personality). But, due to a certain Unwholesome action, that person has no Fulfilment of Personality, he is ugly and deformed like a ghost. If that person is reborn in the royal family; due to his deformed body and ugly face, all the people will not coronate him as a king after his father king's death; saying like “what kind of benefit will we get by having such a deformed king ? “. Again if he is reborn in the family of Commander in chief, he will not attain that rank. In this instance, the story of the “King *Dipa*” will be mentioned so as to understand the above statements.

Once, the Great king who was the father of future King *Dipa* had a son who was going to be the King *Dipa*. The Great King told the Queen to ask for the reward she desired, since the king loved her very much. So, the queen got the reward. When, the prince reached at seven or eight year of age, a cock-fight was set up in the palace ground. One of the fighting cock flew and perforated both eyes of the prince. When that prince came of fifteen or sixteen years of age; the queen went to the king and said, “You majesty, you had promised to give me

PAGE-241

a reward at the time of birth of my son, young prince. I got that reward”. Then the king replied like “If so, my queen tell me the reward you want”.

Then the queen requested like “Your Majesty ---- you always give whatever I want before. So, now please coronate my son as the king for that reward.”

At the time, the King replied that “ ---- my dear queen, your son should not be a king since he is missing both eyes”.

“O --- your majesty, if you are not able to give the reward I like, then -- Why did you promise me to give that reward ?” said the queen.

Since the king was miserable on hearing these words from the queen, and replied “h my dear queen, it is impossible to allow the coronation of your son as a king for the whole Island of *Lanka* (= *Lanka dipa*)-instead; I will allow him to rule the small Island of *Naga* (= *Nagadipa*)”. Then the king sent the crown prince to the small Island of *Naga* and he was known as the King *Dipa*. If that prince was not missing both eyes, he would be the king of *Lanka dipa*, which was about (300) *Yojana* (= 316 miles) wide across and he would attain full accompanying royal servants and a lot of prosperities. That is how the Wholesome actions done in the past are hindered to give their effects by the Dissolution of Perfect Personality (= *Upadhi vipatti*). The Buddha precisely knows in this way.

(Abhi-ttha-2-425.)

3. The next person has done so many Wholesome deeds in the past. The Wholesome deeds can give effects, when that person exists in the Fulfilment of good Period (= *Kala sampatti*). (ie:- That person will get good effects if he is reborn in human world with Fulfilment of good period.) But, due to a certain Unwholesome action done in the past, that person is reborn in the Dissolution of period (= *Kala vipatti*) when the cruel king rules the country, the wicked men exist and human life span is very short. The Wholesome action will never give the effect to that person when he exists in the Dissolution of period. That is how the **Dissolution of period**

hinders the effect of the Wholesome deeds. The Lord Buddha precisely knows in this way. (Abhi-ttha-2-425.)

4. The next one has done a lot of Wholesome actions in the past. These Wholesome actions will give their effects when that person exists with Fulfilment of Diligence (= *Payoga sampatti*). (ie:- The Wholesome actions will give their effects if that person has Fulfilment of Diligence by taking Trainings in Morality, Concentration and Wisdom (= *Sila sikkha*, *Samadhi sikkha*, *Panna sikkha*) so as to purify the Bodily, Verbal and Mental actions.)

PAGE-242

But, that person, although exists with Dissolution of Diligence, performs (10) kinds of Unwholesome Course of Action (= *Akusala kamma patha*) like killing the other's life etc;-or he performs all kinds of Unwholesome actions which will make him an immoral person without any dignity. He is avoided even by the people of same immoral class. The people of same immoral class refuse him to marry their daughters. They accuse him as a person with excessive indulgence in gambling, drinking alcohol and sexual misconduct. He is treated as a social outcast. Due to lack of Fulfilment with Diligence (= *Payoga sampatti*), all the Wholesome deeds can not give effects. That is how the Dissolution of Diligence prevents the effect of Wholesome deeds done in the past. The Lord Buddha precisely knows in this way.

So, the effects of Wholesome actions which will give in association with (4) kinds of Fulfilment (= *Sampatti*) are hindered by the (4) kinds of Dissolution (= *Vipatti*)

(Abhi-ttha-2- 425-426.)

Four Kinds of Action in Group (d)

1. Next person has done so many Wholesome actions in the past. These Wholesome actions can not give their effects if that person is reborn in the Dissolution of Destiny (= *Gati vipatti*) like (4) kinds of Lower World (= *Apaya*). But, that person is reborn in the Fulfilment of Destiny like Human world, realm of gods and Fine and Immaterial Sphere due to a certain Wholesome action. In that existance, the Wholesome actions give their good effects one after another in turn. These actions give him rebirth in Human World at sometimes or in Celestial realm of god at a time or in the Fine and Immaterial Sphere at sometimes. This is how the effect of the Wholesome actions done in the past hindered by the Dissolution of Destiny, give their effect in association with Fulfilment of Destiny. (= *Gati sampatti*). The Lord Buddha precisely knows in this way.

(Abhi-ttha-2-426.)

2. The next person has so many Wholesome actions done in the past. These Wholesome action can not give their effects if that person exists in the Dissolution of Perfect Personality like ugly feature. But, that person is reborn with Fulfilment of Perfect Personality due to a certain Wholesome action. He is very handsome with dignity; like a body of Higher Living beings. Since that person exists in the Fulfilment of Personality the Wholesome actions done in the past give their effects. If he is reborn in the royal family, he will be the king, over whelming the other elder brother

princes by thinking like “This prince is brave and handsome and so if he is a king, the people of the country

PAGE-243

will be pleased and prosperous “. So, due to the Fulfilment of Perfect personality (= *Upadhi sampatti*), that prince will be selected as a king by the royal family. If he is reborn in the family of Crown prince, he will be the Crown prince after his father's death or will be Commander in-chief or the richest person in the city. That is how the Wholesome actions which are hindered to give effects by the Dissolution of Perfect personality give their effects if these are in association with the Fulfilment of Perfect personality. The Lord Buddha precisely knows in this way. (Abhi-ttha-2-426.)

3. Next person has done a lot of Wholesome actions in the past. These Wholesome actions do not give their effects if that person is reborn in the Dissolution of Period like existence of cruel king, or immoral persons. But, due to a certain Wholesome action that same person is reborn in the Fulfilment of Period like existence of good and clever king or noble wise men; and at that time the Wholesome actions are favourable to give their good effects. In this instance, the story of Venerable Noble Holy “Maha Sona Arhat “ is worthy to mention.

(Abhi-ttha-2-426.)

The Story of Venerable Maha sona Arhat

(Abhi-ttha-2-426.)

Once, there was a great catastrophe caused by the rebellion of *Brahman Tissa* (= *Brahmana Tissa*) the rebel in the *Lanka* Island (= *Lanka dipa*), now known as Ceylon. At that time there were (12000) of Buddhist monks living in the *Cittala pabbata* (= *Cittala* mountain) Monastery and also (12000) of Buddhist monks living in the *Tissa-mahavihara* Monastery in that *Lanka* Island. In each monastery there were stored offered rice which was enough to eat for about three years. At one time; all these stored rice were eaten up by a herd of large field mice in a single night. Then, the Buddhist monks of *Cittala pabbata* Monastery gathered and decided to live in *Tissamaha vihara* Monastery, thinking that there may be stored rice there. So, the monks leaved the *Cittala pabbata* Monastery.

Again, the monks from the *Tissamaha vihara* Monastery, thinking in similar above way, leaved their monastery and want to *Cittala pabbata* Monastery.

Both groups of Buddhist monks, met each others in a valley and asked the situation on both sides. Only at that time they realised the shortage of rice in both monasteries. Then they decided not to return to the hopeless monasteries

PAGE-244

and all (24000) monks went into the forest in deep valley and ultimately passed away with the Full Extinction of the groups of Existence (= *Khandha parinibbana*) or Death without the groups of existence remaining (= *Anupadisesa nibbana*) in sitting posture.

After the cessation of the rebellion catastrophe, the later Buddhist monks took the sacred relics of these supreme Buddhist monks with the help of the King of the celestial gods (= *Sakka*); and enshrined collectively in a stupa. (Abhi-ttha-2-426.)

In the Original Subcommentary = *Mula tika*, (= Mulati-2-211), it is stated that, all the above accounts are written in the *Mahapaccari* Commentary.

The rebel *Brahman tissa* robbed the properties from the villagers and destroyed the villages. The Buddhist monks after discussion about the occasion, decided to get help from the King of Celestial realm god (= *Sakka*) for prevention of the rebellion, and sent (8) monks to the King of gods. The King of gods replied like “O --- Venerable monks --- I can't prevent the already appeared rebel. So, all of you better cross the ocean and go to the other bank (India). I, your obedient donor --- King of gods will take care of the monks when crossing the ocean”. Then all the monks from surroundings gathered in *Nagadipa* Island and built a large 3 floored raft at the” *Jambukola* Harbour”. Lowest floor of the raft was submerged in the water, the middle floor was for the monks and the top-most floor was used to put the bowls and robes of the monks.

Three great monks known as *Culasiva*, *Isidatta* and *Mahasona* all of them had learnt Collection of Discourses of the Buddha given on account of certain persons (= *Samyuttanikaya*); are the leaders of the group of monks, Venerable *Culasiva* and *Isidatta* requested Venerable *Mahasona* to get on the raft.

“What about you?”won't you follow? asked Venerable *Mahasona* to the two leader monks.

“O --- Venerable *Mahasona*, whether we die on the land or in the sea -- it is same thing to us. So, we won't follow to cross the ocean. But, for you; since the future accounts of the Buddha's Teachings (= *Sasana*) depends on you, you should not die here. So; please follow the group of monks”; replied by the two leaders.

Venerable *Mahasona* refused 3 times to follow with the group of monks across the sea. So, all three great monks went back from the harbour.

Then, Venerable *Culasiva* said to venerable *Isidatta* as” --- Venerable *Isidatta* -- - Buddha's Teaching in the future solely depends on Venerable *Mahasona*. So, take care of *Mahasona*.”

Then, Venerable *Culasiva*, giving some instruction to Venerable *Isidatta* and *Mahasona* and left them after saying” am going to pay homage to the Great Temple” (= *Maha cetiya*)”. After following the pathway to *Mahavihara* Great Monastery for sometimes,

PAGE-245

finally Venerable *Culasiva* reached the Great Monastery. There were no more residing monks in the Great Monastery. The castor oil plants (*Ricinus communis*) were growing thickly on the flat ground around the temple. The temple was covered with mosses and surround by clumps of bushes.

Then, Venerable *Culasiva*, aiming to the living Buddha, payed obeisance at the temple and entered the ruined resthouse built on sacred premises on the west side of the temple. He was sitting there and thinking like --” nce this temple was payed

obeisance by all beings here since it is the enshrined place of the relics of the Buddha who is worthy of offerings and reverential salutation. But now this temple is neglected and not payed obeisance by any body else”.

At that time, a guardian spirit (= *Rukkha deva*) of near by tree assumed the form of a traveller and offered small amount of rice and a block of molasses and asked Venerable *Culasiva* like “..... Venerable Monk..... Where are you going ?”

“O..... my donor..... I am going to south” replied Venerable *Culasiva*. Then the guardian spirit said “If so..... let us go together”.

The Venerable *Culasiva*, said, “..... My donor..... I am very weak since I have not taken foods for long time. So, I can't follow you and please go on and leave me alone”.

But, the guardian spirit taking the alms bowl and robes, and requested he would go along with Venerable *Culasiva*.

Arriving on the bank of *Tissavapi* lake, the guardian spirit offered some fruit juices to the monk. The Great Monk attained some strength after drinking the fruit juice. After shortening the distance of the journey by creation of the guardian spirit they reached a monastery near the *Venu* river, left by some monks. The guardian spirit cleaned up the place and requested Venerable *Culasiva* to take rest.

In the next morning, the guardian spirit offered boiled rice and alms food to the Great monk. Then, the Great monk covered the alms bowl with hand and said “ --- My donor --- keep some foods for you”. But, the guardian spirit told that his journey is not far away and offered all the alms food to the Great monk. After that, the guardian spirit taking the alms bowl and robes, shortening the distance by creation, took the Venerable Monk to the *Jajjara* River.

PAGE-246

Then, the guardian spirit told the Great monk like “You..... venerable Great Monk,..... this is the place where vegetarians live, and I see the smoke from cooking. I will go ahead” and after saying like that, the guardian spirit disappeared and went back. Venerable Great monk *Culasiva* lived there, depending on the vegetarians of that place all the time of the rebellion of *Brahmanatissa*.

Venerable *Isidatta* travelled along with Venerable *Mahasana* and reached *Alanazana* Village. Near the Village, the villagers discarded the outer shells of the unripened (= *Bassia longifolia*) illipe nuts from hardwood tree after taking out the seeds. On seeing the shells of illipe nuts. the Venerable *Isidatta* Great Monk told like “..... Monk *Mahasana*..... I think, we will get alms food here” and took out the alms bowl from the sling and paused at that place to receive offerings of food. The children when seeing the monks thought as “with these outer shells of the illipe nuts, there may be some benefits for the monks”, and then they cleaned up the dirt from the shells, and put into the alms bowl. Two Venerable monks took up these as foods. These shells of illipe nuts provided nourishment for about seven days to these two Great monks.

When the two Great monks continued to travel, they reached *Coriya* Lake, where people picked up the white water-lily flowers and discarded the stalks of white water lilies. Then, Venerable *Isidatta* Great monk took up the alms-bowl from the bowl sling, saying “..... Monk *Mahasana*..... I think we will get some alms-food here”

nd paused to receive offerings. When young villagers saw the two monks, they clean the stalks of water-lilies and put into the alms-bowl as offerings. The two great monks ate these stalks, and the white water lilies stalks provided them nourishment for two weeks.

Then, the two Great monks continued to travel and reached the village of vegetarians. At that village, the parents before going to the farm gave instruction to their daughter like “..... my dear daughter, if a venerable monk came to our house for alms-food; don't let him go round the village for food; instead ask where that monk temporarily stay” --- then they left to the farm.

When that young girl saw the two Great Monk, she took the alms-bowl and requested the monks to rest in the house. There was no rice in the house at that time. Then the young lady gathered together the sheaths of Jeweller's weights plant (*Abrus precatorius*) stems of banana plant with stalks, and leaves of Jeweller's weights plant then chopped up into small pieces with a small knife. Then she made small pieces of leaves, sheath and stalks into 3 fistful-sized balls. She offered one ball to Venerable monk *Isidatta* and next one to Venerable monk *Mahasona*. Since, Venerable Monk *Isidatta* is senior in years of monkhood, the young lady aimed to offer the last ball of vegetables into the bowl of Venerable *Isidatta*. But as soon as her hands stretched to the bowl of Venerable *Isidatta*, her hands were spontaneously withdrawn from that bowl and instead, the last ball of vegetables was spontaneously offered into the bowl of Venerable *Mahasona*.

PAGE-247

Then, Venerable *Isidatta* said like” How much effect will be given by that action if it is in association with Fulfilment of Period ? But now it is just only able to give the effect of fistful-sized vegetable ball in this time of rebellion of *Brahmatissa* rebel”. After taking up vegetable balls as meal the two Great monks left the house and went back to their dwelling place. The young lady told about all events and dwelling place of the two monks when her parents returned from the farm. Then the two parents went to the two great monks, payed obeisance and requested like “..... Venerable monks..... we get some nourishment here,..... we will offer you these alms-food. So..... please stay here and receive our offerings”. From that time, the two Venerable monks live there for the whole period of the dangerous catastrophe of rebellion.

Some times later, the rebel *Brahmatissa* died. The King *Pitumaharaja* ruled the country again. After hearing the good new that “ Rebellion of *Brahmatissa* is already abolished and the country, becomes prosperous again” The monks who took refuge on the other side of the ocean (ie:- India), returned to Ceylon and arrived at *Mahāñṭha* harbour. Then they asked the dwelling place of *Mahasona* the great monk and went to him. At that time Venerable *Mahasona* monk reached *Mandalarama* Monastery of *Kalaka* village where 500 monks lived. There were above 700 houses in that village. At night time, some celestial gods declared the people like “ Venerable *Mahasona* the great monk, now arrives at *Mandalarama* monastery where 500 monks take as dwelling place. So, every body of the village better offer cloth of 9” x18” length and alms food worthy of one kyat-money.

Next day, all the visitor-monks entered the *Kalaka* village for alms-foods. The people of the village offered boiled rice after giving them place to sit. Among the monk audience, Venerable *Tissabhuti* of the *Mandalarama* monastery was the most senior in years of monkhood, so took the place of chairperson of the meeting. At that time, one of the old male donor, paying obeisance to Venerable *Tissabhuti* monk and asked “which one of the monk-audience is Venerable *Mahasona* monk?”. Among the monk-audience; Venerable *Mahasona* was most junior in years of monkhood, and sitting at the periphery of the monk-audience. Venerable *Tissabhuti* monk pointing to Venerable *Mahasona* and replied to the old donor like “..... old donor..... Venerable *Mahasona* monk is that person”. On knowing that, the old donor took the alms-bowl of *Mahasona* monk after paying obeisance. But, Venerable *Mahasona* refused to give his alms-bowl.

The reason of not giving the alms-bowl was that, Venerable *Mahasona* monk considered, how the old donor knew him and thought like “ Somebody who knows me, tell ahead the presence of me in this monk-audience.” So, by thinking like that, Venerable *Mahasona* did not give the alms-bowl to the old male donor. (ie:- Thinking that one of the monk told ahead.).

PAGE-248

Then, Venerable Great monk *Tissabhuti* replied like “..... Venerable *Sona*..... like you do not know us; all the monks of the audience do not know you. But; the celestial realm gods know who is the person with glory in the monk and prepare the alms -food already for you. So, please give the alms-bowl to the old male donor and make companion monks in residence pleased with your glory and honour.”.

After hearing that, Venerable Great *Mahasona* gave the alms-bowl to the old donor. Then, the old donor took the alms-bowl and offered alm-foods worthy of one kyat money and a bowl Sling made from 9” x18” length of cloth. The other donors took the alms-bowls of other monks and again offered as above, but to Venerable *Mahasona* only. So, all the cloths and alms-food from (700) houses of that village were only offerd to Venerable *Mahasona*.

Then, Venerable *Mahasona*; properly shared the offerings among the monk-audience; left the village and continue to travel to *Mahavihara* monastery. Finally he reached that monastery. He payed obeisance to *Mahabodhi* banyan tree and *Mahacetiya* (Great temple), after washing the face. Then he entered the *Thuparama* town together with the monk audience and attained so many alms-food from the south gate of the town to the *Valanjanaka* dwelling edifice. From that time Venerable *Mahasona* attained uncountable properly prepared offerings, gift and fame. ----- So, even the outer shells of the illipe nuts and stalks of the white water lilies are the rarity of occurence (= *Dullabha*) at the time of Dissolution of Period. On the contrary, a lot of offerings, gifts and fame are attained at the time of Fulfilment of Period (= *Kala sampatti*).

(Abhi-ttha-2-426-430.)

The Story of Venerable Holy (= *Arahat*) *Vattabbaka nigrodha*

The story of Venerable *Vattabha nigrodha* is also mentioned in the Commentary. At the time of rebellion of *Brahmana tissa*, Venerable *Vattabbaka nigrodha* was a novice (= *Samanera*) of the Buddhist Order. Venerable novice *Vattabbaka nigrodha* and his preceptor (= *Upajjhaya*) who was the constant guide and teacher of him, did not follow to the other side of the ocean (= to India). They decided to depend on the vegetarians of the villages in the remote borders of the country (= *Paccanta*) for their foods. So, they went to these villages. Not having any meal for one week, they reached a village, where the novice saw a toddy palm = palmyra palm (*Borassus flabellifer* (= *tala*) with toddy-palm nuts. Then, the novice told his preceptor like “..... my Venerable teacher.... just wait for a while.... I will climb the toddy-palm and pick up those ripe toddy-palm nuts”. The old monk replied like “.... My novice, since you are weak, don't climb the toddy-palm tree”.

But, the young novice climbed up the toddy-palm tree with a knife in hand after saying “.... My teacher, I will climb up”. On top of the palm tree, he tried to cut a bunch of toddy-nut. On cutting the bunch; the blade of the knife,

PAGE-249

dislodged from the hilt and dropped to the ground. Then the old teacher thought, “This young novice wearily climb up the tree”. “ Now; what will he do?”. But the novice was a clever person. He made twines from fibers, obtained by cutting the stalk of toddy palm frond into strip, and tried to get a long rope by tying up the twines. Then, he fastened the handle of the knife with the frond rope and dropped to the ground. After that, he humbly requested his preceptor like “.... my teacher, it is better if you put the blade of the knife into the handle”. On hearing that, the preceptor monk, put in the blade of the knife into the handle and thinking like “This young novice is very clever in expedience”.

Then the young novice took up the knife and cut the palm-nuts from the bunch. The senior monk told to drop the knife first and he peeled off the sheels of the nuts; and said”.... Young novice, you eat first since you are weak and very tired”.

“..... Venerable teacher..... I never take any meal before you” replied the novice and he cut the nut sheels taking out the bowl from the sling, put the seeds into the bowl and obediently served to his preceptor monk first. Only after then, he ate the seeds. So long as the toddy-palm were there, the novice and his teacher stayed there and lived on the palm-nuts. When there were shortage of palm-nuts there, the novice and his teacher continued to travel and reach a monastery discarded by some monks, near a village where vegetarians lived. The novice cleaned up the monastery and made a dwelling place for his teacher. Then, the preceptor monk gave some admonishments to the novice and entered the monastery. The novice thought like : -----

Anayatanenatthanam attabhavanam pamanam natthi, Buddhanam upatthanam karissami.
(Abhi-ttha-2- 431.)

“There are uncountable living bodies, who die from various causes and who die at various places (= There are uncountable lives in the rounds of rebirth of a living beings, where death occur without any reasonable cause and at any place). So, from now, I am going to give personal attention and service to the Buddha” and thinking in this way, he cleaned up thick grasses and bushes growing on the flat ground around

the temple. Since, the novice was starving for seven days, he was very weak and fell down. The novice, even after falling down on the ground, continued to clean up the grasses.

At that time, some villagers came back from the forest taken some vegetables, and honey. When they saw the grasses moving to and fro, they thought, “s that moving object an animal?” and they finally found the novice falling on the ground. “what are you doing..... you, young novice?” They asked.

PAGE-250

“O.... donors,..... I am cleaning the grasses growing on the flat ground of the temple” replied the novice.

The villager then enquired like”.....young novice, is there any monk with you?”.

“Yes, of course.....there is my preceptor monk in that dwelling place” replied the novice.

Then, the villagers offered some honey and said “..... young novice, please offer the honey to your teacher first and then take some for you.”

Then the villagers went back to the village after saying like “..... Young novice, we will drop some leaves bit by bit along the way to our village and please follow our village by seeing these bits of leave along the way, taking your preception monk with you”.

The novice took the honey to his teacher. Waiting outside the dwelling room, the novice said “..... Venerable teacher, I pay homage to you”. On hearing that, the preceptor monk thought like “The young novice came to me with burning sense of hunger”nd remained silent. Then novice repeated like”..... Venerable teacher, I pay homage to you”. At that time the preceptor monk asked”..... you, young novice why are you disturbing the old weak monk taking rest for a while ?”nd opened the door.

Then, the preceptor asked,”You, young novice, what do you have now?.”.... my teacher villagers give me some honey. So, it's time to take up honey” , replied the novice.

Then the preceptor instructed “Young novice.... It is better to make honey juice to drink, rather than taking it as such”. Then, the novice prepared honey juice and served to his teacher. After having honey juice, the preceptor asked whether the novice enquired about the dwelling place of those villagers. The novice told like”.... Venerable teacher,..... they, themselves told me the route to their village”.

One hearing that, the preceptor decided to go there at that moment, thinking that they would be tiresome, if they go next morning. Then the novice took the alms bowl and sling, and went to the village. At that night, they slept at a place not far away from the village.

PAGE-251

At that night, the novice thought like “ Since I attained the novice-hood, I never sleep near the village where I can't take austere practice of residence in a rustic monastery”. [ie:- He always sleep in a sylvan monastery situated at least a thousand yards from the nearest village = *Arannakanga dhutanga*]. So, the novice took the bowl and went into the forest, a thousand yards away from the village where he spent the whole night by taking austere practice of residence in a rustic monastery.

When, the preceptor did not see the novice sleeping, he thought that the novice was arrested and taken away by the human flesh eaters of that place.

Next morning, at dawn, the novice took a bowl of water for face washing and a twig, frayed at one end to clean the teeth and came back to the village.

Then the preceptor monk asked “where are you going last night, you young novice?” You make me worried and thinking in a rambling way”. “ So, for that wrongful behaviour, you should carry sand and fetch water as punishment (= *danda*)”.

“Yes.... I will carry sand and fetch water as punishment” replied the novice. The preceptor monk, after washing the face, put on robe and went to village with the novice. The villagers offered fruits, nuts and leaves. After taking these as meal, they went back to the monastery. At the monastery, the novice washed the feet of his teacher with water.

Again, the preceptor monk asked “where are you going last night, you young novice?” “You make me worried and thinking a rambling way”.

Then, the novice replied like “You venerable teacher, since after attaining the novice-hood, I never sleep near the village where I can't pursue austere practice of residence in a rustic dwelling place. So, I went into the forrest and slept there”.

“If so, young novice, you should not be punished. Instead, I should carry sand and fetch water as punishment” said the preceptor monk. After living there for sometime, at one day, the preceptor monk warned the novice like : -----

“O..... young novice, I am very old. I don't know what will happen to me later”. So, you should try to take care of yourself”. [You should live by taking care of yourself. I am very old. I can't do anythings; and I can't take care of myself since I am old = I can't try further

PAGE-252

to attain the Fruition of Holiness (= *Arahatta phala*.) ---- that was what the preceptor monk wanted to say.]. Since, the preceptor already attained the Fruition of Non-Return (= *Anagami phala*), he foresaw that he would be eaten by human flesh eaters in future. So, he warned ahead the novice to take care of himself. (Mulati-2-211.)

The Venerable guide monk was the noble one who already attained the Fruition of Non-Return. (= *Anagani puggala*). For sometimes later, the people who ate the human flesh (= *Manussa khadaka*), killed him, and ate.

After the death of his guide monk, the novice lived by taking care of himself. After the Rebellion of *Brahmanatissa* was abolished, the novice took another new

guide monk and lived. [So, note that a novice can take another new guide monk when their first teacher of ordination ceremony passed away.]

The novice, when he came of age, was ordained as a Buddhist monk. He learnt *Pali* scriptures of Buddha's teachings (= *Buddha vacana*). He was able to relate the three repositories of Buddhist Scriptures (= *Tipitakattaya*) from memory, and later became Venerable Buddhist monk known as "Tipitakadhara Vattabbaka nigrodha".

At that time, the King "Pitumaharaja" reigned the Island of "Lanka dipa". All the monks came from other side of the ocean (ie:- India) asked the dwelling place of Venerable *Vattabba nigrodha*, and accompanied him. Then Venerable *Vattabba nigrodha* travelled to the Great Monastery (= *Mahavihara*) with these follower monks and pay obeisance to Great Banyan Tree, Great Temple and *Thuparama* Temple. Then they entered the town. As soon as Venerable *Vattabbaka* reached the south gate of the town, Ensemble of three robes for a monk (= *Ticivara*) appeared at (9) places; and he obtained so many properly prepared offerings.

So, the toddy-palm nuts, fruits and leaves are the Rarity of occurrence (= *Dullabha*) at the time of Dissolution of Period (= *Kala vipatti*). But, at the time of Fulfilment of Period (= *Kala sampatti*) a lot of offerings, gifts and fame are easy to obtain.

That is how, although the Wholesome actions done in the past are prevented to give their effects by Dissolution of Period, these are favourable to give their effects at the time of Fulfilment of Period. ----- The Buddha precisely knows in this way.

(Abhi-ttha-2-430-433.)

4. The next person also has so many Wholesome actions done in the past. These Wholesome actions

PAGE-253

are prevented to give their effects when that person is in the state of Dissolution of Diligence (= *Payoga vipatti*). (That person with Wholesome deeds, does not practise in three kinds of Trainings = *Sikkha*, like Morality, Concentration and Wisdom so as to purify the Bodily, Verbal and Mental actions, instead he performs (10) kinds of Evil conducts (= *Ducarita*) with Manifestations of Immoral actions (= *Akusala kammapatha dhamma*). He also performs immoral action led by Wrong view (= *Miccha ditthi*). At that time, that person is said to be in the state of Dissolution of Diligence, and Fulfilment of Diligence is abolished. If that person exists in the Dissolution of Diligence due to Evil-Conducts as described above, the Wholesome actions done in the past are not favourable to give their good effects.)

But, if that person who had done Wholesome actions exists in the state of Right Diligence (= *Samma payoga*), and performs good bodily, verbal and mental actions, observed the five or ten sets of precepts, even the King will send his daughter-princes with numerous prosperities to that person at the time of Fulfilment of Diligence. The people send to him so many gold, silver and rubies or chariots, thinking that he deserves these various gifts.

If that person, is reborn in the human world at the time of Fulfilment of Period with Fulfilment of Diligence, and attains monkhood or novice (ie:- If he is a novice or a monk), he will have a large crowd of monk audience and have great power and glory

(= *Anubhava*). This is one of the stories.

The Story of Venerable Culasudhamma Monk

Venerable *Culasudhamma* Monk who often lived at *Girigamakanna* place was cherished and revered by the King *Kutakanna*. Once, the King *Kutakanna* lived at *Uppalavapi* region, he requested *Culasudhamma* Great Monk to visit to him. The great monk came and lived at the *Malarama* Monastery. Then the king asked the mother of the great monk about the great monk like ---"what does the great monk like to eat ?". The mother of great monk replied --"... Your majesty..... he likes fruits". So, the King *Kutakanna* took some fruits and offered to Venerable *Culasudhamma*. But, the king dared not to look at the face of revered great monk.

On leaving the monastery, the king asked his queen like--"... my dear queen, what is the personality of the Venerable great monk as a whole?".

"Your majesty..... even you, who is the brave and powerful man dare not to look at the face of the great monk, what about me? I also dare not to look at the face of the great monk". replied the queen.

Then the king *Kutakanna* said like" dare not to look at the face of the great monk who was once the son of a rich man who has to pay taxes to me, the king of the country"; and continued to declare like --"... my people, how great the glory and power of the Lord Buddha's Teachings (= *Sasana*) is !". After saying like that, the king whacked with an open palm over the crook of the elbow of the other arm folded across his chest in a jubilant mood.

(Abhi-ttha -2-433.)

PAGE-254

"The Story of Venerable Culanaga Monk, Bearer of the Three Repositories of Buddhist Scriptures"

(*Tipitakadhara Culanaga Thera*)

Venerable *Culanaga* monk bearer of the three Repositories of Buddhist Scriptures was also cherished and revered by the king *Kutakanna*. One day the great monk had infection of the pulp of one finger. The king *Kutakanna* went to the monastery to pay obeisance to the great monk. Since, the great monk was revered by the king, the king kept the finger of the great monk in his mouth. The abscess of the finger burst in the mouth. Since the great monk was cherished one, the king did not spit out the pus. Instead, he swallowed like pure drinking water.

Later, the Venerable *Culanaga* monk, died on the royal bedstead. The king *Kutakanna*, came to there and put the bed pan on his head. (= That bed pan was used by the great monk and it contained excreta of the monk before death.). Then he wept loudly and shouting like: ---

"The axle of the cart (ie :- Doctrine of the Buddha) is broken, the axle is broken", and running around the town. What is the nature of running of the king with bed pan over the head ?

It is the way of noble practice of Right Diligence (= *Samma payoga*).

(Abhi- ttha-2 -433.)

Venerable *Culanaga* Monk, bearer of the three Repositories of Buddhist Scriptures had Right Diligence (= *Samma payoga*) of practising three fold of Training (= *Sikkha*) so as to purify the bodily, verbal and mental actions. The king *Kutakanna* had a deep reverence for that Right Diligence and so he ran about with bed pan on his head. By that action, it is evident that Venerable *Culanaga* Monk; bearer of the three Repositories of Buddhist Scriptures had deeply reverent Right Diligence. (Mulati-2-211.)

That is how, the Wholesome actions, the effects of which are prevented by Dissolution of Diligence will give their effects at the time of Fulfilment of Diligence. The supreme Buddha precisely knows in this way.

So, the Wholesome actions when prevented by (4) kinds of Dissolutions (= *Vipatti dhamma*), will give or favourable to give their effects only when there are (4) kinds of Fulfilment (= *Sampatti dhamma*) or only when these are in association with (4) kinds of Fulfilment. (Abhi-ttha-2-433.)

The Marvellous Example (*Abbhutopama*)

Based on the possibility of giving effects in association with (4) kinds of Fulfilments (= *Sampatti*), the following marvellous example (= *Abbhutopama*) was described by old Commentary teachers.

Once, a king put his counsellor in prison due to an insignificant guilt. The relatives of that counsellor did not complain about the counsellor when the king was in anger. But, when the anger was clear, they complained the king that

PAGE-255

the counsellor was free from guilt. Then the king released the counsellor from the prison and employed again for original official position. From that time, that counsellor received uncountable amount of gifts from the various regions of the city. Since, the gifts and money were too much, the treasurers of the consellor could not accept further.

In the above marvellous example, consider the similarity of the occasion of that consellor imprisoned by the king due to insignificant guilt; to the occasion of an ordinary person suffering in the hell.

Next, consider the similarity of the occasion of releasing and employing original rank to that counsellor by the king; to the occasion of an ordinary person feeling pleasures in the Celestial realm of gods.

Finally consider the similarity of the occasion that the treasurers of the counsellor could not further accept the gifts and prosperities; to the occasion of giving effects by the Wholesome actions done in the past, when these are favourable by (4) kinds of Fulfilments (= *Sampatti*). The Wholesome actions done in the past when favoured by the (4) kinds of Fulfilment, these can give the effects of existing to and fro between the human world and Celestial realms of gods for about the period of one hundred thousands (100000) complete world cycles (= *Mahakappa*) and finally reach the *Nirvana* = *Nibbana* (= liberation from the endless rounds of suffering.).

**Explanation According to the Pali-Scripture of the Path of Analytical Intellect
(= *Patisambhida Magga*)**

Now, the second Physical and Mental Power = Wisdom (= *Dutiya bala nnana*) of the Buddha is already explained in terms of Pali-Scripture in the Second book (= *Vibhanga*) of the Division of the Ultimate Realities (= *Abhidhamma Pitaka*). Further explanation will now be given according to the Pali-Scripture of the Path of Analytical Intellect (= *Patisambhida magga*) (Khu-9-271.)

**(1) The Action done in the Past already Given it's Effect in one of the Past Live
(*Ahosi kammam ahosi kammavipako*)**

The action which was done in the past occurred in the past life. That action had already given it's effects in the past life. That kind of action which occurred in the past life and gave it's effect in the past life; is known as “*hosi kammam ahosi kammavipako*”e:--- occurred in the past life and gave it's effect in one of the past life.(Abhi-ttha -2-434.)

**(2) The Action that Has Been, But Ineffectual
(*Ahosi kammam nahosi kammavipako*)**

A person has done so many Actions like “action ripening during the present life” (= *Ditthadhamma vedaniya kamma*) etc etc. When performing an Action, first Impulsion Consciousness among the seven Impulsion Consciousness occur, can give it's effect or ripens during the present life and known as Action ripening during the life-time (= *Dittha dhamma vedaniya kamma*). The seventh Impulsion Consciousness can give rise to Action ripening in the next birth (= *Upapajjavedaniya kamma*). And, the middle (5) Impulsion Consciousness can give rise their effects from the third rebirth to later births until the person is liberated from the endless rounds of suffering (= *Nirvana*). It is known as the Action ripening in later births (= *Aparapariya vedaniya kamma*). In performing single act of giving (= *Dana*) so many first Impulsion Consciousness, seventh Impulsion consciousness and middle (5) Impulsion Consciousness arise. That is, so many times of thought processes = Cognitive processes (= *Vithi*) occur at that time. So, at the time of performing the act of giving (= *Dana*),

PAGE-256

so many Actions ripening during the life-time, Actions ripening in the next birth and Actions ripening in later births. (= *Dittha dhamma vedaniya*, *Upapajja vedaniya*, *Aparapariya vedaniya*) occur.. If a person performs so many acts of donation, uncountable numbers of Actions will occur. Note in the same way in performing other Acts of Morality, and Meditation. In this instance, the Act of Meditation is meant for the Actions done in realms of sensuous pleasures = *Kamavacara kamma*). (For about

Actions in the Fine-material and Immaterial Sphere = *Mahaggata kamma*, it is mentioned in Seperate section.)

Among the numerous Actions ripening during the present life (= *Ditthadhamma vedaniya*) if one of the Action already given it's effects in the present life, the other Actions ripening during the life-time will not give their effects. Similarly, among the Actions ripening in the next birth (= *Upapajja vedaniya kamma*), if one of the Actions ripening in the next birth has already given the effect of conception in the next birth, the other remaining Actions ripening in the next birth will no longer give their effects. Among the numerous Heinous Actions, (= *Anantariya kamma*) if one Heinous Action gives it's effect of existence in the Hell (= *Niraya*), the remaing Heinous Actions will not give the effect of conception in the Hell. (= *Niraya patisandhi*). If one Heinous Action gives it's effect of conception, the remaining Heinous Actions secondarily support that effect. (Ma-ti-3-374.). Among the (8) kinds of attainment of Mental Absorptions (= *Samapatti*), if one attainment (= *Samapatti*) gives it's effect of existence in the Fine and Immaterial sphere, the remaining Attainments (= *Samapatti*) will not give their effects. To all these kinds of Actions, the term “The Action that has been, but Ineffectual” (= *Ahosi kammam nahosi kammavipako*) is given. (Abhi-ttha-2-434.)

A person has done so many Wholesome and Unwholesome actions in the past. Depending on the noble friends (= *Kalyanamitta*), Noble ones (= *Ariya puggala*) like the Buddha, that person attains the Fruition of Holiness (= *Arahatta phala*), these Actions will not give their effects in that person's body and mind continuum after his ultimate passing away. (= *Parinibbana cuti*). To such kinds of Actions also; the term “That Action has been done, but Ineffectual” (= *Ahosi kammam nahosi kammavipaka*) is given.

(Abhi-ttha-2-

434.)

(3) The Action done in the Past, giving the effect in the Present life.

(*Ahosi kammam atthi kamma vipako*)

A certain Action was done in the Past Life, and it is giving it's effect in the Present Life. It is known as “*hosi kammam atthi kamma vipako*”.

(Abhi-ttha k- 2-434.)

(4) The Action that Has Been, but not giving Effect

(*Ahosi kammama natthi kamma vipako*)

A certain Action was done. Similar in case of No (2):- “**The Action that has been, but Ineffectnal** (= *Ahosi kammam nahosi kamma vipako*)”, that Action has no effect. (ie :- The Action ripening during the life-time which does not give it's effect, among numerous Action ripening during the life-time;-- the Action ripening in the next birth which does not give it's effect, among numerous Actions ripening in the next birth;-- the Heinous Action = *Anantariya kamma* which does not give it's effect of existence in the hell, among the numerous Heinous Actions;--and the Action of attainment = *Samapatti kamma* which does not give it's effect, among the numerous Actions of attainment). That kind of Action is known as “The Action arises, but produce no effect” (= *Ahosi kammam natthi kamma vipako*).

(Abhi-ttha-2-434.)

PAGE-257

(5) The Action had been done, will give effect later

(*Ahosi kammam bhavissati kammavipako*)

A certain kind of Action had been done in one past-life. It will give it's effect in future time. Such kind of Action is known as “The Action had been done, will give effect later” (= *Ahosi kammam bhavissati kammavipako*). These are also known “actions ripening in later births” (= *Aparapariya vedaniya kamma*) (Abhi-ttha-2-434.)

(6) The Action that has been, But Ineffectual in Future time

(*Ahosi kammam na bhavissati kamma vipako*)

A certain Action has been done in the Past- life. That Action as described above will not be able to give it's effect in Future- time. This kind of Action is known as “*hosi kammam na bhavissati kammavipako*” = Action that has been done, but not be able to give it's effect. (These are the Actions ripening in later births = *Aparapariya vedaniya kamma*, done in numerous Past-lives; but are not able to give their effects in the Future after ultimate passing away of that person. (Abhi-ttha-2-434.)

The above described Actions are (6) Actions done in the Past. Now, (4) kinds of Actions performed in the Present Life which are described in the *Pali*-scripture of the Path of Analytical Intellect (= *Patisambhida magga*) will be mentioned.

(1) The Action is there, the Effect of that Action is still there

(*Atthi kammam atthi kamma vipako*)

A certain Action is performed in the Present life, and it is still giving it's effect.

That is “*Tthi kammam atthi kamma vipako*” (= the Action is there, the Effect of which is still there). (Abhi-ttha-2-435.) (This is the Action ripening during the life time = *Ditthadhamma vedaniya kamma*).

(2) The Action is there, the Effect of that Action is not there

(*Atthi kammam natthi kamma vipako*)

A certain Action is done in the Present Life. Among these Actions there are so many Actions, ripening during the Present life time (= *Dittha dhamma vedaniya kamma*). The Action which may give it's effect becomes ineffectual. That is, the Action which is still there, but ineffectual (= *Atthi kammam natthi kamma vipako*). (That is; other Actions among the numerous Actions ripening during the Present time (= *Dittha dhamma vedaniya kamma*) which are not favourable to give their effect, if one of the Action ripening during the life-time has already gives it's effect.).

(3) The Action is there, it will give it's Effect in Later

(*Atthi kammam bhavissati kamma vipako*)

A certain Action is done in Present-life and it will give it's Effect in Future-time. That Action is known as “The Action in there, will give effect later” (= *Atthikammam bhavissati kamma vipako*). (Abhi-ttha-2-435.)

PAGE-258

(4) The Action is there, the effect will not be given
(*Atthi kammam na bhavissati kammavipako*)

A certain Action which is done in the Present life is still there. But, it will not be favourable to give it's effect in Future time. That kind of Action is- “The Action in there, the effect will not be given” (= *Atthi kammam na bhavissati kamma vipako*).

(Abhi-ttha-2-435.)

Among the so many Actions ripening in the next birth (= *Upapajja vedaniya kamma*), if one of them gives the effect of conception (= *Patisandhi*), the remaining Actions ripening in the next birth will not give their effect of conception. Similarly, among the so many Actions ripening in later births (= *Aparapariya vedaniya*), if one of them gives the effect of conception, the remaining Actions ripening in later births, will not give their effects of conception. If one of the Actions of attainment (= *Samapatti kamma*) done in the present life gives the effect of conception, the remaining Actions of attainment will not give their effects. Among the so many Heinous actions, if one of them gives the effect of conception, the remaining Heinous actions will not give their effects of conception. If a person is going to pass away ultimately (= *Parinibbana cuti*); in future, all the Actions done are not able to give their effects after his Ultimate passing away. These (4) kinds of Actions are the (4) kinds of Present-time Actions. Again, the Buddha continues to state (2) kinds of Future-time Actions.

(1) Future Action will be there, and will give Effect in Future-time
(*Bhavissati kammam bhavissati kammavipako*)

A certain Action by itself will occur in future and the effect of that action will occur in Future. That kind of Action is known as “The Future Action will be there and will give the effect in Future (= *Bhavissati kammam bhavissati kammavipako*).

(Abhi-ttha-2-435.)

(2) Future Action will be there, but it will not give effect in future
(*Bhavissati kammam na bhavissati kamma vipako*)

The Action by itself will occur in Future, but it won't give any effect in Future-time. Such kind of Action is known as Future Action without Future effect (= *Bhavissati kammam na bhavissati kammavipako*). (Abhi-ttha-2-435.)

Now, it is understandable by referring same method.

The **innate Knowledge of perception that whether the Consequences will be morally Wholesome or Unwholesome** (= *Kammantara vipakantara janana nana*), possessed by the Perfectly Enlightened Buddha (= *Samma sambuddha*); also known as the One Who Has Trod the Path of Reality (= *Tathagata*), and who knows all accounts of various kinds of Action and various Effect of the Actions, is unshakeable by others. So, it is known as **Second Physical and Mental Power (= Wisdom) of the Buddha** (= *Dutiya bala nana*).

(Abhi -ttha-2-435.)

Now, you noble person have already known following two facts: -----

1. The (4) Fulfilments (= *Sampatti*) can prevent the Unwholesome actions to give their effects and they give support and favour to the Wholesome actions to give their effects, and

PAGE-259

2. The (4) Dissolutions (= *Vipatti*) can prevent the Wholesome actions to give their effects and, favour and support the Unwholesome actions to give their effects.

Now, discussion on the Action causing Fulfilment or Dissolution will be mentioned.

The Seed and The Fruit

Yadisam vapate bijam, tadisam harate phalam.

Kalyanakari kalyanam, papakari ca papakam.

(Sam-1-229.)

If you sow (= *Vapate*) pure stock (= *Yadisam*) of seeds (= *Bijam*), you will get (= *harate*) good quality (= *tadisam*) fruits (= *phalam*). A person who performs good conduct (= *Kalyanakari*), will get (= *labate*) good result (= *Kalyanam*). A person who performs evil conduct will get ill result.

Bitter seeds from the neem or margosa tree (*Azadirachta indica*) and the sponge gourd (*Luffa pentandra*), will never produce sweet and tasty fruits and only give fruits of unpleasant taste. Similarly, evil conducts (= *Ducarita*) like Bodily evil conduct etc, will not give good effect which is similar in nature to pleasant taste and these will give only ill effect which is similar in nature to bitter taste.

Apart from that---the seeds of sugar cane and fragrant rice will produce sweet sugar and tasty grains and will not give bitter taste. Similarly, good conducts (= *Sucarita*) will give only good effect. They will not give ill effect which is similar in nature to unpleasant taste.

(Abhi-ttha-2-419.)

So as to deeply understand this phenomenon, the Discourse of *Culakamma vibhanga* will be mentioned.

(Ma-3-243 -249.)

PAGE-260

Short Discourse on Analysis of Actions

(*Cula kamma vibhanga sutta*)

At one time, the Blessed One, Lord Buddha was dwelling at the monastery of *Anathapindika* in *Jeta Grove* near the city of *Savatthi*. At that time, *Subha* the lad, son of *Brahmin Todeyya* approached the Buddha and engaged in polite and pleasant conversation with the Buddha. After that, he took suitable place to sit and asked the Buddha some questions. Before mentioning the questions of *Subha* the Lad, something about *Brahmin Todeyya* will be described first.

Subha the Lad (= *Subha manava*) ----- That young man had good looking appearance and respectful attribute. Due to his pure appearance and body parts he was named “*Subha*” = Purity. When he was young, he was known as “*Manava*” = a lad.

When became of age, he was also named as” *Subha* the Lad”. He was a precious son of the *Brahmin Todeyya*. That *Brahmin Todeyya* was the Court *Brahmin* who officiated at royal ceremonies and was the advisor of the King *Pasenadikosala*. He was known as *Todeyya*, because he was entitled by the king, to a portion of revenue collected from a village which was known as”*Tudi* village” , near the city of *Savatthi*. Although he possessed a lot of prosperities amounting to (870) millions, he was a very very stingy rich man. He kept in mind that “To whom, who are all the time offering, shortage of prosperities is possible”. So, he never offered anything to any body else. He always taught his son not to donate by saying like --”The brownish stone (probably; jasper) used to smear around the eye, will be thinned out when repeatedly ground. Similarly, the prosperities will become less; if a person is offering all the time. So, my son, a wise man who is married and living in the human world, should **save the prosperities like the termites and the bees** (ie:-- these insects always collect the foods and nectar)”.

He had not offered even a ladle of boiled rice or a spoon of alms cooked rice to the Perfectly Enlightened Omniscient Buddha (= *Sabbannu sammāsambuddha*), who always performs duties (= *dhura*) compulsory for a Buddha like development of Insight, through Contemplation (= *Vipassanadhura*). *Todeyya*, at the proximate time of his death, there were so many Greed rooted Impulsion Consciousness occurring with attachment to his properties. These Greed rooted Impulsion Consciousness were taking the role of Near death Impulsion Consciousness (= *Maranasanna javana*). Due to the Greed (= *Lobha*) in wealth which was strong attachment to the properties, he was reborn in his own house as a dog. The young man” *Subha*” felt great affection for that dog. He fed that dog, the meal he took. He gently took that dog and let the dog to sleep on the delicate bed. At the dawn of one day, the lord Buddha after contemplation to develop Attainment of Mental absorption in the Great compassion (= *Mahakaruna samapatti*), looks with the all-seeing eyes (= *Samanta cakkhu*) for beings eligible (= *Veneyya sattava*) for Liberation from the Endless rounds of suffering (= *Nibbana*). Then the Buddha sees that dog. When the Buddha continues to look, the Buddha foresees like ---- “The *Brahmin Todeyya* is reborn as a dog in his own house due to the Greed in wealth which is strong attachment to the prosperities. If I go to that house of *Subha* the lad, that dog will bark on seeing me. At that time I will tell the dog a few words. Then, that dog thinking like-- ' *Gotama* the great monk knows me ', and will hide and sleep on the heap of ashes in the tripod stand. For that occasion, something will be talked between I and *Subha* the Lad. The young lad,

PAGE-261

on hearing teachings from me, will have firm belief in the Three Gems or Refuges(= *Sarana gamana*). The dog will reborn in the Hell after death.” So, foreseeing *Subha* the Lad taking firm belief in the Three Gems, the Lord Buddha after cleaning the body and hands, entered the village alone. When *Subha* the lad left the home, the Buddha goes there for alms food.

When the dog saw the Lord Buddha, it barked and came near the Buddha. Then, the Buddha tells the dog like:---”..... *Todeyya*, when you were human in the past

life, you scolded me, the Buddha; as “ Hey *Gotama*..... Hey *Gotama*”. Now you are reborn as a dog and barking at me. You will be reborn in the Hell very soon”.

The Lord Buddha tells like that. In this instance, the cause of *Brahmin Todeyya* to exist in the dog life and later reborn in the Hell is the Unwholesome action fulfilling the desire of the Greed (= *Lobha*).

Pāli Quotation

(A-2-377)(M-ṭī-3-371)

(M-ṭī-3-371)

The destination of a person who fulfil the desire of the Greed (= *Lobha*) is the Hell (= *Niraya*) or animal world. The Buddha mentions this in the “ **Discourse of *Aditta pariyaya***”. (Sam-2-377.) as follow: -----

“O..... Monks, [If one perceives, one of the (6) kinds of senses or all of the (6) kinds of Senses (= *Arammana*) as man, woman or as eye, eye brow or as gold, silver etc etc;]; at that time of perception, there is a Mind continuum which is attached to that images like man, woman etc;- with severe desire. That kind of Mind continuum can give the effect of conception in the next life. That is, it is the Consciousness of Action.

(= *Kamma vinnana*). If that peron dies at that time with severe desire and attachment to such images, it is sure that, the destination of that person in the next life is one of the Hell or one of the animal worlds.

(Sam-2-377.)

In this Discourse, the occurence of Greed rooted Impulsion consciousness (= *Lobha javana*) as Near-death Impulsion Consciousness (= *Marana sanna javana*) at the time of death is speicially mentioned. (Sam-ttha-3-51.)

PAGE-262

If a person done some Action which can give the effect of rebirth in the Hell, the effect of that Action can not be prevented even by the Buddha. That is, the Action is already mature enough to give it's effect.

When the dog heard the Buddha's words, it felt very much unhappy and down-hearted. So, the dog hid and slept on the heap of ashes in the tripod stand. The servants of that house were unable to take the dog on the delicate bed to sleep. When *Subha* the Lad came back, he asked “who put down the dog from the bed ?”. All aswered that no body put down and told the whole occasion happened. When the young man heard, what happened, he thought like “ My father is definitely reborn in

the *Brahmin* world. There is no such animal like *Todeyya* the dog. *Gotama* the old monk makes my father dog. *Gotama* the monk uses the untrue and abusive words” So, he felt very angry and went to *Jeta* monastery so as to suppress the Buddha for telling untruth (= *Muasavada*).

When, the young lad asked, the Buddha replied what happened. The Lord Buddha so as to express his words lacking untrue nature, asks the young man like “Then.... *Subha* the Lad;..... Have you any property, which your father had not told you, before his death ?”.

Then, the young man replied, “Yes.... *Gotama* the monk, there are spray of golden flowers wick is worth hundred thousands money, the golden shoes which is worth hundred thousands money, the golden bowl which is worth hundred thounds money and one hundred thounds as free money”.

Then the Buddha said to *Subha* the lad like : - “if so; you young man, go back to your home and let the dog sleep on the bed after feeding it gruel made of milk and rice. When the dog felt asleep, ask it for the hidden properties. The dog will tell you the hidden place of these properties. Then only you will know that the dog in your own father”.

Subha the Lad was very happy by thinking like “If it is true, I will obtain properties and if it is not true, I will suppress the *Gotama* the monk for telling untruth (= *Musavada*). Then, he went back home, performed as he was instructed by the Buddha. The dog felt very unhappy and down-hearted by thinking like “ My son, now, knows me as his father in my last human life” making some unpleasant voice, and went to the place where it burried the properties and raked the soil so as to make the young lad know the place.

Buddhanubhavana kira sunako tatha dasseti, na jatissarataya.

(Ma-ti-3-372.)

The dog was able to point out the place where the properties were burried due to the power and glory (= *Anubhava*) of the Buddha. It was not, that the dog obtained mental faculty to recall it's past existence (= *Jatissara nnana*). (Ma-ti-3-372.)

Subha the Lad after taking the properties, thought as : -----

PAGE-263

“*Bhava paticchannam nama evam sukhumam patisandhiantaram pakatam samanassa gotamassa, addha essa sabbannu* “

“The delicate interval of Conception (= *Patisandhi*), obscured by the Existences (= *Bhava*) is perceived in the Knowledge (= *Nana*) of the *Gotama* the noble one. So, he might be the real Perfectly Enlightened Omniscient Buddha (= *Sabbannu sammāsambuddha*) who knows every things in the world”. After thinking like that, he felt great reverence in the Buddha. Having deep reverence, he prepared (14) problems to be solved by the Buddha.

Subha the Lad, since he himself was an expert physiognomist (= *Angavijja*), considered that the *Gotama* the Noble one realizes the existences in various destinations (= *Gati*) by taking conception for birth (= *Jati patisandhi*) in various spheres;(= *Bhava*). He prepared (14) problems to be solved by the Buddha as

described above. So, *Subha* the Lad thinking in his mind like--"will take these problems to the *Gotama* the monk as gifts of talk on doctrinal matters." and approached the Buddha for second time to put up the following (14) sets of problems. (This account of *Subha* the Lad and *Brahmin Todeyya* is extracted from the Commentary of *Uparipannasa* 175-177).

(14) Sets of Problems Put Up by *Subha* the Lad

"O.... my Revered *Gotama*; although the people exist in the same human world ----- I see; some are superior and the others are inferior in status. What is the underlying cause, and support for this phenomena ?". "..... my Revered *Gotama*.... I see :--

1. Some humans have short life-span.
2. Some humans have long life-span.
3. Some humans have so many diseases.
4. Some humans have no diseases.
5. Some humans are ugly.
6. Some humans are good looking.
7. Some humans are bereft of friends and followers.
8. Some humans are surrounded by friends and followers.
9. Some humans are not endowed with wealth.
10. Some humans are endowed with wealth.
11. Some humans are of inferior status in class.
12. Some humans are of superior status in class.
13. Some humans are lack of wisdom.
14. Some humans are wise.

"So; My Revered *Gotama*..... what about it ? Although the people exist in the same human world ---- I see, some are superior and the others are inferior in status. What's the underlying cause and support for this phenomena ? asked by the young man.

PAGE-264

Then, the Lord Buddha gives a brief answer first, as follow: ---

*Kamassaka manava satta kammadayada kammayoni kammabandhu
kammappa sarana, kammam satte vibhajati yadidam hinappanatata yati.*

(Ma-3-244.)

= "*Subha* the Lad..... the only property ultimately owned by a person is his Action (= *Kamma* = *Karma*); He is heir to his Action; the Action only is the proximate cause; the Action only is relative and the Action only is refuge for him. The Action determines the living beings to have superior or inferior status." the Buddha teaches in this way.

[*Subha* the lad could not understand the essence of the Buddha's answer. It was somewhat like, taking up the honey with his mouth plugged with thick cloth. That young man had excessive pride in himself. He had full of Conceit (= *Mana*). He thought himself as a great wiseman. (= *Panditamani puggala*). He could not see

anybody else who was as wise as him. Since he was thinking himself as a great wise man, he had excessive pride like

----- “Whatever the *Gotama* the great monk says, I have already known about it.” So, to suppress the Conceit (= *Mana*) of the young man, the Glorious Omniscient Buddha thinks as : -----

“I am going to teach difficult doctrine first. Then, the young man will request me ----- “O..... *Gotama* the great monk..... I don't know your words. Please explain me further, so as to perceive your words in my knowledge '. -- Only after then, I will give more teachings to him. If, I teach like this, that young *Subha* will have effective doctrinal teaching” -----

So, thinking in that way the Buddha gives difficult doctrine first. Since young *Subha* could not understand the teaching, he requested as follow.]

“O..... Venerable *Gotama*..... since the teaching is too brief, I could not get it's wider essence. I must apologize to you for giving wider teaching so as to understand the deeper essence of the doctrine”..... requested by the young man.

Then, he Lord Buddha says “.... Young *Subha*..... If so, I will give you further teaching. So, listen carefully and keep it in the heart.” After replying like :”... Yes.... Venerable Omniscient Buddha” by the young man,

PAGE-265

the Lord Buddha gives the Young *Subha*, the son of *Brahmin Todeyya* further explanations as follow: -----

Answer No (1) -----The Cause of Short Life-Span

1. O..... Young *Subha*,..... In this world (= *Loka*), some persons;- may be woman or man are used to kill the other's life. They are cruel; having blood stained hands. They are interested in torturing and they are lack of pity for others. Due to that Wrong actions; that kind of person who is used to kill other is reborn in the Hell of no happiness, and suffers from non-desirable haphazard dissolution; after his death. If he is not reborn after his death, in the Hell of no happiness to suffer from non-desirable haphazard dissolution, and if is reborn in the human world, he will be short lived. O... Young *Subha*.... killing the other's life, having blood stained hands with cruelty, torturing others, and lacking pity for others are the practices which cause the shortage of life-span.

How do these actions ie:-- killing the others, having blood stained cruel hands, torturing the others and lacking pity for others, produce short life-span ?

Answer---- There are (4) sets of Action (= *Kamma*) as:-- Counter -active or Suppressive Action (= *Upapilaka kamma*); Destructive Action (= *Upacchedaka = Upaghataka kamma*); Regenerative or Productive Action (= *Janaka kamma*) and Supportive Action (= *Upatthambhaka kamma*).

1. Counter-active or Suppressive Action (= *Upapilaka kamma*) -----

A person is reborn in human world due to the effect of powerful Wholesome action (= *Balava kusala kumma*). After rebirth, at that lifetime (= *Pavatti kala*); Suppressive Action, as if it is a living being will come and may say like: -----

“If I realize you first, I won't give you the chance of being reborn in the human world, on the contrary I will take you to the Hell. Now, let it be. But, since I am Suppressive Action, (= *Upapilaka kamma*), I will try to squeeze you, like sugar cane is ground in the grinding machine, so as to make you powerless and useless at any time and any where you exist” :-----

So, Suppressive Action, (although it is an inert phenomenon) as if it is a living being will say as above. What does that Suppressive Action perform ? It takes danger and trouble to that person. It destroys the properties of that person. (Ma-ttha-177-178.)

How it performs : ----- As soon as that person is conceived in his mother's womb, the mother feels unpleasant and miserable. Only the unpleasant and miserable feelings

PAGE-266

arise in both parents' mind. That is how, that Action takes dangers and troubles. (Note the story of Venerable *Losakatissa*, the parents of whom were endangered by starvation and various kinds of troubles as soon as he was conceived.). Again, as soon as that person is conceived, all the properties in the house are destructed like common salt disappeared when dissolved in water, due to various hazards of flood or fire. All the cows kept on farms do not produce milk. The strong oxen becomes weak, blind and limp. All the cattles are stricken with diseases. The slaves and workers do not obey the orders. All the paddy plants transplanted are no longer ripe. The prosperity in the house is ruined. The prosperity in the farm is ruined. There is progressive regression and finally even the little amount of foods and clothings becomes rarity. (= *Dullabha*). There is no person for antenatal care. Mother does not produce milk at the time of his birth. The baby, since there is no person to take care of him, suffers from various miserable conditions. The baby is thin and emaciated with long illness. That kind of Action (= *Kamma*) is known as **Counter-active or Suppressive Action (= *Upapilaka kamma*)**. (Ma-ttha -4-178.)

Now, you noble person; stop and consider the above description ---You will find that the Counter-active or Suppressive Action (= *Upapilaka kamma*) is the Unwholesome action. That Unwholesome action is suppressing the Wholesome action to give it's good effect by producing it's evil effect at that present lifetime (= *Pavatti*). Not also that the ill effects of that Suppressive Action is suffered, not only by the doer of the deeds, but also by the doer's parents and relatives.

2. Destructive Action (= *Upacchedaka kamma*) ----- A person reborn in human world due to the Wholesome action which can give long life-span may be killed by Destructive Action which can cut the life-span. For example :-- An archer shoots an arrow pointing to an enemy at a distance of 64 x 8 metres. Another person strikes down that arrow as soon as it is released from the bow. Similarly, a person reborn in

human world due to the Wholesome action which can give long life-span is killed suddenly by the Destructive Action which can shorten the life. How does it performs? It persuades that person to go into the forest where the thieves and robbers live.---- (That Destructive Action creates the occurrence of unrestrained desire to enter the forest.). It may take that person to swim in the river where various carnivorous aquatic creatures exist. It may take him to the place where numerous dangers exist. That kind of Action is known as **Destructive Action (= Upacchedaka kamma)**. The another name of that action is “*Upaghataka kamma*” (ie:- The Action which cuts the life all of a sudden). (Ma -ttha- 4- 178.). It is somewhat like an Action which takes the snake to the mongoose or which takes a person with packet of jewellery to the forest where robbers live.

3. Productive Action (= Janaka kamma) --- An Action which can produce conception with the forming of new life(= *Patisandhi*) is known as **Productive Action(= Janaka kamma)**.

PAGE-267

4. Supportive Action (= Upatthambhaka kamma) --- An action which makes a person to have prosperities = Accomplishment with wealth (= *Bhogasampada*), although he is reborn in very poor family; is known as **Supportive Action**. (Ma-ttha-4-178.)

Among these (4) types of Action, (2) types of Action ie:- Suppressive Action (= *Upapilaka kamma*) and Destructive Action (= *Upaghataka = Upacchedaka kamma*) are Unwholesome actions (= *Akusala kamma*) which prevent the effect (= *Vipaka*) of Wholesome action (= *Kusala kamma*). The Productive Action which can produce rebirth = Conception (= *Patisandhi*) may be Wholesome or Unwholesome action. But, Supportive Action which can give various accomplishments is Wholesome Action only.

(Ma-ttha-4-178.)

Teacher of *Uparipannasa* Subcommentary explained that, like Productive Action which consists of (2) kinds as Wholesome Productive and Unwholesome Productive Action, there should be (2) kinds as Wholesome and Unwholesome in Suppressive Action, Destructive Action and Supportive Action. (Refer to:-Ma-ti-3-374)

Among (4) sets of above mentioned Actions, Destructive Action (= *Upacchedaka kamma*) should be of (2) kinds. A person is reborn as human due to Wholesome Action. His life may be shortened by Destructive Action which can suddenly kill that person. That Destructive Action is nothing, but it is the Action of killing the living Beings (= *Panatipata kamma*). Due to the killing of Living Beings, (ie:- Destructive Action = *Upacchedaka kamma*), the life-span is shortened. If that Action of killing Living Beings is the Destructive Action, it shortens the life. How, it shortens the Life-span is explained as follow:---

1. The Wholesome Actions done by a person who is accustomed to kill living beings, won't give any prosperous effect. It has no power to give long lived conception. That is how, the Action of Killing Living Beings produces shortened Life-span.

(Ma-ttha-4-178-179.)

The Action of Killing Living Beings, manages the body and mind continuum of a person who is accustomed to commit the Action of killing Living Beings, to have shorter life. If the Action of killing Living Beings occurs in the body and mind continuum, that Action will definitely have desire to manage that body and mind continuum to have shortened life. To that body and mind continuum only, the effect of shortening life of that Action of Killing Living Beings exerts. So, even at the time of performing Wholesome deeds, the power of shortening the life possessed by the Action of killing Living Beings is associated and produce destructive nature. (= *Upaghata sabhava*). So, the Wholesome action performed has less effect.

(Ma-ti-3-375.)

You, noble person who want to have prosperity and glory like long life etc; etc; should take special care of these statments described in the Buddha's Doctrinal teachings, explanations in the Commentaries and Subcommentaries. It is a very miserable fact, that the power which can shorten the life always exist even in the Wholesome deeds of a person who is accustomed to commit the Action of killing Living Beings, although he is now performing various Wholesome deeds like Donation, Observance of the precepts and meditation (= *Dana, Sila, Bhavana*). Somewhat like Burmese proverb which says “ Performance is new, Occurence is late manifestation, that's the nature of cause and effect” , the Actions performed now

PAGE-268

are the new causes and the effect suffered now are the results of the Actions done in the successive past rounds of rebirth (= *Samsara*) and the Actions done in the past time of the present life. If an Action is accomplished, it is very difficult to abolish the effect of it. It can be extracted only with the Noble Path. (= *Ariya magga*). Take care of this fact.

Like the paddy plant cultivated in the field produces the grains same to it's seeds of origin, ie:- The power to give the grains which are similar in nature to the seeds cultivated; is implanted in the material continuum (= *Rupa santati*) of that paddy plant. Similarly, in the Wholesome action done by a person who is accustomed to perform Action of killing Living Beings, the Natural Law (= *Niyama*) which causes shortening of Life resulted from the Destructive Action (= *Upaghataka kamma*) is always implanted.

(Ma-ti-3-375.)

2. The Action of killing Living Beings is able to shorten the Life-span, even of the conception by giving permanent fixed appointment to give it's effect.

(Ma-ttha-4-179.)

The Action of killing Living Beings (= *Panatipata kamma*) shorten the Life-span of conceived Mind and Matter continuum (= *Rupa nama santati*), which is formed by Wholesome deed, by implanting permanent and fixed appointment. That is why it is said, that Action is able to shorten the life by giving fixed appointment even to the conception. (Ma-ti-3-375.) If a Living being is conceived due to Wholesome action, the Action of killing Living Beings implants the power of shortening life in that conception. Due to that power, the Life-span of conceived living being is shortened.

Next explanation

In committing the Action of killing Living Beings -----

1. Volition before the act (= *Pubba cetana*), ---Volition before committing the Action after decision to commit,
2. Volition at the time of Resolution (= *Sannitthana cetana*)----- Volition arising at time of committing the Action after decision to commit,
3. Volition after the act (= *Apara cetana*) ---- It is the Volition arising after committing of the Action -----

Among these (3) kinds of Volition (= *Cetana*), rebirth in the Hell is caused by the Volition at the time of Resolution (= *Sanitthana cetana*) and the remaining two ie:-

--

Volition before the act and Volition after the act (= *Pubba cetana*, *Apara cetana*) cause shortening of Life-span as described above. (Ma-ttha-4-179.)

In this instance, the Action of Killing Living Beings (= *Panatipata*) has definite awful effect. So, the Volition at the time of Resolution (= *Sanitthana cetana*) or at the time of committing Killing is the cause of rebirth in the Hell. On the contrary, the remaining, Volition of before and after that action can not give serious awful effect like Volition of Resolution. So; it is explained that these two Volitions only, shorten the Life-span of a Living being. (Ma-ti-3-375.)

PAGE-269

Answer No (2)-The Cause of Long Life-Span

O..... Young *Subha*..... In this world, some persons, may be man or woman avoid to kill the other's lives, and abstain from killing of Living Beings. They already dropped the sticks and cudgels. They already dropped the weapons. They are ashamed to commit killing. They have pity and want all living beings to have wealth. That person who abstains from killing of Living beings will reborn after his death in the celestial realm of gods where persons with good deeds exist due to the established Wholesome actions. If he is reborn in human world, he will have Long Life-span. So, Young *Subha*..... avoidance of killing, abstaining from killing the living beings, dropping the cudgels and weapons, having shame to commit killing, having pity for others and having desire all living beings to have wealth are the practices which lengthen the Life- span of that person. (Ma-3-244.)

The Wholesome actions of Sensuous Sphere (= *Kamavacara kusala kamma*) in which the power of (5) strengths (= *Bala*) or (5) Spiritual Faculties (= *Indriya*) like Faith, Energy, Mindfulness, Concentration and Wisdom (= *Saddha*, *Viriya*, *Sati*, *Samadhi*, *Panna*) are in excess; these will take a person to Celestial realm of gods or when the Strength of (5) power are in excess the Super-normal Great Action (*Mahaggata kamma*) will take to Fine-material and Immaterial World. (= *Rupa loka*, *Arupa Loka*). If the power of these (5) kinds of power (= *Bala*) are less, the Wholesome action of Sensuous sphere will take that person to the human world. If that person is reborn in the human world due to the Wholesome deed of Sensuous Sphere with less powerful (5) kinds of Spiritual Faculty or Strength (= *Idre*, *Bala*), and

at that Life time (= *Pavatti kala*), the Wholesome deed of this abstaining from killing Living Beings (= *Panatipata*) may come and say, as if it is a Living being like :-----

“If I realize you first; I won't give you the chance of being reborn in the human world;- on the contrary, I will take you to the Celestial realm of gods. Now, let it be. I will support you anywhere you exist, since my name is Supportive Action”
(= *Upathambhaka kamma*).

So,” Supportive Action” (= *Upathambhaka kamma*), (although it is an inert phenomenon); as if it is a Living being will say as above and support that person. How does it perform?. It removes all dangers to him. It takes properties for him.

(Ma-ttha-4-179.)

As soon as that person is conceived in his mother's womb, the parents feel pleasant and joyful. All the events are happy occasions. All the dangers produced by human being, devils and natural disasters are removed. So, all the dangers are vanished away.

Again, as soon as that person is conceived, there is uncountable increase in prosperity of that house. Many pots of gold, silver and gems buried under the ground, are uncovered and rolls into the house from front and back doors. The properties entrusted by the passing grand parents to others are regained.

PAGE-270

The properties are given back to his parents. All the cows kept on farms yield more milk. The strong oxen help well. Paddy plants grow well and give more grains. The money on loan and the properties borrowed by others are repayed without any request to give back.

The slaves and workers obey the commands. There is progress in trade and other business. The baby is taken care by attendances as soon as he is conceived in the mother's womb. Lady doctors and lady medical persons also take care of the pregnant mother. If that person is reborn in the rich family, or in the royal official family; he will get the rank of great wealthy person or commander in chief. That is how he will get properties. That person will live long in great wealth without any dangers. That is how the Action of abstaining from killing Living Beings, makes a person to live long. That is the nature, that the effect is equal to the causative Action (= *Kamma*).

(Ma-ttha-4-179.)

When that person performs the Wholesome Action, that Action will make him reborn in the human world, and implants the powers in his mind to abstain from killing other, to drop the cudgels and weapons, to have shame to commit killing, to have pity for others and to have wishes wealth for all living beings. The Action in which the great noble powers of mind in wishing long lives and wealth for others are implanted, when giving the effect, it will give the effect similar in nature to it, ie:- it will give the effect of long life-span and great wealth.

Next ----- The Action done by a person who is accustomed to avoid killing others, can also give great effects. It can give conception with quality of long-life. It gives definite determination for conceived being, to have long life-span.

Next ----- The Wholesome Volition (= *Kusala cetana*) arising at the time of performing Wholesome deeds like, Charity, Morality and Meditation are known as

Determining Volition (= *Sannitthana cetana*). The Wholesome Volitions arising before the act of Wholesome deed are known as Foremost Volition (= *Pubba cetana*) and after the act of Wholesome deed are known as Exultant Volition (= *Apara cetana*). Due to Determining Volition, a person is reborn in the Celestial realm of gods. Due to the Foremost Volition and Exultant Volition, a person will have long life-span. So, try to understand in this way, in the statements for following Questions and answers.

(Ma-ttha-4-179.)

Answer No (3)- The Cause of Having So Many Diseases

“ Subha..... Young Mana”..... Some persons in this world, accustomed to torture the living beings by striking with hands, stones, sticks, or cutting with knives and using various weapons. That person who has such kind of evil Actions, is reborn after his death

PAGE-271

in the Hell where, persons who commit evil conduct exist and where pleasures, desires are lacking and where the haphazard dissolution always taking place. If he is not reborn in the Hell, and if he is reborn in human world, he will suffer from so many diseases. So, Young Subha..... torturing the living beings with free hands, stones, sticks or various weapons are the practices which cause the suffering from various diseases by that person who performs these Actions.

(Ma-3-245.)

Vihethana kammadinipi ti pi- Saddena kodhaissananaka maccherathaddha avidda subhava vasena pavattita kammani sannhati.

(Ma-ti-3-375.)

Unwholesome action of torturing the living beings with various ways, Unwholesome action based on Anger (= *Dosa*), Unwholesome action based on jealousy, Unwholesome action based on unbearable nature on one own possessions may be living or inert coming in relationship with the others = Stinginess (= *Macchariya*), Unwholesome action based on rudeness and arrogance = Conceit (= *Mana*), Unwholesome action based on lack of consideration and wisdom (= *Moha*) ---all these Unwholesome actions, acting as Suppressive or Counter-active Action (= *Upapilaka kamma*) makes a person, lacking, decreasing and dissolution of properties and make that person helpless. To the body and mind continuum of that helpless person, various kinds of dangers and sufferings such as having various diseases, arise. Again, the Wholesome action done by the persons who are accustomed to torture other living beings will never give much developments or can not prevent from diseases. It determines that person to be full of diseases even at the time of his embryo life, conceived in his mother's womb. That is; the Unwholesome action of torturing living beings implants it's Powers of Action (= *Kamma satti*) to give rise that person full of diseases, even at the very early time of his genesis = his zygote-life. In other words, at the time of performing the Unwholesome action of torturing living beings, the associated Determining Volition (= *Sannitthana cetana*) takes that person to the Hell; or as already described, the Foremost Volition and Exultant Volition (= *Pubba*

cetana, Apra cetana) will give him in the present human life, the evil effects like having body, full of diseases.

(Ma-ttha-4-180.)

Yam yadevabhi patthenti, sabbametena labbhati. (Khu-1-10.)

Desire for various things, will be fulfilled by doing Wholesome action According to that Doctrine given by the Buddha, all the Wholesome actions are the Decisive-support Condition (= *Upanissaya paccaya*) for all kinds of Fulfilment (= *Sampatti dhamma*). Similarly, all the Unwholesome actions are the Decisive-Support Condition for all kinds of Dissolution (= *Vipatti dhamma*). That is why, the Commentary Teacher explained the statements as above. (Ma-ti-3-375.)

PAGE-272

So, you noble person;-- If you do not want to be a person, full of diseases, do not torture the living beings. Do not kill the living beings. Don't be angry. Don't be jealous to others who are superior to you. Don't be stingy. Don't be rude. Don't be a person who is lack of proper consideration and wisdom. All the ill effects are caused by adoption of wrongful attitude.

Answer No (4) -- The Cause of Having No Diseases

“O..... Young *Subha*..... Some person in this world never torture the living beings by striking with hands, stones, sticks or cutting with knives, and by using various weapons. That person who has such kind of good Actions, is reborn after his death in the celestial realm of gods, where persons with good conduct (= *Sucarita puggala*) usually reborn and exist. If he is not reborn in the celestial realm of gods where person with good deeds exist, but reborn in the human world; he is free from various diseases. So; Young *Subha*...not torturing the living beings with hands, stones, sticks, knives and various weapons are the practices which cause a person free from various diseases.” (Ma-3-245). Torturing the other peoples will give various dangers and sufferings to the others. The Action which causes sufferings in Body and Mind continuum of other persons is the cause of having various diseases in oneself who performs that Action. In the mind which causes troubles in others, there is power of equal reaction to give evil effect. Anger (= *Kodha*) means the mentality which can cause serious damage to others. In that mentality which cause serious damage to others, the powers which can cause damage to oneself exist. These powers cause to have many diseases. Having many diseases, in turn causes dissolution of the Physical body. There are a lot of Feeling of unsatisfaction behind the mentalities of;- Jealousy to others who are superior to oneself;- Stinginess which is the unbearable nature on one own possessions may be living or inert, coming in relationship with the others;- Rudeness and Arrogance. These are supported by lack of knowledge in the cause and the effect, and the good and the bad. All the unstasfactory feelings in others have special power which will later construct unsatisfactory physical body. So, when here are impure mind in the physical and mental continuum of a person, he will at sometimes have a body with so many diseases, when that Action becomes mature enough to give the effect.

But, foreseeable noble persons try to purify their mind with various practices of Good morality, Concentration and Wisdom.(= *Sila, Samadhi, Panna*). They try to keep away to have the minds of torturing the living beings. They clear their mind from evil mentalities such as Envy, Stinginess and Conceit. (= *Issa, Macchhariya, Mana*).

PAGE-273

By such practices, when the Wholesome actions, associated with pure mentalities have a chance to give their effects, these will construct a physical body without any diseases. These practices are noble actions undertaken by Noble persons.

Answer No (5) -- The Cause of Ugliness

“Young man *Subha*..... in this world, some persons, may be man or woman; are aggressive. They regard others with animosity. All the time they harbour a grudge. They are very angry on hearing even a few words they dislike. They have destructive mentality and stand opposite to others. They express their anger, destructive mentality and dislike. That kind of aggressive person, due to that Wrongful action, reborn in the Hell after his death, where persons of evil-Conduct exist; and where no pleasures, no desires occur and haphazard dissolution always taking place. If he is not reborn in the Hell, but reborn in the human world, he will be ugly and deformed. So, Young man *Subha*.... having aggressive nature, bearing a grudge, having destructive mentality, being angry on hearing even a few words against him, standing opposite to the others and expressing anger, destructive mentality and dislike are the practices to have ugliness.”. (Ma-3-245.)

When, Mind elements based on Anger (= *Dosa*) are arising, the appearance of even a good looking person changes to the worse. The destructive and implacable hatred are all the time arising. These mental elements have powers to make a person ugly. If a person with such mental elements performs the Wholesome action, it makes that person ugly as it's effect in the life produced by that Wholesome action. That is because that Wholesome action is accompanied by special powers which can produce ugliness.

As described above, Wholesome action (= *Kusala Kamma*), when associated with concomitant Anger, it can not produce good look and other great effects. It can not produce good looking conception. It determines the conceived embryo to have ugly appearance. In other words, among the Anger rooted Impulsion consciousness; Anger rooted Impulsion consciousness with Determining Volition (= *Sannithana dosa javana cetana*) will take that person to Hell and Foremost and Exultant Volitions will make him ugly if he is reborn in the human world.

PAGE-274

Answer No (6) -- The Cause of Having Good Look

“Young man *Subha*..... In this world, some persons may be man or woman, are usually less aggressive. They do not regard anyone with animosity. They never bear a grudge. They are not angry even when hearing the words they dislike. They have no

destructive mentality and never stand opposite to others. They do not express their anger, destructive mentality and dislike. That kind of person who are not aggressive, due to that right Action, reborn in the Celestial realm of gods where persons of good conducts exist after his death. If he is not reborn in the celestial realm of gods but reborn in the human world, he will be good looking and attractive. Young man *Subha*..... having less aggressive nature, not bearing grudge, and not being angry on hearing even few words against him, not standing opposite to others, and not expressing anger, destructive mentality and dislike are the practices to have good looking and attractive personality”. (Ma-3-245-246.)

To the above noble mentality, if some one adds Loving-Kindness as subject of meditation (= *Mettabhavana kammattana*) or if he tries to have Mental absorption of Loving- Kindness (= *Metta jhana*), he will reach the acme of good looks or reach the acme of beauty if that person is woman. That is the Buddha's way to improve the physical appearance, without going to beauty parlour. So; it is very important to rectify the mind.

Making endeavour to rectify the mind will be rewarded with attainment of enlightenment. Again, rectification of mind is the basic cause to have Fulfilment of Personality (= *Upadhisampatti*) among (4) kinds of Fulfilment (= *Sampatti*).

Answer (7) -- The Cause of Bereft of Friends and Followers

“Young *Subha*..... in this world, some persons, may be man or woman, have envious feeling = have jealousy to others who are superior to them. They are jealous of advantages, possessions, achievements and dignity attained by others. They swear at the others with envious feeling. They always keep envious feeling in their mind. So, a person with such kind of envious feeling, due to that wrongful action, will be reborn in the Hell after his death, where there is no pleasure, no desire, and haphazard dissolution always occurring and where the persons with evil conduct exist. If he is not reborn in the Hell where there is no pleasure, no desire, haphazard dissolution always occurring and where the persons with evil conduct exist, but reborn in the human world,

PAGE-275

he will be bereft of friends and attendants. Young *Subha*.... having envious feeling = having jealousy to others who are superior; having envious feeling for advantages, possessions achievements and dignity of others, swearing the others with envious feeling in their mind are the practices which produce a person bereft of friends and attendants”. (Ma-3-246.)

Such kind of person when reborn in the human world next time, he will be powerless and less distinct, like an arrow shot in the darkness of the night. He will have no attendants. The Wholesome action performed by that person will not give the prosperous effect; and has no power to produce conception with many attendants. That is how a person with envy is lack of friends and attendants. That envious feeling determines the conceived one, bereft of companions. The Determining Volition (= *Sannithana cetana*) in the Unwholesome Impulsion Consciousness (= *Akusala javana citta*) at the time of arising of Unwholesome phenomena based on the envious feeling,

is the cause of rebirth in the Hell. The Foremost Volition and Exultant Volition (= *Pubba cetana*, *Apara cetana*) cause that person bereft of attendants in the human world.

You noble person should not forget that the Envy (= *Issa*) = Unwholesome action based on envious feeling will produce rebirth in the Hell. The arising of Envy, if not suppressed by the Tranquility and Insight Meditation (= *Samatha bhavana*, *Vipassana bhavana*) in time, that person will further Continue to commit great Unwholesome conducts like swearing the others. All these great Unwholesome conducts are very miserable dangers. They have the powers of equal and opposite reactions. Remember the stories of Venerable *Jambuka* Monk and *Losakatissa* Monk.

Answer No (8) -- The Cause of Having Many Friends and Attendants

“Young *Subha*... In this world some persons, may be man or woman, have no envious feeling. (They have no jealousy to others, superior to them). They are not jealous of advantages, possessions, achievements, dignity and reverence attained by others. They never swear at the others with envious feeling. They never keep envious feeling in their mind. So, such kind of person, due to that good actions perfectly performed, will be reborn after his death in the Celestial realm of gods where persons with good conducts exist. If he is not reborn in the realm of gods, instead reborn in the human world, he will have many friends and attendants in whatever social class he exists. Young man *Subha*.... having no envious feeling = lacking jealousy to others who are superior to oneself = having no jealousy to advantages, possessions, achievements, dignity and reverence attained by others, not swearing at others with envious feeling, and finally not keeping the envious feeling in the mind are the practices which cause a person to have many friends and attendants”. (Ma-3-246.)

PAGE-276

The mind without Envy (= *Issa*) has the power which will further promote the status of life of noble person like you. Persons with pure and high quality mind, lacking envious feeling will be reborn even in the higher celestial realm of gods. So; reform your mind to promote your life status. You, yourself is the refuge for you. The others are not your refuge.

The Wholesome action performed without Envy (= *Issa*) is also able to give great effect. It can give rise to conception with many attendants, dignity and fame. Due to this power, Wholesome action lack of Envy can give the effect of having many attendants. It produces dignity and fame. It determines the person to have many attendants, even at the time of conception of that person in his mother's womb. Among the various Wholesome actions done, the Determining Volition (= *Sannithana cetana*) will produce rebirth in the celestial realm of gods. The Foremost and Exultant Volition (= *Pubba cetana*, *Apara cetana*) cause that person to have many friends, attendants and good reputation in the human world.

Answer No (9) -- The Cause of Not Being Endowed with Wealth

“Young *Subha*..... in this world some persons, may be man or woman, never offer foods, beverage, clothes, vehicle, flowers, fragrance, dwelling to sleep, monastery and open oil lamp to novice, monks and brahmin. That person due to that wrongful establishment of Unwholesome action based on the Stinginess (= *Macchhariya*), will be reborn in Hell where there is no pleasures, no desirable sense, full of haphazard dissolution and where persons with evil conduct exist. If not so, he will be reborn in the human world. where he is not endowed with wealth in whatever social class he exist. Young *Subha*... not offering of foods, beverages, clothes, vehicle, flowers, fragrance, dwelling place to sleep, monastery, and open oil lamp to novice, monks and brahmin is the practice which causes a person not being endowed with wealth”.
(Ma-3-246-247.)

In this instance, not offering is based on the nature of Stinginess (= *Macchhariya*). That Unwholesome action, based on Stinginess causes rebirth in the Hell or in the human life where he is not endowed with wealth. This nature of not offering is not due to lack of offering materials. Those who do not have nature of Stinginess, may offer to some extent when they have materials to offer.

(Ma-ttha-4-180. Ma-ti-3-376.)

So, in this instance, rebirth in the Hell is not due to lack of offering, but due to Unwholesome action based on the Stinginess (= *Macchhariya*).

Kammenati tena macchhariya kammaena. (Ma-ttha-4-180.)

PAGE-277

The Stinginess is unbearable nature on one's own possessions (= *Kama vatthu*) = one's own pleasurable worldly enjoyments (= *Vatthu kama*) which may be living or inert, coming in relation with others. So, you noble person, don't forget that kind of mind is able to take a person to the Hell. Again, note also that there are no goodwills for other's wealth in such kind of mentality based on Stinginess. In the Unbearable nature on the possessions of oneself coming in relation with others, there is the nature of dislike for others to have pleasures and wealth based on that person's possessions. These kinds of mentality are the basic causes for one's failure in obtaining prosperity.

Next--- The Wholesome action done by a person with the feeling of Stinginess, is not able to give great effect, since it is associated with the Stinginess mental concomitant. That is how, the Stinginess produces diminishing prosperity. In other words, the Wholesome action associated with Stinginess determines to lessen the prosperity even at the time of conception of that person in his mother's womb. It causes that person to be conceived in the poor mother. So, in other words, the Determining Volition in the Unwholesome Impulsion Consciousness (= *Akusala javana citta*) will produce rebirth in the Hell. Foremost Volition and Exultant Volition can produce rebirth in the human world, being not endowed with wealth.

Answer No (10) -- The Cause of Being Endowed with Wealth

“Young *Subha*.... in this world some persons; may be man or woman, offer foods, beverage, cloths, vehicle, flowers, fragrance dwelling place to sleep, monastery

and open oil lamp to novices, monks and brachmins. That person, due to that good and right establishment of Wholesome action, will be reborn in the celestial realm of gods where person with good conduct exist. If not so, he will be reborn in the human world where he is endowed with wealth in whatever social class he exists. Young *Subha*.... offering of foods, beverages, cloths, vehicle, flowers, fragrance, dwelling place to sleep, monastery and open oil lamp to novices, monks and brahmins is the practice which causes a person being endowed with wealth”.

(Ma-3-247.)

Tanca kho silavato vadami, no dussilassa. Ijjhati bikkhave silavato cetopanidhi visuddhatta.

(Am-3-71.)

Charity (= *Dana*) cultivated on the field of Morality (= *Sila*) will give great and prosperous effect. If the donor wants to be as rich as a magnate of royal blood (= *Khattiya mahasala*) or as a wealthy brahmin (= *Brahmana manasala*) or as a wealthy householder (= *Gahapati mahasala*), that Wholesome action is able to make him a man of great wealth. If that person wants the pleasures and wealth of gods; that Wholesome action will give rebirth in any levels according to his wish among the (6) levels of Celestial realm of gods. That is due to the fact, that the desire of a person with good morality is definitely fulfilled at all times.

PAGE-278

The donors, generally have wishes for the benefits of recipients. The mentality arising in the mind continuum of a donor who is cultivating the seeds of Charity on the field of Morality and who is wishing the benefits of various recipients; is very noble, great and powerful mentality. That Wholesome action of Charity associated with such great powers is able to give rebirth in a wealthy sphere.

In other words, that action determines a person being endowed with wealth even at the time of conception in his mother's womb. Next----- Among the various Volitions of Wholesome Charity; the Determining Volitions gives the effect of rebirth in the celestial realm of gods. The Foremost and Exultant Volitions cause a person reborn in the human world endowed with wealth.

Answer No (11) -- The Cause of Rebirth in Low Lineage and Low Social Class

“Young *Subha*.... in this world; some person, may be man or woman, have harsh temperament and very arrogant. They never pay homage to revered ones. They never welcome the respectable guest. They never give seats to respectable persons. They never give pathway to respectable persons. They never give respects to revered ones. They never make a respectful gesture to respectable persons. They never give adoration to cherished ones. They never give worship to revered ones. That person, due to these wrongful actions performed, will be after his death reborn in the Hell, where there is no pleasures, no desirable senses, full of haphazard dissolution and where persons with evil conduct exist. If not so, he will be reborn in the human world of low lineage and low social class. Young *Subha*.... having harsh and arrogant temperament, not paying homage to revered ones, not welcoming to respectable guests, not giving seats or pathway or respectful gesture to respectable persons, not giving adoration to cherished ones and not giving worship to revered ones are the practices to cause a

person reborn in human world with low lineage and low social class”.

(Ma-3-247.)

In this case, the persons who deserve obeisance, homage and worship are :-----
The Omniscient Buddha (= *Sammāsambuddha*), the Lesser buddha (= *Pacceka buddha*), the Noble ones (= *Ariya puggala*), Parents and grand parents, elder brothers and sisters, older and younger sister of parents, older and younger brothers of parents and other respectable persons who are older, having more honour and training. Note in similar way in other occasions like welcoming the respectable persons etc; etc.

The harsh and arrogant temperament, temperament to gain the upper hand over others and oppressive temperament over the others are possessed by a person who always looks down on others and who always consider others inferior to him. These mentalities, by themselves can take a person to the Hell. A man known as” *Suppabuddha*” , did not give pathway to the Buddha and due to that evil practice he was reborn in the Hell. The natural powers which can give rebirth in the family of low lineage and low social class also exist in these ill mentalities.

PAGE-279

Again, if a person performs Wholesome action, associated with the harsh and arrogant mind, that Wholesome action will not give great and prosperous effects. It can't produce rebirth in the family of high lineage and high social class. That is how the harsh and arrogant person will be reborn in the low social class with low lineage. The Wholesome action associated with conceit (= *Mana*) will determine the conception of a person in a mother's womb of low social class. That is, that action order the person to be conceived in the mother's womb of low lineage. In other words, among the Unwholesome Impulsion consciousness, the Determining Volition causes a person to be reborn in the Hell, like a man named *Suppabuddha*. The Foremost Volition and the Exultant Volition produce rebirth in the human world of low lineage or low social class.

But, it is to be noted that, that kind of Unwholesome action based on Conceit (= *Mana*) which can produce rebirth in the family of low lineage and social class has no features of Suppressive Action (= *Upapilaka kamma*) and Supportive Action (= *Upatthambhaka kamma*). That Action can not make a person to be in the family of low lineage and social class in the present lifetime (= *Pavatti kala*). Similarly, the Wholesome action which can produce rebirth in the family of high lineage and social class described below has no features of Suppressive Action and Supportive Action. This Action also, can not make a person to be in the family of high lineage and social class in the present lifetime. So, rebirth in the low social class is determined by the Action which produces the low social class only at the time of conception; and rebirth in the high social class is in the same way. It is to be noted, the existence of a person in the low or high social class in the present lifetime is the function of the Action which will produce conception in the family of low or high lineage, respectively. (That is; it is the function of Productive Action = *Janaka kamma* and not the function of Suppressive Action and Supportive Action = *Upapilaka kamma*, *Upatthambhaka kamma*).

(Ma-ttha k- 4-180. Ma-ti-3-376.)

A leper named *Suppabuddh kutthi* was, in one of his life, a son of a wealthy man in the City of *Rajagaha*. One day he found on his way to the royal park, a Lesser Buddha named *Tagarasikhi* who came to the city for alms foods. When he saw the lesser Buddha he asked like” *Kvayam kutthi, kutthi civarena vicarati* = Who is this leper, dressed as a leper, wandering in the City ?”nd he spat spittle and went away without paying any respect. He was arrogant for being as a son of rich man. He had a low opinion on the Noble Lesser Buddha. He did not pay homage to revered Lesser Buddha. Due to that Unwholesome action he was reborn in the Hell after his death. After he was freed from the Hell, he was reborn as a human in the family of lowest lineage and lowest social class at the City of *Rajagaha*. That Unwholesome action makes him a lonely beggar leper-life.

(Udana Pali Text-136.)

Answer No (12) -- The Cause of Rebirth in the Family of High Lineage and Social Class

“Young *Subha*..... In this world, some persons, may be man or woman, are gentle and polite. They are not arrogant. They pay homage to revered ones. They always welcome to respectable ones. They politely give seats to respectable persons. They humbly give pathway to respectable persons. They give respect to revered ones. They make a respectful gesture to respectable persons. They give adoration to cherished ones. They give worship to revered persons. That kind of person, due to the accomplishment of right and good Action; will be after his death; reborn in the celestial realm of gods where the persons with good conduct exist.

PAGE-280

If not so, and if he is reborn in the human world, he will be a person of the family of high lineage and social class. Young *Subha*.... having gentle and tender mind without arrogance, paying homage to revered ones, welcoming to respectable persons, politely and humbly giving seats or pathways to respectable persons, paying respect to revered ones, making a respectful gesture to respectable persons, giving adoration to cherished ones, and giving worship to revered persons are the practices to cause a person reborn in human world with family of high lineage and high social class”. (Ma-3-247-248.)

These kinds of practices have great power to upraise the status of noble person like you without any expenditure. The special great powers, which can take to celestial realm of gods and human world with high lineage and social class exist in the body and mind continuum of a person who is always performing such kinds of Wholesome practices. In fulfilling such practices, there are humble feelings and, he always keeps other respectable person who are older, having more honour and training, in superior place to him. Such kinds of humble feelings give him the effect of rebirth in noble life. The other Wholesome deeds done by that that person with good practices also give great and prosperous effects. These can produce conception in high lineage. That is how these practices produce a person being born in the family of high lineage. Next ----- That Action determine the person to be reborn in the human world

with high social class even at the time of conception of that person in his mother's womb. Next ----- In performing practices which make a person to be reborn in the high lineage, the Determining Volition will produce rebirth in the celestial realm of gods. The Foremost Volition and Exultant Volition give the effect of rebirth in the human world of high social class.

All these practices are the basic principles of the Buddhist culture. A person who is practising these basic principles, may be he is a gravedigger or a beggar, the Wholesome Volitions he performs have great power to make him reborn in the celestial realm of gods. The story of old woman beggar named *Candali* is described in the *Vimana vatthu Pali* text (= The text in which the reason of having palatial dwelling is mentioned). When, the Buddha with follower-monks goes round the City *Rajagaha* to accept offerings of food, an old woman beggar payed homage and gave worship to the Revered Buddha. Due to that Wholesome deed, she was reborn in the celestial realm of gods after her death as a goddess named *Candali* who possessed great and grand edifice. The Wholesome action of giving worship to the Buddha who in the venerable, noble and revered one, by making a gesture of reverence with the palms putting together and raising above the head; done by that old woman beggar took her to the celestial realm of gods. (*Vimana vatthu*-25.). Such kind of Wholesome action can support to attain Fruition of Holiness (= *Arahatta phala*) even by a faeces-collector like *Sunita*. These are the effects attained by reformation of mentality.

PAGE-281

Answer No (13) --- The Cause of Lack of Wisdom

Young *Subha*.... in this world, some persons, may be man or woman, never approach the novices, monks or brahmin and never ask the following questions: -----

1. What is the Wholesome deed ?
2. What is the Unwholesome deed ?
3. Which is the sinful conduct ?
4. Which is the sinless conduct ?
5. Which thing is worthy to associate ?
6. Which thing is not worthy to associate ?
7. Which practice will bring the poverty and suffering day and night ?
8. Which practice will bring the wealth and pleasure day and night ?

They never ask these question. That kind of person due to this wrongful action performed, will be reborn after his death in the Hell, where there is no pleasures, no desirable feelings, full of dissolution and where the person with evil conduct exist. If he is not reborn in the Hell, but reborn in the human world, he will be a stupid person. Young *Subha*... not approaching and asking the novices and brahmins like :----".... Venerable one.... What is the Wholesome deed ? What is the Unwholesome deed ? Which is the sinful conduct ? Which is the sinless conduct ? Which thing is worthy to associate ? Which thing is not worthy to associate? Which practice will bring me the poverty and suffering day and night ? Which practice will bring me the wealth and happiness day and night ? :-- is the practice which will make a person stupid, silly and unwise.

(Ma-3-248.)

Na paripucchita hotiti ettha pana aparipucchanena niraye na nibbattati. Aparipuhako pana “damkatabbam idam na katabba “ nti na janati, ajananto katabbam na karoti, akatabbam karoti. Tena nirayi nibbattati, itaro sagge.
(Ma-ttha-4-180.)

In the above description, just not asking various questions which are worthy to know, is not the only cause of rebirth in the Hell. Actually, a person who is not accustomed to approach and ask the noble wise man does not know :--

PAGE-282

“This thing is suitable to do and this is not suitable to do”. If so, he will avoid things ought to do and will perform things oughtn't to do. Due to, not performing things ought to do; and performing things oughtn't to do, a person is reborn in the Hell.
(Ma-ttha-4-180.)

Answer No (14) -- The Cause of Having Wisdom

Young *Subha*.... in this world; some persons, may be man or woman, approach and ask the novices, monks or brahmins as follow: -----

1. What is the Wholesome deed ?
2. What is the Unwholesome deed ?
3. Which is the sinful conduct ?
4. Which is the sinless conduct ?
5. Which thing is worthy to associate ?
6. Which thing is not worthy to associate ?
7. Which practice will bring me the poverty and suffering day and night ?
8. Which practice will bring me the wealth and pleasure day and night ?

They ask these questions again and again. That kind of person, due to this right action performed, will be reborn after his death in the celestial realm of gods. If not so, and when he is reborn in the human world, he will be a wise man. Young *Subha*..... approaching and asking the novices, monks or brahmin like:-----

1. What is the Wholesome deed ?
2. What is the Unwholesome deed ?
3. Which is the sinful conduct ?
4. Which is the sinless conduct ?
5. Which thing is worthy to associate ?
6. Which thing is not worthy to associate ?
7. Which practice will bring me the poverty and suffering day and night ?
8. Which practice will bring me the wealth and pleasure day and night ?

PAGE-283

----- is the practice which will make a person wise.

(Ma-3-248-249.)

In this instance also, just asking various questions like above will not make a person wise, and rebirth in the celestial realm of gods. Actually, a person who is

accustomed to ask such questions will know as: ----” This thing is suitable to do and this is not suitable to do”. By knowing like that, he will perform Wholesome deed which are ought to do and avoid Unwholesome deed which oughtn't to do. Due to avoiding the Unwholesome deed oughtn't to do and performing the Wholesome deeds ought to do, that person is reborn in the celestial realm of gods and possesses wisdom.

(Ma-ttha-4-180.)

In the world, it is obvious that there are Wholesome phenomena and Unwholesome phenomena, whether the Enlightened Buddha is present or not. But when the Buddha attains enlightenment --- the disciples definitely have chance to know like, this is Wholesome and that is Unwholesome, this is sinful and that is sinless, this is worthy to accociate and that is not, and this gives good effect and that gives evil effect etc.... etc. They will also know that this Unwholesome action will give evil effect and this Wholesome action will give effect. The disciples also definitely know to avoid Unwholesome deeds and to perform, have and multiply the Wholesome deeds. By having chance to know like that, the men and women of good family who have confidence (= *Saddha*) practise, multiply and have Wholesome deeds which are classified as Three Trainings (= *Sikkha*). They attain Insight knowledge which realises the Fruition of Holiness (= *Arahatta phala*). This Insight Knowledge of Fruition of Holiness (= *Arahatta phala nana*) has great power to save the Living being who attains it, from Conception (= *Patisandhi*) in new life which is the danger of Rebirth (= *Jati*); from danger of Ageing (= *Jara*), from danger of Illness (= *Byadhi*) and from danger of Death (= *Marana*). It is the great Insight Knowledge which has the great power to reach Nibbana where there is no Rebirth, Ageing, Illness, Death and Danger. That kind of Knowledge is the great Wisdom. (= *Nana, Panna*). This great Wisdom is attainable by disciples (= *Savaka*) only at the time of Buddha's teaching.(= *Sasana*). Again : -----

1. Penetrating Knowledge attained by discernment of the nature of Corporeality as described in Meditation of Corporeality = *Rupa pariggaha nana*,
2. Penetrating Knowledge attained by discernment of the nature of Mentality as described in Meditation of Mentality = *Arupa pariggaha nana*,
3. Penetrating Knowledge attained by discernment of the Cause and Effect of physical and mental phenomena (= *Paccaya pariggaha nana*) in three moments (= *Kala*) as described in Dependent Origination (= *Paticca samuppada*);
4. Penetrating Knowledge attained by discernment of Character-Essence-Perception-Proximate cause of the respective Ultimate Realities like Materiality and Mentality, now describing in this Section of “ *Lakkhanadi catukka* “. (= *Namarupa pariggaha nana*).
5. Insight Knowledge which will be described in the section of Insight meditation (= *Vipassana nana*) : ----

PAGE-284

All these Knowledges are attainable only at present time of Buddha's Teaching; and all these are great Wisdom. So, noble persons who attain these Wisdom are also Great wise persons. These Knowledges are not attainable by any philosophers and scientists of nowadays who are not followers of Buddha's teaching, but attained only

by the disciples of Buddha. Every noble persons with consideration ought to attain these Knowledges. So, you noble person should try to get and don't let these Knowledge loose.

Conclusion of the Discourse

Young *Subha*..... So;----

1. The practice which can cause the short life span will give the effect of short life.
2. The practice which can cause the Life-span long will give the effect of long life.
3. The practice which can cause diseases will give many diseases.
4. The practice which does not cause diseases will give the effect free from diseases.
5. The practice which causes ugliness will give ugly personality.
6. The practice which can cause good-looking will give the effect of good look.
7. The practice which can cause bereft of attendants will give the effect of bereft of friends and attendants.
8. The practice which can cause a person to have attendants will give the effect of having many friends and attendants.
9. The practice which can cause poverty will give the effect of poverty.
10. The practice which can give wealth will give the properties.
11. The practice which can cause low social class will give the effect of being rebirth in the family of low lineage.
12. The practice which can cause high social class will give the effect of being rebirth in the family of high lineage.
13. The practice which can cause stupidity will give the effect of lacking wisdom.
14. The practice which can cause to obtain wisdom will give effect of having wisdom to that person.

Young *Subha*.... the only property a person ultimately owns is his Actions (= *Kamma*). He is heir to his Action; the Action only is the proximate cause; the Action only is relative and only the Action is refuge for him. The Action determines the Living beings to have superior or inferior status.

When the Buddha teaches in this way, Young *Subha*, the son of Brahmin *Todeyya*, replied as follow :-----

“O Lord Buddha..... your Doctrine pleases me so much. O Lord Gotama ---- your Doctrine pleases me so much. O..... Lord Gotama,..... it is somewhat like turning up a matter which is upside down,

PAGE-285

.....like exposing a covered thing,.... like telling the right way to a person who is following wrong way; and like illuminating open oil lamp in the darkness with the hope to see various objects by persons with good vision. Similarly..... O Lord Buddha..... you teaches me with various ways. So, Lord Buddha.... I take my refuge in the Lord Gotama (= Buddha); I take my refuge in your Doctrine (= *Dhamma*) and I take my refuge in the Order (= *Sangha*). So, You Lord Gotama, from now please recognise me as a disciple who has firm belief in the Three Gems and I take my Refuges in Three Gems (= *Tisarana*) -----

Young *Subha* requested in that way.

(Ma-3-243-249.)

This is the end of “ Short Discourse on Analysis of Action” (= *Culakamma vibhanga sutta*).

Now, you noble person ought to understand about the Action (= *Kamma*) to some extent. This is the section in which how the effects are conditioned by the Aggregates of the Mental Formation (= *Sankharakkhanda*) are described.

The Consciousness (= *Citta*) is pure and clean in it's original nature. The Mental concomitants (= *Cetasika*) which arise with Consciousness, bring the Consciousness under their influence and make the Consciousness miraculous.

When the Consciousness becomes miraculous, the Actions produced also become miraculous. Due to the miraculous Action; the living beings become miraculous; so that the noble persons and wicked persons appear. So, if you noble person want to be a noble man, try to transform your Mentality. Keep yourself in the Trainings of Morality, Concentration and Wisdom (= *Sila, Samadhi, Panna*).

Now; the short account on the Aggregates of Mental Formation (= *Sankharakkhandha*) will be stopped and, the Character, Essence, Perception and Proximate Cause (= *Lakkhana, Kicca = Rasa, Paccupatthana, Padatthana*) of the (50) kinds of Mental Concomitants, enlisted in the Aggregates of the Mental Formation will be further described.

PAGE-286

About the Consciousness and Mental Concomitants (*Citta -Cetasika*)

From now, the Character- Essence-Perception and Prximate Cause of the (50) kinds of Mental Concomitants enlisted in the Aggregate of Mental Formation (= *Sankharakkhanda*) will be mentioned. Before mentioning, some accounts of Consciousness and Mental Concomitants will be, a little bit, explained.

Lokiyadhammanyi patva cittam jetthakam cittam dhuram cittam pubbangamam hoti, lokuttaradhammam patva panna jetthika panna dhura panna pubbangama.
(Abhi-ttha-1-110.)

In the Phenomena of Mundane World (= *Lokiya dhamma*); the Consciousness (= *Citta*) is the chief in that Mundane Phenomena. It is fundamental and decisive factor (= *Padhana*). It is also the leader. In the Phenomena of Supramundane World; the Wisdom (= *Panna*) is the chief in that Supramundane Phenomena. It is fundamental and decisive factor. It is also the leader. (Abhi-ttha-1-110.)

The Consciousness is the leader of the groups of Mental Concomitants known as Aggregate of Feeling, Aggregate of Perception and Aggregate of Mental Formation. The Consciousness is the highest in position. The Consciousness is the chief. All follow the Consciousness and accomplished by the Consciousness. If a person tells, performs and thinks the evil conducts like Greed (= *Lobha*), Anger (= *Dosa*) etc; etc; with ill will or ill Consciousness all kinds of miseries and sufferings will always be following him, due to telling, performing and thinking of such evil conducts; as if the wheel of a cart is following the foot prints of the cattles pulling the loads.
(Dhammapada-13.)

The Consciousness is the leader of the group of Mental concomitants known as Aggregate of Feeling, Aggregate of Perception and Aggregate of Mental Formation. The Consciousness is the highest in position. It is the chief also. All mentalities follow the Consciousness and all functions are accomplished by Consciousness. If a person tells, performs and thinks with pure and clean Consciousness, all kinds of ecstasy, happiness and wealth will follow him due to telling, performing and thinking in good will, as if a silhouette is following all the time to that person.
(Dhammapada-13.)

That Consciousness which is also known as Consciousness of Active-Formation (= *Abhisankhara vinnana*), is able to give all kinds of rebirths in various existences for living beings. In other words the Consciousness which is also known as Consciousness of Active-Formation takes all kinds of living beings to be reborn in various kinds of existences. (Sam-1-36.) (In this instance, Consciousness of Active-Formation means the Consciousness of Action = *Kamma vinnana*; which is able to give rise new life and existence and the fundamental factor is the Volition = *Cetana*).

Citta samkilesa bhikkhave satta samkilissanti, citta vodana satta visujjhanti.
(Sam-2-123.)

“O.... Monks..... the living beings are polluted by the pollutants in the mind; and the living beings are purified by the pure mind. (Sam-2-123.)

Pabhassaramidam bhikkhave cittam, tanca kho agantukehi upakkilesehi upakkilitham.
(Am-1-9.)

“O..... Monks..... the Subconsciousness (= *Bhavanga citta*) which is the host has glittering light = clean and pure. That Subconsciousness is contaminated by the guests like Greed, Lust etc; etc; (= *Raga, Lobha, Tanha*) all of which are Moral Impurities. (= *Upakkilesa*) and Defilements (= *Kilesa*). (Am-1-9.)

PAGE-287

Young *Subha*..... if a person does not take care of, or does not look out for arising of affection and hatred in the Consciousness; it means not taking care of Bodily action, Verbal action and Mental action. In that person who does not take care of the Bodily, Verbal and Mental action; these Bodily, Verbal and Mental Actions are soaked with Defilements (= *Kilesa*). When contaminated with Defilements, these Actions will deteriorate. A person with such deteriorated actions will never die peacefully.

Young *Subha*..... a house with pinnacle, if not properly roofed, it can not prevent pinnacle, rafters and walls from rain. The pinnacle caught in the rain and get soaked. The rafters are caught in the rain and get soaked. The walls are caught in the rain and get soaked. Then, the roof can not prevent the pinnacle, rafters and walls from decaying.

My donor *Subha*..... similarly, if you do not look after the Consciousness, it means not taking care of the Bodily, Verbal and Mental Actions. The Bodily, Verbal and Mental Actions of a person, who does not take care of the these Actions are soaked with defilements. Then, the Bodily, Verbal and Mental Actions (of a person

whose Bodily, Verbal and Mental Actions are soaked with defilements) will decay. A person with decaying Bodily, Verbal and Mental Actions will not die peacefully.

My donor..... if a person looks out for arising of affection and hatred in the Consciousness, it means taking care of Bodily, Verbal and Mental actions. In that person who looks after the Bodily, Verbal and Mental actions, these Bodily, Verbal and Mental actions are not soaked with defilements (= *Kilesa*). When these are not contaminated with defilements, these will not deteriorate. A person without deteriorated actions will die peacefully with dignity.

My donor..... a house with pinnacle, if properly roofed, it can prevent the pinnacle, rafters and walls from rain. The pinnacle, the rafters and walls are prevented from the rain; and not soaked in the rain. So, the roof can prevent the pinnacle, the rafters and the walls from decaying.

My donor.... similarly; if you look after the Consciousness, it means taking care of the Bodily, Verbal and Mental Actions. The Bodily, Verbal and Mental Action of a person who takes care of these Actions are not contaminated with Defilements (= *Kilesa*). Then, the Bodily, Verbal and Mental actions (of a person whose Bodily, Verbal and Mental actions are not soaked with defilements),

PAGE-288

do not decay. A person without decaying Bodily, Verbal and Mental action will die peacefully with dignity.

(Am-1-264-265.)

My donor..... if the Consciousness is destructed and deteriorated by the nature of Cravings, Anger (= *Raga, Dosa*) etc; the Bodily action, Verbal action and Mental action will be damaged. A person with these damaged Bodily, Verbal and Mental Actions; will not die peacefully with dignity.

My donor.... if a house with pinnacle is not properly roofed, the pinnacle, rafter and the walls will decay.

My donor..... similarly; if the Consciousness is deteriorated, the Bodily, Verbal and Mental Action will be deteriorated. A person with damaged Bodily, Verbal and Mental action will never die peacefully with dignity.

My donor..... if the Consciousness is not deteriorated, the Bodily, verbal and Mental actions are not damaged. A person without damaged Bodily, Verbal and Mental action will die peacefully with dignity.

My donor... if a house with pinnacle is properly roofed, the roof will prevent the pinnacle, rafters and the walls from decaying.

My donor.... just like to this example; if the Consciousness is not deteriorated and dissolved by Greed, Anger (= *Raga, Dosa*) etc; the Bodily, Verbal and Mental actions will not be damaged. A person with not damaging Bodily, Verbal and Mental actions will die peacefully with dignity.

(Am-1-265-266.)

O..... Monks..... the Consciousness which is not upgraded with the power of Tranquility and Insight Meditation (ie:- the Consciousness still exists in the field of inexorable Circling of sufferings = *Vatta*) it is not easy to transform to attain the Foundation- forming Absorption (= *Padaka jjhana*) which is used as a foundation for Insight (= *Vipassana*); ---- and to attain Insight knowledge, Knowledge of Path,

Knowledge of Fruition and finally Nibbana. I can't see another thing which is not easy to transform similar to the above Consciousness which is not upgraded. O..... Monks..... the Consciousness which is not upgraded with the power of Tranquility and Insight meditation is not easy to correct and transform.

(Am-1-4.)

O..... Monks..... I can't see another thing which is easy to transform similar to the Consciousness which is upgraded with the Tranquility and Insight meditation.

PAGE-289

O.... Monks..... the Consciousness which is already upgraded with the power of Tranquility and Insight Meditation is easy to correct and transform.

(Am-1-4.)

O..... Monks..... I can't see another thing which causes no desirable effects, similar to the Consciousness being not upgraded by the power of Tranquility and Insight Meditation and which can't give any desirable effects. O..... Monk..... the Consciousness which is not upgraded with the power of Tranquility and Insight Meditation will give so many undesirable effects.

(Am-1-5.)

O..... Monks..... I can't see another thing which causes many desirable effects, similar to the Consciousness being upgraded by the power of Tranquility and Insight Meditation and which can give so many desirable effects. O..... Monks..... the Consciousness which is upgraded by the Tranquility and Insight Meditation will bring so many desirable effects.

(Am-1-5.)

O.... Monks..... I can't see another thing which causes so many undesirable effects similar to the Consciousness which is not upgraded, not repeatedly and intensely contemplated and giving so many undesirable effects. O..... Monks..... the Consciousness which is not upgraded and not repeatedly and intensely contemplated will give so many undesirable effects.

(Am-1-5.)

O..... Monks..... I can't see another thing which causes many desirable effects similar to the Consciousness which is upgraded, repeatedly and intensely contemplated and giving so many desirable effects. O..... Monk..... the Consciousness which is upgraded, repeatedly and intensely contemplated will bring so many desirable effects.

(Am-1-5.)

O..... Monks..... I can't see another thing which brings miseries and sufferings (= *Dukkha*) similar to the Consciousness which is not upgraded, not repeatedly and intensely contemplated and bringing miseries and sufferings. O.... Monks..... the Consciousness which is not upgraded, not repeatedly and intensely contemplated, will bring miseries and sufferings.

(Am-1-5.)

O..... Monks..... I can't see another thing which brings the pleasure and happiness (= *Sukha*) similar to the Consciousness which is upgraded, repeatedly and intensely contemplated and bringing pleasures and happiness. O..... Monk..... the Consciousness which is upgraded, repeatedly and intensely contemplated will bring pleasures and happiness (= *Sukha*).

(Am-1-5.)

All the Wholesome phenomena with great Wisdom never recede.

(Am-1-153-341.)

What is the benefit of the Wisdom ? The Wisdom (= *Panna*) has the benefit of realizing the (4) Noble Truths (= *Sacca*) with great Knowledge (= *Nana*). It has the benefit of knowing definitely and distinctly. It has the benefit of discarding. [= The Ultimate truth, that the existence is suffering (= *Dukkha sacca*) and the Ultimate truth that the suffering is ultimately caused by attachment to the five aggregates of existence (= *Samudaya sacca*) are realised by the Full Understanding of the known Knowledge (= *Nataparinna Panna*); definite and distinct realization is caused by the Full Understanding with Investigation (= *Tirana parinna panna*); and finally all the Defilements are discarded with Full Understanding by Overcoming (= *Pahana parinna panna*).]

(Ma-1-367.)

PAGE-290

O..... Monks..... the Confidence (= *Saddha*) which always follows the Wisdom (= *Panna*) firmly exists in the mind continuum of a wise noble disciple (= *Ariya savaka*). The Diligence (= *Viriya*) which always follows the Wisdom firmly exists. The Mindfulness (= *Sati*) which always follows the Wisdom firmly exists. The Concentration (= *Samadhi*) which always follows the Wisdom firmly exists.

(Sam-3-195.)

So, as described above; in the Mundane World, the Consciousness is the chief in that Mundane phenomena. It is fundamental and decisive factor. It is the leader also. In the phenomena of Supramundane World; the Wisdom is the chief in that Supramundane phenomena. It is fundamental and decisive factor. It is also the leader.

(Abhi-ttha-1-111.)

The Truth of Suffering --(= *Dukkha sacca*) in which (5) Groups of Clinging (= *Upadanakkhandha*) exist in the three Spheres like Sensuous World, Fine- material World and Immaterial World, --- is known as **Inexorable Cycle (= *Vatta*)**. The basic cause to attain this Inexorable Cycle is all Wholesome and Unwholesome actions which are known as **the Foot (= Basic factor) of Inexorable Cycle (= *Vattapada*)**. This is the Truth of Origin of Suffering. (= *Samudaya sacca*). The (9) kinds of Supramundane phenomena are known as the nature of **Absence of the Cycle of existence (= *Vivatta*)**. All the Wholesome actions which are the basic causes to attain these (9) kinds of Supramundane phenomena, known as the Absence of the cycle of existence are --- named “**The Foot (= Basic factor) of the Absence of the Cycle of existence**” (= *Vivattapad*). Among these;- the seeds of Perceptive power (= *Vijja*) and the Conduct (= *Carana*) planted in the various past lives are also included. The Wholesome deeds of Morality, the Wholesome deeds of Concentration, Wholesome deeds of Insight, and the Wholesome deeds of Noble Paths, performed in the present life are also included (Am-ttha-1-40.).

In this instance, although the Consciousness which arises with the power of Inexorable Cycle (= *Vatta*) will gives effects of obtaining pleasures and prosperities in human world, celestial realm of gods and the highest class of beings (= *Brahma*), it will also give various sufferings (=

Dukkha) like repeated cycles of rebirth, conception, ageing, death, sorrow, lamentation, pain, grief and despair; and it will also give various Aggregates (= *Khandha*), Bases (= *Ayatana*), Elements (= *Dhatu*) and the nature of Dependent Origination (= *Paticca samuppada*), all of which persistently subjected to torturing by miserable nature of Arising and Dissolution.

So, that kind of Consciousness will only give the effect of sufferings and miseries. That is, the Consciousness which is not impregnated with Meditation will give disadvantages only.

The Consciousness not impregnated with Meditation (= *Bhavana*) and arises due to the power of Inexorable Cycle of Sufferings (= *Vatta*), will not give rise to the fundamental causes of Great noble phenomena like, the Foundation-Forming Absorption (= *Padaka jjhana*), Insight Knowledge, Knowledge of Path, Knowledge of Fruition and finally Nibbana. Only the Consciousness which arises due to the power of the nature of Absence of the Cycle of existence (= *Vivatta*) will give rise to the above phenomena.

The Consciousness which arises due to the power of the Nature of Absence of the Cycle of existence, will be able to give various kinds of pleasures and prosperities. That kind of Consciousness will give gradual increment in various pleasures and prosperities. It gradually increases the status of prosperity, from human to celestial god's possession, from that of celestial god to pleasure of absorption, from the pleasure of absorption to the pleasure of Insight, from the pleasure of Insight to the pleasure of the Path, from the pleasure of the Path to the pleasure of Fruition and finally from the pleasure of Fruition to pleasure of attainment of *Nibbana*. In this way, the Consciousness impregnated with the power of Tranquility and Insight

Meditations will gradually increase the status of the pleasures and bliss.

(Am-ttha-1-40-41.)

The Consciousness of highest grade which is impregnated with Morality, Concentration and Wisdom has the power of giving very high grade-effects of attaining various pleasures and bliss like escape from all Defilements (= *Kilesa*) and Intoxicants (= *Asava*) and attainment of *Nibbana*.

PAGE-291

On the contrary; the dirty, wicked and loathsome Consciousness will give various kinds of troubles and sufferings, like rebirth in the Hell.

The basic fundamental causes which manipulate the arising of noble high-grade Consciousness or dirty loathsome Consciousness are Mental concomitants. Naturally, the water is clean and colorless. If it is dyed with various colors like red, yellow, blue, black etc; etc; are dipped in the water, it changes into red water, yellow water, blue water, black water etc. Similarly, although the Consciousness is naturally pure and clean; if it is associated with Wholesome Mental concomitants it changes into noble high grade Consciousness and if it is associated with Unwholesome Mental concomitants, it changes into dirty, loathsome Consciousness. If these Mental concomitants are classified :-----

1. Mental concomitants with Dual Mode

..... 13 kinds

| | |
|------------------------------------|----------------|
| 2. Unwholesome Mental concomitants | 14 kinds |
| 3. Lofty Mental concomitants | 25 kinds |
| Total | -----52 kinds |

So, there are total (52) Mental concomitants. Among these (52) Mental concomitants, the Feeling (= *Vedana*) and the Perception (= *Sanna*) are already described. Now, other Mental concomitants like the Contact (= *Phassa*) etc, etc,-- will be mentioned.

Mental Concomitants common to all types of Consciousness

Page 292

Consciousness

(1) *Phassa*

1 – Its characteristic is the contact (meeting) with the object.

2 – Its function is to strike the object and consciousness, or to join consciousness to the object (or to join the object and consciousness together), or to create the meeting of the base (i.e. sensitivity) and object.

3 – (a) Its manifestation is the state that arises due to the meeting of three things-bases (sensitivity), object and consciousness,

(b) Or the state that makes arising of the result, sensation.

4 – Its immediate cause is the object that appears (on the sensitivity).

(i) Characteristic – As explained in the section on consciousness-aggregate, there are three ways of explaining analytically the real (original) meaning of ultimate realities by using the nominative, instrumentive and impersonal; of them the analytical explanation using the nominative and instrumentive is not correct, but the only explanation having (meaning) the impersonal (abstract) sense is said to be correct, and so it is said that the characteristic of *Phassa* is “contact”.

Among these three methods of explaining the ultimate realities,

(1). in the first case of explanation by using the nominative case, it is to be understood that there is not other agent except *Phassa* itself that makes contact with the object, for it is *Phassa* itself, but not *Attā* (soul) that makes contact with the object. This is not a true statement but a figurative speech used in order to reject the soul-theory that *Attā* or soul makes contact with the object.

2. It is only due to the *Phassa* that the associated things come into with contact the object. Coming into contact (meeting) with the object is achieved (accomplished) by *Phassa*, but not by *Attā* or soul. This also is not a true statement but a figurative speech used in order to reject the soul-theory that contact (meeting) with the objects achieved by *Attā* soul, but actually *Phassa* has not power to achieve (accomplish) the contact with the object.

Page 293

It is a true statement that *Phassa* has the characteristic of coming into contact (meeting) with the object, but *Phassa*'s contact with the object and consciousness is not like the touching of two fingers on a material thing, and so, it is just a state that arises in the manner of meeting (contact).

In the worldly (common) sense the two things touching or being attached to each other exist side by side. However *Phassa*'s contact with consciousness and the object is not like touching of the two wooden sticks existing side by side. Just as, when the visible object strikes the eye-sensitivity, the meeting of the eye-sensitivity and the visible object, is a mere elemental contact not being attached to each other, even so *Phassa* contacts with consciousness and object, without being attached to them.

Sanghittarasa – This term expresses the twofold Rasa or function, namely – *kiccarasa* and *Sampattirasa* of them.

1. *Kiccarasa* – Just as the visible object elementally strikes the eye-sensitivity, or the audible object the ear-sensitivity, without being attached to each other, even so *Phassa*, contact also

arises as if elementally striking its associated consciousness and object without being attached to them. This is *kiccarasa*. It is due to the *Phassa*'s elementally striking that there is meeting of consciousness and object, which are joined (connected) by *Phassa*. If *Phassa* strikes only the object but not consciousness, or only consciousness but not the object, there cannot be the meeting of consciousness and object. Therefore *sangattana* or striking is only a phenomenon by which there is the meeting of consciousness and object; in other words, the meeting of consciousness and the object is due to *Phassa*. This (their) meeting is indeed called striking". This means that striking is not a separate thing from the (their) meeting. *Phassa* is just a condition which causes the mind's elemental striking at the object.

2. The striking of one palm at another (one) is just the striking of material elements which have the stronger force (power) of air-element. In clapping, the two palms strike each other. The two palms also are just a group of material elements which are ultimate realities; each of the two palms has five kinds of material groups, or (in other words) the forty four kinds of mater. (If vitality nonad is included, the number of material qualities will be more than forty four material qualities. (See the section on meditation). The force (power) of the mind-born air-element is the greatest of material qualities existing in these two palms. The mutual striking material groups, existing in the **page – 294** two palms, which have more powerful force of mind-born air element is in other words (metaphorically) called clapping, or touching (striking) of two palms. Exactly in the same way, the mind's attention to the object and the being (becoming) of the object to be known is called the touching (striking) of mind and object. *Phassa*, a special phenomenon, depending on mind (consciousness), which arises in the mode (manner) of striking, is metaphorically, called by the commentator, *sangattana* the mind's striking at (on) the object. (See *Mula* TT 1-86; *Anu* TT 1-93)

The *Phassa*'s elemental striking (at the object) is in some cases as evident as the physical contact. Regarding the mode of *Phassa*'s striking is explained by the sub-commentary by three similes, viz.

1. There arises the trembling in a frightened person who is looking at (watching) someone on the top of the tree, who is about to fall down.
2. There arises the driveling (slavering) in a person who sees someone eating sour things (fruits) such as lime, mango fruits etc.
3. There arises the trembling of the body of a virtuous and compassionate person when he sees someone beaten and tortured.

In such cases, *Phassa*'s contact with the object is very evident. (see *AnuTT* 1-93)

Sampatti-rasa: - As *Phassa* arises due to the striking (meeting) of its base (heart) and object know that it (*Phassa*) has also a full (complete) function as its *Sampatti-rasa* due to the striking of its base and object, which is called *Sanghattana-rasa*. Here "*Sampatti*" means not perfection (completeness) but a natural process in full, as stated by *Anutikā*, a sub-commentary.

Page 295

Five-door and Mind-door Processes

It is explained in the great commentary. Every *Phassa* arising in the four spheres (realms), namely, *Kāma*, *Rūpa*, *Arūpa* and *Lokuttara*, has truly a characteristic of touching in the manner of striking (meeting with) the object. "*Sanghattana-rasa*" (function of striking), is said to be obtained in *Phassa* arising only in the Five-door process, but it can be (also) obtained in *Phassa* arising in the Mind-door process, in the sense of Function, though not in the sense of "*Sampatti*".

True - *Phassa* arising in the Five-doors has the characteristic of touching and also the function of striking (*Sanghattana-rasa*), but *Phassa* arising at the Mind-door has only the characteristic of touching, but not the function of striking.

The above statement is again explained in the great commentary, quoting the passage of the “*Milinda-pañha*”:-

"Great King!, for example, when the two goats strike each other with their horns, note one goat as the eye-sensitivity and the other one as the visible object, and the meeting of those two goats as *Phassa*. Thus *Phassa* has the characteristic of touching (contact) in the manner of meeting with the object, and also “*Sampatti-rasa*”, that is, function of being complete (perfect) due to the meeting of the base and the object. (It is the same in the similes, the striking of two cymbals, or of two palms and so on.)

Or, in the phrase, “*Cakkhunā rūpam disvā*”, stated in the canonical texts, *Cakkhu* (eye) is taken as eye-consciousness, not as eye-base or eye-sensitivity, and so this phrase means that the eye-consciousness sees the visible object, being taken as a figurative speech, meaning that eye consciousness is used in the name of eye, “*Cakkhu*”. In the above mentioned *Milinda-pañha* also, eye-consciousness is similarly used in the name (term) of (just) *Cakkhu* or eye, and so on.

Then, in the “*Milinda-pañha*” also, *Phassa* is said to have “*Sanghatta-rasa*” in the sense of function, as it strikes both the mind (consciousness) and the object. (*Abhi-A* -1- pp. 151-2)

Page 296

It is decided in the above said commentary that *Phassa* arising at the mind-door can have '*Sanghattana-rasa*' in the sense of function, though not having it (*Sanghattana-rasa*) in the sense of '*Sampatti*' (completeness or perfection). This means that *Phassa* arising at the mind-door has *kicca-rasa*, which is the arising the manner of connecting the consciousness with the object, and in the manner of striking the consciousness and the object.

Paccupatthāna - Manifestation -

1. *Upatthāṅkāra-Paccupatthāna* -As the *Buddha* said in the canonical texts, *Phassa* is manifest to the knowledge of a meditator who contemplates it (*Phassa*) as a phenomenon arising due to the conjunction of three things-bases (sensitivity), object and consciousness. This is *Upatthāṅkāra-Paccupatthāna*.
Phassa is manifest to the knowledge of a mediator who contemplates it (*Phassa*) in the mode of arising due to the conjunction of three things - base (sensitivity), object and consciousness, as the *Buddha* said to his disciples by way of *Phassa*'s condition which is (said to be) the conjunction of three things - base (sensitivity), object and consciousness. True, in the canonical texts, it is said that *Phassa* arises due to the conjunction of those three things, and so the conjunction of those three things is said to be *Phassa*'s condition. --- Thus, as the *Buddha* said that *Phassa* arises due to the conjunction of three things - base (sensitivity), object and consciousness, and is manifest to the knowledge of a meditator in the mode of conjunction of three things, this manifestation is called '*Sannipāta-Paccupatthāna*', meaning that *Phassa* is manifest to the knowledge of the meditator as a

phenomenon that arises due to the conjunction of three things - base (sensitivity), object and consciousness.

2. **Phala-Paccupatthāna** - In accordance with the formula of *Paticca-samuppāda*, **Phassa** brings about produces the result of feeling (*vedanā*). This is '**Phala-Paccupatthāna**'. In the case of **Page 297 Phassa**'s bringing about feeling, the following simile is given in the commentary: -

Look at live coal, (stick) lac, heat (vapour) - the live coal is an external thing cause to soften the hard lac. When the lac is placed (roasted) upon the live coal, there arises the heat element (vapour) in the lac. Though the heat element (vapour) arises due to the live coal, it just softens the lac on which it depends, but not the coal. In the same way-

1. the external cause - base (sensitivity) and object,
2. consciousness, and
3. **Phassa** (contact), of these three things (phenomena) **Phassa** that arises due to any cause of base (sensitivity) and object which are evident, cannot be said to cause *Vedanā* (sensation) to arise, but actually the only **Phassa** that arises depending on consciousness causes *Vedanā* to arise in consciousness. Although the base (sensitivity) and object are the cause of **Phassa**, this **Phassa** does not cause *Vedanā* either in the base (sensitivity) or in the object. Here, 1. the base (sensitivity) and object are like the live coal,
2. the consciousness is like the lac,
3. **Phassa** is like the heat element (Vapour), and
4. *Vedanā* (feeling) that arises due to **Phassa** is like softness of lac due to the heat element (vapour).

In the case that **Phassa** brings about produces the result of *Vedanā*, it is said that it causes *Vedanā* only in consciousness; and it shows (means) that **Phassa** is a phenomenon or a mental factor that depends on consciousness and (that) can strike just *Vedanā*, unmixed with the base (sensitivity) and object. But its depending on the corresponding material base (sensitivity) is not rejected, but **Phassa** associates only with consciousness, not with material base (sensitivity) on which it depends.

Padatthadāna = proximate cause: - **Phassa**'s proximate cause is the object that appears without obstruction: due to the proper attention or adverting consciousness and eye-sensitivity or faculty and so on, which create the appearance of **Phassa**. (*Abhi-A*- 1-152)

Page 298

In the statement that **Phassa** has as its proximate cause, the object that appears it means that there exists, eye-sensitivity (faculty) etc. on which **Phassa** depends turning to the object and also the adverting consciousness attending to the object, thus creating (helping) together the appearance of the object (on the sensitivity). This helping together (of sensitivity and adverting consciousness) causes consciousness (mind) to take that very object as its object.

Because no god (creator) can prevent the arising of consciousness in such an object thus helped together, it is said that consciousness arises on that object without obstruction. When consciousness arises, **Phassa** also arises together with it (simultaneously). And as **Phassa** arises invariably, without obstruction, in such an object that is thus helped together, the object is to be the proximate cause of **Phassa**. (*Mūla Tī* -1-86)

The point to be contemplated - This **Phassa** touches (strikes) the objects belonging to both the moral (wholesome) and immoral (unwholesome) consciousnesses, and so it arises in both the good and bad consciousnesses. It is a mental factor (concomitant) common to all consciousnesses. Of the mind-moments that arise according to the bases and doors, select

Phassa from the associated mental factors which exist in one mind-moment which you want to contemplate and contemplate its above mentioned characteristic, function etc. Contemplate both **Phassa's kicca-rasa** and **Sampatti-rasa** of **Phassa** arising at the five-door cognitions, but only **kicca-rasa** of **Phassa** arising at the mind-door cognition.

2. **Cetanā** = Intention

Cetanā (intention) is that which motivates and binds to the object, those things (phenomena) associated with itself, causing them to arise continuously.

1. Its characteristic is to motivate its associated things (states) to be fixed on and to attain to the object, (together with itself).
2. Its function is to urge and organize its associated things (states) to exert their own works in the object thoroughly and unitedly.
3. It is manifest (in the meditator's knowledge) as managing (the associated things).
4. Its proximate cause is (its) associated things (states), headed by the base (sensitivity), object, **Phassa** and attention.

Page 299

Lakkhana = Characteristic: - **Cetanā** binds its associated things (phenomena) to an object, making them arise in the object continuously due to the motivation of **Cetanā**, the associated things (states) are to arise continuously and repeatedly.

Āyūhan-rasa - Every **Cetanā** (intention) that exists in the four kinds of plane - **Kāma**, **Rūpa**, **Arūpa** and **Lokuttarā** - has indeed the characteristic of motivation and there is no **Cetanā** that has not such characteristic. But '**Āyūhan-rasa**' is only in the wholesome and unwholesome **cittas**, and it is the function that puts together and unites not dispersing, the associated states in the object which causes the wholesome and unwholesome **cittas**.

Further explanation: - When doing (exerting) moral (good) and immoral (evil) deeds, the associated states (each) except **Cetanā** do partly their own respective work(s), but **Cetanā** exerts excessively and two times more than them, (meaning its great business). So, the commentators says - "This **Cetanā** is like a field-owner". When mental states take their objects, **Cetanā** is excessively busy, in order to bind itself to that object and also to bind its associated states to it. The field-owner takes his fifty-five workers; he (himself) reaps continuously the rice-crops in the field together with his workers, and at the same time urges them to reap, pointing out them to the places where to be reaped, and also has to prepare things to eat and drink. Thus the field-owner is busier than others. In the same way, **Cetanā** works harder than its associated states in wholesome and unwholesome works to bring about moral and immoral deeds; in other words, it does busily the work of organizing its associated states in order to bring about the wholesome and unwholesome states incessantly.

Here, **Cetanā** is like the field-owner, and the fifty-five workers are like the fifty-five wholesome states, such as **Phassa**, **Vedanā** etc. arising by virtue of consciousness. **Cetanā** double work (exertion) in doing wholesome (moral) and unwholesome (immoral) deeds is like the field owner's double work (exertion). Thus **Cetanā's** function of exertion (**Āyūhana-rasa**) is thus to be understood. (**Abhi-A**- 1-155)

Page 300

Paccupatthāna - This **Cetanā** is manifest to the knowledge of the meditators as the state of management, and is like the management of the chief pupil or chief carpenter etc. who manages his own work as well as that of others.

To explain further - The chief pupil (disciple), when seeing his preceptor *Sayādaw* coming at a distance, recites his own lessons and also makes other pupils recite as he does. It is true - when that chief pupil exerts to recite his lessons, other pupils also have to recite their respective lessons following the example of that chief pupil.

Another simile - The chief carpenter himself does his own work - cutting and planning the wood and also causes other pupils of his do their respective works, - cutting and planning etc. It is true when the chief carpenter does his own work, cutting and planning the wood etc, those other pupils of his do their respective works, such as cutting and planning etc.

Another simile - In waging war at the battle-field when the general, the chief of the army, himself is engaged in fighting, he causes his own soldier to fight bravely and courageously. It is true - when the general begins to fight bravely, those soldiers of his have to fight bravely following the general's example.

In the same manner, when this *Cetanā* arises in the object by his own function, its seems (appears), as if managing its other associated states such as *Phassa* etc. to carry out their respective functions such as striking (samghattana) etc., thus is this *Cetanā* is manifest to the knowledge of meditators who contemplate *Cetanā*. It is true - when that *Cetanā* does (exerts) its own work, its associated states also do their respective works. Therefore, it is said that *Cetanā* is to be understood to be like the management of the chief pupil (disciple), the chief carpenter etc. who accomplishes his own and others' works as well.

In remembering the works to be done quickly etc., note that this *Cetanā* is evident when it arises as a state causing its associated states to exert or strive (do their respective works). Here, the state causing (others) to exert (strive) is not *Vīriya*, but it is a respectful attention to the object. *Cetanā* itself respects the object and also causes its associated states to respect (the object).

Page 301

Therefore, note that *Cetanā* is a state causing (others) to exert (*unsahana-bhāva*), which causes its associated states to exert (strive), by way of motivating, impelling and organizing its associated states, in order to put (place) them onto the object and make them do their respective works there. (*Abhi-A* 1-155, *Mūla-tī* 1-87)

What *kamma* is - As *Cetanā* is busy in taking an object, its associated states also are very active as if having great concern. As mind and mental concomitants are very active, the mind-born material qualities born of active mind become very active. As the mind-born materiality is very active, its co-existing material qualities born of *Kamma*, Temperature and Nutritive essence also have to become very active, like a lump of dry cow-dung thrown on the swift current of a river. Therefore, in (when) doing either a good deed or an evil one, the whole body as all material and mental aggregates become active (vigorous) as much as the mind is active (intense); but they are inactive, passive, sluggish and weak if *Cetanā* which is the main (root) cause of all good (moral) and evil (immoral) deeds is said to be *kamma* by the *Buddha*.

"O-monks, one, being motivated by *Cetanā*, does bodily, verbal and mental deeds, and so *Cetanā*, the main cause of those deeds is said by me to be *kamma*." (*Ain* 2-463, *Abhi* 4-290)

Kamma is the actual (real) name of bodily, verbal and mental actions. But those deeds are achieved due to *Cetanā* and *Cetanā* is metaphorically called *kamma* (*Mūla-tī* 1-77).

Padatthāna - In the commentaries, *Cetanā's Padatthāna* (proximate cause) is not stated. In the *Visuddhimagga*, however, while stating the characteristics, functions etc. of mental concomitants included in the "formation-group" (*SañKhārakkhan-dha*), the proximate cause of

Cetanā is said to be the remaining three groups (aggregates), viz. the feeling-group, perception-group and consciousness-group.

Again, in the "*Satta-tthāna-kusala Sutta, khandha-vagga, Sainyutta-nikāya*, (*Sam* 2-51-52), and also in the *paṭisambhidā-magga* and *lisuddhimagga* which contain the chapter on the detailed explanation of "*Udayabbaya-ñāna*" (knowledge of rise and fall) where the connection of cause-and-effect of the conditional states is contemplated, it is stated thus: -

Page 302

In these texts, it is taught that the (three) aggregates of feeling, perception and formations arise due to *Phassa*, and that the aggregate of consciousness arises due to mentality and materiality. (*Sam* 2-51-531, *Patissam* 54, *Vs* 2-266-7) (Furthermore, it is taught thus)

1. The four mental aggregates are mutually related to one another by the forces of co-existence etc. (Path 1-5).
2. The (six) bases, eye-base etc., are related, by the forces of Dependence, Pre-existence etc., to the mental states which arise depending thereon. (Path 1-5)
3. The six objects, visible object etc., are related, by the forces of object condition etc. (Path 1-1)

Therefore, there are indeed the proximate causes which give rise to *Cetanā*. Speaking (Stating) briefly, those causes are of three kinds, namely 1. the base, 2. the object and 3. *Phassa* (the associated mental states headed by *Phassa*).

That those (three) causes are not specifically mentioned in the commentaries is perhaps because there is no special cause to mention to be a more prominent cause out of those three causes in giving rise to *Cetanā*.

In the case of some mental states, such as "*Santirana*" (Investigating consciousness), the proximate cause is the base on which they depend. In the case of some mental states, such as *Phassa*, the proximate cause is the object that appears. In the case of some mental states, such as *Paññā* (wisdom), the proximate cause is Samadhi (concentration) which is its associated state.

This *Cetanā* also is associated either with *Santirana* or with *Phassa* or with *Paññā*. It must have its proximate cause, as there is a proximate cause in its associated states. Therefore, note that '*Cetanā*'s proximate cause is either one of, or all of these three states, **Page 303** namely - the base, the object and (its) associated state(s) headed by *Phassa*. (See also the explanations - *Abhi-A*1-321-322) They have been stated. Note similarly in the case (place) where the proximate is not specifically mentioned in the remaining mental concomitants.

The point to be contemplated: - *Cetanā* also is verily a mental concomitant common to all kinds of consciousness. Selecting (Extracting) *Cetanā*, which one wishes to contemplate out of the associated states which arise (exist) in the mind-moments, contemplate its characteristic, function etc. In contemplating so, contemplate the *Āyūhana-rasa* of *Cetanā* only associated with the wholesome (moral) and unwholesome (immoral) *Javana* (Impulsion) moments. Do not contemplate the *Āyūhana-rasa* of *Cetanā* associated with the (remaining) indeterminate resultant and functional consciousness or mind-moments. If so, one may ask - "Isn't there Rasa (function) in the *Cetanā* associated with the (remaining) indeterminate resultant and functional consciousness?" As the very characteristic of some ultimate realities, such as *Vedanā* (sensation), is their function, here also contemplate that 1. motivation is *Cetanā*'s characteristic 2. and its function as well.

The essential (necessary) meaning of all the explanations given in the commentary, *Mūla-tīkā* and *Anu tīkā*, is that *Cetanā* is a (mental) state that establishes its associated states in their respective works or causes them to do their respective works. This means that *Cetanā* motivates its associated states,

together with itself, to reach the object, or binds them to the object or causes them to be (stay) in the object. That which causes its associated states, together with itself, to do (to be in) their respective works, can be called *Cetanā*'s function. The wise men should think wisely and know the true meaning in this case.

Page 304

3. *Ekaggatā* = *Samādhi*

Samādhi is a (mental state that fixes (places) the mind well or unitedly (equally) on the object. Or, just fixing (placing) the mind well and unitedly (equally) on the object is (called) *Samādhi*.

1. (a) Its characteristic is (the state of being) a chief of associated states being (together) in the object.
(b) Its characteristic is, by its nature, being undistracted (from the object) or being fixed unmoved in the object.
(c) Its characteristic is the cause of being undistracted of its associated states from (in) the object.
2. Its function is to unite (put together) its associated states, (just like the water that unites (gathers together) to fine particles of soap-powder.
3. (a) Its manifestation (*Upatthānākāra*) is a calm (peaceful) state.
(b) Its manifestation (*Phala* = result) is a state that produces wisdom (insight knowledge) as its result, or is the cause of wisdom.

[The *Buddha* said - A man of concentration or concentrated mind fixed in the object knows (the things) Sam 2-12]

4. Its proximate cause is generally a happy sensation (happiness).

"*Cittassekaggatā*" (*cittassa + ekaggatā*) means a state of mind that has one-pointedness in a single object. This term, "*Cittsekaggatā*" is really a name of *Samādhi* (concentration). Its being a chief as its characteristic (*Pāmakka-Lakkhana*) is explained first in the great commentary (*Mahāṭṭhakathā*), thus;

(a) *Pāmakka-Lakkhana* - Just as a pinnacle which is the centre of a graded turret binds and puts together (all) the remaining timbers, such as, cross beams, rafters and so on, and therefore is a chief or principal part, even so *Samādhi* (concentration) has the characteristic of being a chief of all moral (wholesome) states, because all the moral (wholesome) states are achieved due to consciousness (mind) associated with *Samādhi* (concentration). Therefore, Rev.

Nāgasena said, -

"Great King, all the roof rafters on the graded turret reach and incline to (lean on) the pinnacle and join together on it. And so the pinnacle is said to be the best and most important part.

Page 305

In the same way, great king, all the moral (wholesome) states incline to *Samādhi* (concentration), and so *Samādhi* is said to be the best of all the moral (wholesome) states. (*Milinda-pañha* - 38; *Abhi-A*-1-161).

In the case of charity and morality also, there is *Samādhi* (concentration), a mental concomitant but *Cetanā* (intention) is the chief in the case of charity, and *Saddhā* (faith, confidence) in morality. Therefore, the above statement that *Cetanā* has the characteristic of being the chief is to be understood regarding the moral developments of concentration (calm) and insight-knowledge.

(b) *Avisāra-Lakkhana*, (b) *Avikkhena-Lakkhana* - "*Avisāra-Lakkhana*" means the state of being un-distracted of just *Samādhi* itself in the object. "*Avikkhena-Lakkhana*" however,

means that *Samādhi* is not only the characteristic of being undistracted itself in the object, but also causes its associated states to be undistracted in the object. Only

page-29

due to *Samādhi*, its associated states are undistracted in the object. Therefore the state that causes the associated states to be undistracted in the object is (called) “*Avikkhepa Lakkhana*”. Proximate concentration and *Jhānic* concentration is the object of calm-meditation, such as replica image (*Patibhāgre-nimitta*) of (in) the in-and-out breathing and *kasina*-meditations etc., and also concentration of insight-meditation in the mental and material objects thus such and such concentration is fixed calmly in such and such corresponding objects. This concentration is not only fixed calmly itself in that object, but also causes its associated states to be fixed co-exist calmly in the object. Therefore, consciousnesses of both calm and insight meditations or developments are fixed calmly in the objects (i.e., *Kasina* and phenomena) of calm and insight meditations, but do not go astray to other objects. For, the concentration, called “*Avikkhepa*” (undistractedness) is an adversary (opponent) of *Uddhacca* (Distraction) that goes astray to other objects except the objects of calm and insight meditations. Of the mundane concentrations are so powerful as such, the supramundane concentrations are much more powerful than those mundane ones.

When fighting (waging war) in the battle-field takes place, the king has to go to this and that place where fighting fails and wherever the king arrives, many more soldiers come in full, because the king's army follows after him due to his management. The other (opponent) army is broken and the soldiers follow after their king and retreat only to the place where their king is. In the same way, concentration (*Samādhi*) does not give its associated states to any chance of scattering in this and that object, and therefore it (*Samādhi*) is a state that causes its associate states to be undistracted: this is called “*Avikkhepa Lakkhana*”.

Sampindanarasa - Just as water unites (puts together) the fine particles of soap-powder so that they do not scatter, and become a solid lump-soap, PAGE 306 even so *Samādhi* or concentration has the function to unite (put together) its associated states not to be distracted in the objects such as *Kasina* and phenomena of calm and insight meditations. It is due to the power of concentration that all the mental states exist calmly in the single object which is a replica image etc. in the in-and-out breathing and *Kasina* meditations. In the case of insight meditation also of the consciousness of insight is associated with knowledge (wisdom) and happiness, 34 mental states contain in the phases of impulsion *Javana* calmly co-exist in the object of phenomena which is to be contemplated by the insight knowledge. That they can co-exist as such is due to the power (force) of concentration associated with insight knowledge. The Path and Fruition consciousnesses and their concomitants remain fixed in *Nibbāna* which is their object. That they (Path and Fruition consciousnesses) can remain fixed in *Nibbāna* as such is actually due to the power (force) of the supramundane concentration associated with those Path and Fruition consciousnesses. Therefore *Samādhi* (Concentration) is said to have the function of collecting (gathering together) its associated states so that they exist together in one object.

Paccupatthāna is explained as (being of) two kinds, namely, *Upatthānākāra-Paccupatthāna* and *Phala-Paccupatthāna*: -

(a) *Upatthānākāra-Paccupatthāna*

Samādhi (Concentration) is manifested as tranquility (calmness) of mind, *Upasama-Paccupatthāna*, because it has the characteristic of tranquility and is opposed to *Uddhacca*, the mental distraction, and

because it is manifested to the knowledge of the meditator who is the contemplating *Samādhi* in the mode of mental tranquility. This is *Upatthānākāra paecupatthāna*.

(b) *Phala paceupatthāna*

"Monks, develop *Samādhi* (concentration). A monk of concentrated mind knows truly exactly and distinctly.

1. the five aggregates of clinging, 2. their arising and the cause of their arising, 3. their cessation and the cause of their cessation (Sam -2-12).

"Monks, develop *Samādhi*. A monk of concentrated mind knows truly, exactly and distinctly: 1. This is the Noble Truth of Suffering. 2. This is the Noble Truth of its Cause. **PAGE 307** 3. This is the Noble Truth of its Cessation. 4. This is the Noble Truth of Path (leading) to its cessation" (Sam-3-363).

"Monks, develop *Samādhi*, build it up. A Yogi of concentrated mind placed fixedly in the object knows truly and exactly. (*Khu*-10-50, *Khu*-11-38)

As the *Buddha* said thus, *Samādhi* has the manifestation of fruit or result (*Phala paceupatthāna*), which produces *Yathā-bhūta-ñāna*, that is, the knowledge that penetrates truly the four Noble Truths. *Samādhi* produces *Yathā-bhūta-ñāna* as its result, as the latter arises due to the former.

Padatthāna

Happiness (Pleasant feeling) is an approximate nearest cause of *Samādhi*, because generally *Samādhi* arises in a man of happiness and his *Samādhi* can become strong. Generally, *Samādhi* arises if there is happiness, but there are some other (stronger) kinds of *Samādhi*, such as the fourth *Jhānic Samādhi*, not associated with happiness and therefore the author of *Anu- tīkā* explained the word "*Visesato*" as meaning "excessively" (*Atisaya*), although the author of *Mūla-tīkā* explained the word "*Visesato*" as meaning generally (*Yebbuyyena*).

As the *Buddha* he said that the mind of a happy person is concentrated (DT-3-252), the feeling of happiness is an excellent cause of concentration (*Anu- tī* -95).

Just as the flame of a lamp stands still in the place where there is no wind (or the wind is calm), even so the mind is tranquil or calm (when there is no mental suffering). As in the illustration of 'standing still of the flame of a lamp', *Samādhi* is said to be a state of mental tranquility, not of continuous series of mind, like the flame of a lamp continuously burning. (*Abhi*-A-1-162, *Mūla-tī* -1-88, *Mahā- tī* -2-142)

[Remark: As the proximate cause of *Samādhi* associated with the fourth *Jhāna* and indifferent feeling is not mentioned, note that the associated states led by the base, object and *Phassa* (contact) are their proximate cause.]

Review the above statements regarding the *Samādhi*, and it is clear that the moral *Samādhi* (associated with wholesome states) is endowed with the powers (forces) that produce *Yathā-bhūta-ñāna* (true knowledge). If so, why are you, noble man, disgusted with the building up of *Samādhi*?

PAGE 308

Samādhi can help to get *Yathā-bhūta-ñāna* (the knowledge that knows truly), penetrate the four Noble Truths, and produce the Insight Path and Fruition knowledges. *Yathā-bhūta-ñāna*, the knowledge that knows truly, can destroy the defilements (by degrees) up to the *Arahatta* Path-and Fruition knowledges

and (thereby) can cause (help) one to escape from the suffering of round of existences. The Noble ones such as the *Buddha* etc. appreciate and admire *Samādhi* of such a great power.

The *Sammāsambuddha*, who is more excellent than the three kinds of *Buddha*, namely, *Suta-Buddha*, *Sāvaka-Buddha* and *Pacceka-Buddha*, admires *Samādhi* associated with *Ariyan* Path, which is said by the *Buddha* to produce immediately after itself its own result, the *Ariyan* Fruition, and so there is no other state equal to that kind of *Samādhi* associated with *Ariyan* Path. This Jewel of *Samādhi* associated with *Ariyan* Path is excellent. By uttering this truthful word, may all beings be happy and free from all dangers. (*Suttanipāṭa*-312).

In the above stated "*Ratana-sutta*", the *Buddha* admired and revered the Path-concentration (*Magga-Samādhi*), associated with *Ariyā* Path. But *Ariyā* Path-concentrations or *Ariyā* Path states can come into existence, only when they are helped (aided) by successive insight knowledges and concentrations.

According to the teachings stated in the *Paṭṭhāna* 1-146, *Abhi-A*3-443 and *Sam* 1-344, the *Ariyā* Path knowledge and concentration come into existence only when they are helped by the powerful forces of successive Insight Knowledge and concentrations. Again, according to the *Buddha*'s teachings stated in the discourse on *Samādhi*, *Sacca-Samyutta* (*Sam*-3-363), as explained above, one must try to first attain one of the two kinds of concentration, viz., Proximate and *Jhāna*, in order to attain the right knowledge of truth (*Yathā-bhūta-ñāna*) that penetrates the four (Noble) Truths.

PAGE 309

That concentration is one of five powerful forces which (can) promote your (noble man's) mental continuity to the higher and higher stages up to *Nibbāna*. Therefore, may you noble man revere the concentration, understanding (knowing) its value.

The points to be contemplated regarding *Samādhi*'s characteristic, function etc., as presented above, are the points (facts) explained in detail (in preference) for the concentration associated with moral (wholesome) states, but in the same way (manner) one can contemplate (other) kinds of concentration, associated with immoral (un-wholesome), resultant and functional (indeterminate) consciousnesses.

4. *Jīvitā*

1. Its characteristic is to guard (protect) the states which co-exist inseparably with itself.
2. Its function is to establish and prolong its co-existent states from arising (*uppāda*) up to cessation (*bhanga*).
3. It is manifested as a state that maintains its co-existent states until the (instant of) cessation.
4. Its proximate cause is a state (phenomenon) that is established and prolonged by itself.

The term "*Sampayutta*" means the associated mental states. But here, in order to explain the sameness of both "life-faculties", mental and physical, regarding their nature and characteristic etc., it is explained by the words, "*Attanā avinibhuttānam dhammānam*", which means that it (*Jīvitā*) has the characteristic that protects the states which co-exist inseparably with itself. (*Mūla-ṭī* -1-90).

Therefore, as the "material life-faculty" is explained in the chapter one "Matter", if "the mental life-faculty" only is explained, its characteristic, function etc. can be noted as following:

PAGE 310

1. Its characteristic is to protect its associated states.

2. Its function is to establish and prolong its associated states from arising (*upāda*) up to cessation.
3. It is manifested as a state that maintains its associated states until cessation.
4. Its proximate cause is those associated states that are established and prolonged by itself.

It is due to this (mental) life-faculty that its associated (and co-existent) states live or exist alive and live long. Therefore, *Jīvita* is a state that causes its associates to exist alive and live long. It (*Jīvita*) is called "*Indriya*", because it exercises its control over its associated states in its protecting and prolonging them (associated states).

"Anupālana-lakkhane indattham kāreti"

The mental concomitant, *Jīvita*, maintains (protects) its associated states so that they live long, and in this case, its associated states make it (*Jīvita*) their lordship and sovereign. Without *Jīvita*, its associated states have no protective power and so it seems that it causes its associated states to make itself their chief.

(The same is applied to other states of faculty.)

The word "*Jīvitindriya*" is made by combining the two words, "*Jīvita* and *Indriya*". *Jīvita* (life-faculty) is the chief of (continuity of) the aggregates, named "*Pavatta*", which are in continuous existence linked together according to the law of cause-and-effect (*Paliccasamuppāda*), and which are grasped by *Karma* as its result by means of craving (*Tanhā*) and wrong view (*Diṭṭhi*).

PAGE 311

It is due to Life-faculty (*Jīvitindriya*) that its associated (co-existent) states can exist from (their) arising up to (their) cessation. At the time when Life-faculty exists for three instants of arising, static and cessation (vanishing), its associated states can exist, due to life-faculty, from (their) arising up to (their) cessation, and so it is said that, due to life-faculty, its associated states can live. Again, the preceding Life-faculty causes its associated (co-existent) states to become together with itself (even) after itself. It is due to the help (service, assistance) of life-faculty that the continuity of the aggregates of clinging that become (arise) in succession, exists for long, and if those aggregates (associated states) do not receive the help (assistance) of life-faculty, they may expire. Therefore, it is said that, due to life-faculty, its associated (co-existent) states, that is, aggregates of clinging, can continue to exist or live long.

The existence for long of the continuous aggregates of clinging due to the help of life-faculty, if it is associated with the special karmic force that produces this and that (new) existence, can continue (to be) incessantly till death or even till *Parinibbāna* (Total extinction), as it is helped till that time. [As the continuity of aggregates of clinging can continue for long due to the help (assistance) of life-faculty, this life-faculty, if it is associated with the special *kammic* force that produces this and that (new) existence, can exist incessantly till death or even till *Parinibbāna* (Total extinction).] (See: *Mūla-tī* 1-90, *Anu-tī* -1-97)

Lakkhana - By the word, "*Sampayutta*", is meant the (associated) mental states. But here, the co-existent (*sahagāta*) mental and material states are to be taken, as they both are inseparable from life-faculty, which is said to have the characteristic of protecting them. Water is said to protect the lotuses, but it can protect the lotuses etc. that are existent and worthy of protecting. If there are no lotuses worthy of protecting, water cannot protect anything. In the same way, in the case that life-faculty protects its co-existent states, it can protect them only at the time when they exist, but it cannot protect them not to disappear. (So that they cannot disappear.)

Just as a nurse guards (suckles) another's baby (born by another), even so the life-faculty also protects the resultant mental and material phenomena, which are produced by such causes as "*Avijjā, Tanhā, upādānā, saīkhāra, Karma*", or "*Citta, utu, āhāra*", or "Base, object, *Phassa* (contact) and so on.

Just as a boat-man who conveys only the boat to the thither shore by rowing it, as he himself is together with that boat conveyed to thither shore, is said to convey himself also to the thither shore, even so *Jīvita* (life-faculty) is connected with (other) phenomena that are caused by itself to live long from (the instant of) arising up to (till) cessation and can live (exist) up to that moment, and so *Jīvita* is said to guard (maintain) itself in turn, by guarding (maintaining) its co-existent states. (*Abhi-A-1-167*).

PAGE 312

Rasa (Function) - *Jīvita* is said to have the function to cause its co-existent states to arise and maintain them from (the instant of) arising till cessation, but it cannot cause its co-existent states to arise after (the instant of) cessation. It is because both *Jīvita* itself and its co-existent states caused by itself do not exist after (the instant of) cessation. Here, although *Jīvita* is said to cause its co-existent states to arise from (the instant of) arising up to cessation, it means that they are still present (existent) without dissolution. (But) note that it does not cause the un-arisen states to arise. There are two separate causes (forces), viz. the generative cause *Janaka* that causes the un-arisen states to arise, and the supporting cause (*Upatthambhaka*) that supports the arisen states. This *Jīvita* is only a state that maintains the states that have arisen due to the conditions concerned, by the force of "*Anupālana*" maintenance). This *Jīvita* not only helps the states that are to be protected by the force of "*Anupālana*" to exist for the state moment or from (the instant of) arising up to (till) cessation, but also helps them to exist (arise) connectedly and continuously in succession (*Pabandha thiti*) as a continuously of mental and material states.

The causes of resultant mental states and resultant *Kamma*-born material states are *Sarikhāra* (formations) and *Kamma* surrounded by *Avijjā, Tanhā* and *Upādāna*. *Citta* (mind) is the cause of the mind-born materiality states, *Utu* (Temperature) of the temperature-born materiality, and *Āhāra* (Nutriment) of nutriment-born materiality. *Vatthu* (base), object, *Phassa* (contact), proper attention, improper attention etc. are the causes of wholesome, unwholesome, functional and indeterminate states, according to circumstances causing those mental and material aggregates arising due to those corresponding causes (conditions) to live and live long during the period, from (the instant of) arising till cessation, is called "causing to arise".

In the above-mentioned simile of (a) nurse, the baby nourished by the nurse does not come into existent due to the nurse, but it (baby) is caused by the nurse to live and live long in order not to die and the continuity of the baby's mental and material aggregates is maintained (by the nurse) before death. In the same way, in the case that *Jīvita* causes its co-existent states to arise, note that it is just like the causing the body to arise (live exist) by the nurse.

Paccupatthāna - *Jīvita* can maintain its co-existent states only before the (instant of) cessation. At the moment of cessation, however, as *Jīvita* itself is disappearing (dissolving), it cannot maintain (keep) its co-existent states to exist (continue), and note that it is just as the wick and oil which are exhausting cannot maintain (keep) the flame to continue.

Jīvita can maintain its co-existent states only at the moment of "presence" when itself is present, and can neither cause them to arise after the moment of cessation, nor maintain them at the moment of cessation but it is not without the following) three powers:

- a. the power of protection (maintenance),

- b. the power of causing them to arise,
- c. the power of keeping (them) constant.

Why? Because it *Jīvita* can accomplish the functions to maintain the above-said co-existent states at the moment when itself is present, and from the moment of arising till the moment of cessation and to cause them to arise and exist from arising to cessation. (*Abhi-A-1-167*).

PAGE 313

- 1. Here it is *Jīvita*'s, characteristic of maintaining (*Anupālana-Lakkhana*) its co-existent states;
- 2. it is *Jīvita*'s function to cause them to arise (*Pavattana-rasa*);
- 3. it is *Jīvita*'s manifestation as keeping them constant (*Thapana-Paccupatthāna*).

The fact that *Jīvitindriya* can achieve the functions; 1. to maintain its co-existent states (*Anupālana-kicca*), 2. to cause them to arise (*Pavattana-kicca*), and 3. to keep them constant (*Thapana-kicca*).

Jīvita's achievement of these functions is due to the special (distinguishing) cause (condition) of the living (animate) world *Jīvamāna-risesa* which is the liveliness of its co-existent states. The difference of materiality of the living (animate) world from the dead (lifeless) matter, and the difference of the *Kamma*-born materiality from the temperature-born, mind-born and nutriment-born materiality is done by *Jīvitindriya*. (It means that *Jīvita* is included only in the *Kamma*-born material groups, but not included in the temperature-born, mind-born and nutriment-born material groups, and so that difference between the *Kamma*-born materiality and the remaining material factors (qualities) is done by *Jīvita* itself). Therefore *Jīvita* is said to be the special (distinguishing) cause of the living (animate) world which is the liveliness of its co-existent material qualities.

Padatthāna - Just as water that keeps the lotus fresh and alive can protect or maintain it (lotus) only when it exists (is present), but cannot protect it (lotus) if it does not exist, even so *Jīvita* can protect or maintain its co-existent (material) states which are to be protected by it, only when they exist, but it cannot protect them, if they do not exist; and therefore, *Jīvita*'s proximate cause is the group of its co-existent (material) states which are to be kept going and livened long by itself.

Point to be contemplated: - As this *Jīvita* is common to all types of consciousness, the Yogī can contemplate the above-mentioned characteristic, function etc. of *Jīvita* which he wishes to contemplate taking it out of the associated (mental) states arising during the mind-moments. The same is applied to the remaining mental states.

PAGE 314

Material life and mental life - both of them are called the life of living beings. There is no substance called "*Attā*" other than this two-fold "*Jīvita*" inside the body of beings.

5. *Manasikāra*

The state or mental concomitant that makes the object present and appear (*Ārammana-patipādāka-manasi-Kāra*) is (called) *Manasikāra*, as it makes the object appear in the mind.

Its characteristics are as follows;

- 1. It has the characteristic (*Lakkhara*) that makes its associated states go (run) straight to the object, as if it drives them towards the object.
- 2. It has the function (*Kicea*) to join its associated states to the object.

3. It is manifested (*Paccapatthāna*) to the Yogi's knowledge as a state that directs (adverts) the mind to the object.
4. Its proximate cause is the object.

This mental concomitant, *Manasikāra*, is included in the formation aggregate.

As it makes the object appear or it touches the object, it is a state that makes its associated states go (run) to the object, like a charioteer who drives the well-bred horses.

Three kinds of *Manasikāra*

1. *Ārammana-patipādaka-Manasikāra* that makes the object appear (arise),
2. *Vīthi-patipādaka-Manasikāra* that makes the consciousness of cognitive process appear (arise),
3. *Javana-patipādaka-Manasikāra* that makes the consciousness of impulsion appear (arise).

Thus there are three kinds of *Manasikāra*. Of them,

1. "*Ārammana-patipādaka-Manasikāra*" means is the mental concomitant called "*Manasikāra*". It is included in the aggregate of formations.

PAGE 315

2. '*Vīthi-patipādaka-Manasikāra*' means (is) the Five door adverting consciousness (Pañcadvārāvajjana), which makes arising of 'eye consciousness, accepting consciousness investigating consciousness etc.' after itself. It is included in the aggregate of consciousness.
3. '*Javana-patipādaka-Manasikāra*' means (is) Mind-door adverting consciousness, which makes arising of series of impulsive consciousness after itself. It also is included in the aggregate of consciousness. (*Abhi-A*-1-177, *Vs*-2-96)

Of them, the two kinds of *Manasikāra*, namely, '*Vīthi-patipādaka-Manasikāra*' and '*Javana-patipādaka-Manasikāra*' are in the texts used (in the name of) as '*Yoniso-manasi-kāra*' and '*Ayoniso-manasi-kāra*'. In fact only the mentality of impulsion obtain(s) the names of '*Yoniso-manasi-kāra*' and '*Ayoniso-manasi-kāra*'. The adverting consciousness (*Āvajjama-Citta*) obtains the names of '*Yoniso-manasi-kāra*' and '*Ayoniso-manasi-kāra*' only because they are like (the consciousness of) impulsion. How the two kinds of adverting consciousness obtain the name of '*Manasi-kāra*' is explained in the commentaries thus: -

"They are so called because they make the series of impulsive consciousness different from the preceding subconsciousness. (*Abhi-A*-1-177, *Vs*-2-96). The above-mentioned characteristic, function etc. are not the characteristic, function etc. of the two-fold "*Manasikāra*", but are only the characteristic, function etc. of the mental concomitant, *Manasikāra*, Known as "*Ārammana-patipādaka-manasi-kāra*".

Ārammana-patipādaka-Manasikāra = the concomitant manasi-kāra

'*Manasi-kāra*' is a concomitant associated with consciousness and has the function that joins the consciousness = associated states to the object, and so it can make the mind (consciousness) reach or get to the object. Therefore if it makes the mind reach straight to the object it is said to makes the object also reach to the mind. Therefore "*Manasikāra*" means (is) a state that makes the mind advert (turn) or attend to the object, or makes the object enter (into) the mind or conveys the object to the mind.

“Attention” (*Manasi-kāra*) means the making the object so to say enters (into) the mind and the object appear in the mind. In fact, this ‘*Manasi-kāra*’ cannot persuade the object to enter (into) the mind, but due to the power of ‘*Manasi-kāra*’, the mind has always an object, and so ‘*Manasi-kāra*’ can be said to bring so to say, the object to the mind.

PAGE 316

Lakkhana - Just as a charioteer who drives the chariot drawn by the well-bred horses makes the well-bred horses go (reach) straight to the (desired) destiny, even so this concomitant *manasi-kāra*, which is like the charioteer, so to say, drives the (its) associated states towards the object, and so it is said to have the characteristic of driving the (its) associated states to the object. This means that it (*Manasi-kāra*) directs and pushes the (its) associated states, and makes them go straight to the object.

Rasa - So, it is also said that it has the function to join the (its) associated states to the object.

Paccupatthāna - The *Paccupatthāna* of “Sati” is the attention to the object in order not to forget it. But the *Paccupatthāna* of “*Manasi-Rāra*” is the adverting (directing) the associated states to the object by joining them to the object. This is the difference between *Paccupatthāna* of 'Sati' and that of “*Manasi-kāra*”. (*Mahā-ti*-2-147)

It is due to the power of the concomitant *manasikāra* that the mind and its concomitant states have always an object, and are never without the object “*Manasi-kāra*” is like the charioteer, the (its) associated states are like the well-breed horses, and the object is like the destiny towards which the chariot goes.

Padatthāna - The object is the nearest cause of *Manasi-kāra* (attention) because the attention is possible only when there is the object of attention.

The note of Pyi *Sayādaw*

The object appears only when it is attended by the concomitant '*Manasikāra*'. The five-door cognition is possible only when the five-door adverting consciousness makes the succeeding series of cognitive consciousness different from the preceding *Bhavanga Citta* (life-continuum). Likewise, only when the Mind-door adverting consciousness (*Mano-dvārāvajjana*) makes or creates the following series of impulsive (*Javana*) consciousness different from the preceding *Bhavanga* or subconsciousness, the impulsive consciousness of the mind-door cognition takes place (arises). *Vitakka* mounts the (its) associated states onto the object; *Cetanā* urges (impels) them; *Manasikāra* takes them to the object. Of it is so, these three states seem in different from one another. (But) How are they different from one another?

Vitakka seems to mount the (its) associated states on to the object. *Cetanā* joins the states mounted on to the object by *Vitakka* with (to) itself. It is like the captain (major) who joins his soldiers in the battle. *Manasikāra* joins the states in the object being mounted by *Vitakka*. It is like the charioteer who yokes the well-bread horses with the chariot. Thus is the difference between *Vitakka*, *Cetanā* and *Manasikāra*.

PAGE 317

The eminent teachers make this admonition that one should well make *phamma* as his own real refuge, bearing in mind that sleeping after eating and living merrily is not the business (work) of a monk, in order to know thoroughly the characteristics of the states (things) by means of learning, questioning, memorising etc., with the perfect confidence in the *Buddha* who has known truly and taught the different characteristics of manifold states (things). (Pyi-translation of *Visuddhi magga*)

This is the end (of the explanation) of the characteristic, function etc. of the seven mental concomitants common to all consciousness, included in the aggregates of feeling and Perception. Now I am going to explain the characteristics, function etc. of the six particular concomitants.

1. *Vitakka*

Vitakka is a state of thinking of an object. 'Thinking' means 'mounting the mind on to the object' so that the mind reaches the object. Its characteristics etc. are as follows:

1. Its characteristic is to mount the mind on to the object.
2. Its function is to initially knock at the object, all round, again and again.
3. It appears to the contemplating knowledge that it is a state that persuades the mind towards (to reach) the object.
4. Its proximate cause is the object (base + object + contact.)

Lakkhana (characteristic): - *Vitakka* makes the mind reach (mount on to) the object. Just as a man unfamiliar with the king has an opportunity to get into the palace depending on (with the help of) a friend or a kinsman familiar with the king, even so the mind has to mount on to the object depending on (with the help of) *Vitakka*. Therefore, it is said that *Vitakka* has the characteristic to mount the mind on to the object, and so *Vitakka* is at the same time said to mount the mental associated states on to the objects as the mind and its associated states are inseparable.)

Page 318

The *Milinda-pañha*

Rev. *Nāgasena* said "*Vitakka* has the characteristic to initially knock (*ākotana*) the object. Great king, just as a drum is initially struck and afterward the drum sounds continuously, even so *Vitakka* is noted to initially knock the object, just like the initial striking of the drum, and *Vicāra* to reflect the object again and again just like the continuous sounding of the drum". (*Milindapañha* - 641 *Abhi-A*-1-157).

Rev. *Nāgasena* or the commentator said this characteristic of "*Ākotana*" (= knocking), depending on (regarding) the function of *Vitakka* (*Anu-tī* 1-94).

The statement that knocking at that object, so to speak, means "attending to the object and contemplating the meditative objects, e.g., the in-and-out breathing" etc. in undertaking the calm-meditation, "*Pathavī, Pathavī*" etc. in contemplating the earth-*kasina* object, "matter matter" in taking up (acquiring) the materiality, "mind mind", in taking up (acquiring) the mentality, "*Anicca Anicca*" etc. in undertaking the insight meditation. The initial knocking (at the object) is *Vitakka*, and continuous knocking is *Vicāra*.

Rasa = Function - Due to the function of *Vitakka* to initially knock at the object (*āhanana*) and to knock at the object all round (*pariyāhanana*, the Yogi is said to initially knock at the object with (by) *Vitakka* and to knock at the object around with (by) *Vitakka*. (*Abhi-A*-1-157).

Paccupatthāna - It is manifest to the Yogi's knowledge that *Vitakka* is a state that leads and takes the mind to the object. (*Abhi-A*-1-157).

Padatthāna - There is no special statement regarding *Vitakka*'s *Padatthāna*. Therefore, the very object is stated to be its (*Vitakka*'s) approximate cause. Or, 1. base, 2. object and 3. the associated states led by *Phassa* are noted to be the approximate cause of *Vitakka*.

Kattu-sādhana = sense of agent, *Bhāva-sādhana* = impersonal sense

Page 319

1. The commentary says that **Vitakka** is so called because it thinks of an object. Here by the word "think of", it is meant (pointed out) that the very state "**Vitakka**" is an agent that does the action (function) of "thinking", in order to reject (object) the agent or actor known as "**Attā**", a state other than **Vitakka**, which does the action of thinking.
2. Again, the commentary explains in impersonal sense that "thinking" itself is **Vitakka**. The impersonal sense that just thinking is **Vitakka** is made (used), in order to object (reject) the sense that **Vitakka** is brought under (**Attā**'s) power (influence). (**Mūla-tī** -1-88).

"Thinking" is a mode of thinking, which is just becoming due to the (its) respective (corresponding) causes. Therefore, the explanation in impersonal sense is made in order to reject (object) the arising of **Vitakka** according to the wish of another person (**Attā**). It seems that **Vitakka** initially knocks at the object and knocks at the object again and again, so that the mind is made to take the object by **Vitakka**. Therefore, the commentator explains that **Vitakka** has the characteristic of initially knocking at the object and the function of knocking at the object again and again. The **Vitakka**'s characteristic of initially knocking at the object **ākotana-Lakkhana** is said by Rev. **Nāgasena** in the **Milinda-pañha** depending on **Vitakka**'s function of knocking at the object again and again (**āhanana-parihanana-rasa**). True, the ultimate realities have no other mode of action than that of their own, and similarly they have no mode of taking (getting) the object. Just as, though an ultimate reality is a natural phenomenon which has just a characteristic (of its own), it is explained by many ways using many synonyms, in conformity with the disposition of people (beings) capable of the four (noble) truths, in the same way, this **Vitakka** also is explained with many synonymous words. It is explained thus, that explanation is a well-done one. (**Anu-tī** -1-94)

How the **Cittas** dissociated with **Vitakka** can take an object.

The fivefold pair of **Cittas** (ten in number), though dissociated with **Vitakka**, can mount onto ascend the object by their own power, as the contact of fivefold objects with the fivefold bases, such as the eye-base is evident. This means that **Vitakka** need not place mount the states (associated with fivefold consciousness) on the very evident object.

Page 320

There is no **Vitakka** in the second **Jhānic** consciousness etc. The higher **Jhānic** consciousnesses such as the second **Jhānic** consciousness and so on, though having no **Vitakka**, can mount onto ascend the respective objects of calm meditation, such as the replica-object of "in-and-out-breathing" by the power of development. Here, the teachers have difference of opinion regarding the power of development.

1. There is an opinion that the **Jhānic** power of the lower **Jhānic** is taken as the power of development; and
2. There is another opinion that the power of Proximity-development is taken as the power of development.

The author of this treatise has the opinion that the second and higher **Jhānas**, having no help of **Vitakka**, can mount onto ascend the object, due to this twofold power viz "the **Jhānic** power of the lower **Jhāna**", and "the proximity-development, which is the development-**Citta** of **kāmāvacara**" which is in proximity before the arising of second **Jhāna** and so on.

As explained in the section on the "*Ānapānassati-Samādhi*" = in setting up the preceding *Samādhi* (concentration), when the Yogi of *Samatha*-meditation who starts to attain *Jhāna* wants to attain to the higher *Jhāna* after attaining to the lower *Jhāna*, he can attain to the higher *Jhāna*, after practicing (exerting) to master the lower *Jhāna* by means of the five kinds of mastery, and therefore the power of development which is a good practice to master the lower *Jhāna* by means of the five-fold mastery is the cause of attaining to the higher *Jhāna*.

Again, although he (Yogi) has practised to master the lower *Jhāna* by means of the five-fold mastery, he, not stopping at this stage, should again take the very object of calm-meditation which is the object of lower *Jhāna* such as the counter-part sign of "in-and-out-breathing etc. and proceed to practise (exert) the very *Samatha*-development in order to eradicate *Vitakka* according to the way of five-fold *Jhāna*, or to eradicate *Vitakka* and *Vicāra* according to the way of fourfold *Jhāna*. In doing so, only when he (Yogi) has thoroughly taken the object of calm-meditation that can make him attain to (higher) *Jhāna*, such as the counter-part sign of in-and-out-breathing etc. by his proximate *kāmāvacara*-development before the arising of the higher *Jhāna* such as the second *Jhāna* etc, then he can attain to the higher *Jhāna*, such as the second *Jhāna* etc. Therefore, the power of proximate-development which is near (close to) the second *Jhāna* etc. is also the cause of ascending the object of calm-meditation, such as the counterpart sign of in-and-out-breathing, of the second *Jhāna* etc. without *Vitakka*. Therefore, note that the higher *Jhāna*, such as second *Jhāna* etc. without *Vitakka* can ascend the object of development without *Vitakka*, due to the lower *Jhāna* power and also the power of proximate-development which is near (close to) themselves.

In the decision of *Mahā tikā Sayādaw*, the following words are the proofs to support the above-mentioned statements (opinions).

Page 321

The decision of *Mahātikā Sayādaw*

One may ask, "If the mind ascends the object depending on *Vitakka*, how can the mind without *Vitakka* ascend the object?" He should answer that the mind without *Vitakka* can ascend the object only due to the power of *Vitakka*.

As stated above, just as a man who has the opportunity to go to the palace depending on one who is familiar (acquainted) with the king, when he frequents the palace and used to go there, he dares (to) go to the palace fearlessly, even without that man familiar (acquainted) with the king, even so the mind without *Vitakka*, being familiar (acquainted) with the object, (or being in habit of going to the object), can ascend the object even without *Vitakka*. Here, being acquainted (accustomed) means by having acquaintance, called "development of *Vitakka* (*Vitakka-bhāvanā*)" arising continuously in the mental continuity (continuum?).

Vitakka-bhāvanā is means the twofold development, namely,

1. development of absorption associated with *Vitakka*,
2. development of proximity (access) associated with *Vitakka*.

The first *Jhāna* is the development of absorption associated with *Vitakka*. After attaining the first *Jhāna*, the development near (close to) the higher *Jhānas*, such as the second *Jhāna* etc., during the time before attaining the higher *Jhānas*, such as the second *Jhāna* etc., is the development of proximity (neighbourhood).

It is true, due to the power of **Vitakka** which arises continuously in the mental continuity, the act of ascending the object of mind has been accustomed for long. Therefore, that mind, though without **Vitakka** sometimes, arises in that object. The mind contemplating with insight knowledge, the mental and material phenomena by applying the three characteristics to them, is the great wholesome (and functional) consciousness associated with knowledge. When that consciousness (mind) associated with knowledge, contemplates, with insight knowledge, the mental and material phenomena repeatedly it gets accustomed, and it becomes smooth (or automatic). When the practice succeeds, the mind of insight knowledge sometimes becomes the one dissociated with knowledge. That mind dissociated with knowledge also arises continuously by the power of contemplation. **Page 322** Likewise, the mind without **Vitakka** also can ascend the object even without **Vitakka**, by the (repeated) practice, known as the development of **Vitakka** arising continuously in the continuity of mind.

Another example, The mind with defilements, though completely free from defilements in the mind of an **Arahat**, who has attained to the **Arahatta**-Path and existed in the **Arahatta**-Fruition, continues to arise in habituation (nature) of defilements practiced habitually in the round of existences gone-by. Likewise, that mind, though without **Vitakka**, can arise in that object. (*Mahā-tī* -1-166)

What is **Appanā**?

In the canonical text of *Dhamma-saṅgāṇī* (*Abhi* 1-18), the **Buddha** calls **Vitakka** an **Appanā**, saying "Vitakko **Appanā** byappanā" etc.

In the *Atthasālinī* - commentary, (*Abhi*-A1-210), however, **Vitakka** is explained to be with "**Appanā** = **Jhāna**". Regarding this point, *Mūla-tīka* *Sayādaw* explains as follows;

The state associated with **Appanā** (**Jhāna**) is **Vitakka** and **Vicāra**. In the canonical text, the **Buddha** said, giving **Vitakka** a name of **Appanā**, with the words, "(**Vitakka**) **Appanā** byappanā" etc. Therefore, a question arises, "How can **Vitakka** or **Appanā** be a state associated with **Appanā**?" The answer is, "Though **Vitakka** is said to be an **Appanā** in the canonical text, according to the Commentarial usage, however, **Vitakka** is used as **Appanā**, in the first **Jhānic** concentration which arrives at firmness due to the **Vitakka**'s special function, and also in the second **Jhānic** concentration etc., which is like the first **Jhānic** concentration, as it is far away from the opposite obstacles (*Nīvarana*). This is the usage in (of) the commentary. Therefore **Vitakka** associated with the first **Jhānic** concentration can be said to be a state associated with **Appanā**. Likewise, according to the commentarial usage, the (higher) **Jhānas**, second **Jhāna** etc. are also called **Appanā**. If we take the meaning according to the canonical usage, except the commentarial one, as **Vitakka** itself is **Appanā**, there cannot be association with that **Vitakka** = **Appanā**. (*Mūla-tī* -1-101)

Note that every **Jhānic** concentration is called **Appanā** or **Appanā-Jhāna**, according to the commentarial usage.

2. **Vicāra**

The mind wanders about on the object, due to that state (of **Vicāra**). Therefore, **Vicāra** is a state by which the mind wanders about on the object, or which causes the mind to wander about on the object. That means the (mind's) wandering about well on the object.

1. It (**Vicāra**) has the characteristic of polishing, reviewing the object again and again.
2. It has the function to cause its co-existing states to associate with the object again and again.
3. It is manifest (to the Yogi's knowledge as a state that binds (ties) the mind uninterruptedly to the object taken.

4. Its approximate cause is the object (or base, object and *Phassa* = contact).

***Vitakka* and *Vicāra* (*Abhi-A*-1-158)**

Although *Vitakka* and *Vicāra* associate with the 55 consciousnesses associated with *Vitakka*, *Vitakka* is a states that initially causes the mind to fall on (arrive at) the object as it (*Vitakka*) mounts its associated states on to the object, because it is rough and fore-runner in taking the object, just like the first sound of the bell or gong struck (by a baton).

Vicāra is a state that binds (ties) the mind to the object uninterruptedly, because it is smooth (subtle) in taking an object, and is polishing and reviewing the object again and again, just like the successive sound of the bell or gong struck (by a baton).

Again, of these two states - *Vitakka* and *Vicāra*, *Vitakka* which is the cause of mental agitation when it arises first in the object, has the nature of agitation in taking the object. This *Vitakka* is like the flapping of a big bird wishing to fly up in the sky, or like a bee flying towards the forest of lotuses, following after the perfume of flowers.

page 324

Vicāra, however, has the tranquil nature, having no mental agitation. It is just like the hovering of a big-bird stretching its wings after flying up in the sky. It is also like the hovering of a bee over the forest of lotuses after flying towards it. (in order to know whether there is any danger or not)

Another opinion: In an old *Mahā-atthakathā* (great commentary), however, *Vitakka* arising as a state to mount the mind on to the object is like the flying of a big bird in the sky, taking the force of the wind and placing its wings well in the sky. True, that *Vitakka* attains to *Appanā* (*Jhāna*) when it gets only one object.

“namo tassabhagavato arahato sammāsambudhassa”

NIBBĀNAGAMINIPATIPADA
WAY OF PRACTICE LEADING TO NIBBĀNA

VOLUME IV
PAGE 324-385

BY
PA-AUK TAWYA SAYADAW

TRANSLATED BY
U MYINT SWE (M.A London)

Vicāra which arises as a state investigating, examining and rubbing caressing the object again and again is like the flying of a big bird flapping its wings in order take the force of the wind. True, that **Vicāra** investigates, examines and rubs caresses object again and again. Thus it is explained. The explanation of that old **Mahā-atthakathā** (great commentary) is very appropriate at the moment of the proximate and **Jhanic (Appanā)** concentrations when it (**Vitakka**) fixes the mind continuously at the object. (**Vitakka's** taking the object or sign of calm-meditation is also very tranquil as it arises continuously, existing at (on) a single object, such as the counterpart sign of the in-and out breathing.)

To say further, it is thus: - The above said difference between those **Vitakka** and **Vicāra** is evident in the first and second **Jhānas** (Absorptions). The mode of mounting the mind on to the object, which is its particular characteristic, is gross, and therefore is evident at the moment of first **Jhāna**, according to the fivefold **Jhanic**, system; and according to the fivefold system, as there is no **Vitakka** at the moment of second **Jhāna**, **Vicāra's** special mode of examining and reviewing the object is evident. (**Mahā-ti**-1-167).

The second **Jhāna** is more tranquil (calm) than the first one. As **Vitakka** is associated only with the first **Jhāna** and not associated with the second one, the second **Jhāna**, being devoid of **Vitakka**, is more tranquil (calm) than the first one. Therefore, it is evident that **Vitakka** is gross, and **Vicāra** is subtle.

Further similes :- In the case that a dirty bronze cup is tightly grasped or gripped (taken hold of) with by a hand and polished with soap- powder and brush etc- by another hand, **Vitakka** is like the hand which tightly takes hold of a bronze cup and **Vicāra** is like the hand which polishes it (with soap powder etc.)

Again in the case of turning the potter's wheel (around) and making a (earthen) pot, **Vitakka** is like the potter's hand which presses the pot, and **Vicāra** is like his another hand which turns the wheel around.

P.325 In making a hole (holes) in a brass tray, a plank etc. with a drill, **Vitakka** which mounts the mind onto the object is like the awl or drill which is put right at the centre, and **Vicāra** which examines or reviews the object is like the awl or drill which is turned around. (**Abhi-A**-1-158; **Mahā-ti**-1-167)

3. Adhimokkha

Plunging into the object and deciding the object is **Adhimokkha**. Its characteristic etc. are as follows:-

1. Its characteristic is to decide the object firmly.
2. Its function is to oppose 'Doubt' (**Vicikiccha**) which cannot decide the object moving to and fro.
3. It is manifest (to the **Yogi's** knowledge) as a state that decides the object.
4. Its proximate cause is the object that is to be decided.

Lakkhana - characteristic: - Here, plunging in to the object is to be understood to be plunging into the object, by means of deciding it firmly. But it is not a kind of plunging into the object, as (by means of) confident faith that decides and believes firmly in the objects (things) of inspiring confidence. Making decision (in) the object whether right or wrong, is (called) 'plunging into the object (**Adhimuccana**)'. For, in him who cannot decide the object whether right or wrong, there cannot be cognitive process regarding both the evil deeds, such as killing etc. and good deeds such as charity, morality etc. (The evil deeds such as killing etc. and good deeds such as refraining from killing etc. can be achieved due to this **Adhimokkha's** firm decision of the object, whether right or wrong.) '**Saddhā** (faith, confidence), however, is **pasādādhimokkha**, a kind of deciding confidently regarding the objects (things) of inspiring confidence, such as, true **Buddha**, true

Dhamma, true *Sangha* etc, that are worthy of being confidently (knowingly) believed.

This is the difference between this ‘

Adhimokkha’ and ‘*Saddha*’. (*Mahā-ti*-2-146).

According to these statements (or remarks), it is to be understood that the belief of non Buddhist or heretics who believe decidedly in their so - called *Buddha*, *Dhamma* and *Sangha* is not ‘*Saddha*’ in true sense, but it is only this *Adhimokkha*, a mental concomitant, that is, a wrong decision (*Micchādhimokkha*), which is *Adhimokkha*, a mental concomitant associated with ‘*Ditthi*’ (wrong view).

P.326 A question to be raised: - The five door cognitions take the ultimate reality only as (their) object. The deciding consciousness (*Votthapana*) in the five door cognitions arises, whether right or wrong, deciding the object, an ultimate reality, investigated by its immediately preceding investigating consciousness, and helps by means of *Anantara paccaya* etc. Its succeeding *Javana* (impulsion) consciousnesses (a) in order to bring about (produce) the wholesome *Javana* consciousnesses according to the proper (right) consideration (*Yoniso. manasi.kāra*) produced by the right decision of those succeeding *Javana* consciousnesses, or (b) in order to bring about (produce) the unwholesome *Javana* consciousnesses according to the improper (wrong) consideration (*Ayoniso. mansi. Kāra*) produced by the wrong decision of those succeeding *Javana* consciousnesses. If it is so, one may ask “How does the deciding consciousness help (serve) the *Javana* consciousnesses associated with *Vicikiccha* (sceptical doubt)?” The answer is thus (as follows):-

Votthapana (deciding consciousness) is to be understood to help, in deed, those *Javana* consciousnesses associated with *Vicikiccha* (sceptical doubt), as a cause of wavering or wandering about (*Samsappana*).

That is to say, *Votthapana* actually helps (serves) also those *Javana* consciousnesses associated with *Vicikiccha*. This means (implies):- If there is doubt, (wavering = *Samsappana*) ‘Is it a true *Buddha*?’ regarding the All enlightened *Buddha*, that *Vicikiccha* (sceptical doubt) is also helped by *Votthapana*, with a mode of deciding, “ Is it a true *Buddha* ?” It means that *Votthapana*’s mode of deciding, “Is it a true *Buddha*?” is said to be given by *Votthapana* to the *Vicikiccha*’s associated *Jananas*, called ‘ *Samsappanāṅkāra* (mode of wavering). The same is applied to the mode of having doubt in the true *Dhamma* etc.

Asamsappana.Rasa :- (Sceptical) doubt is called ‘*Samsappana*’, which means ‘wandering about in the objects around, being unable to decide or stand fixed in one object. *Adhimokkha* has the function to be opposed to that ‘*Samsappana*’ (doubting or wavering) and to decide an object, whether it is right or wrong. ‘*Asamsappana*’ is a mode of mind (or thought) which is opposed to ‘*Samsaya*’ (doubting or wavering), being unable to decide, whether it is to be done or not, wandering about in this and that object, just like a child unable to stand still. ‘*Adhimokkha* is said (meant) to have the function of ‘*Asamsappana*’ (not doubting, not wavering). (*Mula-ti*-1-935-*Mahā-ti*-2-146).

Padatthāna :- ‘*Adhimokkha*’s proximate (nearest) cause is the states (phenomena) which are the objects of the consciousnesses associated with ‘*Adhimokkha*’ arising there in and which are to be decided by *Adhimokkha*, having the characteristic of deciding the object there of. (*Mahā-ti*-2-146).

P.327 Considering this (above –said) statement, as ‘*Adhimokkha*’ (concomitant) is associated with *Votthapana* (deciding) *Citta*, it is (only) the ‘*Adhimokkha*’ (concomitant) associated with the *Votthapana Citta* that decides the (very) objects, either pleasurable or displeasurable, the objects which are to be decided by the *Votthapana Citta*. Or it (*Adhimokkha*) is said arises as a mode of deciding the object.

As this ‘*Adhimokkha*’ concomitant stands still in the object, it is like a large pillar (post) erected firmly (in the ground) at the city-gate. (*Abhi.A*-1-177; *Visuddhi*-2-96).

4. *Vīriya*

1. Its characteristic is a state of exerting well and zealously in doing this and that work, or a state of ever enduring any sufferings (mental and physical)
2. Its function is (a state) to support or reinforce the co-nascent states.
3. It is manifest (to the *Yogi's* Knowledge) as a state not shrinking and reluctant.
4. Its proximate cause is (a) The religious emotion, as the *Buddha* said;- “A man of religious emotion, exerts himself properly and methodically” Or, (b) the things or objects to be exerted (to be done zealously).

327 1. The state causing some one to be brave is *Vīriya*. (*Abhi-A-1-163*)

2. The work (deed) done by the brave ones with their effort is metaphorically called *Vīriya*. (*Abhi-A-1-163*).

3. Or *Vīriya* is a state caused to do some work by preparatory ways and means (devices) prepared in advance (called) *Pubba.yoga.vidhi*. It is an effort, a great and successive exertion done to achieve this and that work. (That is, there arises an effort, exertion to do some work, when considering the disadvantages (faults) of one who does no work out of laziness and also advantages of one who does work with effort (exertion) or zealously. Referring to that kind of exertion, it is said to be a state caused by preparatory ways and means. That very effort (exertion) is (called) also a Faculty *Indriya* in the sense of predominance (chief), as it dominates laziness, the cause to make one lazy. Or, it is (called) also a faculty, as it causes its associated states (co-adjuncts) to make itself their predominance (chief), according to its characteristic of continuously helping or supporting its associated states. By combining the two words, *Vīriya* and *Indriya*, it is called '*Vīriyindriya*'. The characteristic of *Vīriya* is explained as following;-

That *Vīriya* has the characteristic of helping (assisting) and also supporting its associated states (co-adjuncts). (*Abha-A-1-163*).

Just as an old house about to fall down exists erect being supported by temporarily supporting posts, even so the mediator (*yogi*) being supported by *Vīriya*, does not fall away from all the merits (wholesome states). Thus it is understood that *Vīriya* has the characteristic of supporting (*Upattha-mbhana*) its associated states. (*Abhi-A-1-163*).

Therefore, Rev-*Nāgāsena* said thus:-“great king, just as a house about to collapse is supported another post and thereby does not fall down, even so *Vīriya* has the characteristic of supporting (assisting) its associated states. All the merits (wholesome states) being supported by *Vīriya*, do not decrease (decline). (*Khu-11-35; Abhi-A-1-164*).

Another simile:- When a small and weak army is fighting against a large and strong one, the former has to retreat. This situation is reported to the king, who for that reason sends out a large and strong reinforcement.

The king does not let his (small and weak) army assisted by his large and strong reinforcement, be lost to (or rather defeat) the rivalry army. In like manner, *Vīriya* does not allow its associated states to retreat (hesitate, flinch), but it assists (helps, favours) them. Therefore it has the characteristic also to assist (favour) its associated states (co-adjuncts). [Commentators Sayādaw, quoting the *Milinda-pañha* (p-35-6) explains that *Vīriya* has the characteristic of both supporting and assisting. This characteristic of supporting is also used in the sense of the function to support (its co-adjuncts). (*Abhi-A-1-163-164*)].

P.329 '*Ussāha*' means 'threefold exertion' namely:-

1. '*Arambha. Vīriya*', to exert well this and that work.
2. '*Nikkhama. Vīriya*', which is stronger than '*Arambha. Vīriya*', as it escapes from the state of laziness by which someone becomes lazy.
3. '*Parakkama. Vīriya*', which is much stronger than '*Nikkhama. Vīriya*', as it can reach (attain to), step by step, the higher and higher stages (such as *Jhāna*, Path, Fruition and *Nibbāna*) which can be reached (Attained to) only by making successive (continuous) efforts.

The explanation of only the (two) ‘*Arambha.Vīriya*’ and ‘*Parakkkhama.Vīriya*’. done in the great Commentary, is noted (understood) to show only the beginning and the end of the threefold *Vīriya* (omitting the middle kind of *Vīriya*).

The explanation of the *Sangaha-bhāsā-tikā*

Vīriya is a state by which someone becomes (a) brave or courageous (one). This *Vīriya* has the characteristic of bravely enduring the (mental and physical) pains. A zealous (industrious) man is courageous in (doing) every work, and so *Vīriya* is the cause of a courageous man. A zealous (industrious) man can endure (resist) all pains about to get (have) in doing any (difficult) work (enterprise). Such kind of endurance (resistance) as called ‘*Ussaha*’. (*Sangha.bhāsā.tikā*-100). Upatthambha.Rasa- It is *Vīriya*’s function to favour (assist), hold up (maintain) and strengthen (give suitable strength or energy to) its associated states (co-adjuncts), not allowing (giving) then to fall into laziness by which someone becomes a lazy man. (*Mahā*-ta-2-141). Just as an old house about to fall down is supported by the posts in order not to let it fall down, even so it is *Vīriya*’s function (or *Vīriya*’s functions) to support (assist) its associated states in order not to let them lose in any work (enterprise). Being support thus, the states associated with *Vīriya* become active and energetic in doing such work as charity morality and meditation etc.

Asanisīdana.bhāva.paccupatthānā-

The unwholesome, states associated with or headed by sloth and torpor (*Thina-middha*) are the causes of making men lazy and un-energetic (weak-minded) in doing such works as charity, morality and meditation etc. and they are called ‘*Kosajja*’ (laziness). And reluctance (hesitation) in doing such (moral) works is called ‘*Samsidana*’ (reluctance, hesitation, losing heart). *Vīriya* overcomes laziness sluggishness and reluctance. Therefore, *Vīriya* is opposed to reluctance (hesitation). It is manifest. (Or appears) to the knowledge of a yogi (meditator) P.330 who contemplates *Vīriya* as a state not retreating (turning back) in such matters (cases, works) as charity, morality development (meditation) etc. overcoming laziness and reluctance (hesitation). Note that *Vīriya* is not a mere absence of laziness and reluctance (hesitation). (*Mahā*-ti-2-240).

Vīriya’s proximate cause is mainly the knowledge of religious emotion.

Vīriya’s proximate cause are eight places causes of religious emotion, namely;-

1. Danger of rebirth (*Jāti*),
2. Danger of old age (*Jarā*),
3. Danger of disease (*Byādhi*),
4. Danger of death (*Marana*),
5. Danger of suffering in falling down to woeful states,
6. Suffering which is (causes) misery of past existences,
7. Suffering which is (causes) misery of future existences,
8. suffering which is the search for food (and wealth) in this present life.

When considering (thinking of) those eight places (causes) of religious emotion, there arises the knowledge associated with the moral dread which is the cause of religious emotion, and it is called ‘*Sahottappañ. āna*’, (knowledge associated with moral dread), which is itself religious emotion (*Samvega*). One who has that knowledge of religious emotion acts (does) ardently such works as charity, morality, and meditation etc; and so, that knowledge of religious emotion is a proximate cause for arising of *Vīriya*.

Take as the ultimate realities great wholesome states (mind and mental concomitants) for those worldling and non-Arahats (learners) having eight fold knowledge of religious emotion as a dominant factor, and take great functional states for Arahats having such knowledge, (*Mahā*-ti-2-141).

Depending on (referring to) *Sangītisutta* in the canonical *Sutta.pātheyya*, eight causes of making effort (*Vīriya*) is explained (in *Mula.ti*-1-89, and *Mahā-ti*-2-141) briefly thus:-
(*Vīriya* arises) in such eight critical moment as, 1-about to travel, 2-just after traveling, 3-about to do some work, 4-just after the completion of work, 5-about to be sick, 6-just after recovery, 7-not getting enough food 8-getting abundant food.

The (later) Sub. Commentators explain following (according to) the order of these eight things, mentioned in the Commentary, but this order is somewhat different in the canonical text; nevertheless, the meaning is the same.

P.331 These eight things (factors) associated with knowledge of proper (wise) reflection suitable for arising of *Vīriya* are the causes for arising of *Vīriya* (*Vīriyārambha votttha*) or the mental states (mind and its concomitants) =proper (wise) reflective knowledges, having root causes of those eight things (factors) are called the causes for arising of *Vīriya* (*VīriyArambha.votthu*).

Here in order to understand more how to reflect properly (wisely) or improperly (unwisely), the *VīriyArambha.vatthu Sutta*, stated in the eighth section in (of) the *Anguttara.nikāya*, is further presented;-

VīriyArambha.vatthu Sutta

Monks, these eight are the causes of laziness. What are they? : -

1. “Monks, a monk of (living in) this *Buddhasāsana*, will be having to do a certain work. He thinks, I will be having to do some work. Doing that work, my body will be get tired (painful). Now I will take a (short) sleep.” He (that monk) sleeps. He does not make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition that he has not yet Attained and realized. Monks, this is the first cause of laziness.
2. “Monks, another monk, again, has finished (achieved) a certain work. He thinks, “I have finished some work. Having done that work, my body is tired. Now I will take a (short) sleep. He (that monk) sleeps. He does not make an effort to attain and realize supernormal mental states that he has not yet Attained and realized. Monks, this is the second cause of laziness.
3. “Monks, another monk, again, will be having to travel. He thinks, “I will be having to travel. Going on a journey, my body will be (get) tired. Now I will take a (short) sleeps.” He does not make an effort to attain and realize the supernormal mental states that he has not yet Attained and realized. Monks, this is the third cause of laziness.
4. “Monks, another monk, again, has traveled. He thinks, “I have gone on a journey. Having gone on a journey, my body is tired. Now I will take a (short) sleep.” He sleeps. He does not make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks this is the fourth cause of laziness. **Page-332**
5. “Monks, another monk, again, goes to a village or a (small) town for alms-food, and (but) does not get (receive) enough food, rough or soft. He thinks, “I went to a village or a (small) town for alms-food, and (but) did not get (receive) enough food, rough or soft. Going for alms-food, my body is (gets) tired. It is not proper yet (for me) to undertake a meditation work, calm and insight, for *Attā*ining the supernormal mental states, such as, *Jhāna*, Insight Knowledge, Path and Fruition. Now I will take a (short) sleep.” He sleeps. He does not make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight knowledge, path and fruition) that he has not yet Attained and realized. Monks, this is the fifth cause of laziness.
6. “Monks, another monk, again, goes to a village or a (small) town for alms-food and gets (receives) enough food, rough or soft. He thinks, “I went to a village or a (small) town for alms-food and get (received) enough food, rough or soft. (Having taken food at my will), my body is (becomes) heavy. It is not proper yet (for me) to undertake a meditation work, calm and insight, for

*Attā*ining, the supernormal mental states, such as, *Jhāna*, Insight Knowledge, Path, and Fruition. My body is heavy like wet peas. Now I will take a (short) sleep.” He sleeps. He does not make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition). Monks, this is the sixth cause of laziness.

7. “Monks, another monk, again, has (suffers from) a slight (negligible) disease. He thinks, “I have (suffer from) a slight (negligible) disease. It is proper (for me) to take a (short) sleep. Now I will take a (short) sleep.” He sleeps. He does not make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight, Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is seventh cause of laziness.

8. “Monks, another monk, again, begins to recover from (after) my disease or illness. It is not long to get recovery. He thinks, “I begin to recover from (after) my disease or illness. It is not long to get recovery. Not long to get recovery, my body is weak. It is not proper yet (for me) to undertake a meditation work, calm and insight to attain the supernormal mental states, such as, *Jhāna*, Insight Knowledge, Path and Fruition. Now I will take a (short) sleep.” He sleeps. He does not make an effort to a attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the eight cause of laziness.

P.333 Monks, these are the eight causes of making an effort. What are these eight?

1. “Monks, a monk of (Living in) this *Buddha.sāsana*, will have to do a certain work (sewing and dyeing the robes, baking the bawls etc). He thinks, “I will have to do some work. Having to do some work, I am not able to given attention to the teaching (admonition) of the *Buddha*. Now I will make an effort in advance to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized that monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the first cause of making an effort.

2. “Monks, another monk, again, has finished (achieved) a certain work.” He thinks, “I have finished some work. Doing that work, I could not give attention to the teaching (admonition) of the *Buddha*. Now I will have to make an effort to attain and realize (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized. That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the second cause of making an effort.

3. “Monks, another monk, again, will be having to travel. He thinks, “I will be having to travel. Going on a journey, it is not easy for me to give attention to the teaching (admonition) of the *Buddha*. Now I will make an effort in advance to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized.” That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is third cause of making an effort.

4. “Monks, another monk, again, has traveled. He thinks, “I have gone on a journey. Having gone on a journey, I could not give attention to the teaching (admonition) of the *Buddha*. Now I will make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not Attained and realized.” Monks, this is the fourth cause of making an effort.

P.334 5. “Monks, another monk, again, goes to a village or a (small) town for alms-food and (but) does not get (receive) enough food, rough or soft. He thinks, “I went to a village or a (small) town for alms-food and (but) did not get (receive) enough food, rough or soft. (Taking) little food), my body is (becomes) light. It is proper for me to undertake a meditation work, calm and insight. Now I will make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized.” That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight, Knowledge, Path and

Fruition) that he has not yet Attained and realized. Monks, this is the fifth cause of making an effort.

6. “Monks, another monk, again, goes to a village or a (small) town for alms-food and a get (receives) enough food, rough or soft. He thinks, “I go to a village or a (small) town and gets (receives) enough food, rough or soft. (Taking enough food) my body is (becomes) strong. It is proper for me to undertake a meditation work, calm and insight. Now I will make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized.” That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the sixth cause of making an effort.

7. “Monks, another monk, again, has (suffers from) a slight (negligible) disease. He thinks the disease is liable to grow. Now I will make an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized.” That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the seventh cause of making an effort.

8. “Monks, another monk, again, begins to recover from (after) his disease or illness. It is not long to get recovery. He thinks, I begin to recover from (after) my disease or illness. It is not long to get recovery. The disease is liable to occur (come) to me again. Now I will make an effort in advance to attain and realize the supernormal mental states a (*Jhāna*, Insight Knowledge, Path and Fruition) that I have not yet Attained and realized.” That monk makes an effort to attain and realize the supernormal mental states (*Jhāna*, Insight Knowledge, Path and Fruition) that he has not yet Attained and realized. Monks, this is the eighth cause of making an effort.

“Monks, these are the eight causes of making an effort.”

Here ends The *Vīriyārambha.vattha Sutta*

One who is zealous or one who has right or wise reflection (consideration) and review (reasoning), however, considers the *Buddha*’s admonition and inclines (is willing) to undertake the meditation work. He works hard, makes an effort and puts forward the zeal of the great men considering (depending on) these eight factors, namely,

1. going or about to do a certain work,
2. just having finished or achieved some work,
3. going or about to travel,
4. just coming back from his journey,
5. not getting enough food,
6. getting enough food,
7. beginning to suffer from illness, and
8. just having recovered after illness.

(1,2) If one is going or about to do a certain work, such as dying the robe, baking the bowl etc., one engages oneself in the meditation work zealously, before doing such worldly works, considering that one will fail to undertake the meditation work at the time of doing such works. * And also if one has just achieved a certain work, one engages oneself in the meditation work with double effort, considering of one’s having failed to undertake the meditation work while doing such (worldly) works.

• (3,4) If one is going or about to travel, one engages oneself in meditation work zealously, considering that one will fail to undertake the meditation work at the time of going on a journey.

• And also, if one has just traveled, one engages oneself in the meditation work with double effort, considering of one’s having failed to undertake the meditation work while going on a journey.

- (5, 6) If one gets (receives) not enough food, one engages oneself in the meditation, one engages oneself in the meditation work zealously, considering, my body is now light, and fit to undertake the meditation work. So I will now make an effort to do that.” * And also, if one gets (receives) enough food, one engages oneself in the meditation work zealously with double effort considering “My body is now strong, and fit to undertake the meditation work. So I will now make an effort to do that.”

Page 336

- (7,8) If one begins to suffer from illness, one engages oneself in the meditation work, zealously, considering that one will fail to undertake the meditation work at time of one’s being ill (sick). * And also, if one has just recovered after illness, one engages oneself in the meditation work with double effort, considering of one’s having failed to undertake the meditation work while being ill (sick).-

• Thus, if there is precedence of if they are preceded by wise reflection (consideration) and review (reasoning), these eight factors are the causes of making an effort, and so are called **VīriyArambha.Vatthu.**” However it there is no precedence of if they are not proceeded by such wise reflection (consideration) and review (reasoning), the same eight factors are (become) the causes of laziness, for a greatly lazy one whose mind shrinks back from (undertaking) the meditation work.

- (1,2) A greatly lazy one who lacks the wise reflection (consideration) and review (reasoning) if he is going or about to do a certain (worldly) work, sleeps, considering (thinking) that he will get tired in doing some work. * And also, if he has achieved some work, he sleeps, depending on his getting tired, when one was doing that work.

- (3, 4) And also if he is going on about to travel, he sleeps, thinking that he will get tired when going on a journey. * And also, if he has traveled, he sleeps, depending on his getting tired while going on a journey.

- (5,6) And also, if he has not enough food, he sleeps, arguing that he has not enough food while going for alms-food not yet strong. * And also. if he has enough food, and eats it till he is full, he sleeps, depending on his bodily heaviness

- (7, 8) And also, if he feels sick slightly, he sleeps, arguing that he should sleep. * And also, if he has just recovered after illness, he sleeps, thinking of his being weak.

Thus, these eight factors are the causes of laziness, for a lazy man who lacks the precedence of wise reflection (consideration) and review.

This **Vīriya** is a mental concomitant, both good and bad (wholesome and unwholesome). It is an exertion not only to generate (bring about) the bad (unwholesome) states, such as, greed, hatred, delusion, envy, avarice, wrong, pride, evil, deed, defilement etc., but also to generate the good (wholesome) states, pertaining to charity, morality, calm and insight meditations, and to develop the insight knowledge till its perfection. It is two-fold, wrong effort and right effort. Avoiding the wrong effort, it is necessary to make a right effort. Making an effort, one can become a **Buddha**. No work that cannot be done (achieved) by a diligent man.

Every (courageous) man exerts (makes an effort). A wise man should not be lazy.

A wise and virtuous man must indeed make an effort,

1. not to make the unarisen evil states arise,
2. to eradicate the arisen evil states,
3. to make the un arisen good states arise, and
4. to develop the arisen good states.

Every man has energies (potencies) which, if rightly used, can lead one to attain to, even **Buddha** hood; and **Attā**ining to other states lower than **Buddha** hood) however, is not necessary to be said of **Vīriya** (exertion) is one of the ten perfections fulfilled (done) by the **Buddha**. Every virtuous man wishing to attain to **Nibbāna** should not forget this fact (point).

5. *Pīti*

To please, delight gladden and develop (increase) one's mind and body is (called) *Pīti*.

1. Its characteristic is to like (love) the object.
2. Its functions are (a) to please and develop one's mind and body, and (b) to pervade the whole body with good (noble) mind-born material forces (qualities).
3. It is manifest (to the Yogi's Knowledge) as a state that gladdens and elevates (arises) one's mind and body.
4. Its proximate cause is the object, (or base, object, contact).

That *Pīti* is of five kinds, viz,

Khuddikā Pīti- Pīti - which can just raise the hair on the body

1. ***Khuddikā Pīti - Pīti*** - which, like the lightning, rises and passes away again and again (moment by moment).
2. ***Okkantika Pīti- Pīti*** - which overwhelms the whole body and passes away (moment by moment), like the waves striking the bank and receding (again and again).

Ubbegā pith- This *Pīti* is so strong that it raises levitates the body filled with it and lets it hover in the sky, like the help of cotton blown upward in the sky.

3. ***Pharana Pīti -Pīti*** which, being stronger than ***Ubbegā Pīti***, pervades and in un dates (floods) the whole body, for long, with the good (noble) mind-born material qualities.

Of them, the potency of ***Ubbegā Pīti*** is explained in the Commentary as follows:-

P.338

Ubbegā Pīti

This '***Ubbegā Pīti***', being strong, has the strength to raise up the body filled with it and lets it hover in the sky, like the heap of cotton blown upward in the sky. Rev. ***Mahātissa***, living in a place named '***Punnavallika***', one full-moon night, went to the courtyard (compound) of the pagoda situated. In the '***Punnavallika***' monastery and proceeded towards '***Mahā-ceti***' (great pagoda), looking at moon-light. He thought them, "Oh, at this time, long ago, the four kinds of audience, monks, nuns, laymen, and laywomen-were then worshipping the great pagoda!" Recalling (remembering) the object (scene) seen before by his own, eye and taking the object of the ***Buddha***, he flew into the sky, like a velvet-ball that hits on the hard platform and goes (rises) upward, and stood on the courtyard of the great pagoda.

Again, a certain lady of the village which is a resort for alms-food, also, had flown up in the sky, by the force of the very strong ***Ubbegā-Pīti***, taking the object of the ***Buddha***. The detail of that story is as follows.

When the parents of that lady were, one evening, about to go to a monastery named '***Girikandaka***', situated on the mountain called '***Girikandaka***', in order to listen to the sermon, they said to her, "Dear daughter, you have heavy pregnancy. You are not able to go at night. We will listen to the sermon, making a share of merit for you" So saying they departed.

That lady, though wishing to go with them, was unable to object (reject) their words and left behind alone in the house. Standing at the door, under the moon light, she saw from afar the oil lamps offered by the people to the pagoda on the top of the mountain situated in the compound of '***Girikandaka***' monastery, and also four kinds of audience (who were) giving the pagoda offerings, such as the flower, perfume etc. and going around it clockwise. She also heard the voice (sounds) of the monks reciting the sermons collectively in honour of the ***Buddha***.

Then she thought, thus, "Fortunate are those people who got a good chance to go to the monastery and to see (worship) the pagoda going round in its compound, and also to listen to the sermons similar to the sweet and delicious taste!"

Then, while looking at, from afar, the noble pagoda similar to the heap (cluster) of pearls, she Attained '**Ubbegā Pīti**', which has the force of rising levitating her body and of flying up (in) the sky. She flew up in the sky and was (stood) there listening to the sermons before her parents, after having descended from the sky to the compound of the pagoda and worshiped the pagoda. (But her parents arrived later, being (having) to climb the mountain where the monastery was situated.)

Page- 339

After the lady had arrived, her parents who arrived later, asked her, "Dear daughter, by which way did you come?"

She replied, "I came by air, not by ordinary way."

They asked her again, "Only the **Arhats** can go (travel) by air. How can you come and arrive here?"

She told them thus, When I stood at the door in the house looking at the pagoda standing in grandeur (splendor, magnificence) under the moon light, there occurred in me the (**Ubbegā Pīti**) incessantly, having the full force of great strength, caused by the recollection of the **Buddha's** virtues. Then I did not even realize that I was standing up right and sitting as well. Indeed, I flew up (in) the sky, having the only object of the **Buddha's** virtue and stood in the compound of the noble pagoda.

Thus, **Ubbegā Pīti** has such a force of enabling one to fly up the sky. (**Abhi-A** I-159-160).

'Pharanā Pīti, however, is the one that lasts longer than **Ubbegā Pīti**, and pervades the mind-born noble material things in the whole body. When this '**Pharanā Pīti**' arises, the whole body, in which that **Pīti** immanents, becomes like a balloon filled with air, or a valley flooded by a current falling heavily rapidly from the mountain, is incessantly touched all over by the noble material qualities born out of mind associated with that **Pīti** (**Abhi-A** I- 160).

'Khuddikā Pīti', raises the hair on the body, and if (when) it disappears, it appears no more. It is a kind of **Pīti** which rises sometime only. '**Khuddika Pīti**', however, rises again and again (many times). '**Pharanā Pīti**', more tranquil (calm) than, '**Ubbegā Pīti**', has no trembling (shaking) and lasts longer, and so is more excellent than the former.

When that fivefold **Pīti** takes pregnancy (that is, takes root in mental continuum) and matures, it generates the twofold tranquility- of mind and mental concomitants. (So, it is said metaphorically that, if **Pīti** matures, there tranquility of mind and mental concomitants, and so 'the maturity of **Pīti** to generate the tranquility or **Passaddhi**' is metaphorically said that it (**Pīti**) takes pregnancy to give birth to the child of **Passaddhi**. When tranquility or **Passaddhi** takes pregnancy and matures, it generates the twofold **Sukha** or happiness, mental and physical. When **Sukha** takes pregnancy and matures, it generates the threefold **Samādhi** or concentration, viz., **Khuddikā** = temporal, Upacara = proximate, and Appanā = absorption (**Jhāna**). (Visuddhi I- 139- 140, **Abhi -A**- I - 159- 160)

Pīti and Sukha

Page- 340

Pīti has the function to make the mind and body joyful and develop them, that is, it pervades the body with the excellent mind- born material qualities, and so, when **Pīti** arises and is blooming, the mentality also becomes joyful and develops. Due to the mentality associated with **Pīti**, the excellent mind- born material qualities arise over the whole body. The pervasion of the excellent mind- born material qualities over the whole body is metaphorically said that **Pīti** pervades (inundates, floods) the whole body. As **Pīti** floods (inundates) the whole body, it (whole body) is said to be developed with the excellent mind- born material qualities. (Note that **Pīti** can arise depending on the heart- base only)

Mental happiness (*Cetasik Sukha*) has the characteristic of causing a being in whom it arises and its associates to enjoy the object. It has the function to develop its associated states. Its proximate cause is the associated states held up (encouraged) by it.

Although *Pīti* and *Sukha* inseparably associate with (in) some consciousness, *Pīti* is that which likes (loves) the desirable object, and but, *Sukha* is that which enjoys the taste of it (desirable object). There is *Sukha* in whatever consciousness in which there is *Pīti*. But there is not always *Pīti* in every consciousness in which there is *Sukha*. *Pīti* includes in the formation aggregate, while *Sukha* includes in the feeling-aggregate. *Pīti* is (like) the delight of a tired (fatigued, weary) traveler in a desert, when he hears of and sees a great forest and a big lake (called *atassara*) full of water and also when he enters the forest and sees the water, whereas *Sukha* is the satisfaction (happiness) in his entering the forest and drinking water. (*Abhi-A*- I- 160).

Paccupatthāna Pīti's characteristic and function are evident. When the yogi practises the meditation-calm and insight and *Attā*ins different stages of concentration and insight knowledge not yet Attained before by him, and also when he knows the (*Buddha*'s) teaching, not yet known by him - he is filled with *Pīti* or rapture and sheds tears, born out of pleasure and delight. Having the two fold smile, physical and mental (Or, being lifted or elevated physically and mentally), he becomes whole-hearted and energetic in his meditation work. As this condition is due to *Pīti*, in such a case *Pīti*'s nature that refreshes and pleases or delights (the yogi's) mind and body is manifest (clear) to the yogi's insight knowledge.

Padatthāna (proximate cause) is not separately mentioned in the commentaries. Therefore, the very object itself is stated as (*Pīti*'s) proximate cause. In other words, 1- the base, 2- the object and 3- (*Pīti*'s) associated states headed by *phassa* (contact) are *Pīti*'s proximate causes. **Page - 341**

In the eases of health, education and business (economics), or of charity, morality, calm and insight meditation works, those who exert all their strength are one day destined to achieve their aim and object. Then, they become happy (pleased) to review the works done by themselves.

Even the *Buddha* himself, after getting up from his cross-legged sitting at *Mahābodhi* had been gazing at *Mahābodhi* with his open eyes for seven days, because of (due to) his *Pīti*, satisfied and pleased (joyful).

The noble mediators also, when being satisfied with *Dhamma* and successful in their meditation work, are encouraged by *Pīti* so that they do not want to get up from sitting. Thus the noble *Pīti*s also arise greatly in the industrious men (Yogis).

Another *Pīti* of great value- A virtuous man can recollect and review, on the verge of his death, any of his meritorious deeds done by himself, such as charity, morality, calm and insight meditations. If he dies, filled with great *Pīti*, born out of recollecting and reviewing his meritorious deeds done successfully by himself, that kind of *Pīti* is an invaluable state for those who can not yet make an end of his journey in the round (cycle) of rebirths.

In this *Buddha sāsana* (*Buddha*'s dispensation), the would-be Rev. *Pañca sila samādhāniya*' who Attained Arahathship at the age of five (years), observed the unblemished and perfect 'fivefold precepts for one thousand and hundred years, at the time of the '*Anoma dassi Buddha*, who appeared in the world one *Asankhyeyya* and one lac aeons ago. When he recollected and reviewed his morality observed, on the verge of his death, he found it perfect and unblemished even once, and so there arises *Pīti* blooming out of his satisfaction. The moral *Javana Cittas* headed by *Pīti*, taking his morality as the object, could arise in place of his dying mind- moments and so was reborn in the world of gods. Due to that morality, he was not reborn, even once, in the woeful nether worlds for one *Asankhyeyya* and one lac aeons, land (instead) was alternately reborn only in the worlds of men and gods. He became the one who was handsome, wealthy and wise, in his succeeding existences in the round of rebirths. These are the things that every being longs for. You, noble man also wandering in the round of rebirths, should necessarily observe such kind of morality, perfectly and without blemish. (*Apādāna*- I- 84)

6- Chanda

Page- 342

'**Chanda**' means' a state of willing to do or to get something, or to take something as an object.

1- **Chanda** has the characteristic of willing to do something or to take something or to take something as an object.

2- It's function is to search for an object.

3- It appears or manifests (in the yogi's knowledge) as a state of longing for, or desiring an object.

4- Its proximate cause is the object that is desired.

Lakkhana (Characteristic)

In the canonical texts (**Abhi**- 2- 266 etc.), the **Buddha** used the word '**Chanda**' in the sense of craving **Tanhā**, or in the sense of effort (**Vīriya**) in such texts as (**Abhi**- 2- 255). To exclude '**Tanhā**' and '**Vīriya**', the commentator explains the word. '**Chanda**', in the sense of willing or desiring to do something or some object.

In the canonical text, **mātikā** (Table of contents), the **Buddha** expounded the two kinds of Ultimate Realities, namely, those, (**Dhammas**) taking the objects and those not taking the objects. The mind and mental concomitants are included in the '**Dhammas**' taking the objects, one of which is '**Chanda**', a mental concomitant; and so '**Chanda**' is a state of willing or desiring to do something or some object; and it also is a forerunner in doing something. Therefore, **Chanda** is said to have the characteristic of willing or desiring to do something, or to take something as an object.

Chanda is of six kinds, viz.,

1- Wishing to see a visible object,

2- Wishing to hear a sound,

3- Wishing to smell a smell,

4- Wishing to taste a taste,

5- Wishing to touch a tangible object,

6- Wishing to think of a mental object,

It is **Chanda**'s characteristic of wishing to do all these six kinds of objects. But unlike **lobha**'s being **Attā**ched to an object, **Chanda**'s wishing to do (or to have) something is not a state of being **Attā**ched to an object. Though '**Lobha**' and '**Chanda**' are different in nature, they both can exist together in one moment of consciousness.

Chanda however, is subordinate to and has to follow the dominant **lobha**, in desiring the sensual objects which are able to arouse **lobha** (craving). **Lobha** is a state of being **Attā**ched to an object whereas **Chanda** is a state of (just) desiring that very object.

Likewise, also in the states associated with '**Dosa**' (hatred) etc., **Chanda** is subordinate to and has to follow the dominant '**Dosa**' etc. '**Dosa**'s (has) the harsh and rude nature, while '**Chanda**' is (has) the nature of wishing to be harsh and rude. Note the following facts (points) to understand easily these phenomena;

'**Chanda**', associated with '**Lobha**', is (has) the nature of wishing to be greedy.

'**Chanda**', associated with '**Ditthi**' (wrong view), is (has) the nature of wishing to perceive wrongly.

'**Chanda**', associated with '**māna**' (pride), is (has) the nature of wishing to be proud (haughty, puffed up).

'**Chanda**' associated with '**Dosa**' (hatred), is (has) the nature of wishing to be angry (hateful).

'**Chanda**', associated with '**Issā**' (jealousy, envy), is (has) the nature of wishing to be jealous.

'**Chanda**', associated with '**machariya**' (avarice, miserliness), is (has) the nature of wishing to be avaricious (miserly).

'**Chanda**', associated with '**Kukkucca**' (remorse), is (has) the nature of wishing to be remorseful.

In this way (And so on and so) one has to understand the states to be contemplated, in the case of meditating on the mental states.

Likewise, also in the case of good deeds such as charity, morality etc, dominated by '**Saddhā**' (faith, confidence) '**Chanda**', associated with the series of consciousness dominated by 'faith, is (has) the nature of wishing to be faithful (confident). '**Chanda**', associated with '**Samādhi**' concentration in the serious of consciousness dominated by '**samādhi**' is (has) the nature of wishing to be concentrated. '**Chanda**' associated with '**Paññā**' (wisdom), in the series of consciousness dominated by wisdom, is (has) the nature of wishing to be wise or penetrate. '**Chanda**', associated with '**Paññā**', is (has) the natures of wishing to penetrate such things (phenomena) as, the eye sensitivity, the material qualities, mental states, cause and effect, the three characteristics of **ANicca**, **Dukkha** and **Anatta**, and so on. '**Chanda**', associated with '**Vīriya**', is (has) the nature of wishing to be zealous, and so on, and thus are also to be understood.

Page- 344

Rasa, Paccupatthāna, Padatthāna- '**Chanda**' has the characteristic of wishing to do something or to take something as its object, and so it has the function to search for an object it is manifest (to the yogi's knowledge) as a state of longing for an object, and its proximate cause is the desired object.

'**Chanda**', in taking an object, is like the stretching of mind's hands. **Chanda**'s longing for an object is like the turning of the hands towards the object to take it. The statement that the mind is like the hands is figuratively said to clarify **Chanda**'s wishing to do (something), though the mind has no hands. (**Abhi-A** -1-177-**Visuddhi**-2-96).

When **Chanda** occurs in the continuum of beings, its nature is very evident (clear). A child, wishing to go (move) from its father's hands to its mother's hands, stretches its hands towards its mother. This wishing to go is **Chanda**. **Chanda** includes all kinds of wishing to go here and there, to meet with someone, to see, to hear, to smell, to eat, to take, to touch, to understand' and so on.

Moreover, the wholesome (good) **Chanda** includes all kinds of wishing to give charity, to observe the precepts of morality, to have firm morality, to develop the concentration, to have firm concentration, to develop or to attain the insight knowledge, to realize or to attain to **Nibbāna**, to become the omniscient **Buddha** or the private **Buddha**, or the chief disciple, or the great disciple, or the ordinary disciple, or a king, or a wealthy man, or a god, or a **Brahmāgod** or a monk, or an ascetic'. For, those wholesome **Chandas**, rooted in the wise thought, can occur (arise) in the (continuum of) noble men, who have proper (wise) thought.

In wishing moderately **Chanda** is weak, while in wishing strongly, it is strong. Having fulfilled the perfections with great zeal (**Vīriya**) based on this **Chanda**, one finally at will has to become the omniscient **Buddha**, or private **Buddha**, or the chief disciple, or the great disciple, or the ordinary disciple, or a man, or a god, or Brahma-god.

Without the basic desire (**Chanda**) to attain to the top-rank, one will not (never) make a great effort to attain to the top-rank. Therefore, one must initially make **Chanda** arise to attain (get) the noble advantage. This kind of **Chanda** is called **ĀsāChanda** (wish-to-be or hope). Then, knowing that one cannot attain to the top-rank by having merely wishing or praying, one must ardently make an effort with great zeal.

Page- 345

Also those who would be in future the omniscient **Buddha**, the private **Buddha**, the chief disciples, the great disciples and ordinary disciples have to fulfill, ardently, their respective perfections to attain to their own individual enlightenment with great zeal. They become such and such noble men only having fulfilled their respective perfections, but not otherwise.

And also those laymen and monks of today who have Attained to the higher position (rank) become so only having ardently made a great effort, but they are not the self born persons not making any effort. Therefore you who have luckily Attained the human life which is hard to attain, if lazy and foolish (stupid) not wishing to attain to the higher rank and not making any effort for it, are sure to be born in the four woeful nether worlds. Therefore, you should (must) have the noble wish (desire) to attain to the higher rank (position) and also to the path and fruition, either in this life or future existences.

There is nothing not to be achieved for (by) anyone of strong desire (wish).

The noble desire (inspiration) can produce (bring about) a noble effort and its noble result, and happiness as well.

Page- 346

Section on the 14 Immoral *Cetasikas* (concomitants)

1. *Moha* = Delusion

1. (a) *Moha* has the characteristic of being blind of the wisdom's eye to see, or being unable of the mind to see the true nature of ultimate realities.
(b) Or it has the characteristic of being opposed to wisdom, or being unable to see the true nature of Ultimate realities.
2. (a) It has the function to be unable to see the true nature of the ultimate realities or the objects.
(b) It has the function to conceal the true nature of the ultimate realities or the objects.
3. (a) It manifests (to the Yogi's knowledge) as a state that causes to act (follow) the improper (wrong) practices, or not to act (follow) the proper (right) practices. Or as a state being opposed to following the right practices.
(b) It manifests as a state that blinds the wisdom's (mind's) eye.
4. Its proximate cause is the improper (unwise) attention to the (impermanent, painful) objects that they are permanent, happy (pleasurable) *Attā*, or soul, pleasant etc.

(*Abhi-A*- I- 291; Vs - 2 - 98)

It is *Paññā* that knows the ultimate realities rightly. It is *Moha* that causes to blind the wisdom's (minds) eye. So, *Moha* has the characteristic of causing to blind the wisdom's (mind's) eye. (*Mahā.ti* -2-149).

1. It is *Moha* that by which the (its) associate states are ignorant of, or that makes the (its) associate states ignorant of, the objects or ultimate realities.
2. Or, it is *Moha* that itself is ignorant of the objects or ultimate realities.
3. Or, it is *Moha* that is merely ignorant of the objects or ultimate realities. [*Abhi-A*- 1- 290, Vs -2- 98]

Page- 347

This delusion (or ignorance) is not knowing the true nature of the objects. Or, though *Paññā* (*Ñāna*= wisdom) knows the true nature of the ultimate realities, but *Moha*, not knowing that true nature wrongly or reverely knows the impermanent painful nature of the ultimate realities that they are permanent, happy, *Attā* or soul, pleasant etc. Therefore, *Moha* is the opposite to *Paññā* or *Ñāna*. Here regarding *Moha*'s reverse (contradictory) knowing, it is explained in the commentaries and sub- commentaries thus;

(1) *Asantain bujjhati*= knows not really existing things. *Moha*, by (means of) concealing the true nature of the objects, the ultimate realities, is the cause of clinging to the wrong views such as '*Pakati* (*prakṛti*), *Attā* (soul) etc. Which are not really existing, and so it (*Moha*) knows the wrong views such as '*Pakati*, *Attā*, *SAttā*, *Puggala*' etc. Which are not really existing.

(2) *Asamaim.bujjhati* = knows the things Uncomfortable to Truth. *Moha* is explained by the commentator that it (*Moha*) being the cause of knows perversion perversely (or wrongly) the five aggregates or mental and material phenomena, that they are permanent (*Nicca*), happy (*Sukha*), soul or ego (*Attā*) and pleasant (*Subha*), by means of three kinds of "perversion, namely, 1- of perception (*Sañña.vipallāsa*), 2- of consciousness (*Citta.vipallāsa*), and 3- of view (*Ditthi.vipallāsa*)."

The cause of (three) perversions of 'perception, consciousness and view is figuratively explained as an agent that knows perversely (or wrongly) the mental and material phenomena. [Actually, the explanation as an agent is not in conformity with the ultimate reality, but the abstract (or impersonal) definition is in conformity with the ultimate reality. Therefore, *Moha* is (means) the mere notion of '*Pakati, Attā, Sattā, Puggala*' that are not really existing, and the mere wrong notion of the five aggregates or mental and material phenomena which are reality existing that they are '*Nicca, Sukha, Attā* and '*Subha*']

Note that this meaning (explanation, interpretation) just shows the force of *Moha* associated with '*Ditthi*' (wrong view). Here, '*Pakati*' is a name or term given to the doctrine of a religious teacher named '*Kapila*'.

Page- 348

'*Moha* knows '*Pakati, Attā, Sattā, Puggala*' etc, that do not exist in the sense of ultimate reality, and also knows perversely (wrongly) the ultimate realities". This explanation should be noted to be (as a) figurative speech. '*Moha*' does the function of concealing the true nature of the ultimate realities. "Clinging to the (wrong) views of '*Pakati, Attā*, etc, and also clinging to the wrong notion or perversion that the five aggregates are '*Nicca, Sukha, Attā* and '*Subha*'" these (factors, concomitants) headed by '*Ditthi*' (wrong view), in which *Moha* however is included. Being concealed by *Moha* the true of ultimate realities, the mental states headed by (associated with) '*Ditthi*' know '*Pakati, Attā* etc. That are not really existing, and also know perversely (wrongly) the true nature of ultimate realities, (that is, these two 'wrong and perverse' knowledge arise due to the mental states headed by or associated with '*Ditthi*'). Therefore, the above-mentioned resultant wrong and perverse' knowledge two in number, are figuratively based or depending on the cause '*Moha*'.

The above-stated meaning is to be noted by virtue of *Moha* associated with '*Ditthi*'. The arising of '*Moha*', dissociated with '*Ditthi*' is to be understood depending on 'how the ten fetters arise', described in the chapter on 'the meditation on the mental states'. Here, '*Pakati*' is the main doctrine (view) of *Kapila* the ascetic.

Rasa (function)-'*Moha*', being a wrong notion of the five aggregates or mental and material (physical) qualities as '*Nicca, Sukha, Attā, Subha*', is not able to penetrate (1) The five aggregate which have the true nature of '*ANicca, Dukkha, Anatta*, and '*Asubha*', (2) the connectedness of cause and effect '*Paticca samuppāda*' in (of) those five aggregates (3) the impermanent, suffering and ego less (*Anicca, Dukkha, Anatta*) natures of the five aggregates together with their causes, (4) '*Nibbāna*', the unconditioned state, which is the cessation of those five aggregates together with their causes.

Therefore, '*Moha*' is the virtue of being unable to penetrate the true nature of the ultimate realities. Or, '*Moha*' has the function to make (of making) the mind unable to penetrate well the true nature of the ultimate realities.

The penetrative knowledge of the four noble truths is (called) '*Catusacca samma Ditthi*'. The four noble truths penetrated by this penetrative knowledge are the true natures of the ultimate realities. The true natures of objects are also the relations (relationships) between 'cause and its effect', that is between moral and immoral actions and their resultants penetrated by this knowledge, knowing. '*Kamma* is verily the real property of beings". But these true real ties are included in the knowledge of the four noble truths, which knows 'how the truth of suffering arises

due to the truth of cause (*tanha*). This knowledge of four noble truths (*catusacca sammā Ditthi*) is also called the knowledge of the cause and its result. It is '*Moha*'s function that conceals not to know the true natures of those realities.

Page- 349

Paccupatthāna- Due to the *Moha*'s concealment that hides the true nature of the objects (the ultimate realities), even the wise men who know well the true nature of good and evil deeds, when *Moha* arises in them, do (can) not know (see) the faults of the evil deeds and so (happen to) commit the evil deeds. Therefore, *Moha* is manifest (to the Yogi's knowledge) that it is a state that leads to the improper and wrong practices. This is (called) '*Phala Paccupatthāna*'.

(A) Again, the way to the attainment of the right knowledge called '*Catu sacca sammā Ditthi*' is the right practice. *Moha*, being the opposite to the right knowledge, is also the opposite to the right practice.

(B) Again, just as *Moha* which is the opposite to the right knowledge knows only the wrong, not knowing the right or truth, even so '*Moha*' which is also the opposite to the right practice lets (someone) practice only the wrong practice, not letting (someone) practice the right practice. By practicing the wrong practices, there will not arise the right knowledges or views such as '*Catu sacca sammā Ditthi*'. The right knowledge's, included in the '*Catu sacca sammā Ditthi*'. Which is 'knowing rightly the materiality (material qualities), knowing rightly the mentality, (mental qualities), knowing rightly the cause, knowing rightly the result, knowing definitely and rightly (truly) the impermanent, painful and soulless natures of all conditioned states (materiality, mentality, cause and effect, are the special (super normal) knowledge's which can be attained only due to (by virtue of) the right practice which is the eightfold noble practice. Therefore, '*Moha*' has the nature of practicing only the wrong practice, turning away from the right practice, and so it (*Moha*) is a state that blinds the eye of wisdom, which is the right knowledge. Thus also '*Moha* is manifest to the yogi's knowledge. This is (called) '*Upatthānākāra Paccupatthāna*'. (*Maha-ti-* 2 – 149)

Padatthāna- In him who has wrong (improper) consideration, there (will) arise the defilements or unwholesome states that have not arise and the defilements or unwholesome states that have arisen will develop (increase). (Ma- 1- 4)

According to these teachings as such, the unwholesome states (will) naturally develop in him who has wrong (improper) consideration, and so wrong (improper) consideration is the proximate cause of *Moha*.

Page- 350

Avijjā- This very *Moha* is said (described / taught) as *Avijjā* (ignorance). This *Moha* or *Avijjā* itself neither knows nor lets (makes) the mind and mental states associated with it, and also the person in whom there arises (exists) *Avijjā*, know the four noble truths etc; that should be known by the noble men. Just as a person whose eye is covered by a cataract does not see, due to that cataract, those things that should be seen, even so those beings who are blinded (concealed) by *Avijjā*, cannot know, for this reason, the four noble truths etc; that should be known. Those who are devoid of right knowledge cannot distinguish between right and wrong, and so are sure to commit the evil or immoral deeds, perceiving the wrong as right and the right as wrong. Therefore, this '*Moha*' is said to be the root cause of all evil or immoral states.

There kinds of *Moha*

This *Moha* is of three kinds or stages- Latent disposition (*Antusaya*), out burst (*pariyutthāna*), and transgression (*vitikkama*). As the ten defilements have those three stages (grades), *Moha* which is one of them (defilements) also has the same three stages (grades).

'*Anusaya* in pali means the latent disposition. '*Pariyutthāna* means the outburst'. So, '*Moha* that always (ever) exists (lies) latently (dormantly) in the beings is called '*Anusaya Moha*. '*Moha* that sometimes arises (burst out) together with consciousness is called '*Pariyutthāna Moha*'. '*Moha* that reaches the transgression stage is called '*Vitikkama Moha*'.

Anusaya Moha- Just as the potency that bears the poisonous fruits exists (lately) in a poisonous tree, even so in the beings there exists (dormantly, latently) the potency that conceals (hides) the four noble truths etc, to be known (so) that they cannot be known. That 'potency' is called '*Anusaya Moha*' (*Moha* lying dormant). Being concealed by this '*Anusaya Moha*', the worldlings whose 'eye of insight knowledge' is blind, do not know thoroughly (penetratively) the impermanent, painful and ego-less natures of the conditioned states, nor the four noble truths, nor the 'chain (connectedness) of cause and effect or conditionality of the conditioned states.

The worldlings cannot know the potency (nature) of the '*Anusaya Moha*' by their little (limited) knowledge. [or the potency (nature) of the '*Anusaya Moha*' cannot be known by the little (limited) knowledge of the worldlings.] Now- a- days although those who have no (right) insight knowledge by learning the scriptures are said to know the impermanent, painful and ego-less natures of conditioned things (states), they know them superficially (perfunctorily) by inference. Their knowledge is just a kind of inference, not a kind of insight knowledge that penetrates into the ultimate realities. That '*Anusaya Moha*' becomes (still) lesser and lesser by degrees, up to the stages of stream winner, once- returner and non returner, but is not totally exhausted (ceased) yet. Only when one attains to Arahathship, that '*Anusaya- Moha*' is totally exhausted. Therefore, as long as one has not yet attained to Arahathship, so long the '*Anusaya Moha*' exists (lies) latently in him, even when one is doing good deeds. When there is a suitable condition, there will surely arises this '*Moha*'.

Page- 351

'*Pariyutthāna Moha*- When, '*Moha*' but bursts bring associated (together) with mind, then evil or unwholesome consciousness is said to have arisen. Being concealed by this '*pariyutthāna Moha*', one cannot know the bad effects of evil deeds, surely experienced either in this life or in the next.

Vitikkama Moha- When '*Moha*' arises (violently) being forced by that '*pariyutthāna Moha*' even the wise and virtuous (noble) men happen to commit the evil deeds, not knowing (being unable to know) their (evil) faults or effects. This '*Moha*' is a great (the greatest) evil in the unwholesome (evil) matters. All foolish acts in this world are rooted in this '*Moha*'.

Haritaca Jātaka (No. 431)

Buddha, the teacher of gods and men, while living at *Jetavana* monastery, said thus referring to a monk, wishing to disrobe (turn to a lay-man) when (as) he saw a well-adorned lady.

"Monks, defilement does indeed spoil (ruin) the evident virtues, is devoid of pleasure (pleasantness) and causes one to be reborn in hell. The defilement of this nature will surely soil and vex (distress) you. A great storm strong enough to blow the mount meru out, will shamelessly blow off the old leaves (on the trees). It is right. This defilement has made even a virtuous man (ascetic) mindless and lose his eight fold *Jhānas* (absorptions) and his fivefold super intellects, who is of very pure morality and who is ever fulfilling the (ten) perfections to be an omniscient *Buddha*. After saying this, he retold the (His) past story:-

A wise man overcome by *Moha*

The would be **Buddha**, named '**Haritaca**', being of gold complexion, gave up (abandoned) his great wealth amounting to eighty cores and retired (resorted) to the **Himālaya** forest, at the death (demise) of his parents, and became an ascetic. He attained the **Jhānas** and super intellects within seven days after his ascetic hood, fulfilling the (ten) perfections. He lived there for long, eating the bulbus roots and fruits of the forest, and then went from the **Himālaya** mountain to the city of Benares in order to take (eat) sour and salt. He was living in the royal garden. The king of Benares, the would be Rev-**Ānanda**, was his old fellowman in fulfilling the (his) perfections. Therefore, he revered greatly the ascetic as soon as he saw him. Instantly he invited the ascetic to his palace and served him with various delicious meal (eatables and drinkables), letting him sitting on the throne under the canopy of white umbrella.

Page- 352

After the meal, the ascetic admonished (taught) the king with a thinks giving discourse. The king of Benares , too being pleased with his (ascetic's) thinks-giving discourse and revering him very much, requested the ascetic to live in the royal garden, appointing his gardener as the ascetic's servant and having prepared the resting places by day and by night etc. there. The **Buddha** would be (Bodhisat) ascetic, too, has ever taken his meal at he king's palace since that day and lived in that royal garden for twelve years.

One day when the king was about to go out to subdue the rebels ravaging at the borders, he repeatedly asked his queen to serve unneglectfully (mindfully) the teacher ascetic who is like a fertile field where the seeds of merit are sown and set out. The queen, too, personally served the ascetic with meal punctually. One morning, however, as the ascetic has not come (arrived) yet, the queen was lying down on the throne enjoying fresh air, after having bathed herself with scented water and put on smooth clothes.

The Buddhist ascetic, too, come through the sky by the force of the supernatural powers and arrived at the window. The queen, too, hearing the sound of his robe (sack clothe) got up hurriedly from the throne and the waist cloth slipped off her waist. When he saw her female organ, **Moha** lying latently in him (his continuity) so pure for many years, bursts out instantly; that is his '**Anusaya Moha**' reached the stage of '**Pariyutthāna Moha**'. **Moha**, bursting out in him, arose in association with lust (attachment), and so he took her by the hand and committed evil adultery behind the curtain. (**Jatakattha Katha**-3- 473-4).

In this story, it is to be noted that '**Anusaya Moha**', not stopping at the stage of '**pariyutthāna Moha**' and being combined with lust (attachment) reached (rose up to) the stage of '**Vitakkama-Moha**' (transgression stage of **Moha**). If this kind of **Moha** did not arise in him, the ascetic could not commit this kind of in proper (evil) deed as such, even if he was allowed to do so by the king. Now that the thick darkness of **Moha** oppressed him with its greatest force, the ascetic, not being able to see the evil consequences in this life and in the next, happened to commit this kind of evil (adultery). The super-natural (Psychic) powers which he attained after long exertion could not defeat (overcome) and destroy, at this critical point (moment), the darkness of **Moha**, too thick to be destroyed, but (rather) even disappeared in him.

The ascetic, however, originally having perfectly matured (good) nature, felt, greatly repent when the king returned and having again made an exertion to regain his lost psychic powers, returned to the Himalaya forest far from human beings, with great remorse that he happened to commit such a sin (crime), due to his stay near the human society.

Page- 353

(Before returning to the Himalaya forest, the ascetic admonished the king thus "Great king, these four things (states), namely, **Rāga**= lust, **Dosā** = hatred, **Mada**= madness (conceit) and **Moha**= delusion, are very powerful and strong (violent). **Paññā** or wisdom cannot stand, being influenced by these four things (states), just like the men drifting about helplessly in the large (wide) current so deep and so swift (Violent)". [**Jataka**-A-3-476]

Unmindfulness (*pamāda*)

"Monks, I do not see such a thing (state) as this unmindfulness that brings about (is for) so great ruin. Monks, unmindfulness (negligence) is for great ruin. (Am-1-14)

Unmindfulness (Negligence) in the wholesome (moral) states or acts is a group of consciousness and its mental concomitants headed (influenced) by *Moha*. A commentary entitled '*Sammoha vinodani*' retold the story of a virtuous man turning to the life of a charcoal carrier.

The Wise Charcoal Carrier

When thirty monks, after worshipping a great stupa (Pagoda) named *Kalyāṇi*, was coming towards the highway by a forest-path of (in) a great forest, saw a layman on the way, who returned after working in a fire-burnt farm. He was black like charcoal his whole body being besmeared by (with) charcoal-powder. He was girding his loins with a clothe blackened by charcoal-powder. He looked like a stump burnt by fire. He who looked like a stump burnt by fire, after working in the farm for the whole day, returned home carrying a bundle of wood half- burnt. His head- hair scattered on his back. When meeting face to face with the monks, he descended to the by-path and was standing in front of the monks.

Page- 354

Some young novices followed after those monks. When seeing him (the old man), the novices who followed the monks, looking at one another, and talking laughingly, thus: "Hey, novice, if he were your father, grand father, or uncle"; and they asked him too, "Lay devotee, what is your name?"

That lay- devotee, being asked his name and feeling sad (unhappy), put down the bundle of wood put on his clothes well and said to the reverend monks, worshipping them, "Your reverends, stop (stand) here for a moment." the monks, too, were standing in favor of him. The young monks and novices came and laughed at him, even in the presence of the elder monks. Then the lay devotee said thus:-

"Your reverends, you see me (in this form) and laughed at me. Do you think that you reach the highest spiritual stage by merely putting on the robes for long. I, too, was formerly a monk like you. You have not yet Attained to (even) the concentration, called one pointedness of mind; (He was saying so, being laughed at) I was formerly a monk possessed of supernatural psychic powers (even) in the order of this *Buddha Gotama*. I could turn (change) the sky into the earth and also the earth into the sky. I could make a long way short and also a short way long. I could travel (through) thousands of universes in a moment. Now look at my hands. My hands at present look like the monkey's hands. I could once touch the sun and the moon with these my hands (even) while sitting on this earth (ground). I could rub the sun and the moon with these my feet, as if they were used as shards (potsherds) to rub my feet. These supernatural psychic powers of mine had disappeared due to my negligence in the moral states (deeds). Your reverends should live in this *Buddha sāsana* vigilantly (mindfully), having mindfulness in the moral states (deeds) such as the four foundations of mindfulness. Due to negligence, those like me are brought to ruin.

"Having mindfulness (vigilance) in the moral states (deeds). Such as the development of the four foundations (Applications) of mindfulness, the virtuous (wise) men living in this *Buddha sāsana* could make an end of 'birth, disease and death.

Therefore your reverends, taking me as an object (example), should have (keep) vigilance in the moral matters".

Page- 355

Thus the lay devotee, charcoal bearer, admonished the monks, giving them religious warning. While being admonished by that lay devotee, those thirty monks Attained to the knowledge of religious emotion and practiced the in sight meditation, and thereby they Attained to Arafat ship on the spot.

Thus, even the virtuous men who have attained (mundane) calm and insight knowledge's may lose them and are ruined, when they are oppressed and over powered by *Moha*. (*Abhi-a-A-2-282-3*).

Every ignorance is not delusion

Though ignorance is said to be delusion, not knowing (unknowing) an art not yet learnt, a place not yet visited, a name not yet noted and so on is merely not knowing (unknowing) and is not delusion.

It is merely not having perception (motion) that has perceived (noted) before. That unknowing arises even in the *Arahat's*, not to speak of ordinary men.

An *Arahat* free from *Avijjā* delusion (ignorance) cannot be said to know all mundane and supra mundane things. In fact he knows just the four noble truths etc that should be known. Even an *Arahat*, not possessed of the (fourfold) analytical knowledge's, can be versed in the Three Canons, only when he has studied them. Though he is well versed in the Three Cannons, he cannot know others' dispositions (intensions, wishes). The knowledge of the beings inclinations and dispositions, and the knowledge of weakness or sharpness of being's mental faculties are common only to the omniscient *Buddha's* but not to the (*Buddha's*) disciples, and they (these two knowledge's) are included in the *Buddha's* unique (uncommon) six fold knowledge.

Only the omniscient (all enlightened) *Buddha's* can completely (perfectly) know all things that are to be known. That the disciples cannot completely know all the mundane and supra-mundane things is not (due to) the concealment of *Avijjā*, but is only (due to) the weak potency of their knowledge. For example, not seeing an object at a distance during the day time is not due to the concealment (obstruction) of darkness, but is only (due to) the weakness of eye sensitivity.

Thickness & thinness (of Avijja)

Page- 356

This *Avijjā* is of two kinds, thickness and thinness, considering its various (varying) stages. *Avijjā* or *Moha* which (conceals one that one cannot know: "This is wholesome state (morality) and this is unwholesome state (immorality)" is very thick *Avijjā*, whereas *Avijjā* which knows "This is morality and this is immorality," and can avoid immorality and does morality, is said to be very thin. But this much (of thinness) is yet far away from (total) freedom of *Avijjā*. Although the stream winner, the oncereturner and the Nonturner can penetrate the four noble truths, etc, their *Avijjā* becomes just thinner and thinner (less and less). Only when one has attained to Arahatsip, one is completely free from all *Avijjā*.

Page-356 Here, the (insight) knowledge of the *Ariyā* disciples that knows the supra mundane noble truths etc; and also the knowledge of the insightmediators, in the virtuous (perfect) worldlings who have Attained the right insight knowledge is unlike the knowledge of the present persons who just know the categories of mental and material phenomena as described in the 'compendium of *Abhidhamma*' and as taught by their teachers. This knowledge is a kind of *Sañña* perception (remembrance) memorization but not real knowledge. It is a real (penetrative) knowledge that knows (penetrates) the ultimate realities of suffering. The cause of suffering etc by one's own insight knowledge.

This world (mankind) is totally, blind by the eye of wisdom. In this world, only a few of beings can know well the impermanent nature etc-of conditioned things (phenomena). Just as,

among the birds caught in the net, there are only a few that are free, even so there are only a few who, after death, attain to heaven.

2. *Ahirika* (Shamelessness)

1. Its characteristic is being undisgusted with unwholesome states and evil deeds, or being shameless in unwholesome states and evil deeds.
2. Its function is to do evil deeds in shameless way.
3. It manifests (to the Yogi's knowledge) as not shrinking from doing evil deeds.
4. Lack of respect for oneself is its proximate cause.

Ahirika means (1) a shameless person, (2) shameless mind and (3) mental states associated with *Ahirika*, a concomitant.

Page- 357

Note that up to this *Ahirika*, a mental concomitant cannot be taken yet.

(1) A state causing a person to be shameless, (2) a mind to be shameless and (3) associated states to be shameless.

This is *Ahirika* concomitant. It is a cause that causes a man shameless to do evil and unwholesome deeds. It is also a *Ahirika* concomitant that causes a mind and its associate states to be shameless. It is shamelessness that causes a person to be shameless, a mind to be shameless, and (its) associate states to be shameless. *Ahirikka* (an abstract noun form) is used as *Ahirika*, by dropping one 'k'.

3. *Anottappa* = Dreadlessness

A state that is dreadless (fearless) in doing evil and unwholesome deeds is *Anottappa* concomitant.

Page 358 Any evil deed and defilements such as '*Lobha, Dosa, Moha*' etc. Which are the root causes of those evil deeds are really disgusting things, when they are viewed (considered) by the wisdom of the holy (noble) *Ariyas* such as the *Buddha* etc. The persons who are dominated (over powered) by '*Lobha, Dosa* and *Moha*' and who commit evil deeds are very disgusting in the midst of the holy (noble) *Ariyās* such as the *Buddha* etc. But like a pig that eats excrement, a man dominated by *Ahirika* does not despise, but greatly like such disgusting evil deeds without despising them, being concealed by *Moha* and blinded by its darkness. After doing evil deed, again, (the evil doer) will surely meet with the following dangers:-

1. *Attānuvāda*, a danger that (he) accuses himself, without respecting himself,
2. *Parānuvāda*, a danger that he is accused by other,
3. *Danda*, a danger that (he) incurs punishment by the king,
4. *Duggatī*, a danger of being reborn in the woeful states after death, though he may escape the above said (present) dangers by his tactful means.

And so those evil deeds are really fearful and dreadful things. But like a moth (fire-fly) that dashes against the fire, the people dominated by *Anottappa* do (commit) those evil deeds fearlessly, not being reluctant.

"*Moha, Ahirika, Anottappa* and *Uddhacca*" these four concomitants are common to (all) unwholesome consciousnesses: so it is natural that whenever '*Ahirika* nad *Anottappa*' arise, there arises *Moha* as well, and whenever. *Moha* arises, there arise '*Ahirika* and *Anottappa*' as well. So even the wise men (being dominated by *Moha, Ahirika* and *Anottappa*) sometimes happen to

commit the evil deeds, shamelessly and fearlessly. So the so-called wise or virtuous men should consider, by their own experiences, whether this statement is right or wrong.

The example of ascetic *Haritaca*

In committing sexual intercourse (adultery) by ascetic *Haritaca*, the characteristics of *Moha* (delusion), *Ahirika* (shamelessness) and *Anottappa* (fearlessness) are evident. *Haritaca* was a real virtuous person who Attained *Jhānas* and psychic powers. The evil deed committed daily by the ascetic behind the curtain in the palace was a great crime of adultery, really shameful and dreadful. Being concealed (blinded) by *Moha*, the ascetic being shameless and fearless, committed wholeheartedly such an improper deed (crime) which spread notoriously in the whole city. But the respectful nature (character) of the Bodhisat ascetic is thus:-

His Respectful Character

Page- 359

The king, hearing that news, approached the ascetic *Haritaca* and asked him whether the news was true or not. The Bodhisat ascetic thought Thus:-

"If I said, I did not enjoy the sexual pleasure, the king of Benares would surely believe my word. There is in deed no such a refuge equal to truth in this world. Saying (Telling) the false words, the untruthful men whose truth is corrupted (ruined) are unable to attain to the perfect Enlightenment, sitting Cross- legged on the couch at the foot of the Bodhi tree. I should tell (him) a true word." Thus he thought

"True, the Bodhisat, in his some existences, happened to commit such evil deeds as (1) killing others, (2) stealing other's property, (3) committing adultery and (4) taking intoxicating drinks and drugs. But he never told lies that spoiled (ruined) other's welfare. Therefore, the Bodhisat ascetic, wishing to say (tell) the truthful word only, said thus:-

"Great king, the new that you hear is true. People deluded by *Moha* are led to believe in the sensual pleasures as pleasant, and I myself too, being deluded and foolish, happened to follow the wrong course".

Thus he admitted openly and truly his fault (sin). Really courageous!

Page- 360

But this was quite a fearful crime. His crime was quite dreadful. It is clearly a danger of self-censure that could not respect even himself. The bad news that the king's teacher ascetic had offended the queen during the absence of the king spread in the whole city, and so, he (the ascetic) had at present met with the danger that he was censured by others.

If the king were not would-be *Ānanda* who was a fellow man to fulfil the perfections together with the Bodhisat, he would not value (would destroy) even the ascetic's life. As the king was a virtuous man, the ascetic narrowly escaped (from) the danger of life being influenced (overpowered) by evil states such as *Raga*, *Moha*, *Ahirika*, *Anottappa* etc.", the ascetic, not thinking of anyone (else), dared to commit such a scandal or adultery very close to the danger of death. It is natural that a man may be wise, but hardly be mindful (at the same time).

Only the sexual matter is not too, shameful among the audience, but all evil states such as (i) anger (*Dosa*), that abuses (scalds) other rudely and harshly out of great anger (ii) pride (*Māna*) that is puffed up, haughty like a man, regards much of oneself, highly boastful and regards little of others, and regards others as not equal to oneself, and (iii) envy (*Issā*) that envies, censures and scolds others are verily disgusting, shameful and dreadful.

1. Just a pig is not disgusted with excrement; even so a shameless one abhors no evil.
2. Just a fire fly fears not the flame, even so a dreadless one fears no evil. (*Mahā -ti-* II- 149)

The characteristics, functions etc; of these *Ahirika* and *Anottappa* are clear. The point to be contemplated is to contemplate a mental concomitant each selected from the mental concomitants associated at present with a corresponding unwholesome (immoral) consciousness. But, as you, wise man is not at present committing any evil; you can just contemplate attentively one of the series of consciousness that arose when you had committed an evil. Again,-

According to the statement of the *Mahātikā*, thus described above, shamelessness and fearlessness do the foul, disgusting and evil deeds are the natures or characteristics of *Ahirika* and *Anottappa*, and so, taking the objects that cause the defilements to arise, such as '*Lobba, Dosa, Moha, Māna*' etc. one can take as objects the natures or characteristics of *Ahirika, Anottappa* which are shameless and fearless to do evil deeds. Those two mental concomitants (*Ahirika* and *Anottappa*) are common to all kinds of unwholesome consciousness. There cannot be any evil deeds whenever unwholesome consciousness arises. Therefore even if unwholesome consciousness arises, while not doing evil deeds, those two mental concomitants surely arise, and so it is possible to contemplate any objects that cause the defilements to arise. In saying thus, shamelessness and fearlessness in arising of the defilements, such as '*Lobha, Dosa, Moha, Māna*' etc; are respectively *Ahirika* and *Anottappa*.

4. Uddhacca

Page- 361

Uddhacca is that which causes the unwholesome consciousness to be agitated, distracted and excited. Or *Uddhacca* is that which causes the states associated with it (*Uddhacca*) to be agitated, distracted and excited. The consciousness (mind) and mental states associated with *Uddhacca* are to be agitated and distracted at the object due to *Uddhacca*. *Uddhacca* is meant to be a state that agitates and distracts the mind and its mental concomitants.

1. Its characteristic is the agitation of mind, like the water that trembles being whipped by the wind.
2. Its function is to agitate the mind, just as the wind shakes the flag.
3. It appears to the Yogi's knowledge that it (*Uddhacca*) is a mental agitation just like the ashes that go upwards, as a stone is thrown on them.
4. Its proximate cause is an improper consideration to the objects that agitate the mind.

The mind (consciousness) associated with *Uddhacca* cannot remain calm on an object, and it appear (looks) as if rising up and scattering about. It is agitated, not remaining calm. Agitation or not remaining calm means 'not remaining together' of mind and its mental concomitants on one object. It is *Uddhacca* that cannot take an object calmly, just like the trembling of water being whipped by the wind.

Page- 362

Rasa, Paccupatthāna- Just as a flag on the post cannot remain calm, being blown away by the wind; even so it is *Uddhacca*'s function that causes the mind not to remain calm on one object. Being incited by *Uddhacca*, all the states associated with it cannot take an object firmly. Even *Samādhi* called '*Ekaggatā*' can merely fall (arrive) at one object, at the moment when it is associated with *Uddhacca*. *Ekaggatā* called *Samādhi*, associated with the consciousnesses of calm and insight meditation of path and fruition can take well and for long, the objects of calm and insight meditation and of *Nibbāna*, but *Ekaggatā* associated with *Uddhacca* cannot take the object well and firmly. Therefore, just as the ashes rise upwards, when the heap of ashes into which a stone is thrown, even so "*Uddhacca* is a state of mind that cannot remain in (at) one object, and is agitated and distracted" thus it appears (manifests) to the knowledge of the Yogi who contemplates *Uddhacca* and this is called '*Paccupatthāna*'. In the case, of *Padatthāna*, the commentary explained thus:- "Just as some one kills a panther in order to get its leather (or in other words, a

panther is killed due to its (leather), even so due to improper (unwise) reflection (consideration) there arises disquietitude of mind, and again, due to disquietitude, there arises improper (unwise) consideration, too. Therefore, (even) the very improper (unwise) consideration resulting in (from) the disquietitude of mind is the proximate cause for arising of **Uddhacca** (mental distraction).

Or, the object is figuratively said to be the cause of mental disquietitude (**Avūpasama**). For example, in saying that phlegm is the (lump of) molasses or treacle, the treacle which is the cause of phlegm is figuratively said to be phlegm which is the result of treacle; in the same way, in the case of arising of mental disquietitude, taking something as an object, that object itself which is the cause of mental disquietitude is (figuratively) said to be disquietitude (**Avūpasama**). The name '**Avūpasama**' which is mental disquietitude, the result, is figuratively said to be 'an object; the cause of mental disquietitude. According to this second explanation, the very improper (unwise) consideration which is the cause of mental disquietitude is to be understood to be the proximate cause of '**Uddhacca**'.

Page- 363

Just as, when a stone falls on the heap of ashes, the ashes rise upward, even so the state of going to this and that object without remaining fixed on (at) one object, is (called) '**Uddhacca**', and so the mind (consciousness), too, associated with '**Uddhacca**' is (said to be) the distracted mind; and when **Uddhacca** is strong, the physical body, too, is moving to and fro, desiring to do this and that, and finally the man of strong **Uddhacca** becomes a tramp. Although a man of distracted mind is sitting and meditating on the meditative object, his (distracted) mind does not attend to the meditative object, but is thinking about the affairs of his children, business etc. Which are one by one disturbing (entering into) or wandering in his mind; and this (state) is due to the force of '**Uddhacca**'.

Since prince **Nanda** has received (taken) ordination, his mind frequently goes to **Janapadakalyāṇi**, his would-be wife; and this (state) too, due to the force **Rāga** (attachment, lust) associated with '**Uddhacca**'. And a wise and virtuous man called '**Kudala-pandita**', too, is changing his life from monkhood to a layman (alternately) for seven times, and is frequently thinking of his hoe without attending to his monk's religious duty and (he) cannot control (subdue) his mind. This, too, is due to the force of **Uddhacca** associated with lust. It is **Uddhacca** that cannot remain fixed at his monk's religious duty. But when he has received ordination at the seventh time, he can successfully subdue his lust and has attained the **Jhānas** and psychic powers.

This **Uddhacca**, by its nature, does not remain fixed at any object, but is distracted, going to this and that object; and though it is an unwholesome (immoral) state, it does not commit any evil by itself and so unlike **Lobha**, **Dosa** etc, it has no force to throw anyone into woeful states, but it may weaken concentration and make the mind (someone) flippant or negligent. For, an unwholesome or evil intention headed by this **Uddhacca** may (can) produce bad result during life-time.

5. **Lobha** = greed

Page- 364

It is **Lobha** (greed) by which the (its) associate states are attached to the object. Or, it is **Lobha** that itself is attached to the object. Or, just attachment to the object is **Lobha**.

1. Its characteristic is the grasping (to grasp) at the object thus: "It is mine," just like the money catching gum.
2. Its function is clinging (to cling) to the object, just like a piece of meat thrown into the very hot iron-pan and stuck on it.

3. It appears (manifests) to (in) the yogi's knowledge as a state that cannot abandon (give up) its object, just like grease or engine oil that soils the cloth. (Or, just like the cloth that is soiled by grease or engine oil).

4. Its proximate cause is the wrong view that sees (thinks) the unpleasant objects, the causes of fetters, as pleasant (pleasurable).

In taking hold of an object by **Lobha** (*ārammana gahana*), according to the degrees, great or small, of **Lobha**, it is **Lobha** that cannot abandon (given up) the object or that firmly clings to the object, by firmly attending to the object, with **Tanhā** or craving. Therefore, **Lobha**'s taking hold of an object is compared with 'catching the monkeys by means of the very sticky monkey- catching gum.

In old days, the hunters used to trap and catch the monkeys, in the plain of **Himālayas**, by means of the very sticky monkey- catching gum. A flirting or wanton monkey of curious nature went near the place besmeared by the monkey-catching gum and touched the gum with one hand, which was firmly seized by that gum. In order to separate that hand from the gum, he used another hand to push at the gum. That second hand of his was also firmly seized by the gum. In order to separate both of his hands from the gum, he used his mouth to bite the gum. His mouth also was again firmly seized by the gum. In order to separate them all from the gum, he used both of his feet, to kick at the gum. Both of his feet too, were again seized by the gum. Then, he tried to separate them all by pressing the gum with his body. His whole body was firmly seized by the gum. Then the monkey came to be treated, roasted and devoured by the hunter at his will.

Page- 365

In the same way, when any of the six fold objects strike at (contact with) one of the six fold doors, **Lobha** is greatly attached to that object, and seizes the person dominated by **Lobha** so that he cannot keep away from that object. Just as the monkey seized by the gum comes to be carried to the fire-place (live coals), even so that **Lobha**, too, that cannot keep away from the object, will mature and increase (develop) and fling the man full of greed in to the ocean of woeful states, like the rapidly flowing current of the rivers that finally flows into the ocean.

Rasa, Paccupatthāna- Just as a piece of meat thrown into the very hot iron pan at once, sticks at that iron-pan, even so **Lobha**, that meets with an object and cannot keep away from it, greatly clings to it. That clinging is **Lobha**'s function. Just as a cloth that is spoiled by grease, engine oil etc cannot easily be washed clean, even so **Lobha** that is contemplated by a yogi appears (manifests) to (in) his knowledge that it (**Lobha**) clings to an object and cannot keep away from it. This is '**Upattanākāra. Paccupatthāna**'.

Padatthāna- When one is attached to the sensual objects, animate or inanimate, all of them are the objects of attachment (fetters). According to **Abhidhama**, they are six fold objects. These objects of attachment (fetters) are actually the unpleasant (loathsome) objects in the eye of wisdom of the **Ariyā** (Noble) persons like the **Buddha** etc. But those who lack such an eye of ultimate reality think (consider, view) those six fold sensual unpleasant (loathsome) objects, animate or inanimate, as pleasant. When these unpleasant objects are thought (considered, viewed) as pleasant, there arises attachment to (craving for) those sensual objects. Therefore **Assādaditthi**, meaning the wrong view that view (considers) the unpleasant objects of attachment as pleasant is the proximate cause for arising of **Lobha** (greed).

Here, the statement that **Assāda Ditthi** is the proximate cause of **Lobha**, is said only for **Lobha** associated with wrong view. However, for **Lobha** dissociated with wrong view and (but) associated with **Māna** (pride) only, or for **Lobha** dissociated with both wrong view and pride, it's proximate cause is (just) unwise or improper consideration (thought), for this unwise (improper) consideration is the root cause of all immoral (unwholesome) states.

Lobha and **Chanda** - According to the above-mentioned characteristic, function etc; the difference between **Lobha** and **Chanda** should be understood. **Lobha** has adherence or sticky nature (gum) in desiring the objects, and having the sticky nature it sticks to (in) that object.

Chanda, however, has no such sticky nature in desiring the objects, and having no sticky nature it does not stick to (in) the object. Therefore, **Lobha** is a state that has attachment (adherence) to the object, whereas **Chanda** is a state that has no (such) attachment (adherence) to the object but has just desire to do. The above statement that **Chanda** has no attachment to the object but has just desire to do means that it (**Chanda**) has merely no attachment to the object, but (it) does not mean that **Chanda** is not as strong as **Lobha**, in every case. **Chanda**, while (at the time of) being associated with **Lobha** complies with (yields to, concedes to, gives concession to) the **Lobha**'s nature, and said not to be as strong as **Lobha**, but the predominal moral (wholesome) **Chanda** that desires anyone of the Enlightenments of Omniscient **Buddha**-hood, private **Buddha**-hood, Chief Disciple-hood, Great Disciple-hood, Ordinary Disciples-hood is said to be stronger even than **Lobha**. Such kind of moral **Chanda** is so powerful that it can elevate (raise) someone's noble life. That moral **Chanda** (desire) is manifold, namely, the desires to attain to '**Nibbāna**', insight knowledge, path- knowledge, fruition- knowledge, and other spiritual progresses.

Other commonly used synonyms of **Lobha**

its many synonymous names (terms) such as '**Pema**, **Tanhā**, **Rāga**, **Samudaya** and so on. (Abh. t. 215).

The word '**Pema**' is used to mean (express) 'affection for oneself (mutual) affection between the husband and wife, affection for sons and daughters, (mutual) affection between the brothers and sisters, '**Pema**' means 'affection, love (family love)', which is also called 'fetter' in the world. Although 'fetter' is of ten kinds, this '**Tanhā**, **Lobha**' named '**Pema**' is commonly known as 'fetter' (**samyojana**). Like a rope that binds the bulls together that they can not separate from each other, this '**Tanhā**, **Lobha**' that binds the two beings (persons) together that they cannot separate from each other is verily called 'fetter'.

Like being thirsty and hungry, being thirsty, hungry for and being **Attā**ched to the six fold objects, viz, form, sound, odour, taste, tangible and **Dhamma** objects, that cannot separate from them, is also called **Tanhā**, as explained in **Abhi**-1-215-6. Like a cloth soiled with oil, excessive attachment (to the object) is called '**Rāga**'.

Page- 367

In the discourse on Truth, this '**Lobha** is called '**Samudaya**' (cause of suffering) as a chief factor. '**Samudaya**' means 'the root cause of suffering'. Not being free from this '**Lobha**' called '**Samudaya**, **Pema**, **Tanhā**, **Rāga**, beings are miserably wandering incessantly in the round (cycle) of existences. Now, various sufferings, great or small which everyone has to meet with, are produced by this '**Tanhā**, **Lobha**' and so 'the stronger **Lobha** is, the greater suffering is (will be), or the weaker **Lobha** is, the lesser suffering is (will be)'. If there is no **Lobha**, there will not be any suffering. The mind or consciousness associated with **lobha** is called the mind or consciousness associated with **Lobha**, **Tanhā**, **Rāga** and **Samyojana** (fetter), and the man possessed of those (evil) states is also called he who has great greed, attachment, lust and fetter.

If this **Lobha**, also called '**Tanhā**, **Pema**, **Samudaya**, **Saṃyojana**' is left as it is, without being controlled, overcome (subdued) by the (meditation) practice of pure and noble eight fold path, then this **Lobha** will never recede (retreat). Just as when a calf grows up, its horn, too, will be longer, even so this '**Lobha**, **Tanhā**' arising together with rebirth consciousness will be greater (stronger) when an individual concerned grows up.

As long as this '**Samudaya**, **Tanhā**, **Lobha**' is not eradicated (uprooted) by **Ariyā** Path (**Magga**), it will still exist as a dormant (latent) disposition in the continuity (continuum) of beings. Due to the force (forcing power) of that latent disposition (**Anusaya**) of **Lobha**, a child since his child hood will naturally love his parents, grand parents, brothers and sisters. Being guided by this innate state (**Lobha**), a person concerned enjoys the sensual pleasures, and the more he enjoys, the more he is thirsty for them and will finally remain engulfed in the whirlpool of the ocean of

existences not being able to see **Lobha's** faults, just as a man who is thirsty drinks salty water, and the more he drinks it, the more he becomes thirsty.

The force that can throw one into the woeful states

Even little or negligible '**Lobha**', if not being supported (helped) by wholesome or moral states, has a the strong force that can throw one into the woeful states, just as even the smallest stone, if (being) thrown into the water, will surely sink down in the water. Therefore, a person who is clinging to his children and wealth, at the advent of death can be thrown by his **Lobha**, **Tanhā**, into the fourfold woeful states, just after his death, as the **Buddha** taught (explained) in the following discourse, called *Āditta. Pariyāya Sutta*'.

Extracts from *Āditta Pariyaya Sutta*

"Monks, I will teach you a discourse called '*Āditta. Pariyāya Sutta*'. Listen to that discourse. Monks, what is this discourse called '*Āditta. pariyāya*'.

Page- 368

(1) "Monks, it is better to pierce the eyes of him who is sleeping on his back with a red hot iron-rod burning with flames. But it is ignoble (bad) to grasp and cling to various visible objects cognized by the eye- consciousness, (A) by taking in mind the forms of their whole body such as "This is a man, a woman, (my) husband, (my) wife, (my) son, (my) daughter, (my) grand -child" etc., (B) by taking in mind the marks (actions) of their limbs such as, hands and feet, and also their smiling and laughing etc.

"Monks, when one clings to them, then the volitional consciousness (**Kamma Viññāna**) which has a great force that can produce the result of rebirth in the (his) next existence-

May exist (a) either as a mental continuity, bound with delight and pleasure taking in mind the forms of their whole body such as man, woman, (my) wife, (my) husband, (my) daughter, (my) son etc, (b) or as a mental continuity, bound with delight and pleasure taking in mind the marks (actions) of their limbs, such as hands and feet, and also their smiling and laughing etc.

"At that (such at) time, if one were to die, then one would (might) be reborn either in hell or in animal world. Monks, seeing such a fault (sin) I taught thus (as stated above).

(2) "Monks, it is better to pierce the ears (of him who is sleeping on his side) with a red hot iron rod burning with flames. But it is ignoble (bad) to grasp and cling to various sounds cognized by the ear consciousness, (A) by taking in mind the forms of their whole body such as "This is a man, a woman, (my) husband, (my) life, (my) son, (my) daughter" etc., (B) by taking in mind the marks (actions) of their limbs, such as hands and feet, and also their smiling and laughing etc.

"Monks, when one clings to them, then the volitional consciousness (**Kamma. Viññana**) which has a great force that can produce the result of rebirth in the (his) next existence-

May exist (a) either as a mental continuity, bound with delight and pleasure taking the forms of their whole body such as 'man, woman, (my) wife, (my) husband, (my) daughter, (my) son etc., (b) or as a mental continuity, bound with delight and pleasure taking in mind the marks (actions) of their limbs, such as 'hands and feet, and also their smiling and laughing etc.

Page- 369

"At that (such a) time, if one were to die, then one would (might) be reborn either in hell or in animal world. Monks, seeing such a fault (sin) I taught thus (as stated above).

(3) "Monks, it is better to cut up the nose to piece with a small sharp red hot (nail clipping) knife, burning with flames. But it is ignoble (bad) to grasp and cling to smells (odors / odorous

objects) cognized by the nose consciousness (e.g.) the embracing and kissing one's young son, daughter, and grand child etc), (A) by taking in mind the forms of their whole body such as, "This is a man, a woman, (my) husband, (my) wife, (my) son, (my) daughter etc"., (B) by taking the marks (actions) of their limbs, such as hands and feet, and also their smiling and laughing etc.

"Monks, when one clings to them, the volitional consciousness (*Kamma. Viññāna*) which has a great force that can produce the result of rebirth in the (his) next existence.

May exist (a) either as a mental continuity, bound with delight and pleasure, taking in mind the forms of their whole body, such as 'man, woman, (my) husband, (my) wife, (my) son, (my) daughter etc"., (b) or as a mental continuity bound with delight and pleasure, taking in mind the marks (actions) of their limbs, such as 'hands and feet, and their smiling and laughing etc.

"At that (such a) time, if one were to die, then one would (might) be reborn either in hell or in animal world. Monks, seeing such a fault (sin), I taught thus (as stated above).

(4) "Monks, it is better to cut up the tongue with a small sharp red hot razor, burning with flames. But it is ignoble (bad) to grasp and cling to the tastes cognized by the tongue consciousness, (A) by taking in mind the forms of chicken, pig, potato etc., (B) by taking in mind the marks of their limbs, such as 'the liver, gizzard', salted (pickled) fish, kneaded fish' etc.

"Monks, when one clings to them, the volitional consciousness (*Kamma Viññāna*) which has a great force that can produce the result of rebirth in the (his) next existence-

May exist (a) either as a mental continuity, bound with delight and pleasure, taking in mind the forms of their whole body, such as 'chicken, pig, potato etc., (b) or as a mental continuity, bound with delight and pleasure, taking in mind the marks of their limbs, such as 'the liver, gizzard', salted (pickled) fish, kneaded fish' etc.

Page- 370

"At that (such a) time, if one were to die, then one would (might) be reborn either in hell or in animal world. Monks, seeing such as fault (sin), I taught thus (as stated above).

[Note:- carrying (one's) babies or young children and grand children is a kind of enjoyment or appreciation. This is called '*Sambhoga Rasa*', which is included here.]

(5) "Monks, it is better to pierce the body with a sharp red hot spear burning with flames. But it is ignoble (bad) to grasp and cling to tangible objects cognized by the body consciousness, (A) by taking in mind the forms of their whole body such as "This is a man, a woman, ,(my) husband, (my) wife, (my) son, (my) daughter etc". (B) by taking the marks (actions) of their limbs such as "This is the hand, the foot, the cheek, the ear etc" and also their smiling and laughing etc.

"Monks, when one clings to them, the volitional consciousness (*Kamma Viññāna*) which has a great force that can produce the result of rebirth in the (his) next existence-

May exist (a) either as a mental continuity, bound up with delight and pleasure, taking in mind the forms of their whole body, such as 'man, woman, ,(my) husband, (my) wife, (my) son, (my) daughter etc". (b) or as a mental continuity bound with delight and pleasure, taking in mind the marks (actions) of their limbs, such as 'hands and feet, and their smiling and laughing etc.

"At that (such a) time, if one were to die, then one would (might) be reborn either in hell or in animal world. Monks, seeing such a fault (sin), I taught thus (as stated above).

(6) "Monks, it is better to be falling asleep (sleeping soundly), which indeed I taught as a kind of barrenness of living beings, and as a kind of nature or a time that is fruitlessness of living beings. ['Falling asleep' is said (meant) to be continuousness arising of series of sub consciousness, without having (seeing) dreams. Those sub consciousnesses are series of consciousness that do (can) not produce any result in future. So 'sleeping soundly' is said to be a kind of barrenness, or a kind of delusion of living beings. At the time when series of sub consciousness arise in those (beings) who are not free from proclivity (dormant disposition), they (beings) are said to have proclivity of '*Moha* or *Avijjā*']

Page- 371

The (evil) thoughts that can cause one to break the united *saṅgha* (order) will not arise at the time of sleeping soundly, when only the series of sub consciousness arise (take place). Monks, seeing such a fault (sin) of living beings, I said. "It is better to be falling asleep (sleeping soundly). (Sam -2- 377- 8)

In order to escape from the cycle of misery such as the suffering of woeful states, the *Buddha* further taught us to contemplate earnestly and continuously the three characteristics of all mental and material phenomena, together with their conditionality, having acquired (taken up) those mental and material phenomena such as "1- the sixfold doors, 2- sixfold objects, 3- sixfold consciousness, 4- sixfold contacts, and 5- sixfold feelings. (For the detailed explanation, see '*Āditta pariyaya sutta*'- Sam -2-337-8)

As explained in the previous section on 'Meditation of Mental elements, *Vatthu* (Base), means 'the primary and derivative material factors; '*Aramana* (object)' means all the mental and material objects', '*Viññāna*, *Phassa*, *Vedanā*' mean 'the mental phenomena headed by each of them'.

"*Anubyañjana ggāha, nimitta. ggāha*"

Anubyañjanaggāha means "grasping at any of the limbs, such as "the eye is beautiful; the face is beautiful; the hand is beautiful; the foot is beautiful" etc, and also "the arising of mental continuity (process), bound by delight and pleasure (enjoyment) regarding any of those limbs." '*Nimitta ggāha*' means grasping at the whole body of man, woman, wife husband, son daughter, grand child etc. (thinking that) "This is man, woman, ,(my) husband, (my) wife, (my) son, (my) daughter, (my) grand child etc", and arising of series of cognitive consciousness, bound with pleasure and delight regarding (concerning) their whole body as being grasped". This twofold grasping, namely, '*Anubyañjana. ggāha* and *Nimitta ggāha*' are all obtained during the *Javana* or impulsion phases (stages) in (of) the cognitive processes. (Sam-A- 3- 50-51).

If one were to die at that time

Page- 372

The death consciousness of beings cannot (should not) be an unwholesome (evil) one. There cannot (should not) any being who dies with unwholesome consciousness. It is true. All beings actually (have to) die only with *Bhavaṅga Citta* (life-continuum). (Death - consciousness is nothing but the last *Bhavaṅga Citta* or life-continuum which is neither wholesome nor unwholesome). The *Buddha* said (taught) as stated above, in order to express the great fearful suffering of produced by) defilements.

Or, the *Buddha* taught thus, referring to the time factors. When a visible object appears on the eye- sensitivity, then the *Lobha-Citta* that is attached to that object or the *Dosa-Citta* that desires to spoil it or the *Moha-Citta* that is ignorant of it may subside into *Bhavaṅga-Citta* enjoying the taste of that object. And supposing that one dies with that (kind of) *Bhavaṅga Citta*. The dying *Javana* consciousness (near or proximate to death) arises as a *Lobha-Citta* or *Dosa-Citta* or *Moha-Citta* and subsides into *Bhavaṅga* (life-continuum) and just after that, if one is supposed to die, then one is expected to be reborn just (only) in one of the two destinies of hell and animal world. According (Referring) to such time factor, the *Buddha* taught this '*Āditta pariyāya Sutta* (Saṅ-A-3-51).

This *sutta* is an important sermon which shows that if one were supposed to die with one of the unwholesome *Javana* (impulsion) consciousness, viz, *Lobha-Citta*, *Dosa-Citta* and *Moha-Citta*, one can surely be reborn in one of the four woeful existences. The *Buddha* admonished us

thus, fore-seeing well, with his Omniscient wisdom, a great misery to be suffered in hell for many hundred thousands years.

Lobha of Rev. Kokālika

While the **Buddha** was at one time residing at the **Jetavana** monastery in the city of **Sāvatthi**, Rev **Kokālika** approached the **Buddha**.

Page- 373

The reason is thus:- This Rev.**Kokālika** was the son of the Millionair **Kokālika** in the city of **Kokālika** in the **Kokālika** country. After having entered the **Buddha sāvana** and been ordained, he was staying, by the name of junior **Kokālika**, in the monastery constructed and donated by his father. He was not a chief disciple of Rev. Devad**Attā**, who was named **Mahā**. (Senior) **Kokālika** of Brahman family.

While the **Buddha** was sojourning in the city of **Sāvatthi**, the **Buddha**'s two chief Disciples, named Rev. **Sariputta** and Rev. **Mahā Moggallāna**, was going on a religious tour, being accompanied by their five hundred disciples. When rainy season (Lent) came near, they wanted to live a secluded life endowed with three kinds of seclusion, namely, 1- **Kāya viveka**- bodily seclusion, 2- **Citta. Viveka**= leading solitary life, mental seclusion, entering the **Jhāna** attainments, and 3- **Upadhi viveka** = entering the **Arahāṭṭa** Fruition attainment, taking as object **Nibbāna** free from fourfold **Upadhi**.

And so, having sent back their follower monks, they took up their bowls and robes, and went to the monastery situated in that town named '**Kokālika**', where Rev. Junior **Kokālika** was residing.

When the two chief disciples arrived at that monastery, they were given services by Rev. **Kokālika**. They exchanged pleasing and delightful words with that Rev. **Kokālika**. And then they said:-

"Rev. **Kokālika**, we both wanted to stay here for rainy season (lent of three months). Please do not tell anybody about us (that we are **Buddha**'s chief disciples.)"

Having his (the other's) promise, they spent the rainy season there.

Having done the 'invitation ceremony' at the end of the rainy retreat, they said to Rev. **Kokālika**, "We are going back". Then Rev. **Kokālika** requested them to stay for one day more and go back on the following day. And next day he entered early into the town and said to the lay people:-

"Lay people you do not know that the two chief disciples have stayed here for the rainy season, and even one of you has not invited them with fourfold requisites".

Page- 374

And the lay people replied:- "Where are the two chief disciples", Why do (did) you not tell us about them?

The Reverend said. "What is the use of telling (explaining) you the reason? Don't you see the two reverends sitting on the throne of senior reverends? They are the two chief disciples".

Then the lay people quickly assembled and brought there the butter, molasses etc and pieces of cloth etc to be sewed robes.

The thought of Rev. **Kokālika**:- "The chief disciples have great contentment (are very contented), desiring little or nothing. They do not enjoy any gains by urging (impelling) the people that they want to give the four requisites. If they do not want those requisites, they will tell the people to give them to the resident monk."

And then he brought those gifts (requisites) to the chief disciples.

['*Payutta Vācā*']- means 'the words that urge or persuade (give hints to) the people who are not one's relatives and who have not invited beforehand (in advance) with four requisites, (so) that they (people) want to give the requisites. These requisites obtained by such means (by urging with such persuading any words) are not fit to be used by all fivefolds disciples.]

The chief disciples, too, know that these requisites are obtained by means of '*Payutta Vācā*' and that they are not fit to be used by themselves and by Rev. *Kokālika* as well. And so, not telling the people to give those requisites to *Kokālika*, they departed without receiving them.

Then Rev. *Kokālika* was disappointed thinking "If the chief disciples do not accept the requisites (by) themselves why (for what reason) do they depart not giving them to me?" and so he bore a grudge against them.

Page- 375

The two chief disciples, too, went to the *Buddha*; and then, next time they went on a religious tour in the countryside, taking follower monks, and gradually they arrived again at that town '*Kokālika*', in the country (district) called '*Kokālika*'. This time the citizens recognized well the two chief disciples, and having gathered the gifts (requisites) in the pavilion they constructed, they gave a great donation to them. On seeing a great donation to the chief disciples and their follower monks, Rev. *Kokālika* thought thus again, "These chief disciples were formerly content, but now they have evil will, being afflicted by greed. Formerly they seemed to live (and behave) like those who desired little, were content or contented (had contentment) and wanted seclusion. Now these monks have evil will (intention) and disclose the virtues that they don't really have in them".

Not stopping at this stage, that Rev. *Kokālika* approached the two chief disciples and said:- "Your reverends, you seemed to be like those who desired little, were contented and wanted seclusion. But now you are really (indeed) evil monks!" So saying he took his bowl and robes, and instantly he departed in a hurry, towards, the city of *Sāvatthi*, thinking (intending):- I will report this matter to the *Buddha*". Gradually he arrived at the place where the *Buddha* was residing.

He approached and paid respect to the *Buddha*, and, sitting at a suitable place, he said thus:- "Blessed one, Rev. *Sāriputta* and Rev. *Moggallāna* have evil desire (will) and follow the course of evil desire".

Then the *Buddha* replied:- " *Kokālika*, don't say so. *Kokālika*, don't say so. *Sāriputta* and *Sāriputta* love (esteem) morality. Appease (laden) your mental attitude towards them".

Second time Rev. *Kokālika* said so as before and third time he did so as before. The *Buddha* also prevented him as before not to say so for three times.

Page- 375

[Note:- The *Buddha* reflected with His (omniscient) wisdom upon the attitude of Rev. *Kokālika* who approached himself and instantly know well:- "*Kokālika* came here wishing to rebuke and offend the chief disciples". Then the *Buddha* considered:- "Can I prevent (stop) him?" and know: "No, I cannot (prevent him)". Moreover, he knows also:- "When (If) he offended the chief disciples, he would surely be reborn in *Paduma* hell, at (after) his death". So the *Buddha* prevented Rev. *Kokālika* for three times, in order to be free from being blamed (censured) by others:- :Why did not the *Buddha* prevent him (*Kokālika*) not to do so, when he himself heard his words rebuking even the chief disciples" and also in order to disclose the grave consequences of evil or sin done to (to censure) the *Ariyās*.]

Then Rev. *Kokālika* departed, after getting up and paying respect to the *Buddha*. Soon after his departure, there appeared (arose) the blotches as big as mustard seed everywhere on his whole body.

Then the blotches gradually developed from the size of mustard seed to that of green bean-seed, from that size to that of chick pea-seed, from that size to that of juju besed, from that size to

that of myrobalan-seed, from that size to that of small (tender) bael fruit, and from that size to that of big bael fruit.

Those blotches as big as the as the big bael fruit outburst, and pus and blood oozed (flowed) out. Then Rev **Kokālika** died due to that disease; after death he was reborn in the hell named '**Paduma**' due to the sin that he offended Rev. **Sāriputta** and Rev. **Moggallāna**. (Sam-1-152); Sam. A-1-198- 9; **Suttanipāta**- A- I- 194-5).

"One who is born has (already) a big dagger in his mouth. With that dagger the fool cuts off himself, speaking ill of others.

"The fool praises the blame worthy one and blames the praise worthy one, accumulates the sin with his mouth and cannot attain happiness due to that sin.

Page- 377

"The loss of his body and all his wealth in gambling (playing dice) is very little (negligible), but it is verily weighty (severe) sin that one offends (transgresses) the noble **Ariyās** who, having practiced the Eightfold noble path, attain to **Nibbāna** well, and who have reached the highest stage of the **Buddha**'s, the Private **Buddha**'s and the **Buddha**'s **Ariyā** disciples. Who are therefore called '**Sugata**' (who rightly tread on the path to **Nibbāna**). (Sam- t-154; **Suttanipāta**- A-1-197-8).

Rev. **Kokālika**, due to the sin that offended the two chief disciples, suffered pitifully in **Avici** hell, for full years equal to the life span in the **Paduma** hell. In this case, the root-cause is the attachment (**Tanhā, Lobha**) to the fourfold requisites. That '**Tanhā, Lobha**' at the stage of latent disposition (**Anusaya**) rises up to the (second) stage of outburst (**Pariyutthāna**), and being unable to overcome that **Lobha**, which reaches the (third) stage of transgression (**vitikkama**), that is, bearing (personal) grudge accompanied by hatred (**Dosa**). That immoral (unwholesome) **Kamma** leads Rev. **Kokālika** to **Avici** hell. The mind (attitude) associated with **Lobha** (craving) is really so powerful.

You virtuous man has also a big dagger in your mouth at the time of your birth. You should take care of that dagger that it would not cut off yourself.

Memoir of Rev. **Kokālika**'s Past existence

Rev. **Kokālika** was ruined, due to his (daggerlike) mouth, not only in this present life, but also in his past life.

A man who would-be Rev. **Kokālika** was a tortoise in a life in the **Himālayas**. The two young swans usually resorted to that lake became close friends of that tortoise. One day the two young swans said to the tortoise: - "Friend, there is a delightful place in the golden cave on the side of the '**Citta Kuta**' mountain in the **Himālayas**. Will you come with us?"

When the tortoise asked (them) "Friends, how shall I go there with you?" the swans replied: - "If you should control (restrain) your mouth, we could take you there". The tortoise having promised them, "I will restrain my mouth," requested them to take him there. Saying "Yes, the two swans told the tortoise to take hold of the middle (part) of a stick and they, taking hold of both its ends each, flew up in the sky. The speed of their flying was very swift. When the young villagers saw them in this manner, they shouted-" The two swans are carrying a tortoise with a stick". The tortoise also wanted to reply (or replied) "It is not your concern with my friends carrying me", but as the speed of their flight was very swift, the tortoise, to reply to them, happened to release the stick which he took hold of, when they arrived above the palace of king of **Benares**. He dropped down on the ground and was broken into pieces. (**Dhammapada**-A-2-363).

The virtuous men should bear in mind that immoral dispositions (altitudes) fostered (cherished) (by one) in one existence follow (one in) the next existences.

Lobha of Rev. **Upananda**, a **Sākyan** monk

Page- 378

Rev. *Upananda*, a *Sākyan* monk, possessed of good personality, was a good preacher. Concerning him, the rules laid down (by the *Buddha*) were many. The rule 'not to accept (receive) gold and silver (money)' was laid down concerning Rev. *Upananda* who accepted them. And the rules 'to spend the rainy season in one monastery, (but) not in the two monasteries' were laid down concerning him, and so on.

At one time, Rev *Upananda* resided in a forest monastery. He taught some sermons regarding the virtues of monks who use the four requisites frugally and who have little desire and contentment etc. Hearing his sermons, many monks each honored him with threefold robes and took the vow to practice the austere practices. Rev. *Upananda* took all of those requisites abandoned by those who practiced the austerity. Moreover, when the rainy season was near, he went to the countryside. Then the monks and novices who resided in a monastery were fond of him (*Upananda*) as a good preacher and requested him to spend the rainy season in their monastery. Being asked by him, "How many robes for the rains do you receive in this monastery?" the (resident) monks replied, "Each monk receives a pair of robes", and then he left his slippers there and went on to another monastery. There, in that second monastery, he left his walking stick, when getting the information that the monks each received two pairs of robes and went on to another monastery. There, in that third monastery, he left his drinking bottle, when getting the information that the monks each received three pairs of robes, and went on to another monastery. There, in that fourth monastery, he got the information that the monks each received the four pairs of robes, and so he decided to spend the rainy season in that fourth monastery, delivering various sermons to both laymen and monks. He was honored by them with many robes. At the end of the rainy season, he sent the messages to the monasteries where he left his slippers, walking stick and drinking bottle, telling the monks living there to send him the robes that he should get as his share, and then he went (departed) in a cart, being filled up with those robes.

Page- 379

At that time, when he passed by a monastery situated on his way and his foot was entangled with a creeper, he thought (interpreted) that it was a sign of good luck and so he entered into the monastery. There, the two monks spending the rainy season, received the two pairs of rough cotton robes and one pair of velvet robes and were disputing being unable to divide them among themselves. On seeing Rev. *Upananda*, they requested him to divide the robes among themselves. Being repeated requested by them, he asked them, "Will you accept my word of decision?" When they said, 'yes', then Rev. *Upananda* gave them each one pair of cotton robes and he took the velvet robe which, he said, was fit to be worn by a good preacher like himself. Being displeased with his decision, the two young monks went to the *Buddha* and reported the matter to him. Then the *Buddha* replied, "This *Upananda* did thus to you not only now but also in the past, and retold them the following past story.

In one existence in the past, there were two otters-one who resorted to the river side and another who resorted to the deep water in the river Ganges. They two got a big fish together and could not divide it among themselves. They two were indeed the two would- be young monks who were disputing over the robes which they got.

The would be Rev. *Upananda* was then a fox who resorted to the bank of river Ganges was wandering to search for a fish as his wife named '*Māyāvi*' had a longing to eat fish.

[You who are reading this story may perhaps have a mistress who is urging you to get an ear-ring of diamond for her and therefore have to search for it.]

That fox, when going out to search for fish along the way, got his leg entangled with a creeper and thought (interpreted) that it was a sign of good luck which would bring him something. When going down the bank of river Ganges, he met with the two otters, who requested him to

divide the fish among themselves. Being requested repeatedly by them, he asked them, "Will you accept my word of decision?" When they replied, 'Yes, then the fox cut the fish into three pieces (parts) and took the middle part of it as a share right of the judge, giving away the other two parts (the head and the tail) to them each, and ran away. The two otters stood being disappointed, looking at the fox.

Page- 380

The two young monks, as the otters in their past existences, had disputed with regard to dividing a fish among themselves, and also now disputed with regard to dividing the velvet robe among themselves. And Rev. **Upananda** had exploited as a fox in his past life in the case of fish of the two latter's, and also as a senior monk in his present life, in the case of velvet robe of the two young monks. He, though being a sākyan monk who happened to meet with the **Buddha**, should search (strive) for noble truth, but instead he strove just to get the four requisites, being contented with his life as a good preacher, and therefore he was censured as (being) a wanton monk who was too greedy for the requisites. By those dispositions of his, he was made (kept) far away from the noble truth, and he missed the noble truth, though he happened to meet with **Buddha Sāsana**.

After narrating this past story, the **Buddha** said to the two young monks. Thus this **Upananda** had made you unhappy in his past existence as well". Then the **Buddha**, wishing to reproach **Upananda**, said "Monks, he who wants to exhort others should first well establish himself in **Dhamma** (Truth)". He then said again in verse:- "A wise man should well establish himself first in the **Dhamma** (good virtue), and then only should exhort others, and should not defile himself with defilements (impurities)". (**Dhammapada** -158 **Dhammapada**- tnra- II 88-90).

He who exhorts others without establishing himself in the **Dhamma** is sure to be blamed by others and his mind is also defiled. On the other hand, he who has first established himself in the **Dhamma** and then exhorts others is later to be praised. Therefore his mind is not defiled. By doing thus, the wise man may not be defiled with defilements. (**Dhammapada**- A- 2-90)

The lady *Ciñcamānavikā*

A lady named '*Ciñcamānavikā*', pretending to be pregnant, falsely accused the **Buddha** (with her pregnancy). Such evil dispositions arose in her due to the force (power) of the latent (evil) dispositions that existed latently in her since her past existences.

As described in the '*Cūlapaduma Jātaka*' story, a lady who was the would-be *ciñcamāna* secretly enjoyed the sexual intercourse with a man whose things were cut off and later she cunningly pushed her (legitimate) husband known as prince **Mahāpaduma** down from the top of the mountain. (*Cūlapaduma Jātaka*-A-5-105 -110).

Page- 381

Susumāra Jātaka - Once upon a time, the would-be **Buddha** (Bodhisat) in one of his existences was born as a monkey in the **Himālayas**. He when grown up had a big and splendid body, and was as strong as an elephant. He lived in the bend of a river. At that time there lived in that very place the two crocodiles, husband and wife who were the would-be Rev. **Devadatta** and the would-be *ciñcamānavika*. Then the wife crocodile told her husband that she had a peculiar longing that she wanted to eat a monkey's heart and that she would die unless she ate (had) it. Then her husband soothed her by giving promise that he would try to get it by all means. So saying, he went to the Bodhisat monkey who was resting (staying) near the bank of river Ganges after drinking water.

And he said, "Friend monkey, why do you resort to the usual pasture here, eating (only) bananas? On the other side of river Ganges there are plenty of sweet and delicious fruits, big and

small such as the mango, jack- fruit and so on. Shouldn't you go to the other side of river Ganges to eat such like fruits?"

The monkey replied "Crocodile, the river Ganges has much and deep water, the surface of which is very wide. How can I go to its other shore?" The crocodile said, "If you want to go there, I will take you there, putting you on my back". The Bodhisat, believing him, said 'Yes'. 'If so,' the crocodile said, 'come and get on my back " and the monkey did accordingly. Then the crocodile went a little far away and drowned the monkey in the water.

Then, the bodhisat asked "Friend, you have suffocated me in the water. What is the reason (cause) of doing thus?" The crocodile replied, "Monkey, I did not carry you in good intention. Indeed my wife has a longing to eat your heart. I want her to eat your heart. That is why I carried you".

The Bodhisat said "Friend crocodile, you have done what is right and good by saying thus. If the heart were in my womb, it would be broken into pieces when (while) I was running on the tops of trees." When the crocodile asked. "Where do you place your heart," the Bodhisat said; pointing to a fig-tree full of flowers and fruits that are seen nearby "Look at that fig- tree, on the top of which I hang my heart."

The crocodile said; "Monkey, if you give me your heart, I will not kill you". The Bodhisat replied: "If so, take me to that fig-tree. I will give you my heart which I hang on it (its top)."

Page- 382

Then the crocodile carried the Bodhisat to that fig- tree. The Bodhisat jumped from the crocodile's back and ran onto the fig-tree (*Jataka*-A-2-145-6).

In this story, the lady *ciñcamāna* (now) was then the she-crocodile who had a longing to eat the heart of Bodhisat. The ill- dispositions to harm the Bodhisat have ever been latently in *ciñcamāna* throughout the cycle of existences, but not '*Alobha*' (non- greed) in her towards the Bodhisat.

"The strong '*Lobha*' cannot defeat the weak '*Alobha*'. Being unable to control (restrain) that '*Lobha*', *Ciñcamāna* has been reborn in hell till now".

Lobha' of the Nun Thullanandā

Just as many monastic rules were (have been) laid down concerning Rev. *Upananda*, even so there were many monastic rules laid down concerning the nun *Thullanandā*. The rule '*Lasuna sikkhāpada*', was one of those many rules laid down concerning the greediness of the nun *Thullanandā*.

While the *Buddha* was once, residing in *Jetavana* monastery in *Sāvatti*, a certain lay man invited the nuns to accept the garlic, saying "I will give you the garlic as much as you want." Then he told (ordered) his field-watcher; "When the nuns come here, give two or three packets of garlic to each of them.

Once there was a festival in *Savatti*. All the garlic that were brought from that lay man's field were sold out. Then the nuns came to that lay man and told him that they wanted the garlic. That layman too told them that there were no garlic left, and so asked them to go to the field (farm) and have the garlic.

The nun *Thullananda* went to the field and let the field watcher fetch (bring) plenty of garlic unlimited. The field watcher and other people rebuked and reproached her, That news reached the ear of the *Buddha*. The *Buddha* then censured the nun *Thullanandā* and narrated her past story.

Page- 383

"Monks, the nun *Thullanandā* was in the past the wife of a certain *Brāhman*. She gave birth to three daughters named '*Nandā*, *Nandavati* and *Sundarinandā*. Monks, the *Brāhman*

father, after death, was reborn in a certain kind of swan, whose feathers were golden (made of gold). That swan gave daily one gold feather to his wife and daughters who belonged to him in his past human life. Monks, the wife who was then *Thullanandā* was not content (unsatisfied) that the swan gave her only one gold-feather each day, and so, taking hold of the swan (coming next time), she plucked all his feathers off. All that swan's feather, when grew up again, became white, (and the swan never came there again).

"Monks, the nun *Thullanandā*, in that past existence of hers too, had lost all gold, being too much greedy. And now too she has lost all garlic.

"One should be content with what one has obtained. A very, greedy one is indeed evil. The woman who taking hold of the swan, plucked out all his feathers and so lost all gold. (Yi-2- 339-40)

The force of thirst for taste

While the *Buddha* was residing in *Veluvana* monastery in the city of *Rājagaha*, the only son named *Tissa* of a rich man (millionaire) had a great desire to be (become) a monk, when he went to the *Buddha* and listened his sermon. Though he asked his parents to permit him to be a monk, but he failed; and so he went on a hunger-strike for seven days like the young man *Ratthapāla* and then he got their permission.

He took ordination under (in the presence of) the *Buddha*. The *Buddha* having ordained him a monk, stayed in the *Veluvana* monastery for two weeks and then proceeded to the *Jetavana* monastery (in *Sāvatthi*). The monk *Tissa* strictly observed the thirteen kinds of austerity (known as *Dhutaṅga*) and spent his time, going round for alms-food from house to house successively in *Sāvatthi*. So he came to be known (called) as 'Rev. *Cūla pindappātika Tissa*'.

At that time, when there occurred a merry-making festival in *Rājagaha*, the parents of Rev. *Cūla pinda pātika Tissa* placed on their bosom a jeweled tray in which are all put the jeweled ornaments which their son were in his laity-life and took part in the other such like merry-making festivals . They cried out saying "Our son put on these jeweled ornaments and took part in the merry-making festivals like this. The monk *Gotama* took our only son away and went to *Sāvatthi*. Where did our son stay now? and so on.

Page- 384

Then a beautiful prostitute went to their house, and asked the rich woman the reason (causes) of her crying. (weeping). When she learnt everything about her weeping, she said to that rich woman, "If you give me all property in your house, I will bring your son to you".

The rich woman, too saying 'Yes', gave the prostitute enough money and provision, and sent her (being) accompanied by many retainers to her son, saying, "go to my son and bring him back to me by means of your tactful persuasion".

That prostitute, sitting in a covered carriage, went to *Sāvatthi* and bought a house by (near) the road where Rev. *Cūla.pindapātika.tissa* used to go for alms-food. The retainers given her by the rich woman, being kept to stay out of that Reverend's sight, she stayed together with her own retainers and started to persuade the Reverend with a taste of very delicious food served to him.

(Rev. *Tissa* too who had not taken such delicious food for long, could not help going for alms to that road and so went there daily.) Gradually persuading the Reverend from a standing - monk to a sitting-monk, she invited him into the house and served him with delicious meat, Rev. *Tissa* himself, being bound (tied) with the 'lust for food,' accepted her invitation and acted accordingly. That lady also, knowing his attitude ready to comply with her desire (will), pretended to be ill and slept (was sleeping) in her bed room.

Rev. *Tissa*, after going round for alms-food from house to house successively, arrived at the door of her house. Her female servants took the Rev's bowl and let him sit inside the house. The

reverend too, not seeing his lay-woman, asked: "Where is the lay woman?". The female servants (house maids) replied: "She is ill, and wants to see you."

Page- 385

That *Cūla.pindapātika.tissa*, being bound (tied) with the 'lust for taste' broke the 'vow of austerity' (*Dhutaṅga*) and went alone into her bed-room. That lay-woman, telling him the cause of coming here, persuaded him with all her artifices (guiles), and the Reverend, being bound (tied) with the 'lust for taste', was inclining to turn to lay-man. Latent craving (lust) hidden in him began to burst out. Then that lay-woman, after letting him disrobe, and sit in the carriage together with her, took (brought) him back to *Rājagaha*, being accompanied by a number of retainers. *Tissa*, the monk also followed after the prostitute in (under) the guise of a rich lady. That news spread among the circle of monks. Then the *Buddha* said "Monks, this monk followed after that lady, being *Attā*ched to taste, not only in this life, but also in his past existence," and then narrated his past story.

The honey-besmeared grass

In one past existence there was a (royal) gardener named '*Sañjaya*' at the time of king of *Benares*. At that time, a kind of deer called '*Migavāta*' as he could run as swiftly as air came to that royal garden and (but) ran away when he saw '*Sañjaya*', the royal gardener. That deer frequently resorted to that royal garden. The royal gardener too daily presented various flowers and fruits to the king. Then one day the king asked that gardener: - "Gardener, have you seen anything strange in the garden?" The gardener replied: "Your majesty, I have seen nothing strange but a kind of deer called '*Vātamiga*' (rare to be seen) which frequently came and resorted to the royal garden. When the king asked, "Can you catch that deer?" the gardener replied, "If I get some honey, I can

“namo tassabhagavato arahato sammāsambudhassa”

U MYINT SWE (M.A London)

bring (take) him to the palace,” the king gave the gardener honey as much as he wished. *Saṇḍjaya* took honey to the garden and besmeared with honey, the grass on the place where that deer resorted to, but hiding himself in one place and watching the deer which came to the place. When the deer, *Vātamiga* came there and ate the honey-besmeared grass, he being attached to that taste did not go to any other place but resorted to that royal garden. When the gardener knew that the deer was too much attached to the taste of the honey-besmeared grass, he showed himself to that deer. When the deer saw the gardener and ran away for two or three days. But when he frequently saw the gardener, he did not go away and gradually became friendly with the gardener. The deer then began to eat the grass placed on the gardener’s palm.

When the gardener knew well the deer’s friendliness with him, he made a passages way covered (fenced) on both sides, with the mat, made of bamboo up to the palace and scattered the branches along the way. Then he scattered the honey-besmeared grass here and there in front of that deer and thereby took the deer towards the palace. As soon as the deer, *Vātamiga* arrived at (entered) the palace, the door was closed. When the deer saw the people, he was running here and there in the royal courtyard. When the King of Benares descended from the palace and saw the deer running about in fright, he remarked as follows:-

Page 386 “the deer *Vātamiga* does (will) not come, for seven days, to a place where he sees a human being even once, and does (will) never come to a place where he runs away in fear (fright). The deer *Vātamiga* of such nature which used to stay in the big forest only, being tied (bound) with lust for taste, has now come to the royal courtyard of such kind. Friends, there is indeed no evil thing (state) worse than ‘lust for taste’. After saying so he (the king) said again in verse as follows:-

“*sambhoga.rasa*” which is attachment to living ever together with one’s (husband), wife, son, daughter etc. is evil. Hundred, thousand and hundred-thousand times worse (more evil) than that *sambhoga-rasa*’ is the enjoyment (taking) of food with lust for taste without intending (just) to maintain one’s life-faculty (vital life) called ‘*Jvitindriya*’. Though *Vātamiga*, a kind of deer used to stay in the big forest, he, being tied (bound) with ‘lust for taste’, has fallen into the hands of the gardener ‘*Saṇḍjaya*’. There is no evil thing (state) worse than the enjoyment (taking) of manifold taste with lust (attachment). Having said so, he (the king) let the gardener send the deer ‘*Vātamiga*’ back to the forest.

In this story, the prostitute named ‘*Vanna.dāsī*’ was at that time the gardener ‘*Saṇḍjaya*’ and the deer ‘*Vātamiga*’ the Rev. *Cūla.pṇḍa.pātika.tissa*’. (*Jātaka*-A-1-172-5).

You virtuous man, too, might perhaps have taken (eaten) the honey-besmeared grass. You should take religious emotion (fear)’ that one cannot separate oneself from the honey-besmeared grass due to lust for taste.

Due to this very lust for taste, people drink various intoxicating drinks (liquors). Depending on this very lust for taste, people commit various evil (immoral) deeds. Due to those evil deeds, they are (have to be) reborn in hell. Therefore, the Bodhisat, King of Benares told (us) how evil the lust for taste was, in the above-stated story.

The four rich sons (or sons of rich men), well-known as ‘*Du-Sa-Na-So*’ are now still having to suffer in the hell called ‘*Lohakumbī*’ as they were too much addicted to sensual pleasures, drifting in the flood of sensual enjoyment.

Rev- *Cūla.pṇḍa.pātika.tissa*’described above, however, was (like) a log drifting in the river Ganges which is the eightfold Noble practice flowing towards the ocean of *Nibbāna*, as described according to the *Dārukkhandhopama sutta*’. As it happens to

reach (come to) thither shore and is taken away (by somebody), the log does not arrive at the great ocean of *Nibbāna*. One should be mindful of the power of the ‘honey-besmeared grass’.

Page.387 cannot fall into hell, if supported by merit

Though there is lustful attachment between each other, that attachment if supported (helped) by merit, becomes too weak to make one fall into hell. For example, though a stone thrown into water is drowned, it is not drowned if it is put in the boat and carried by it. Therefore, many persons who have lustful attachment between one another are found in the *Jātaka* stories to become close friends who fulfill their perfections for *Nibbāna*. To take an example of the ascetic named *Sumedha* and the lady *Sumittā*.

***Sumedha* the ascetic**

Four *Asaṅkhyeya* and one lakh (hundred-thousand) aeons ago, there was a wise man named *Sumedha* who went up his palace and thought thus sitting cross-legged:—

“O wise man, rebirth in a new existence is suffering (painful). Likewise, suffering is the repeated death in those existences in which one is reborn. I am reborn now in this existence being subject to old age, disease and death. Being thus subject to the danger of rebirth, old age, disease and death, I should strive to search for *Nibbāna*, free from rebirth, old age, disease, (death) and other sufferings and where there is peaceful bliss, Indeed there must be a good (right) way to *Nibbāna*, an escape from (painful) existences.

To take for an instance – a man sinking down in the pit of excrement, if he sees at a distance a pond covered with multi-coloured lotuses, should seek a way to that pond. Not seeking the way to that pond is that man’s fault, not of that pond. In the same way there is evidently a pond which is deathless *Nibbāna* in which all filth of defilements is washed out, but if the way to that pond (*Nibbāna*) is not sought, it is not the fault of that pond (*Nibbāna*).

To take another example – a man surrounded by the robbers, if he does not run away even though there is a way out (exit) - not running away is the fault of that man, but not of the way. In the same manner, a man surrounded and arrested by the defilements, if he does not seek the way to peaceful *Nibbāna* free from defilements even though there is a way to it – not seeking the way to *Nibbāna* is the fault of that man, but not of the way to *Nibbāna*.

Page 388 To take another example – a man afflicted by disease, if he does not seek (go to) a physician who can cure that disease – not going to that physician and not letting that disease to be cured, is the fault of that man (patient), but not of that physician. In the same way a man afflicted by the disease of defilements, if he does not seek (go to) a teacher who can cure that disease of defilements – not seeking (going to) that wise teacher, is the fault of that man, but not of that wise teacher.

To take another example: - A man well-adorned with beautiful flowers, if he could give up (abandon) a corpse hung around his neck, would experience happiness. In the same manner, I too should give up (abandon) my putrid body which is actually a corpse without clinging to it, and enter into the golden city of *Nibbāna* (an eternal and peaceful state).

To take another example: - People, men and women, after discharging their excrement and urine, go back home without clinging to them. In the same way, I too should give up (abandon) my putrid body which is actually a corpse and enter into the golden city of *Nibbāna* which is deathless state.

To take another example: - the chief boatman (captains) naturally give up their old and useless boats and go their own way. In the same way, I too should give up my body similar to the old and useless boat, as it is discharging loathsome things through its nine apertures and enter into the golden city of *Nibbāna*.

To take another example: - A man who, carrying various jewels (gems), happens to go together with the robbers, being afraid of losing his jewels, gives up (abandons) those robbers and goes his own safe way. In the same way, my putrid body is like a robber who steals (robs of) jewels, and if I am attached to my body similar to a robber, the jewels of *dhmma* which is true path to *Nibbāna* will disappear (be lost) in me. So I should give up (abandon) this my putrid body similar to a robber and enter into the golden city of *Nibbāna*.

Thinking of the true nature of renunciation thus with various similes, the ascetic *Sumedha* abandoned his unlimited wealth at home and gave charity generously. Having abandoned all objective and subjective lust, he left the city of *Amarāvati* and lived alone

page 389 in a thatched hut together with a passage for walking on the mountain named ‘*Dhammika*’. He was engaged in meditation-work and attained the eightfold *Jhānas* (absorptions and fivefold mundane psychic powers. (*Jātaka*.A.1.3-7)

One day while placing himself like a bridge in the mud and laying himself flat on the way on which the Buddha *Dīpaṅkara* and his four hundred-thousand disciples will come walking, the ascetic *Sumedha* opened his eyes and saw the splendours of the Buddha *Dīpaṅkara*. Then he thought thus: -

“If I wished, I could enter the city of *Rammā* as an ordinary disciple of the Buddha *Dīpaṅkara*, after having eradicated all defilements. I should not attain to (enter) *Nibbāna* as an ordinary monk (disciple) after having eradicated the defilements. Like the Buddha *Dīpaṅkara* possessed of the ten fold strengths (powers) and ten fold wisdoms, it would be good for me, if I would enter *Nibbāna*, after having attained the knowledge of omniscience, the perfect (noblest) wisdom and save all the people from the ocean of sufferings by teaching them the wheel of *Dhamma*. It would be good for me to endeavour for attaining the noblest “Omniscience”. (*Jātaka* -tha-1-1-17)

In the above-stated thought of the ascetic *Sumedha*, there is the perfect wholesome desire (wish). Being urged by that wholesome desire, he aspired to attain the omniscient wisdom. The Buddha *Dīpaṅkara* too predicted (assured) that he (the ascetic) would become the Buddha named *Gotama* after the four *Asaṅkhyeyas* and one hundred-thousand aeons.

Behind these noble desires and perfections to be fulfilled for the four *Asaṅkhyeyas* and one hundred –thousand aeons, after receiving the prediction (assured by the Buddha *Dīpaṅkara*), there is craving for the existence, accompanied by ignorance (*Avijjā*), in which he would attained the Omniscient wisdom. That craving has the power (force) to fulfill the perfections for the attainment of the Omniscient wisdom, but it is not craving powerful enough to throw him into the woeful existences.

The craving of the lady *Sumittā*

The lady *Sumittā* too stretched out prostate and aspired to help the ascetic *Sumedha* in fulfilling the perfections for the attainment of Omniscient wisdom. The craving (lust) for the existence as *Sumedha*’s wife existed in her, who was the would-be nun (*Therī*) named *Yasodharā*, but that craving (lust) was not strong enough to throw her page 390 into the woeful states (nether worlds). On the contrary, it (lust) was a cause of the wholesome desires to help him (*Sumedha*) fulfills the perfections for the attainment of Omniscient wisdom.

In the '*Therī-apadāna*' concerning the nun *Yasodharā*, however, it is stated that her aspiration to be the wife of *Sumedha* did not begin just at the time of the Buddha *Dīpaṅkara*, but she aspired so even at the times of the previous countless Buddhas. To help him (*Sumedha*) for his attainment of Omniscient wisdom, she made sacrifices in her past existences as described in the following:-

1. she sacrificed her life to save others;
2. she extracted her eyes and gave them to others;
3. she sacrificed (abandoned) her limbs to save others;
4. she gave away her children to others;
5. she gave up her life as a wife of others, just to comply with the wish of the Bodhisat *Sumedha*, but not at her will;
6. she gave away her possessions, animate and inanimate, to others;
7. she fulfilled the perfections such as morality, renunciation and so on.

Therefore, the ignorance (*Avijjā*), craving (*Tanhā*) and clinging (*upādāna*) that urged (encouraged) her life were the main causes that caused wholesome (moral) acts to arise. They were just the main causes that let fulfil the perfections for the Bodhisat *Sumedha*'s attainment of the Omniscient wisdom. Therefore if you, virtuous man, can consider the Buddha as your father, then you should consider the nun, *Yasodharā* as your mother as well. Many were her services to the Bodhisat for his attainment of Omniscient wisdom she was a heroine who could do fearlessly and bravely the works that could not be done by ordinary ladies.

Likewise, the noble persons also such as Rev. *Sāriputta*, Rev. *Mahāmoggalāna*, Rev. *Mahākassapa*, Rev. *Anuruddha*, Rev. *Ānanda*, Rev. *Rāhula*, the nun *Khemā*, the nun *Uppalavannā* etc., took part and helped the Bodhisat in his fulfilling the perfections. They desired to have (attain) such kind of existence in which they could help the Bodhisat in his fulfilling the perfections. But this kind of craving for existence was merely the root-cause to attain the enlightenments of the chief disciple, great disciple and ordinary disciple and also the main cause of the perfections which were the wholesome deeds, ordinary and extra-ordinary.

Page 391 The would-be Rev. *Mahākassapa* and would-be *Bhaddā*, too, fulfilled the perfections together for the hundred-thousand aeons from the time of the Buddha *Padumuttara* up to the time of *Gotama*. Of them, the former fulfilled the perfections hoping to attain the enlightenment of the great disciple who was honoured by the Buddha as a best (foremost) disciple in practicing all the 13 kinds of austerity, and the latter too fulfilled the perfections together with the former to attain the enlightenment that had great force to save one (her) from the sufferings of repeated existences. Though they were attached to their existences, yet that attachment was subordinate to the wholesome desire. Because of the forces of the wholesome desire and perfections, the forces that could not abandon (separate from) each other and that could renounce the sensual objects, animate and inanimate, dwelt in them. In their final existence their mutual attachment (love) ceased.

The young man *Pippali*, the would-be *Mahākassapa*, was very handsome and wealthy. The lady *Bhaddā* too, possessed of physical radiance that illuminated the room of twelve cubits was very pretty and wealthy. Though they became husband and wife due to the arrangement of their parents and lived together in the same house, they did not look at each other with attachment even once.

One day they gave away all their possessions, animate and inanimate, and agreed to renounce the world with reference to the Buddha. On the way, when they came to the cross-road, they agreed to take separate roads, the right road being taken by *Pippali* and the left one by *Bhaddā*. But they had no mutual attachment and mental agitation

(emotion). This earth shook greatly, though being able to carry (hold) the Mount Meru, but unable to hold their virtues. (Am-A-1-141).

The above mentioned virtuous people were possessed of the seven qualities of the virtuous. It was their wholesome wish (desire) that they purposely aspired to have in order to ever live together. They were virtuous people who fulfilled the perfections that helped them to attain the enlightenment which they aimed.

“The virtuous one can attain everything he wishes, as their aspiration (wholesome desire) being purified.” (Am-3-71).

Therefore, though they might have mutual love that bound them together, they had equal wholesome wish of great force that helped them to abandon (renounce)

page 392 everything, and so they became inseparable companions (partners) according to their wish just to fulfill the perfections.

Nakula.pitā and Nakula.mātā

At the time of the Buddha (*Gotama*), there live at the town of *Susumāra* in the *Bhagga* district the two stream winners, a well-known rich man named *Nakula.pitā* and his wife named *Nakula.mātā*. They both lived together for many existences in the past, as the Bodhisat’s parents, grand-parents and uncles and aunts, and so they loved the Buddha as their own son as soon as they saw him and was so familiar with him that they used to tell him whatever they wished.

So one day they told him thus: - “Reverend sir, I took the young *Nakula* in marriage since our young age, and since then, I did not remember that I even mentally committed adultery with others except (beyond) *Nakula.mātā*, and so needed to say about the physical transgression. Reverend sir, we both wanted to see each other not only in this life but in future as well.” (Am-1-372. Am-A-1-308).

This was what *Nakula.pitā* said. Hearing his word, *Nakula.mātā* also told the Buddha with emulation as she thought; -

“Reverend Sir, *Nakula-Pitā* took me in marriage since our young age. Since then I did not remember that I even mentally committed whore with others except (beyond) *Nakula-pitā*, and so needless to say about the physical transgression. Reverend Sir, we both wanted to see each other, not only in this life but in the future as well”.

Then the Buddha replied thus:-

Page. 393

"House-holders (House-lords), if the husband and wife want to see each other not only in this life but also in the future life, they should have equal faith, equal morality, equal charity (generosity) and equal insight knowledge (or path-and-fruit knowledge). If they are possessed of these virtues, they will (surely) see each other both in this life and in the next life."

The wife, like her husband, should (must) have good faith and good morality. If one wants to give (charity) one should not be prevented by the other. If the wife wants to give (charity), her husband should (must) agree; and if the husband gives (charity), his wife should (must) be joyful (cheerful). They both should (must) have equal knowledge-equal insight, path and Fruition knowledges. The same statement is given in the "Poem called *Pañcāvudha*," . . .

Think of the mutual love cherished by the couples, the stream-winners, described in this story. As they had equal love among (between) each other, they never thought of committing the sexual intercourse with others except themselves. As they had so good morality and noble mind, they wanted to see each other throughout their past existences, having mutual love and esteem. In wishing (desiring) to see each other, their mutual

attachment which is noble desire based on love will tie them together, and all their noble deeds done by them, such as, charity, morality, calm and insight meditations (developments) will surely take (carry, convey, lead) them to happy existences, up to the attainment of Arahatsip.

"But just as excrement, even though little (negligible), is verily disgusting, even so every existence, even a single, is verily disgusting and so I do not admire it, (Ami- I- 36)"- such a knowledge is also given by the Buddha. For every existence is verily subject to all kinds of suffering such as birth (old age), disease, death, sorrow, lamentation, pain (suffering), and displeasure.

The Power of the Relation of Determination dependence Upanissaya Paccaya

Demerit (unwholesome state) is related to merit (wholesome state) by way of sufficing condition.

Page- 394

Pakatapanissaya:-

Depending on **Rāga** (lust), one gives charity, takes moral precepts, observes fast (sabbath), develops (brings about) **Jhānas**, insight and path knowledges; one develops (brings about) intellects (psychic powers) and meditative attainments. That **Rāga** is related, by way of Natural Decisive condition, to Faith (confidence), morality, knowledge (analytical knowledges of mind and matter, and of their conditions or causes), liberality, knowledges (of insight meditation, Path) intellects and **Jhānas** or meditative attainments.

Likewise, aspiration, of which Ultimate reality is **Rāga**, too, is related, by way of efficiency of relation of determination dependence, to faith, morality, learning, liberality (generosity) and knowledge. (*Patthāna*- 1-149).

Depending on **Rāga** being attached to the abodes of existence, objects and beings, one acquires (accumulates) very high morals such as charity, morality, sabbath (fast), **Jhāna**, insight, path, intellect and meditative attainments. When those moral states are obtained, then **Rāga** is related to each of those moral states by way of efficiency of relation of determination dependence. One should understand and take the examples of those above mentioned noble men, such as the would-be Buddha, would-be chief disciples, would-be great disciples, and would-be ordinary disciples.

The Bodhisat **Sumedha** aspired to have an existence in which the Omniscient wisdom is attained. The lady **Sumittā**, however, was attached to an existence in which she could help him (Bodhisat) in his fulfilling the perfections for the attainment of Omniscient wisdom. The would-be **Rev. Sāritta** for the attainment of the Buddha's right chief discipleship, the would-be **Rev. Mahā. moggallāna** for the attainment of the Buddha's left chief discipleship, the would be **Rev. Ānanda** for the attainment of the Buddha's personal attendantship, the would-be **Rev. Rāhula** for the attainment of the Buddha's sonship, **Rāga** arising in each of these noble men is related to (or causes) the wholesome states that lead to this and that enlightenment by way of efficiency of relation of determination dependence (*Upanissaya paccaya*). It is a kind of **Rāga** that causes the perfect wholesome states.

Translator's Note

[page 394 to 408 are left out because it is detailed explanation on Mora Sutta through numerous verses in Myanmar.]

Page- 408

The above-stated noble persons who were destined to enlightenment were associated with each other by the four causes, namely, 'faith, morality, generosity (liberality) and knowledge and could fulfill the perfections unitedly (unseparably) throughout the cycle of existences. And you noble persons, too, who are not yet united by these four causes, namely, 'faith, morality, generosity (liberality) and knowledge' if you want to live unseparably throughout the cycle of existences should read one of the following past stories:-

The Story of (king) Assaka

Now-a-days some men who lead spiritual (holy) life temporarily (not for life) are persuaded (tempted) to disrobe (to turn to manhood) by their ex-wives. Similarly, at the time of the Buddha, too, a monk was persuaded to disrobe by his ex-wife, and so this story of (king) *Assaka* was narrated by the Buddha as the following:-

In the past there was a king named Assaka who reigned at the city of Patali in *Kāsi* Division. King Assaka had a lovely, pretty and graceful queen named '*Upari*'. She was nearly as beautiful as a goddess. One day she died.

Due to her death King *Assaka* was greatly afflicted by sorrow, and suffered a lot, physically and mentally. He was lying down, weeping without taking any food, under the bedstead (cot), on which there lay a coffin in which the queen's corpse was put and some oil **page 409** was poured.

His mother, father, relatives, friends and so on and soothed him, saying:- "Great King, don't worry, and don't be sorrowful, because all conditioned things are impermanent and subject to change, arising and disappearing," and so on and so forth. But they failed, and the king was still lying down being sorrow-afflicted for seven days.

After the lapse of seven days the Bodhisat ascetic living in the Himālayas who attained the five mundane psychic powers and eight meditative attainments (absorptions) developed the radiant light arising due to the power of Divine-eye; and with this divine-eye, he looked at the whole *Jambudipa* (India) and saw that king *Assaka* weeping thus. Then he thought:- "I should be a refuge for that king *Assaka*," and then he went up the sky with his psychic power, and after descending on the auspicious stone slab in the royal garden, was sitting like a golden statue.

Then he met with a *Brāhman* youth, through whom he sent a message (to king *Assaka*):- "I know Queen *Upari*'s present life where she is reborn, and I will let her speak in the presence of King *Assaka*".

After hearing that news, King *Assaka*, hoping that he will meet with Queen *Upari*, went joyfully and hurriedly to the ascetic living in the royal garden.

The ascetic then said thus:- "Great king, that Queen *Upari*, being very proud of her beauty, failed to do (accumulate) the reliable good deeds, through negligence and so was reborn as a she-coprophi (dung-worm) in this very royal garden".

In order to make king Assaka believe, the ascetic made a resolution by his psychic power thus:- "Let the male and female (husband and wife) coprophagi break their heap of cow-dungs and come to his presence". Then he made another resolution that caused the she-coprophi to talk (reply) in human language:

Ascetic:- "Upari!"

She-coprophi:- "Sir, what shall I do?"

Ascetic:- "What were you in your past life?"

She-coprophi:- "I was the chief Queen, *Upari* by name, of King *Assaka*".

Page- 410

Ascetic:- "Now whom do you love, king *Assaka* or male-coprophi?"

She-coprophagi:- "Sir, it is right that King *Assaka* was my husband in the previous human life, in which I wandered about, together with king *Assaka*, in this royal garden enjoying the five-fold sensual pleasures, namely, visible form, sound, odour (smell), taste and tangible object. But now, since the time when I am reborn in a different and new existence, that King *Assaka* is of no use for me. Therefore, I now want to kill King *Assaka*, and wash the feet of my present and new husband, the male-coprophagi, with the blood of that king *Assaka's* throat".

This is what the female coprophagi said to the ascetic in the presence of King *Assaka* and the audience, and her reply was the heart-breaking words for King *Assaka*, love-sick and sorrow afflicted, longing and weeping for his late Queen. Furthermore, the female-coprophagi, not being satisfied with that much, said again thus:-

"Sir, this delightful royal garden was an old garden where I wandered about together with King *Assaka* in the past existence in which I was a human being, and an old place where we both wandered about, being unsatisfied in(with)loving each other.

"But now, sir, if I were to speak truth (frankly), past happiness is covered (hidden)by newly arising happiness, and the past misery by newly arising misery. Finding (Meeting with) a new mate, I forget an old one. Forgetting an old one when meeting with a new one is the true nature of the whole world (of all beings). Therefore I love my male coprophagi much more (hundred or thousand times more) than King *Assaka*.

Page- 411

This is the true word of the female coprophagi who spoke in human language to the Bodhisat ascetic in the presence of audience. At the time when King *Assaka*, sorrow-afflicted, was weeping, his late queen, Upari, now reborn as a female coprophagi spoke openly that she wanted to wash the feet of her new mate, the male-coprophagi, with the blood of King *Assaka's* throat. This was a heart-breaking scene.

The Buddha, after giving this admonition, went on to teach the discourse connected with the four noble truths, at the end of which the monk who wanted to disrobe himself, being persuaded by his ex-wife attained to stream-winnership.

In this *Jātaka* story the monk who became a stream-winner, was in the past king *Assaka* who was wailing for his late Queen '*Upari*', and the ex-wife who persuaded the monk to disrobe was in the past the late Queen *Upari*, who was reborn as a female-coprophagi and wanted to wash the feet of her male-coprophagi with the blood of king *Assaka's* throat. (Jā.-A-2- 142-144).

You virtuous man who is reborn as a human being, hard to be obtained, and who is ordained as monk-hood, hard to be obtained in this *Buddha-sāsana*, hard to be met with, should not forget the true nature of the whole world, in which beings live joyfully as this husband and this wife in this life and live as that husband and that wife in another(past) existence, but it is hard to attain all of the four good conditions, namely, faith (confidence), morality, generosity and wisdom.

Living together in the past life

The Story of the would-be Arahat named *Baddā-Kundala- Kesā Theri* too was full of remorseful events. The lady was the only daughter of the rich parents whose wealth amounted to forty crores (four hundred millions). One day, a thief or robber (criminal) sentenced to death was being carried to the cemetery to be killed, passing by the *Bhaddā's* house. As soon as *Bhaddā* saw that thief, she was sleeping throwing herself down on her bed, saying:- "I would die if I could not get (marry) this thief." Her parents, having bribed the mayor, secured that thief to whom their daughter was married and led them both live on the top floor of the seven storied house.

Bhaddā laid down flat on bed because she could not help winning and marrying that thief. Why did such intense lust arise in her? It was due to their living together in their previous lives. **Bhaddā** was the 'most sharp-witted' among the lady Arahats who attained the Arahatship.

Page- 412

Even in those noble ones who would become Arahats, this lust could give them a great trouble before their attainment of Arahatship in their present existences. (Therī gāthā 391-392 Am-A-1-283-288).

To attain 'the most sharp-witted' title, **Bhaddā** fulfilled perfections for the hundred- thousand aeons, from the time of the Buddha **Padumuttara** up to the time of the Buddha Gotama. This powerful lust could afflict even such a noble lady in her last existence to attain Arahatship so (severely) that she fell on her belly in bed weeping. So you noble one should think (consider) whether it is right or not to keep (maintain) such powerful lust (craving) in you. That lust can do more pain to you than to a noble one like **Bhaddā**. That craving could make the lady **Patācārī** mad before her attainment of Arahatship and of the title 'the best of the **vinaya-dhara** nuns.' "Be careful not to drink salty water whenever you are thirsty."

Māyā and Sātheya

Pali Quotation (Mahāti-1-84)

Māyā has the characteristic to conceal one's apparent fault, where as **sātheya** has the characteristic to praise (exalt) the virtues not existing in oneself. They both are verily **Tanhā** or **lobha** (craving, lust) as an ultimate reality.

Māyā is like a conjurer. Just as the conjurer can take a stone and turn it into gold, even so this **Māyā** conceals one's apparent fault in order to delude (deceive) others. One with **Māyā** pretends not to have any fault though he has it really, and such a one is called hypocrite by the people in the world. The **Ariyās** such as the Buddha etc. like to make their own fault manifest and confess it for cure.

Women's artifices:- In the past there was a pupil of the professor in **Taxila**. His wife committed whore with another man. In that day of her adultery she treated her husband more kindly than before, but in other days she treated her husband badly as a slave. Not knowing her strange behaviours, that pupil confused in mind told his teacher all about her; and the teacher who knew well women's true nature and character told his pupil about his wife's moral corruption.

The woman in this story pretended to treat her husband more kindly (tenderly) in the day of her adultery, in order to hide her guilt; and that pretending is indeed this woman's artifice, which is in some cases called '**Tankhanuppatti. ñāna**' (ready-wit) but actually is the woman's artifice or hypocrisy.

Ascetic's artifice:- There is an artifice (hypocrisy) not only in women but in men as well. In the past, there was an ascetic- teacher in a village, worshipped (attended, served) by a layman. Due to the danger of thieves or robbers, that layman buried (a pot of) the hundred gold pieces (coins) near that ascetic's hermitage, requesting the latter, "Sir, please take care of that gold." Then the ascetic replied, "Layman, you should not request the ascetics thus. We should not have any attachment to other's property."

Then ascetic thought thus, "I can live well as a householder with these hundred gold coins," and buried them in another place. Next day after taking breakfast in that layman's house, the ascetic said, "Layman, it is quite long since I have lived (here) depending on you. Living too long (together) conduces to (mutual) attachment. So I will go to another place." Failing to request repeatedly him not to go away, the layman sent him off up to the gate of the village.

Page- 414

Then the ascetic, after going away to some distance, returned and said, "Layman, a thatch from the roof of your house got hanged (stuck) in my braided-hair. An ascetic should not take even a grass (straw, thatch) not given by the owners (others)." The honest (silly) layman also respected him much, thinking, "My ascetic teacher has high morality".

But at that time, there was in his house an intellegent guest who was a Bodhisat, who reminded the house-holder, "Friend, what did you deposit in your ascetic-teacher? If you deposited something in him, go and see whether it is there or not." When they both went there and found that there was no gold, they hurriedly followed the ascetic and caught him with gold coins. (*Jātaka*- A- 1- 398-399 *Kuhaka Jātaka*).

In this story, it is the ascetic's artifice that he returns a thatch (to his lay disciple) being afraid of discovering his gold theft. Thus, this kind of artifice prevails even in the ascetics and monks, and therefore there is nobody to trust (confide) in this world (mankind) full of countless artifices or cunning tricks. For this reason, to get a chance to associate with honest and virtuous men will be possible only if one attains (receives) the help of one's merit done in the past.

Sātheyya (craft, treachery):- '**Sātheyya**' means a kind of greed (lust)that one pretends to have or boasts of having good virtues not existing (arising) in oneself, in order to be praised (or highly thought of) by others." '**Māyā**' conceals one's faults and pretends to be faultless, whereas **sātheyya** pretends to have good virtues not existing (arising) in oneself. Both of them are craft and cunning. Pretending to have morality without it (morality) to have concentration without it (concentration), to have knowledge without it (knowledge), to have good character without it, and to have good learning without it-all of these pretences are only a kind of **Sātheyya**.

In the world too, pretending to have morality concentration and knowledge without (having) them, to have university degree without (having) it, to be wealthy without wealth, to wear (put on) jewels hired (borrowed) from others to be highly thought of by others, and to have courage (ability) without having it, and son on ... all of such pretences are also a kind of **Sātheyya**.

Page- 415

The Story of *Bilāravata*

While sojourning in the *Jevana* monastery, the Buddha narrated this story of *Bilāravata*, with reference to a monk who created a marvel in the minds of (his) lay men and laywomen, by pretending to have threefold training, viz, morality, concentration and knowledge (wisdom) without having them in him.

In the past, the would-be-Buddha (Bodhisat) who was born as a rat (mouse); when he was grown up and his body became very big, he looked like a small pig. He lived in the forest, wandering about accompanied by many mice.

One day, a fox, while wandering about here and there, saw a group of mice and thought thus:-" I will deceive and eat up these mice." So in a place not far away from those mice's place, he was standing on one leg of his, facing the sun and drinking air.

When the Bodhisat mouse saw that fox, while wandering about here and there in search of food, he thought, "This fox would be a virtuous one". Believing in him thus, he approached that fox and asked him, "What is your name?" The fox replied, "My name is *Dhammika*, the Virtuous." When the Bodhisat asked, "Why are you standing on one leg of yours, not on four instead?", the fox replied, "If I put down my four legs, the earth will not be able to bear me and so I (have to) stand on one leg of mine."

When the Bodhisat asked, "Why do you stand opening your mouth?", the fox replied, "I eat just air, not any other food".

When the Bodhisat asked, "Why do you stand facing the sun?", the fox replied, "I am worshipping the sun".

Hearing the fox's words, the Bodhisat thought, "This fox will be a virtuous one," and so, since that day he together with his mouses attended on that fox.

Then, when the mouses attended on the fox and returned, the fox caught and ate the last of them. Thereafter he stood as before. As a result, the mouses gradually became less and less. Then the mouses thought thus, "In the past the mouses were so many that our place was not enough for all of us. But now they become less and less, and our residence is not full (filled). What is the reason?"

Page- 416

The Bodhisat, too, being informed by them, suspected the fox by pondering and decided to inquire the nature of that fox. When he went to approach the fox, he let the mouses follow (after) him, and when returning, he followed (after) them. Then the fox ran after the Bodhisat to pounce (attack) upon the latter, and the Bodhisat saw the fox running after him, he turned back and said:-

"Fox, you took (observed) the religious vow, not to practise the good austerity, but to harm (injure) others, flying the *Dhamma's* flag, and so you are a hypocrite of cunning nature." (Jātaka-A-1-486).

That fox in the past time (existence) was verily the deceitful monk (*Kuhaka-Bhikkhu*) in this present life, who pretended to have 'morality, concentration and knowledge' without having them and behaved like that to be highly thought of him by laymen and laywomen. It should be noted (borne in mind) that evil disposition fostered in one's mind will latently exist in him throughout his future (successive) existences till it is uprooted.

These '*Māyā* and *Sātheyya*' (artifice and craft) are worse than ordinary greed (*Lobha*). It is the greatest evil, as it deceives the whole world, like the heretical teachers (*Tiṭṭhi*) who claim to be Buddhas though they are actually not and thereby they deceive others. It is such a great evil that it commonly arises in most of the people; and so those who want to be wise and virtuous should be careful not to let it arise in them and try to be honest and upright men (ones).

Page- 417

6. *Ditthi* = *Micchā. ditthi*

1. '*Micchā. ditthi*' means 'wrong view' that sees (knows) wrongly.
2. Or, it means 'false view' that grasps something falsely.
3. Or, it means 'disgusting view,' (for the wise) as it brings about unbenefit (unbeneficial result).
4. Or, it means 'wrong or false seeing, as it lets its associated states see wrongly (falsely) the objects of ultimate realities. Or, it is 'wrong or false seeing' as it itself sees wrongly (falsely) the objects of ultimate realities. Or it is just wrong notion that sees wrongly the objects of ultimate realities.

'The wrong notion that sees wrongly the objects of ultimate realities,' means 'wrongly seeing the ultimate realities as '*nicca* (permanence), *sukha* (pleasure), *atta* (soul) and *subha* (pleasantness, beauty), which are actually '*anicca* (impermanence) *dukkha* (suffering), *anattā* (soullessness), *asubha* (unpleasantness).

1. Its characteristic is wrong (improper) attention to the objects of ultimate realities as '*nicca, sukha, attā* and *subha*'.
2. Its function is wrong thinking (perceiving, reviewing) them as '*nicca, sukha, attā* and *subha*'.
3. It appears to the yogi's mind (knowledge) that wrong view (*micchā. ditthi*) is wrongly firm thinking (reviewing) them as '*nicca, sukha, attā* and *subha*'.
4. Its proximate cause is not wishing to see the noble (Ariyā) persons as the Buddha etc.

Page- 418

Lakkhana, Rasa, Paccupatthāna

1. The five aggregates that are impermanent as permanence,
2. The five aggregates that are suffering as pleasure,
3. The five aggregates that are soulless as soul.
4. The five aggregates that are unpleasant as pleasantness-

Such a wrong (improper) attention is its (***Micchā. ditthi's***) characteristic. Such a wrong thinking (perceiving, reviewing) is its function. It appears to the yogi's mind (knowledge) who meditates on this mental concomitant (***Micchā-ditthi***, that wrong view (***Micchā-ditthi***) is a phenomenon produced by repeatedly reviewing them (aggregates) thus.

Patthāna:- If one frequently sees the noble (***Ariyā***) persons, such as the Buddha etc. who have realized the four noble truths and also the virtuous worldlings, learned and well-versed in the true ***Dhammas*** (doctrines) expounded by the noble (***Ariyā***) persons such as the Buddha etc. then one can, by frequently hearing their true doctrines, attain (acquire) the right view (knowledge) which is the understanding of the good and bad deeds and their corresponding results. Depending on this right view (knowledge) of cause and effect (***Kammassakatā-sammāditthi***), when one progressively goes on to practice the 'calm and insight developments (***samatha-vissanā.bhāvanā***), one will, according to the quality of his perfections, attain (acquire) the manifold higher right views (knowledges) concerning the ***Jhāna***, Insight, Path and Fruition. These right views or knowledges will gradually (step by step) rise in him.

Unwilling to see such noble persons and keeping away from them is the proximate (nearest) cause of having the wrong view, but not the right view. If one whose right view is not firm frequently associates with those of wrong view, one is more likely to receive the wrong views.

To attain (acquire) the right view (understanding) of the four noble truths, that penetrates rightly the four noble truths, listening to (hearing) the true doctrines concerning the four noble truths from the noble (***Ariya***) persons such as the Buddha etc. is the main (indispensable) cause of many causes. And listening to the true doctrines from the noble persons, too, is possible only when one gets an opportunity (a chance) to see and associate with such noble persons. Otherwise one will not attain (acquire) such a right view (understanding). As long as one does not attain (acquire) such a right view (understanding), so long the door of wrong view will ever be open to him.

Page- 419

This wrong view (***Ditthi***) not only knows what is real (really is) as unreal and what is unreal (really is not) real, but also accuses (censures) others, saying "Only my view (belief) is right and that of others is wrong".

Herein the misunderstanding that there is a creator of this world and these beings, though there is actually not such a person (creator), and that there is a soul in the bodies of beings, though there is actually not such a thing (soul). This misunderstanding is the wrong view that knows what is unreal (really is not) as real.

And the (manifold) misunderstandings that there are no good and bad deeds done by oneself, of which the potency (force) to produce their corresponding results still remains (unaffected, undestroyed) till one attains to complete ***parinibbāna***, though there are actually good and bad deeds; that there are no results of good and bad deeds, though they are actually experienced (by the people); that there is no ***Nibbāna*** in which all the mental and material things completely cease, though it really exists; that there is no more (next) existence in which one must inevitably be reborn until one attains to ***Nibbāna***,

though it really exists; and that there is only the present existence between birth and death, but no life (existence) after death. This (kind of) misunderstanding is the wrong view that knows what is real (really exists) as unreal.

Killing the beings and sacrificing them to the gods is a great merit; bathing in the very cold time; and sitting broiling oneself between the four fires in the very hot noon-time (which is called '*pañca-tapa*', the five-fold heat); and living like an ox and a dog- these practices as such are good practices, causes of purifying oneself of defilements. And bathing in the Ganges at an auspicious time is a good practice to be purified of (or to wash away) the bad deeds done by oneself. This misunderstanding is the wrong view that knows what is not true as true.

The misunderstanding that doing good deeds such as donation, morality, calm and insight meditations etc. and practicing the Noble Eightfold Path are not good practices that lead to the happy states and to *Nibbāna* is actually a wrong view that knows what is true as untrue. Such misunderstandings are included in the manifold wrong views.

Not accepting that in the world there are noble persons who have attained to Arhatship and Buddhahood by practising the Noble Eightfold Path that leads to *Nibbāna* and who know well, by their insight wisdom, of this present life and the next life is also included in this wrong view (*Micchā dīṭhi*).

The unfailing practice

Here, let me talk about the education system expounded by the Buddha at this opportune moment:- At once time, the Buddha, going on a journey accompanied by many monks in the kingdom of *Kosala*, arrived in a village of Brahmins, called '*Sāla*'. This village was situated by the high way in the middle of *Kosala* and at the entrance of a big forest.

Page- 420

It was a centre to be visited by many religious teachers known as *Samana* and *Brāhmaṇa* who have different beliefs. The inhabitants of this village were familiar with various philosophical doctrines of that time (day) taught by almost all the philosophers who arrived in that village. The Buddha arrived there as a last one of those philosophers.

The Buddha said to the inhabitants of that '*Sāla*' village who came to Him:-

"Laymen, do you have an admirable, good (religious) teacher who is worthy of taking refuge with firm (strong), confidence?" When the laymen replied that they did not have anyone of such kind, the Buddha said:-

"Laymen, you who do not have an admirable teacher, should follow and practice the unfailing path or *Dhamma*, called '*Apānnaka. dhamma*'. This unfailing (*APānnaka*) *dhamma* will bring about your happiness and prosperity throughout the rounds of rebirth (*samsāra*). Laymen, what is this *Apānnaka- dhamma*?

- (I) Laymen, there are those recluses and *Brāhmaṇs* who believe and used to say, that
1. There is no (good) result (effect) of donation,
 2. There is no (good) result of great donation and generosity,
 3. There is no result of small donation, such as present-giving etc.
 4. There are no (corresponding) results of the tenfold good deeds and of the tenfold bad deeds,
 5. There is no present life that comes from the past life,
 6. There is no future life after death,
 7. There are no results, good and bad, of deeds, good and bad, done to one's mother.

8. There are no results, good and bad, of deeds, good and bad, done to one's father.
9. There are no beings who are reborn after death.
10. There are no recluses and **Brāhmans** (**Arhats and Buddhas**) who realize this world and next world by their insight (special) wisdom and who well practice the right path leading to **Ariyā** path (and Fruition) and **Nibbāna**.

Page- 421

- (II.) Laymen, there are those recluses and **Brahmans** who believe and used to say that,
1. There is a (good) result (effect) of donation,
 2. There is a (good) result of great donation and generosity,
 3. There is a (good) result of small donation, such as present-giving etc.
 4. There are (corresponding) results of the tenfold good deeds and of the tenfold bad deeds,
 5. There is a present life that comes from the past life,
 6. There is a future life after death,
 7. There are results, good and bad, of deeds good and bad, done to one's mother,
 8. There are results, good and bad, of deeds good and bad, done to one's father,
 9. There are beings who are reborn after death,
 10. There are recluses and **Brāhmans** (**Arahats and Buddhas**) who realize this world and next world by their insight (special) wisdom and who who practise the right path leading to **Nibbāna**.

"Laymen, don't you think, "These recluses and **Brāhman** have contradictory beliefs among themselves?"- thus the Buddha , asked.

The laymen replied, " Yes, they have, Blessed one".

(I) Laymen, of those two who have contradictory beliefs, those recluses and Brahmanas who used to say that there is no (good) result of donation, etc. (and who profess the nihilistic view) will certainly reject the threefold good deeds,- Physical, verbal and mental, and practise the threefold evil deeds- physical, verbal and mental. Why? Because they do not know the bad result of evil deeds and the good result of good deeds either.

Page - 422

The view of one who deduces that there is no next existence, though really (evidently) there is, is a wrong view. A thought of one who thinks that there is no next existence, though really (evidently) there is, is a wrong thought. The word of one who speaks (says) that there is no next existence, though really (evidently) there is, is a wrong word. He who says that there is no next existence, though really (evidently) there is, is said to directly contradict the **Arahats** who realize the next existence (by their divine eye). He who lets (makes) others know that there is no next existence, though really (evidently) there is, is said to let(make) others know wrong teaching, and thereby he admires himself and reproaches (abuses, blames) others. Thus, such a person (who is a nihilist) is said to abandon a good (true) law and to nourish a bad (wrong) law.

"Thus, many evil, unwholesome things (laws) such as, 1- this wrong view, 2- this wrong thought, 3- this wrong word, 4- this contradiction to the **Arahats**, 5- letting others know the evil, unwholesome things (laws), 6-praising oneself, and 7- blaming others, arise in such a heretic (nihilist), due to his wrong view.

(I) Laymen, of these two views (right and wrong), a wise man thinks thus, "If there were no next existence, then this man (of 'nihilistic' wrong view) would exert himself to enjoy happiness in this present life (having no thought of next life).

"Or, if there were the next existence, then this man (of 'nihilistic' wrong view) would be reborn in (fall into) the hell devoid of even little happiness after his death.

"Whether there were the next existence or not as expounded by those recluses **brahmins**, this man has 'nihilistic' wrong view and is devoid of morality at all"- Knowing thus, the wise and noble men such as the **Buddhas** etc. will blame (censure) him.

Page- 423

"If there is next life, this man (of 'nihilistic' wrong view) 1- will be blamed (censured) by the wise and noble man such as the **Buddhas** etc. And 2- He will be reborn in (fall into) the hell, devoid of total happiness, after his death.

Thus, this man (of nihilistic' wrong view) will incur (meet with) the losses both in this life and in the next; in him there exists fixed this unquestionably wrong and unbeneficial 'nihilistic' view, (called '**apannaka. dhamma**'); and in him, on the contrary, there exists no a realistic view, called '**Atthika**' which is right view of other recluses and **Brahmins**, and he is totally devoid of morality (or wholesome states).

III "Laymen, of these two views (right and wrong), there are in this world some other recluses and **Brahmins** who have right view that 1- there is verily a good result (effect) of donation given ... 10- and there are really recluses and Brahmins (**Arahats** and **Buddhas**) who realize both this world and the next by their insight (special) wisdom and who well practise the right path leading to **Ariyā** Path (and Fruition) and **Nibbāna**.

These recluses and **Brahmins** who believe and speak thus, will verily avoid three fold evil deeds- physical, verbal and mental and observe (practise) threefold good deeds- physical, verbal and mental. Why? Because they know (realize) that there is great sin and meanness in those evil deeds and there is good result (effect) of good deeds, escaping from the evil deeds. Again, the view that there is verily next existence is right view. And he thinks that there is verily next existence and so his thought is right thought; and he speaks that there is verily next existence and so his speech is right.

page- 424

He who speaks that there is verily next existence does not contradict the Arahats who realize the next existence. He who makes others know that there is verily next existence is said to make others know the good (noble) doctrine. He does neither exalt himself nor censure others by making others know the true doctrine. Thus he is said to have eliminated the evil character and to have good character.

1. **Sammā. ditthi** = right view,
2. **Sammā. sankappa** = right thought,
3. **Sammā. Vācā** = right speech,
4. Not contradicting the **Ariyās**,
5. Letting (others) know the truth,
6. Not exalting himself,
7. Not censuring others,

These and other moral (wholesome) states arise in him, because of his right view.

"Laymen, of those two views, a wise man reflects thus:-"If there were the next existence, then this man would attain to the world of gods, the destiny of good-doers, after his death.

"Although there were not the next existence, this man is, even in this life admired by the wise and virtuous persons such as the Buddha etc. saying, "This man has good morality, right view, right faith in the cause and effect, and is the one who has the realistic view or rightly believes in the next existence."

"If there were the next existence, then this man wins these two benefits, viz; '1- being admired, even in this life, by the noble men such as the Buddha etc.; and 2- attaining to the world of gods, the destiny of good-doers, after his death"

Page- 425

Thus, he is admired by the wise in this life and also attains to the world of gods after his death. Thus, he wins these two unfailing and unquestionable (*Apannaka*) benefits, and avoids the evil deeds. (M. 2- 62-66).

To win the two benefits

The realistic view, headed by right view, (accepting the cause and effect), is the *Buddha's* own doctrine, and the nihilistic view, headed by wrong view, rejecting the cause and effect, is that of others or heretics. If there were the next existence, then the realistic view would bring about happiness, as it causes one to practice morality in advance. (Or) If there were not next existence, then the realistic view would bring about happiness, as it causes one (of right view) to be admired by wise and to live happily, due to his good morality. This is the right practice (path) that brings about the unfailing and unquestionable (*Apannaka*) both in this life and in the next: Thus the *Buddha* taught the laymen and laywomen to practice such kind of right practice. The same (method) is applied to the other (remaining) wrong views. (M. A. 3-82)

One who has the fixed wrong view

1. *Natthika. ditthi* rejects the effects (results) of *kamma* (cause).
2. *Akiriya. ditthi* rejects *kamma* (cause) that produces effects.
3. *Ahetuka. ditthi* rejects both *kamma* (cause) and its effects.

Of these three (wrong views), one who rejects *kamma* (cause) that there is no *kamma* (cause) also, rejects the the effects (results) produced by *kamma*, as well. One who rejects the effects (results) that there are no *kamma's* effects also, rejects *kamma* (cause) which produces the (its) effects, as well. Therefore, these three wrong views, viz. *Natthika*, *Ahetuka* and *Akiriya* are all said to reject the cause (*Kamma*) and its effects (results).

Page- 426

Those who accept one of or all of the wrong views of those religious leaders recite and reflect those wrong views, day and night, wherever they stay (dwell). Then, in them there arises the wrong mindfulness bearing in mind that 1. there is no (good) result of (small) charity, and there is no (good) result of great charity, 2. an evil-doer cannot be said to do the evil deeds, and 3. there are no direct productive cause and no supportative cause that purify or defile the (minds of) beings. And in them there arises the wrong concentration, and there arise the unwholesome *javana* consciousnesses rooted in greed and headed (accompanied) by wrong view. At the first, second ... sixth moments of this *Javana* phase, their wrong view can be cured, but at the seventh moment of *javana* phase, their wrong view cannot be cured even by the *Buddhas*. And so those such heretics are sure to fall into the woeful states, like *Arittha* monk, *Kantaka* novice and so on.

Of those three wrong views, one believes in one wrong view, one believes in two wrong views and another believes in all three wrong views; but all of them are said to be a believer in fixed wrong view (*Niyata. micchā. ditthi*). One who has 'Fixed Wrong View' cannot attain to the world of gods, nor to the Path-and-Fruition knowledges and Nibbāna, as he is prevented not to attain to them by his Fixed Wrong View. Such a being is said to be a victim of ever-lasting suffering. Such a being is sure to fall into the woeful states after his death. But such a being will repeatedly resort to his wrong view in his next

existences too, and if so, he will never get a chance to escape from falling into the woeful states.

"Therefore, a wise man who longs for his prosperity should avoid those who believe in wrong view, like a poisonous viper. (M-A-3- 85).

The Nihilist Nandaka

The king *Pingala* who reigned the country of *Surattha* had a general named *Nandaka*. King *Pingala* and General *Nandaka* were the nihilists who rejected *kamma* (cause) and its effects. They believed in the nihilistic view, thus - In each of the beings there is *Atta* or soul, which is not subject to death and ever-lasting. There is a fixed law- "when a being is to enjoy good results or to suffer bad results". After the lapse of the eight million and four lack great aeons, a being is automatically (naturally) cut off".

Page- 427

They also prevented and censured the good deeds such as charity etc. done by others.

One day General *Nandaka* died, not- giving up his fixed wrong view, Nihilism. He was reborn as a *Preta* (afflicted by great hunger and thirst). He had a daughter, named '*Uttarā*,' who, however, was a *Sotāpanna*, an *Ariyā*, devoted to the Tripple Gems. When her father, General *Nandaka* died, she (for her father's sake) invited a monk going for alms-food to her house and gave him a plateful of cakes and a cup of water.

Then she said to that monk, "Your Reverence, my father died. May this merit reach to my father."

Doing this meritorious deed thus, she gave a share of her merit to her late father. Instantly the *Preta Nandaka* enjoyed divine luxuries on a Banyan tree. But there is a Problem.

King *Pingala* of *Surattha* went to the Moriya kings, the successors of *Phammāsoka* Kings, and on his return, after giving taxes to those kings, his chariot arrived at the residence of *Preta Nandaka*, by virtue of the latter's power. *Preta Nandaka* showed his divine luxuries to king *Pingala* and served him with good meal. On being asked by King *Pingala*, *Preta Nandaka* told him in detail:- "I am not a god, but a *Preta* named *Nandaka*. Due to my nihilistic wrong view known as '*Uccheda. ditthi, or Natthika. ditthi*, I am reborn as a *Preta*. As being given a meritorious deed and a share of merit by my daughter, I have enjoyed such great divine luxuries".

"But," he continued with great. despair " I will have a chance to enjoy these divine luxuries for six months more . After then, I will be reborn in the most fierce (terrible) hell known as *Avīci*."

Furthermore, he requested King *Pingala* too, to take refuge in the Tripple Gems, to observe the five basic moral precepts and to do meritorious deeds such as charity etc. King *Pingala*, too, promised *Preta Nandaka*, "I will give up my nihilistic wrong view, take refuge in the Tripple Gems, observe the basic five moral precepts and do the meritorious deeds," and then returned home.

This is a valid example to show that if someone does not give up his fixed nihilistic wrong view till his death, he is sure to be reborn in the four woeful abodes.

Page- 428

If you virtuous man want to reject the law of cause (*Kamma*) and its effect, you are requested to decide after trying to realize yourself 'the law of relation (connectedness) of cause- and- effect, known as '*Paticca-samuppāda*'.

May you all exert yourselves to know and practise the unfailing or unquestionable Path (practice) of the virtuous, at this time when you get a rare chance to be reborn as a human and to meet with this very precious '*Buddha-Sāsana*'.

Page- 429

7. *Māna* (Pride)

Being puffed up, saying (thinking) 'I, I, I', is *Māna* = Pride.

1. Its characteristic is 'being proud (conceited) and elevated mentality.'
 2. Its function is 'to lift up its associated states'.
 3. If appears to the Yogi's mind or knowledge, 'It acts like a pinnacle, or wishing to be superior or to get upperhand'.
 4. It's proximate cause is 'craving (attachment) associated with wrong view.
- Pali Quotation (Abhi-A-1-403,404)

Page- 430

Pride is threefold basically (or) ninefold in detail:-

Concerning the (one's) 'wealth, knowledge, virtue, fame, complexion, voice, retinue and so on,

1. Thinking of oneself better (superior) than others. This is called '*Seyya.māna*'.
2. Thinking of oneself equal to others. This is called '*Sadisa.māna*'
3. Thinking of oneself inferior to others, (but needless to care others, though I am inferior to them.)
This is called '*Hina.māna*'.

Thus, *Māna*, pride is threefold (basically). Those three kinds of pride arise in three kinds of persons in the world, namely:-

1. *Seyya.puggala* = One in the superior class.
2. *Sadisa.puggala* = One in the middle class, equal to others.
3. *Hina.puggala* = One in the lower class.

In each of these three kinds of persons there arise three kinds of pride:-

Threefold Pride arising in a superior person

1. Minding (Attending to) those who are inferior to oneself, in wealth, education, rank etc., one thinks of oneself, "I am superior to you," and is proud of oneself.
2. Minding (Attending to) those who are equal to oneself thinks of oneself, "I am equal to you," and is proud of oneself.
3. Mind (Attending to) those who are superior to oneself in every respect one thinks of oneself, "I am inferior to you, but I do not care" and one is proud of oneself.

Therefold pride arising in a person equal to others:-

1. Minding (Attending to) those who are inferior to oneself, in wealth, education, rank etc., one thinks of oneself, "I am superior to (higher than) you" and is proud of oneself.
2. Minding those who are equal to oneself one thinks of oneself, "I am equal to you," and is proud of oneself.

Page- 431

3. Minding those who are superior to oneself in every respect, one thinks of oneself, "I am inferior to you, but I do not care," and one is proud of oneself.

Therefold pride arising in an inferior person:-

1. Minding those who are inferior to oneself in wealth, education, rank etc, one thinks of oneself, "I am superior to you," and is proud of oneself.
2. Minding those who are equal to oneself, one thinks of oneself, "I am equal to you," and is proud of oneself.
3. Minding those who are superior to oneself in every respect, one thinks of oneself, "I am inferior to you, but do not care," and is proud of oneself. (Abhi. 2 - 404)

Of these nine kinds of pride, the pride of superiority arising in a superior person, the pride of equality arising in a equal person, and the pride of inferiority arising in an inferior person- these three kinds of pride are real (true) ones, which can be eradicated by the *Arahatta-magga* only. The two kinds of pride each arising in one who is not equal to others are not real (true) ones, which can be eradicated even at the attainment of *Sotāpatti-magga*. (If you virtuous person think yourself to be a *Sotāpanna* or Stream Winner, examine yourself by your eye of wisdom whether the unreal (false) pride arises in you or not, and your disposition as well.) All kinds of pride have the characteristic of arrogance, haughtiness, boasting and being puffed up.-

To be superior to (better than) others in wealth, in education (knowledge), and regarding one's own sons, daughters, wife or husband, and lastly in moral status- all of these dispositions to be better than others are this pride's characteristics.

He who has the disposition of pride likes to stand on toes and stand above others, like a flag flying in the air. When he is better than others in rank, wealth, education, beauty, health etc., he thinks highly of himself and thinks nothing (little) of others, saying "You are not equal to me."

He who is proud-natured, even if he is equal to others, but not better than others, is also conceited, saying "No difference between you and me. I can do as you can".

He who is proud natured, even if he is inferior to (lower than) others in rank, wealth and so on, is also conceited though he cannot compete with others saying: "Though they are higher than me, I do not care them. I can eat if I have. I can get (money) if I work. No need to stoop before others.

Page- 432

"Pride commonly arising- pride of one's clan" means "pride arising for one's high caste (clan)". Now-a-days, there are some persons of considerably high caste (clan), but rare are those persons who are so high in (by) caste that they can stand on their toes (above others) or can place others under their feet. Even if someone is born in the really great family, he should, not being conceited, have loving-kindness (*Mettā*) and compassion in their mind and speak to others of lower class, politely, kindly, gently and sweetly, and thereby will be loved, admired and respected by those of lower class.

Buddha's Great Compassion

A man, would-be Rev. *Sunita*, seemed to be very proud, in one of his past existences, as described in *Vibhaiga-Sutta*. In his last existence, however he was born as an outcaste and lived by working as a fetcher of excrement. One day when the Buddha entered (attained to) the 'Great Compassion Attainment' and looked at the human world, saw *Sunita* in the net of Buddha's Omniscience, knew that in him there was a good seed of great merit called '*Pāramita*' (perfection).

The Buddha, accompanied by many monks went on alms-round up to the lane behind the houses where **Sunita** was fetching and saw him coming carrying a pot of excrement on his shoulder. **Sunita** too put (lay) down the pot of excrement and was standing giving respect to the Buddha. Then the Buddha called him '**Sunita**', with the voice of great compassion.

When the Buddha, peerless in the whole world called him '**Sunita**', with the voice of great compassion, **Sunita** was filled with extreme happiness, as if being poured with water of nectar (ambrosia).

Such a voice of great Compassion addressed by the peerless Buddha was an invaluable medicine for a man of lowest class (caste) in the world.

Page- 433

When the Buddha called him '**Sunita**,' the man, would-be Rev. **Sunita** replied 'Blessed One'. Then, when the Buddha asked him, "Don't you want (like) to be ordained?", **Sunita** replied, "I want to, Blessed one". Then the Buddha stretched his right hand, and said, "Come, O monk. I expounded the **Dhamma** (doctrine) good in the beginning, middle and end, (You) practise the holy practice for the Path-knowledge comprising '**Sila**, **Samādhi** and **Paññā**,' in order to make an end of sufferings of birth and death.

The word addressed thus by the Buddha is called '**Ehi Bhikkhu**'. Then **Sunita**, the excrement fetcher became a monk called '**Ehi Bhikkhu**' gracefully already endowed with the eightfold requisites and appeared to be an Elder of sixty years. The Buddha took Rev. **Sunita** to the monastery and gave him method of meditation practice. Rev. **Sunita**, too, greatly (ardently) practiced the meditation and soon became an **Arahat**. When he became an **Arahat**, the gods and **Brahmās** came together and paid homage to him. (*Theragāthā*-300).

The Buddha, peerless in the whole world, favoured an excrement-fetcher of lowest class (caste) in the human society in order to be honoured by the gods and **Brahmās**, If it is so, why don't (can't) you virtuous men deal with a man lower than (inferior to) you, speaking to him kindly and sweetly? When being looked with the eye of wisdom, all people are wandering about in the rounds of rebirth (**samsāra**) carrying their own bags of excrement.

Some rude persons give no respect to those whom they closely associated with and will lose advantages due to their rudeness. Thus, those of higher class consider rightly in every respect and should take care not to be proud of their higher class. "Pride is the cause of being born in the lower (inferior) class",- thus everyone who wishes his welfare should not forget this point (fact).

Pride of one's wealth

The pride of those who have considerable wealth is called 'pride of wealth' (**Dhana. māna**). Now-a-days there are some persons who have considerable wealth, but those who have unexhaustible wealth are rare, and they do not have so much wealth that they cannot go (walk), eat and speak with others who have less wealth than their own. Just as who has not seen a river thinks a stream to be a river, even so some persons of little wealth think themselves to be very rich, and such persons should be broad-(good)minded and have compassion on the poor persons, who, if being well dealt with, will protect their wealth. Smiling face and sweet word of the wealthy persons can be the nicest nectar for the poor persons.

Therefore, those who become rich, being helped by merit accumulated in the past, should not take (a) pride, the cause of being born in the inferior family (caste) and try to be a refuge of others.

Good fortune of a king enjoying his royal luxury, among the ministers is actually momentary like the bubbles on the water. (The minister Ananta. suriya).

The **Buddha-sāsana** (Teaching) is against the class-distinction. The kings, the **Brāhmins**, the rich men and the poor- the four classes are all the sons of the **sākiyan** Buddha, when they enter (into) the **Buddha-sāsana** and become the monks. The junior monks have to pay respect to the senior monks. The **Sākiyan** junior monks of noble race, such as Rev. **Anuruddha**, Rev. **Ānanda**, Rev. **Baddiya** etc. had to respect to Rev. **Upāli**, a master of **Vinaya. pitaka**, who was their barber. In the **Buddha-sāsana**, the perfection of '**sīla, samādhi and paññā**' is the only main factor to be a noble person. If a person, though of noble race, is morally corrupt, is considered to be (recognized as) an evil (a mean) person in the **Buddha-Sāsana**. (See **Vasala-sutta**).

Pride of one's education (Knowledge)

Only the right insight knowledge of four noble truths is recognized as **paññā** (true knowledge) in (by) the **Buddha-sāsana**. Here, '**Paññā**' does not mean 'the right insight knowledge of four noble Truths', but 'a kind of perception-knowledge, skilful in the Buddhist scriptures etc., which creates 'Pride of education. Actually, the knowledge of the Buddhist scriptures is the one which gives right knowledge to avoid what is not proper, known by the learner and to follow what is proper known by the learner. But a great false pride arising in dependence on the (one's) knowledge of Buddhist scriptures is verily a great shame. Now-a-days, many kinds of education learnt (acquired) from the others (teachers) are not extra-ordinary knowledges. They are a kind of ordinary education which can be acquired by many men lucky enough to learn from their good teachers. Such learned men, therefore, should not look down upon others who are illiterate (ignorant) and uneducated, due to their bad luck, but, instead, should educate (teach) those unlucky fellows, with good intention.

Learning the scriptures like wrongly catching a snake:-

Page- 434

There are three kinds (methods) of learning the scriptures; namely, 1. Learning the scriptures like wrongly catching a snake, 2- Learning to go out of '**Samsāra**', cycle of birth and death, 3- Learning the scriptures just to keep (maintain) them, as done by the **Arhats**.

1- Learning the scriptures like wrongly catching a snake:-

"Monks, a man who, wishing to get a poisonous snake and wandering about to search for it, saw a big snake and took (seized) it at its body and tail, was bitten by that snake, at his hand or arm, and so he might die or suffer from a fatal pain. Why, O monks? Because he badly (wrongly) took (caught) the snake.

In the same way, O monks, some foolish men in this **Buddha-sāsana**, learn (study) the Buddhist scriptures consisting of these nine parts, viz., 1- **Sutta** = **Sūtras**, 2- **Geyya** = mixed verses, 3- **Veyyākaraṇa** = pure prose, 4- **Gāthā** = pure verses, 5- **Udāna** = (Buddha's) solemn utterances, 6- **Iti-vuttaka** = Buddha's sayings, called "Thus the Buddha-said", 7- **Jātaka** = **Jātaka** verses, 8- **Abbhutadhamma** = Buddha's teaching, concerning the marvellous facts, 9- **Vedalla** = Buddha's teachings in the form of 'questions and answers', for special knowledge; but they do not reflect (examine) their true meanings by their analytical knowledge (and do not try to realize these Buddha's teachings by their reflective and penetrative knowledges).

Page- 436

Such foolish learners, void of Path-and-Fruition knowledges, learn (study) the Buddhist scriptures just to reveal the defects of others' views and to get free from the censure put forward (presented) by others. Actually the Buddhist scriptures are to be learnt (studied) to attain the Path and Fruition knowledges (by practising '*Sīla, Samādhi* and *paññā* or insight knowledge), but for those foolish learners who study the Buddhist scriptures in wrong way, their learning is futile, or rather to suffer for long. Monks, this is the evil result of their learning with wrong intention.

If they are skilful in the Buddhist scriptures and pass the (religious) examinations, they will be famous honourable, admired and get for his easy living, many donors who donate him many fine requisites, such as food, robes, building and medicine. And consequently they will be proud, think little of others and do whatever they like, not caring others, and finally their wrong learning will be for their ruin or to go downward to hell. This is a kind of wrong learning the scriptures like wrongly catching a snake.

Dhamma to be learnt is of nine kinds

I will further explain briefly the *Dhamma* to be learnt, of nine kinds for those who are weak in the *pariyatti* learning.

1- '*Sutta*'- means "all kinds of *Buddha's* teaching, contained in the five books of *vinaya pitaka* and *Sutta-nipāta*, such as '*Mangala-sutta, Ratana-sutta, Nālaka-sutta, Tuvattaka. sutta* and others, having the tittle of *Sutta*".

2- '*Geyya*' means "the discourses in verse contained in the *sutta. pitaka*, and especially the whole *Sagāthā-vagga.samyutta*, contained in the *Samyutta- nikāya*."

3- '*Veyyākaraṇa*' means "the whole *Abhidhamma-Pitaka, Suttanta* discourses without verses and all other Buddha's teachings, not counted in the other eight kinds."

Page- 437

4- '*Gāthā*' means "all the Buddha's teachings in pure verses, contained in the canonical texts such as 'the *Dhamma-pada, Thera- gāthā, Therī.gāthā, Suttanipāta*, not entitled '*Sutta*".

5- '*Udāna*' means "Buddha's solenm utterances out of joy, eighty-two in number."

6- '*Iti- vuttaka*' means "over one hundred *suttas* recorded in the Text '*Iti-vuttaka*', which contain the introductory words. "Thus said the Buddha".

7- '*Jataka*' means "the five hundred and fifty *jātakas*, known as '*Jātaka-pāli*".

8- '*Abbhuta.dhamma*' means "all the *Suttanta* discourses, arising in connection with the marvelous doctrines, which have not been before."

9- '*Vedalla*' means "all the *Suttanta* discourses, in the form of 'questions and answers', such as '*Cūla-vedalla, Mahā.vedalla, Sammā.ditthi, Sakka.pañha, Sankhāra.Bhājanīya, Mahā.punnama*' etc, which give special knowledge and great pleasure or contentment."

(2) Learning the scriptures in order to get out of samsāra:-

"Monks, a man who, wishing to get a poisonous snake and wandering about to search for it, saw a big snake, and took (seized) it, pressing it at its neck with a spear which is goat's hoof- shaped. Monks, even though the snake wound his hands, arms and any other limbs with its body, that man would not suffer (undergo) death or any fatal pain. Why, Monks? Because that man caught (seized) the snake well (rightly, properly).

"Monks, in like manner, some noble persons in this *Buddha.sāsana* learn the scriptures of nine kinds, namely, '*Sutta, Geyya, Veyyākaraṇa, Gathā, Udāna, Iti.Vuttaka, Jātaka, Abbhuta. dhamma and Vedalla*'. After learning, they realize the true

meaning of the scriptures, with their right knowledge and fulfill the three-fold holy practice, viz.

Page- 438

Sīla, Samādhī and Paññā. They do not learn the holy scriptures just to censure and destroy others' doctrines, and also just to defend their own doctrines and escape from others' censure. But rather, they learn the Holy Scriptures in order to attain Path-and-Fruition and enjoy its bliss. The holy scriptures learnt with this right attitude are for their welfare and happiness. Why, monks? Because they learn the holy scriptures well or rightly.

"Monks, if you know the true meanings of the holy doctrines expounded by me, memorise them as known by you. If you do not know the true meanings of the holy doctrines expounded me, then you should ask me, or the monks skilled in the doctrines or *Pitakas*.

"Monks, I will teach you a true doctrine, similar to a raft, which is not to be kept (taken hold of) but to be used for crossing over. Listen it well and bear (keep) it in mind," said the Buddha. The monks replied, "Yes, Sir, Blessed One". The Buddha expounded this doctrine:-

"Monks, for example a traveler saw a vast ocean. The hither shore is disgusting and dangerous. The thither shore, however, is peaceful and safe (free from danger). That man has no boat (raft), or there is no bridge either, to cross from hither shore to thither shore. Then he thought thus:-

"This is a vast ocean. The hither shore is disgusting and dangerous. But the thither shore is peaceful and safe. I have no boat (raft) or there is no bridge either, to cross from hither shore to thither shore. It will be good if I collect the grass, leaves and the branches to make a raft, by which I cross over the thither shore, using my hands and legs."

"Monks, then that man made a raft with grass, leaves and branches, and by that raft he crossed over the thither shore, using his hands and legs. Having crossed over the thither shore, that man thought thus, "This raft is useful for me. By this raft I crossed over the thither shore, using my hands and legs. It will be good if go wherever I want to, carrying it on my head or shoulders."

Page- 439

"Monks, how do you think of it? If he does so, does he do what is right, regarding the raft?" asked by the Buddha. The monks replied, "No Sir, Blessed One." "Monks, if he does in what manner regarding the raft, does he do what is right?"

"Monks, that man who crossed over the thither shore thought, "This raft is useful for me. By this raft, I crossed over the thither shore, using' my hands and legs. It will be good, if I go wherever I want to, leaving it on the land or in the water. Monks, if that man does so, he is said to do what is right (proper) regarding the raft.

"Monks, in the same way, I teach you the doctrine, similar to the raft which is just (to be used) to cross over the thither shore (*Nibbāna*), but not to be grasped at. Monks, you who know (realize) the *Dhamma* similar to the raft, should abandon even your lust attached to the *Dhamma*, of two kinds, *Samatha* and *Vipassanā* (calm and Insight meditations). So it is needless (unquestionable) to give up the lust attached to the sensual pleasure.

Even the true Dhamma should be abandoned:- Here , '*Dhamma*' means '*Samatha* and *Vipassanā* (calm and insight meditations). The Buddha taught (told) his disciples to abandon even the lust attached to the Insight knowledge and to the *Jhānas* as well. In which discourse, did he tell his disciples to abandon the lust attached to *Jhānas*?

"*Udayī*, I teach you to abandon the highest *Jhāna* too, called '*Neva-saññā-nāsaññāyatana*.' The Buddha asked "*Udayī*, do you see the fetters, great or small, taught by the *Buddha*, that should not be abandoned?" *Udayī* replied, "No, I don't, sir, Blessed One." (M-2- 119 *Latukikopama-sutta*).

Page- 440

"Monks, if you are not, by lust attached to the right view of *vipassanā* (Insight knowledge), are you said to know (realize), the *Dhamma*, similar to a raft, which just (to be used) to cross over the thither shore (*Nibbāna*), but not to be grasped at? " asked by the Buddha. The monks replied, "We are said to know, Blessed One." (M-2- 327 *Mahā. tanhā.sankhaya-sutta*).

In the above-said *Mahā. tanhā. sankhaya-sutta*', the Buddha told his disciples to abandon the lust attached to the right view of *vipassanā* (Insight knowledge). In the '*Alagaddūpana sutta*', however it is said that the *Buddha* taught (told) his disciples to abandon even the (your) lust attached to the *Dhamma* of two kinds, '*Samatha and Vipassanā*'. So it is needless (unquestionable) to give up the lust attached to the sensual pleasure.

Here, the true meaning is thus:- "Monks, I taught my disciples to abandon even the lust attached to the true *Dhamma* which is '*Samatha- Vipassanā*'. So it is needless to abandon the lust attached to sensual or sexual enjoyment, a mean (evil) act which ends in washing with water, done by the villagers or common people. This monk, *Arittha*, even said that the lust attached to the five-fold sensual pleasures could not be an obstacle to the attainments of *Jhāna*, Path-and-Fruition. The monks, like the monk 'Arittha,' being similar to the rubbish are not to be included in this *Buddha sāsaṇa*. Thus the Buddha censured the monk, '*Arittha*' by giving this admonishment. (M-A-2-15-16).

Rev. *Arittha*, who had killed a vulture, later joined the *Buddha.sāsaṇa* and became a monk. He was considerably skilled in the *suttanta*, but not in the *vinaya pīṭaka*. So, he believed that if even the house-holders, like *Visākhā, Anātha.pindika*, enjoying the sensual pleasures, can attain the Path-and-Fruition knowledges, then the monks too, enjoying the sensual pleasures can certainly attain the Path-and-Fruition knowledges if they practise the meditation works. In connection with him, the Buddha expounded the '*Alagaddūpama suttanta*'.

Page- 441

Of the three ways of learning the sacred (Buddhist) scriptures, a monk learns (studies) the Buddhist scriptures hoping to get the gains and admiration that I who study the Buddhist scriptures well, will get (receive) the four requisites, such as the robes etc., and will be admired in the fourfold audience- his way of learning the Buddhist scriptures is like that of wrongly catching a poisonous snake. Then such a wrong learning the Buddhist scriptures is better to sleep without learning them. (M-A-2-13)

However, a monk learns the Buddhist scriptures with right way or purpose that by studying the Buddhist scriptures, I will cultivate (fulfil) the morality and practise (exert) the meditation works of concentration and insight in order to attain the Path-and-Fruition Knowledges, his way of learning is said to be right, as it helps him to get out of the round of misery and to cross over the thither shore. (M-A-2 -13-14).

“namo tassabhagavato arahato sammāsambudhassa”

NIBBĀNAGAMINIPATIPADA
WAY OF PRACTICE LEADING TO NIBBĀNA

VOLUME IV
PAGE 442-463

BY
PA-AUK TAWYA SAYADAW

TRANSLATED BY
U MYINT SWE (M.A London)

“Learning the Scriptures just to maintain (memorize) them:” *Bhandāgārika-Pariyatti*’ means ‘the Buddhist scriptures learnt (studied) by the *Arahats*, whose mind is free from the mental defilements. They have already known the truth of Suffering (*dukkhasacca*), that is, the five aggregates by the three-fold knowledge, have already abandoned (eliminated) all mental defilements and kammic forces, called *samudaya.sacca*’ have already developed the truth of Eightfold path, called ‘*Magga.sacca*’ and have already realized *Nibbāna* the Truth of Cessation of Craving, called *Nirodha.sacca*’, with their Path-and-Fruition knowledges. Those *Arahats*,

1- have already known the five Aggregates of Clinging; called *Dukkha.sacca*; existing in eleven modes (of), such as ‘past, future, present’ etc, by their insight knowledge of three kinds, viz, ‘*Ñāta, Tirana and Pahāna*’.

2- have already abandoned (eliminated, uprooted) all the defilements and kammic forces, by their path knowledges.

3- have already developed the Eightfold path, called ‘*Magga.sacca*’.

4- have already realized *Nibbāna*, the Unconditioned and Peaceful element, called ‘*Nirodha.sacca*’, by their Arahatta-Fruition knowledge.

Therefore, the *Arahats*’ learning the Buddhist scriptures is just to memorize the Canonical texts, to maintain the succession of *Dhammas*, and to main the lineage (family) of the Buddha. Thus, their learning of the Buddhist scriptures is termed ‘*Bhandāgārika. Pariyatti*’.

When there arose (took place) the hardships such as the hunger and thirst etc., and the famous and eminent Reverend monks could not live (stay) together in one place, a worldling monk living by daily going round for alms, studied (learnt) the Buddhist scriptures with good purpose (intention): “Let the Buddhn’s sweet teachings (Buddhist scriptures) not disappear (or last for long). I will memorize (keep in mind) these canonical texts. I will maintain (guard) the tradition of those teachings”- If it is asked whether such as learning of his (worldling is ‘*Bhandāgā-rika*’ or not, the answer should, “No, it is not,” because such a learning of his is not that of an *Arahat*. It is true:- The learning of *Pariyatti* (Buddhist scriptures) may be one of the two- fold learning- ‘*Alagadda-Pariyatti* and *Nittharana Pariyatti* learning to cross over thither shore). The learning of the seven-fold *Ariyās* or learners (Non-*Arahats* can be only ‘*Nittharana-Pariyatti*’. The learning of *Arahats*, totally free from defilements, can be only the ‘*Bhandāgārika. Pariyatti*’. (Ma. tha- 2- 13- 14).

The (wrong) learning of Buddhist texts called ‘*Alagaddūpamā Pariyatti*’ is the lower road (for going to the woeful states).

If someone is greatly proud of his well- learning such a pride of *Pariyatti*- learning, has the force (power) to prevent (one) not to attain even the Path-and-Fruition knowledge. The

thorn-like pride of **Pariyatti**- learning, as long as it is not removed, will not let (one) realize the Path-and-Fruition knowledges.

The **Pariyatti**- learning of a virtuous worldling, to get out of 'cycle of existences', is said to be an 'upper class'. This virtuous worldling learns the **Pariyatti** (Buddhist scriptures) joyfully and practises accordingly, with a good intention (purpose):- "if I know well the Buddhist scriptures, I will have a good chance to know the Buddha's teachings. I will then have a good (rare) chance to practise the 'holy practice, called '**Sāsana.brahma.cariya** and **Magga-brahma.cariya**', counted as the three-fold training, viz, ', **Samādhi, Paññā**'. Looking frequently at the mirror of **pitaka**', he tries to make his mind pure (clean) and noble, by washing or cleaning it (mind) with clear water of '**Sīla, Samādhi, Paññā**'. Standing on the ground of **Sīla** and grinding the knife of **Paññā** on the hone of **Samādhi** he broke (cut) the mass of defilements into pieces, with his sharp knife of **Paññā**. . He teaches others, too, to do (practice) like himself.

Having learnt (studied) **Pariyatti** or Buddhist scriptures thoroughly with such as noble and admirable (upper-class) purpose, he, not caring the gains (gifts) given by many laymen and laywomen, practised the three-fold training (**Sīla, Samādhi and Paññā**) according to his primary aim (purpose). Such as **Pariyatti**- learning of his is a good cause of reaching the higher stages and is verily a kind of learning for getting out of the 'cycle of misery (existences).

Although some virtuous monks who have not such a noble purpose, learn the Buddhist scriptures just to pass the (religious) examinations and to become famous, but, when they know (understand) them thoroughly, their attitude (mind) now changes into noble one and becomes restful (quiet), like a calm pot being full of water. So their **Pariyatti**-learning goes one-step forward for getting out of **Samsāra** (cycle of existences). Let the young monks walk on the right path (road) to **Nibbāna** (or on the way-out of **Samsāra**)

Pride of beauty:- To be proud of one's beauty is called 'pride of beauty'. A lady should not be blamed if is proud of her beauty that illumines and graceful in the audience, in this life, due to her meritorious deeds done in her past lives, such as, purity of her morality, offering of the flowers, sweeping in the court-yards of the pagodas and monasteries etc.

That **Subhaddā** was so beautiful and graceful that her radiant body illumines in the room twelve cubits wide, is due to her meritorious deeds done in her past lives, such as,

Page. 444

1. Purity of her morality,
2. offering the gifts obtained by fair means,
3. to the virtuous (noble) monks such as the private Buddha,
4. with her very pure and clean mind,
5. believing well in the cause (**Kamma**) and its effect (**vipāka**),

"Monks, whatever a virtuous one desires (longs for) is certainly fulfilled, due to the purity of his morality.

According to the Buddha's saying (teaching) as such, the fulfillment of whatever a virtuous one desires is marvelous.

But considering that such as beauty in this life is obtained due to the past meritorious deeds, such as offering the water, flowers etc., one should be careful not be proud and belittle (think low of) others. And instead, one should mindfully try to keep one's mind pure (clean, clear) and control oneself in every behaviour.

The noble men who have attained to *Nibbāna* can highly be proud of their caste etc. Some of them are the princes who have grown up in the hands of kings and queens and so can be highly proud of their luxurious lives, and some are so eminent in their knowledge that they are honoured even by the Buddha with a special title '*Etadagga*'. The noble ladies, too, such as '*Uppalavanna, Khemā, Yasodharā, Janapada. Kālyāni*' etc are so famous in the world that they are worthy of wearing the crown of knowledge and beauty as well.

Those gentlemen and ladies of upper class should be greatly proud of their high caste etc, but they are not at all. So pride of one's beauty and high rank etc. is said to be a great shame.

Therefore, being conceited and puffed up can prevent one not to attain to Path, Fruition and *Nibbāna*, and also is an improper (shameful) behaviour that can do one fruitless. In the future existences too, such a pride that thinks high of oneself, but thinks low of others, is a stronger condition that causes one to be reborn in the lower caste or as an outcaste. Therefore, one who, in this life, has reached higher rank (position) in knowledge and wealth,

Page- 445

should (may) remove this fang of pride and live like 'a fang-broken snake, a horn-broken ox, and a feet-rubbing waistcloth', in order to reach the higher and higher stages throughout his future existences.

Sampaggaha.rasa: As *Māna* itself has the nature of being puffed up and wishing to be above others, it has (does) the function to cause its associated states to be arrogant (haughty) and elated.

There is a difference between *Viriya's* lifting up its associated states and *Māna's* lifting up its associated states. *Māna* lifts up its associated states by way of 'causing them to be arrogant.' It, being itself arrogant, has the nature of causing its associated states to be arrogant, whereas *Viriya*, being itself active (industrious) in achieving its works in both cases (fields) with moral or immoral, lifts up (encourages) its associated states, by causing them to work hard.

Although *Māna* thinks little (low) of itself thus, "I am inferior to others in every respect," and is a kind of '*Hina-māna*,' it thinks again, "I do not care you, though I am inferior to you. If I have, I am to eat," and in this way, it lifts up its associated states. So it is needless to say about "*Seyya-māna, and Sadisa- māna*."

Ketu- kamyatā-paccupatthāna:- Because *Mānā*, has (does) the function of being itself arrogant (haughty) and of causing its associated states to be arrogant, it appears in the mind (knowledge) of the Yogi who contemplates it with his 'Right knowledge' (*Sammā. ditthi- ñāna*), as a arrogant nature, like (similar to) a flying flag (banner).

Ketu:- Although ancient teachers interpreted *'Ketu'* as a flag or banner, *'Ketu'* should mean 'the highest (topmost) pinnacle or banner set up on the top of a building, as described in the commentary on the chapter, called *'Nikkhepa;*

Page- 446

So, the highest pinnacle (banner) among the banners or flags set up on the top of a building. *Māna*, too, when arising repeatedly in the continuum of beings, becomes the highest (worst) *Māna* = pride, being supported (increased) by its preceding manifold 'Prides' by way (the force) of 'more powerful Decisive supporting (Sufficing) Condition (= *Upanissaya paccaya*), and therefore it (*Māna*) is called *'Ketu'*, being similar to the highest (topmost) pinnacle or banner.

'Ketu. Kāmya' means 'the mind or consciousness that wishes (desires) to be very high or very proud, like the highest (topmost) banner (flag).

'Ketukāmyatā' means *'Māna'*, which is the cause of the mind's arising that wishes to be very high or very proud, like the highest banner. That *'Ketu- Kāmyatā'* concerns *'Māna'*, but not *'Attā'* (Soul). So, note that the Buddha used, the word *'Ketukāmyatā'* (meaning, *Māna*, the cause of the mind's arising that desires to be very proud'). It is true the mind associated with *'Māna'*, desires to be very high or very proud (arrogant), like the highest banner. The cause of arising such mind is called *'Ketu. Kāmyatā'*. That cause is verily *Māna* called *'Ketu'*. Therefore, it appears in the mind (knowledge) of the Yogi who contemplates *Māna* with his insight-knowledge, as a state (phenomenon) that desires to be very high or very proud, like the highest banner.

Pada.tthāna:- *'Ditthi'* clings (takes) the mundane aggregates of clinging as Attā. *'Māna'* thinks (regards) those same aggregates as 'I'. Both *'Pitthi* and *Māna'* each regard only the mundane aggregates

Page- 447

1- a *'Attā'* (by *Ditthi*), 2- as 'I' (by *Māna*); and So *'Māna'* is similar to *'Ditthi'* by nature, but they both do not arise together. They both, contradictory to each other, fight (combat) each other, and so are said to be the combatants, similar by nature in arising. *'Ditthi'*, too, clings to the five mundane aggregates as *'Attā'* (Soul, ego), and *Māna* also clings to the Same aggregates as 'I'. As their clinging is thus similar (the same), *'Māna'* cannot arise with *Ditthi* in one consciousness. If *Māna* cannot arise with *Ditthi*, is it possible that *Māna* arises together with *Dosa*, etc.? *Māna's* clinging (to the aggregates as 'I' is possible to arise depending only on *'Lobha'* that 'loves oneself' (*Atta. sineha*) and so *Māna* can arise together with *'Lobha'*. Therefore, only *Lobha'* arising in the consciousness dissociated with *'Ditthi'* must be the proximate cause for *Māna's* arising. A conceited person, being puffed up, is considered to be like a mad man. (Abhi. tha- 1- 297 "Visuddhi-2- 99").

The Pride of *Pariyatti*- Learning

As explained above, any of manifold *Māna*, if (it is) not eliminated, is an obstacle (a danger) to *Jhāna* (absorption), Path and Fruition. As described in the *Mūla.pariyāya Sutta*, *Mūla- pannāsa*, (M.1-1), the five hundred young Brahmins entered the *Buddha-sāsana*, were destined to become *Ariyās* (*Arats*) in this life. But when they learnt (studied) the Buddhist scriptures, they, being sharp- witted, became very soon skilled in them. So they became very much proud of their mastery (thorough knowledge), and did not pay respect even to the Buddha and did not come to Him frequently to hear His sermons. The Buddha could not expound anything but three genders, fourfold words and sevenfold case-endings. "When he expounds the sermons, nothing is difficult for us"- thus they became very conceited.

"These monks, without removing this thorn of *Māna*, are not worthy of realizing the Path and Fruition". (Ma. tha. 1- 18)

The Buddha, knew well their proud disposition that prevented them from attaining Path and Fruition so long as their pride of *Pariyatti*- learning was removed, and being skilful in teaching, expounded the sermon, called '*Sabba. dhamma. mūla, pariyāya*' in order to remove their pride of *Pariyatti*- learning. (M. tha. 1- 18).

Page- 448

When they had heard that discourse, their pride decreased. The Buddha continued to preach the '*Mūla. pariyāya Jātaka*' (Khu. 5-68). When their pride decreased, they paid respect to the Buddha and practised the 'Calm and Insight' meditation works. When their (good) faculties matured, the Buddha, staying at the 'Gotama-pagoda', taught them the '*Gotamaka Sutta*', and at the end, they became *Arahats*, possessed of the 'Analytical Knowledges'. (Ma. tha. 1- 61)

To be given holy punishment

Rev. *channa*, born at the same time as the Buddha, a close friend and a play-mate of the Buddha, accompanied the Buddha at the time of his renunciation. For these reasons, said proudly: "He (the Buddha) is the son of our lord, He is our Buddha and this is our *Dhamma*". And so he talked harshly to the chief and great disciples, such as Rev. *Sāriputta*, thinking (saying) that they were new arrivals (comers). The Buddha knew that due to his great pride, Channa would not attain to the higher spiritual progress, and so, at the critical moment of *parinibbāna*, told Rev. *Ānanda* to give *Channa* the holy punishment.

According to '*Dārukhandhopama Sutta*', (Sam 2- 386-7), a proud man, drifting in the current of right view (*Sammā.ditthi*) is said to be like a log stranded on the beach amidst the water. From the point of view of noble men, such a conceited man who wants to be above the others, will be seen to have doubtful behaviour (manners) whether he has morality or not.

But Rev. *Channa*, having been given holy punishment, zealously practiced the calm and insight meditations and contemplated the five aggregates as impermanent, painful and soul-less. But when he, did not attain the Path-and-Fruition knowledges, as not contemplating the 'Law of Conditionality', Rev. *Ānanda* taught him the '*Kaccāna-gotta sutta*' (Sam.1-257) and then Rev. *Channa* became a Stream-winner. When he continued his meditation work, he became an *Arahat*. (Sam.2-108-110).

Page-449

8. *Dosa* = anger, hatred

1- The cause of ruin of its associated states is *Dosa*. Or the state that ruins (spoils) its associated states is *Dosa*. *Dosa* and its associated states also ruin both body and mind, or himself. As the associated states are ruined due to *Dosa*, *Dosa* is also the cause of ruin of its associated states. As *Dosa* ruins its associated states, it is the cause of ruining its associated states.

2- *Dosa* is so called because it itself is a ruined state. Or, *Dosa* is so called because it itself ruins (spoils) both body and mind or himself and others.

3- Or, the state of being ruined is *Dosa*. Or, the state that ruins both body and mind, or himself and others is *Dosa*.

[Remarks:- The teacher-monks translated (interpreted) the paliwords '*Dussati Dussana*' as 'to be ruined, being ruined' (in passive sense) respectively. But the famous 'Pyi sayādaw' interpreted them as 'to ruin, ruining (in active sense). Both the interpretations are considered to be correct].

Dosa's characteristics etc. are as follows:-

- 1 (a) It has the characteristics of hardness and harshness.
- (b) It has the characteristic of causing body and mind to be hard and harsh. (It is like a cobra that is struck by a stick).
- 2 (a) Its function is to cause one's body to tremble, like a man afflicted by snake poison.
- (b) Or, it has the function of trembling of one's body, like a man afflicted by snake poison.
- (c) Its function is to burn the heart, its base, or body and mind, like a forest fire.
- 3 *Dosa* appears to the Yogi's mind or knowledge as a state (thing) that destroys body and mind, or the welfare of oneself and others, (like an enemy who has opportunity to destroy others).

Page.450

4. The nine or ten conditions to bear (harbour) enmity are its (*Dosa's*) proximate causes. (*Dosa* is like the putrid foul smelling urine mixed with poison).

Just as the poisonous snakes such as viper, cobra etc., when stuck by a stick, instantly raises their expanded hoods, so being angry and harsh (gruff) is the nature of **Dosa**.

The term '**Visappana**' means-

1. "an expansion,
2. a particular behaviour."

Therefore, the author of **Mūla. tikā**, explains the former as **Sampatti rasa**,' and latter as '**Kicca-rasa**', and the author of **Anutikā**, too, explains them in the same way. What these commentators imply is thus:-

Sampattirasa:- When poison falls on the body, the parts of the body are ruined, from the place where poison falls up to the whole body, according to the intensity of poison. In the same way, when '**Dosa**' (anger) arises, the parts of the body are ruined, from the heart on which '**Dosa**' depends, up to the whole body, due to the consciousness headed by '**Dosa**' (anger). And as long as there is the force (impetus), the material qualities caused by '**Dosa**' are still unpleasant or in the state of ruin. Due to the ruined mind-born material qualities, the other co-existing material qualities born of '**Kamma, Utu** (temperature) and **Āhāra** (nutriment), too, become unpleasant or are naturally ruined. Therefore, the whole body of an angry man trembles and his angry manners are evident (visible). Thus, the unpleasant material qualities pervade on the angry man's body due to the intensified '**Dosa**'. This is called '**Sampatti. rasa**', that is a state of one's unpleasant body, possessed by enemy-like '**Dosa**' (anger).

Page- 451

Kicca. rasa: When poison, little or much, falls on the body, that body is ruined (becomes unpleasant). In the same way, '**Dosa**' (anger), whether it is little or great (much), is said to be a state corrupted from the intrinsic nature of (original) consciousness. That corrupted state of consciousness is said to be angry. Due to consciousness headed by (associated with) '**Dosa**', the unpleasant mind-born material qualities pervade the whole body. The other material qualities born of '**Kamma, Utu**, and **Āhāra**, become unpleasant in conformity with the unpleasant (corrupted, ruined) mind- born material qualities. The whole body, when it is pervaded by the unpleasant material qualities, trembles violently. It is **Dosa's 'Kicca- rasa'** that it itself is a corrupted state and that it causes the whole body to tremble by causing its material qualities to be corrupted (ruined).

Or, another '**Kicca-rasa**':-

The forest-fires, called '**Dāvaggi**' arise due to the friction between the two branches of trees or two bamboo trees. The fire arising due to that friction begins to burn the corresponding branches or bamboos. In like manner, as the Buddha expounded '**Dosaggi**= fire of anger, etc. **Dosa** is a kind of fire element. When there is the meeting (friction) between the object and the door, sometimes the fire of **Dosa** arises depending on improper (unwise) thought. When **Dosa**

arises, its associated states, too, become (get) heated. The material qualities, too, caused by consciousness headed by (associated with) **Dosa**, get heated. The heat (hotness) of fire element arising in the mind-born material qualities becomes very, intense. The material qualities born of **Kamma**, **Utu** and **Āhāra**, too, co-existing with those mind-born materiality within the same body become heated and then the heart-base begins to be burnt, just as a house burnt by fire causes other neighbouring houses to be burnt: When the whole heart becomes burnt (heated), the heat pervades whole body the flesh of which becomes red and the whole body begins tremble. If the power (force) of **Dosa** = anger is very great (intense), the whole heart becomes burnt till person concerned instantly dies, just like the gods named '**Manopadosika**'. Therefore, it is **Dosa's** function that its associated consciousness and the heart-base co-existing with it become burnt (heated), just like the forest-fire.

Paccupatthāna: Just as an enemy destroys his enemy (rival) whenever he gets a chance, even so **Dosa** destroys (ruins) a person (body) in which it exists, both in this life and in the next. Therefore, **Dosa** appears in the mind or knowledge of a Yogi who contemplates on **Dosa**, as a state which destroys both oneself and others. Or, if **Dosa** arises, both mind and body co-existing with itself are to be miserable, and ruined. Therefore **Dosa** appears in the Yogi's knowledge (mind) as a destructive state.

Note:- In destroying (ruining) thus, other persons are either ruined or not. But the person concerned himself is surely ruined, his complexion being at least ruined and so on. He has already accumulated many kinds of **kamma** that cause him to be reborn repeatedly in the woeful states, and to be ugly in his many subsequent (successive) existences in the cycle of birth and death.

Page 452

Therefore, as the fire of **Dosa** burns a person concerned both in this life and in the next, a very angry (hateful) person, is said in the scriptures, to be easily old. When a man takes a lump of excrement and throw sit on others, then they both are dirty (smeared) with it.

Padatthāna- 9 fold or 10 fold **āghātavatthu**

There are ten causes of harbouring enmity, namely, a man is angry and harbours enmity, thinking -

- 1- That he has spoiled (ruined) my welfare before,
- 2- that he is now spoiling (ruining) my welfare,
- 3- that he will spoil (ruin) my welfare in future,
- 4- that he has spoiled (ruined) the welfare of my beloved,
- 5- that he is now spoiling (ruining) the welfare of my beloved,
- 6- that he will spoil (ruin) the welfare of my beloved, in future,
- 7- that he has done (worked for) the welfare of my enemy,
- 8- that he is now doing (working for) the welfare of my enemy,

9- that he will do (work for) the welfare of my enemy.

10- He is angry at (in) the wrong Places (with a wrong person).

'*Atthāna.kopa*'. means 'to be angry at the wrong places, or to be angry giving lame excuses. The *Atthasālini* commentry explains the causes of being angry, as follows:-

An angry-natured person is angry (giving these lame excuses):-

1- that it rains heavily , (too much),

2- that it does not rain,

3- that it is too hot,

4- that it is not hot,

5- that the wind blows,

6- that the wind does not blow,

7- He is angry at the leaves fallen from the Bodhi- tree, being unable to sweep them out.

10-He is angry at the stump, as he falls down being struck with it.

"The Buddha said:- the angry-natured person is angry at (in) such wrong places, without any reason." (Abhi-A-1-399).

Page- 453

Again, the '*Mūla. tikā*' (sub-commentry) describes the nine kinds of '*Atthāna. Kopa*', as follows:-

An angry- natured person is angry, thinking (considering)-

1- that he did not work for my welfare in the past,

2- that he is now not working for my welfare,

3- that he will not work for my welfare in future,

4- that he did not work for the welfare of my friend in the past,

5- that he is now not working for the welfare of my friend,

6- that he will not work for the welfare of my friend in future,

7- that he did not work for the welfare of my enemy in the past,

8- that he is now not working for the welfare of my enemy,

9- that he will not work for the welfare of my enemy in future.

The anger arising in such cases should be '*Atthāna.kopa*', as the anger arises at (in) the wrong places. (*Mūla.ti*-1-168-169).

This explanation given by the author of '*Mūla.tikā*' commentary is similar to that given in the '*Uraga sutta*, of the '*Sutta. nipāta. atthakathā*' (p.11), in which the nine-fold" - '*Āghāta. vatthu*' is given, namely:-

1- The nine fold '*Āghāta. vatthu*', enumerated first,

2- Another nine- fold '*Āghāta. vatthu*', enumerated in the '*Mūla. tikā*',

3- One kind of '*Atthāna.kopa*:-

Thus the total number is nineteen.

The original nine-fold. *Āghātavatthu* is first given (mentioned) in the Sangiti sutta (B-3-218), the '*Āghātavatthu sutta* (Ang. 3-208). All these '*Āghātavatthu*' are the proximate causes of *Dosa*.

The mere (simple) urine is considerably medicinal, but when it is mixed with poison or with an improper thing and is drunk (taken), becomes (is) unwholesome (undesirable), disgusting and to be given up. In the same way, at the time when *Dosa* arises in some consciousness or when the unwholesome state rooted in *Dosa* gives its (bad) result is really undesirable, disgusting, and to be given up. Thus the commentator explains.

Page- 454

Cruelty of mind is called '*Dosa*', but the mind which is violent and defiled is not smooth, like the undefiled mind. As the mind is cruel (rough) and defiled, the mental weakness and fear (fright) is called a kind of *Dosa*. The mental suffering, fright (fear), desperation, peevishness (irritation), angriness, hatred, abuse, frightening, attacking, aggression, injuring, beating, harming etc,- all of them are *Dosa*. As *Dosa* contains both fright (fear) and cruelty, the man of great anger and cruelty, are easily frightened. Mental cruelty is said to high or strong *Dosa*; and sorrow, despair and fright are said to low or weak *Dosa*.

Dosa of Rev. Devadatta

Rev. *Devadatta* was a noble person who fulfilled the perfections for the two *Asancheyya* aeons to attain the wisdom of a Private Buddha. But five aeons ago, while he was a seller of coloured -glass balls, he grudge the Bodhisat, a seller of the same goods for not getting a cup of gold which was obtained by the latter, and as a result, he died being broken-hearted and vomiting the blood.

That hatred or grudge (*Dosa*) did not stop (end) with that much. Since then (that life), it (Grudge) grew (increased) gradually, from one life to another, and matured, because he continuously cherished it, not trying to destroy (subdue) it. By the power of his increased (matured) *Dosa* or hatred, there were many existences in which he tried to destroy the bodhisat, and there were many existences in which the latter escaped from the former's destruction.

In the *Vānarinda jātika* (*Jātaka*. tha- 1- 296) it is stated:- "A crocodile, who would be Rev. *Devadatta* tried to kill the Bodhisat monkey, because he was urged by his wife, female crocodile, the would-be evil (crafty, cunning) lady named '*Ciñcamāna (vikā)*', but did not succeed in killing the sharp-witted Bodhisat".

Similarly, in the '*Tayodhamma*' *jātaka* (*Jātaka*. tha, 1- 298-299), too, it is stated:- "A father monkey who would-be Rev. *Devadatta*, tried to kill his own son monkey, the Bodhisat, but did not succeed, but there were existences in which the former succeeded in killing the latter.

Page. 455

Nandiya jātaka

In this *jātaka* (*jātaka*.A. 2- 183), it is stated:- "In one existence, the Bodhisat monkey named '*Mahā. nandiya*' was living in the *Hinālayas*. His younger brother monkey was the would-be Rev. *Ānanda* named '*Cūla. nandiya*'. They both, having abandoned their eighty thousand follower monkeys, took their old blind mother and descended from the *Himālaya* and lived together on a banyan tree situated on the outskirts in order to wait upon (attend on) their mother freely and peacefully.

At that time, the would-be Rev. *Devadatta* was a young Brahman in Benares. He studied all kinds of arts and sciences in *Taxila* city under the great professor, usually called '*Disā. Pāmokkha*' who was the would-be Rev. *Sāriputta*, and then requested his teacher to let him go back home. The Professor, being well-versed in the 'Knowledge of bodily lucky and unlucky marks', knew the cruel nature of his pupil Brahman and so admonished (warned) the latter thus:- "Young man, you are cruel-and-violent natured. Such a natured man will not always prosperous (successful) in life, but one day will undergo much ruin (suffering). So, be not cruel, and do not do any regrettable deeds."

After worshipping his teacher, *Disā- Pāmokkha* and returning to Benares, the young Brahman was living as a married man. Being unable to earn his livelihood with his other crafts, he decided to earn his livelihood as a hunter and departed from Benares. Living in a small village in the countryside, he earned his livelihood, by going to the forest, killing various animals and selling the meat. One day when he came back from the forest not getting anything, he went towards a banyan tree situated on the edge of that forest.

At that moment, the two brother monkeys, sitting on the space between the forks (branches) of the tree, after feeding their mother, saw that hunter coming and were watching him, thinking, "What will he do to our mother?".

That coercive young man came to the foot of the banyan tree and tried to shoot at the blind old female monkey with his arrow. Seeing that behaviour of the hunter, the Bodhisat elder monkey said to his younger brother, *Nandiya*:- "*Nandiya*, that man wants to kill (shoot) our mother. I will sacrifice my life to save our mother. When I die, you wait upon the mother". So saying, he came out of the branches and said to the hunter:- "Hunter, do not kill my mother. She is blind, old and feeble. I will give her life. Please kill me, instead of her." So saying, he stood before the hunter, after getting the latter's promise not to do so.

Page- 456

That merciless hunter shot the Bodhisat monkey and let it fall down. Then again he tried to shoot the Bodhisat's mother monkey. Then *Cūlanandiya*, the younger brother monkey, decided to give his mother life and, coming out of the branches, stood in front of the hunter, saying:- "Hunter, do not kill my mother and give her life. Kill me and take both of us, the two brothers". But the merciless hunter shot him and let him down on the ground. Next, he shot the

old mother monkey, too and let her down on the ground. Then he took all of three monkeys and went towards his home.

At that time, that evil-doer's house was struck by lightning (thunder), and his wife and two children, too, died, his house being burnt. Then that man (hunter), at the gate of the village, being informed by another villager of the whole matter, was so much afflicted with sorrow for his wife and children that he left there his carrying-pole together with his wild game and his bow, and went towards his home nakedly, throwing his clothes away, and raising his hands and weeping (crying out). When he happened to enter into the (burning) house, the house-post fell on his head, causing it to be broken. The earth broke open and the flames from the fire of *Avici* hell rose up. When being swallowed by the earth, that evil-doer recalled (remembered) his teacher's admonishment given to him and recited the following (in two verses):-

Page- 457

"Dear young man, do not do evil. You will repent (of) you sin later. Seeing this bad consequence, my teacher said to (admonished) me thus. When a man does the deeds, good or bad, by his body, speech (words) and mind, he will certainly experience their results, good or bad. One will reap the fruit of the seed that one sows".

While crying (weeping) thus, that man entered into the earth and was reborn in the great Hell, *Avici*. (Jataka. A. 2-183-185).

This is the example of how '*Dosa*' ruins (destroys) both oneself and others.

Again, according to the *Khanti.vādi Jātaka* (Jataka. tha. 3-37), the drunkard king *Kalābu* ordered his men to whip the Bodhisat ascetic named *Khanti.vādi* who said that he practise the perfection of *Khanti*, patience (forebearance), cut off his hands, his feet, his ears, his nose. The reason why he treated the noble ascetic so cruelly was that he being drunk fell asleep on the lap of a singer lady, on the stone-slab in the royal garden and saw, when awake, his concubines who entertained him, respectfully listening to the sermons of the *Khanti-vādi* ascetic at a distance, who was therefore attacked by the king out of great anger.

Finally, when the *Khanti.vādi* ascetic said that his patience (forebearance) existed in his heart, not in his skin, hands, feet, ears, nose and so on, the king replied, "Dishonest (Deceitful) acetic, you live with your patience," and so saying, he kicked at the ascetic's chest and departed. But the noble ascetic's attitude was thus:- "May the king who has cut of my hands, feet, ears and nose live long. The wise men like me are not angry (do not show their anger). (Jātaka-A-3-39)

These words were said by the ascetic, when he was requested by the kings general who came later, not be angry at (with) the king.

When king *Kalābu* left the royal garden and arrived at a distance beyond the ascetic's eye-sight, this massive earth, two hundred-thousand (lakhs) and forty thousand *Yojanas* thick, broke open and swallowed (carried) him together the flames arising from the *Avici* hell. That

king **Kalābu** was swallowed at the gate of the garden and was reborn in the **Avici** hell. (Jātaka-A- 3-40).

Page- 458

In this **Jātaka**, king **Kalābu** was verily the would be Rev. **Devadatta**. The Bodhisat **Khanti.vādi** ascetic died on that very day.

Cūla. dhammapāla Jātaka:- At one time, the would -be- Rev. **Devadatta** was king **Mahātāpa** at Benares. The Bodhisat too rebirth in the womb of that king's queen named Candādevi. When he was born, he was named '**Dhamma.pāla**'. When he was seven years old, his mother bathed him with scented water and then let him play. The king went to the presence of his queen, but the queen being filled up with love for her son playing, did not get up in respect to the king. Then, the king thought, "This queen is even now proud depending on her son. I will kill him (little prince) just now". When he returned from his queen's chamber, he sitting down on his royal place, called his executioner and ordered to fetch the little prince and to cut off his hands, feet and head.

Queen **Candādevi** died, being heart-broken. King **Mahātāpa**, too, was swallowed by the earth and reborn in the **Avici** hell. (Jātaka-A-3- 165-168).

This is the example of **Dosa** or **Kodha** (hatred), started (cherished) from the life (existence) of a seller of 'the coloured - glass balls' which became gradually so increased that it urged king **Mahātāpa** to kill even his own little son, seven years old, and also (the example) of **Dosa** that destroyed oneself and others.

Mahā.Kapi Jātaka (Jātaka-tha-3- 349). In that **jātaka**, it is stated that the monkey, would -be Rev. **Devadatta**, had killed the Bodhisat monkey, by jumping down from the top of the tree forcibly on the back of the latter, who was trying to rescue his fellow-monkeys by letting them to go (walk) on the back of his, who was holding a long creeper reaching to the other (thither) shore of the river.

In the **Daddara Jātaka** (Jātaka. tha- 3- 511- 517), it is stated that a cunning ascetic, the would-be Rev. **Devadatta**, had killed and eaten a partridge (bird) who was teaching the **Vedas** and other arts to the five hundred young men.

In such and such ways, the would-be Rev. **Devadatta** who cherished the hatred against the Bodhisat for numerous existences since the life (existence) of a seller of coloured-glass balls, tried for many times to kill the Buddha, whom he lastly met with in this present life, too. He could not have faith (confidence) in the Buddha, the peerless and noblest Person in the world. Evil dispositions cherished in one life (existence) followed a person concerned for numerous existences throughout the cycle of rebirth. Due to (depending on) such defilements as **Dosa** (hatred) etc. Cherished for numerous existences, Rev. **Devadatta**, again in this present life, too, committed such crimes as 'injuring (wounding) the Buddha, making (creating) schism in the

united *Samigha*', which took (led) him to the *Avici* hell and let him suffer the greatest pains there till the world would last.

Page- 459

A certain lady's *Dosa*

Mahāgandhāyone Sayādaw, in Taung-myo (Amarapūra) narrated a sad story of a pitiable lady in India, as follows, in order to remind the parents who forcibly used to give their children (sons or daughters) in marriage.

In this story, a young man and a lady, not knowing each other's nature (disposition), were forcibly given in marriage by their respective parents. The lady as a good wife treated well her husband dutifully, but her husband, being pessimistic, did not treat her kindly.

So, she began to be grieved and depressed (despaired) and was often lost in thought. When the pessimistic husband often saw her being lost in thought thus, he was disgusted with her and sometimes ill-treated her. She was greatly depressed and frustrated, but treated him well and dutifully as before, having no (other) choice.

So, she often thought of killing herself (committing suicide). But she had to live enduring intense suffering just like in Hell until, she gave birth to the two children. Finally, being unable to bear such intense suffering, when her husband went to another town for some business, she wrote him a letter as follows:-

"Sir, though being given in marriage to you by my parents, I really loved you and tried to get your love (loving- kindness) by all means, but you always misunderstood me and failed to respond to my love (kindness). Being depressed and frustrated, I tried to kill myself (to commit suicide), but failed because of my children. But now, being unable to bear any more suffering, I wrote this letter for you, and we all three killed ourselves, by eating the poisoned cakes".

After receiving (reading) the above letter, her husband remembered all of her dutiful (kind) treatments given to him and hurriedly returned home, but finding them all dead on the well-prepared, he also shot himself dead.

(*'Abhiddhidhamma* in Daily Life'- 51-52)

This is the force of *Dosa* that destroys both oneself and others. One should try to remove (eradicate) such ruinous *Dosa*, by means of 'Calm and Insight' meditations. If one cannot do such kind of meditation practices, then one should remember (think of) repeatedly the facts described in the following sermon, called '*Kakacūpama sutta*', which shows the best way (means) to remove '*Dosa*'.

Page- 460

'*Kakacūpama sutta* (M. 1. 173- 181)

One day, when the Buddha was staying in *Jetavana* monastery in the city of *Sāvatthi*, Rev. *Moliya. phagguna* lived for long extravagantly (carelessly) together with the nuns' (*Bhikkhunis*), thus:-

If a certain monk said the faults of the nuns in the presence of Rev. *Moliya. phagguna*, the latter became angry and quarrelled with the former. If a certain monk said the faults of Rev. *Moliya. phagguna* in the presence of those nuns, the latter became angry and quarrelled with the former. In that (above-said) way, Rev. *Moliya. phagguna* lived intimately with the nuns.

Then a certain monk went to the presence of the Buddha, and sitting in a proper (suitable) place, told Buddha the whole matter about Rev. *Moliya. phagguna*.

Then when the Buddha called Rev. *Moliya. Phagguna* and asked him whether the report was true or not, the latter admitted that it was true. Then the Buddha admonished him as follows:-

"*Phagguna*, you as a noble man left your layman's life and joined (entered into) the holy- life through true faith, didn't you?- thus the Buddha asked him. *Rev. Phagguna* replied, "Yes, sir. It is true".

The Buddha said:- "*Phagguna*, it is not proper for you, who enter into the holy life through true faith leaving the layman's life, to live for long extravagantly (carelessly) together with the nuns.

"*Phagguna*, if someone say the faults of those nuns in your presence, you should abandon the wrong thoughts that will arise depending on the sensual lust. *Phagguna*, in abandoning thus, you should practise thus, 'my mind will be ruined and I may speak evil words. I will live with loving-kindness, abandoning (removing) the offensive mind (attitude)'. I will live with loving-kindness associated with the (others') welfare, not being malevolent.

"*Phagguna*, therefore, if someone were, in your presence, to hit those nuns with his hands, to throw stones at them, and to strike them with the stick, then *Phagguna*, you should abandon the lust and the wrong thoughts that will arise depending on the sensual pleasures. In abandoning thus, you should practise thus:- "my mind will not change (be ruined). I will not speak

Page- 461

the vulgar words. I will live with loving-kindness associated with the (others') welfare, not being malevolent.

"*Phagguna*, therefore, if someone speaks your faults in your presence, you should abandon the sensual lust and wrong thoughts that will arise depending on the sensual pleasures. In abandoning thus, you should practise thus:- "My will not change (be ruined). I will not speak the vulgar words. I will live with loving-kindness associated with (other's) welfare, not being malevolent".

"*Phagguna*, therefore if someone strikes you with his hands, throws the stones at you, strikes you with the sticks, and cuts (hews) you with the sword, then in this case you should

abandon the sensual lust and wrong thoughts that will arise depending on the sensual pleasures. In abandoning thus, you should practise thus:- "My mind not change (be ruined). I will not speak the vulgar words. I will live with loving-kindness associated with (others) welfare, not being malevolent". Thus the Buddha admonished (Rev. *Phagguna*).

Then the Buddha said to the monks:- "Monks, at one time the monks were satisfied with the Buddha's words. At that time, the Buddha said:-"Monks, I (the Buddha) ate the meal just at one time (a day). Monks, when I ate the meal just one time (a day), I knew that I was free from diseases and healthy, and that I lived happily with my bodily lightness and strength (vigour). Monks, come on. You, too, eat (take) the meat just at one time (a day). When you eat the meal just at one time (a day), then you will know that you are free from diseases and healthy and that you live happily with your bodily lightness and strength (vigour)". Monks, I did not admonish you, but just reminded you".

"Monks, just as a skilled (skilful) charioteer holding a whip in his hand mounts a chariot, yoked with the well-bred horses and, holding the ropes in his left hand and a whip in his right hand, drives the horses straightly wherever he wishes, either in going forward or in returning, in the same way, I did not admonish you, but just reminded you. Therefore, you, too, give up (abandon) unwholesome things and exert yourselves in (cultivating) wholesome things. If you exert yourselves, then you will flourish and prosper in this *Buddha-Sāsana*.

Page- 462

"Monks, just as a certain man who wishes the welfare and safety of a forest (grove) of sal-trees covered with the castor-oil plants, situated not far from the villages and small towns, cuts off the bent sal-trees and dwarfs, carries them out to clear in the forest, and cultivates the straight and well-grown young sal-trees, in the same way, you too give up the unwholesome things and exert yourselves in (cultivating) wholesome things. If you exert yourselves, then you will flourish and prosper in this *Buddha-sāsana*.

"Monks, in the past there was a land-lady (rich lady) called '*Vedehikā*' in this city of *Sāvatti*." She is gentle, humble and calm-minded"- thus her fame spread. Monks, the lady, *Vedehikā* had a female-servant, named *Kālī* skilful (clever), industrious and able to manage well the household affairs. Then *Kālī* thought thus:- my land- lady *vedehikā* is gentle, humble and calm-minded. Thus her fame spread. How? It will be good if I inquire that why she does not show (exhibit) her anger, whether being present in her, or as not being present in her, or as I well manage the household affairs.

"Monks, then *Kālī* got up when the sun was up. Then lady *Vedehikā* called 'Hey *Kālī* ' who replied, "What, land-lady?" The land lady asked, "Why do you get up late?" *Kālī* said, "There is nothing to do, sir. The land-lady asked, "Should you sleep till the sun-rise, though there is nothing to do?" and so saying, she looked askance at her, being angry and displeased.

"Monks, then *Kālī* thought, "My landlady did not show her anger, though being present in her. She did not show her anger, just because I did the household affairs well. It will be good if I investigate her anymore".

"Monks, then **Kālī** got up very late. Then the land-lady called "Hey **Kālī** !" **Kālī** replied, "what, landlady?" The landlady asked, "Why do you get up very late?" **Kālī** replied, "There is nothing to do, sir." Then the landlady asked, "Should you get up very late, though there is nothing to do?", and so saying, she looked askance at her, being angry and displeased.

Page- 463

"Monks, then **Kālī** thought again, 'My landlady did not show her anger though being present in her. She did not show her anger, just because I did the household affairs well. It will be good if I investigate her anymore.

"Monks, the **Kālī** got up again very late. Then the landlady called "Hey **Kālī**!" **Kālī** replied, "What, landlady?" The landlady asked, "Why do you get up very late?" **Kālī** replied "There is nothing to do, sir". Then the landlady said, "Should you get up very late, though there is nothing to do?" So saying, she got (became) angry, and displeased, and stroke her head with a door-bar (lintel), breaking (splitting) it (her head).

"Monks, then **Kālī** , her head being split and bleeding, cried out to her neighbours, thus- "You look at what the polite, and humble lady did. Why did she strike the head of mine, the only she slave, with a door-bar (lintel), being so angry at me, for getting up late?"

"Monks, then the notorious news spread that landlady **Vedehikā** was cruel, not humble and calm-minded".

"Monks, in the same manner, a monk in this **Buddha-sāsana**, may be known as one who is gentle, humble and calm-minded, so long as he does not meet with unpleasant conditions (things or words). Monks, only when he meets with unpleasant conditions (things or words), he is said (known) to be gentle, humble and calm-minded.

"Monks, I do not say that a monk who is obedient (easy to be admonished) because of the robes, alms food, dwelling and medicine (4 requisites) is obedient (easy to be admonished). Why? - Because that monk may not obedient (easy to be admonished) if he does not obtain (receive) those requisites".

NIBBĀNAGAMINIPATIPADA
WAY OF PRACTICE LEADING TO NIBBĀNA

VOLUME IV
PAGE 464-473

BY
PA-AUK TAWYA SAYADAW

TRANSLATED BY
U MYINT SWE (M.A London)

Page- 464

"Monks, I (should) say that only the monk who is obedient (easy to be admonished), paying proper respect, regard and honour to the **Dhamma**, is truly an obedient monk (easy to be admonished). So, you must exert yourselves, considering that only the monk who pays proper respect, regard and honour to the **Dhamma** can (will) be an obedient monk (easy to be admonished).

"Monks, there are five ways by which others may speak to you , namely:-

- 1 (a) At a proper time, or
(b) At an improper time; or
- 2 (a) Truly, or
(b) Untruly (falsely); or
- 3 (a) gently = politely, or
(b) Harshly ; or
- 4 (a) Reasonably, or
(b) Unreasonably; or
- 5 (a) Having loving-kindness, or
(b) offensively.

"Monks, others may speak to you by (one of) these ways.

"Monks, you must practise thus, when spoken by others to you:- Our mind will not change. We will not speak the vulgar speech. We will live with loving-kindness, wishing the others' welfare, not having offensive (aggressive) mind. We will live, radiating (our) loving-kindness to him who speaks thus. And we will live, radiating (our) unlimited loving-kindness to all beings, thus "May they be free from dangers and sufferings."

"Monks, for example, suppose (that) a man, taking hold of a hoe and a basket, may say, "I will make this earth empty." He digs the earth, saying 'Be (it) not earth! Be not earth," and spread it here and there, spit and urinate here and there. Monks, what do you think of it? Can that man make the earth empty?" asked the **Buddha**

Page- 465

Monks replied, "No sir, Blessed One. It is impossible." When the **Buddha** asked, " Why is it impossible?", the monks replied, "Blessed One, as this earth is too thick, and unlimited in breadth and length, it is not easy to make that earth empty, and it is just painful for that man".

"Monks, in the same way there are five ways of speech (as stated above) by which others may speak to you. When others speak to you by (one of) these five ways, you must practise thus, "Our mind will not change. We will not speak the vulgar speech. We will live with loving-kindness, wishing others' welfare, not having offensive mind. We will live radiating (our) loving-kindness to him who speaks thus. And we will live, radiating (our) loving-kindness to all beings,

thus; - "May they be free from dangers and sufferings". [Just as the man who takes hold of a hoe and basket cannot make the earth empty, so the mind full of loving-kindness of the monk (who practises or enters the *Jhānic Mettā*, unlimitedly radiated to all beings) cannot be changed by the speech of one who speaks by these (above-said) five ways.]

"Monks, for example, suppose (that) a man, taking the liquid of lac, or any liquid, yellow or brown or reddish, may say, "I will paint a figure and make it appear in this sky". Monks, how do you think of it? Can that man paint a figure and make it appear in this sky?," asked the *Buddha*.

Page- 466

The monks replied, "No sir, Blessed One. It is impossible." When the *Buddha* asked "Why is it impossible?" the monks replied, "Blessed One, this sky is formless, and not a visible thing. It is not easy to paint a figure and make it appear. It is just weary and painful for that man."

"Monks, in the same way..."

[It is meant that the speech spoken by '*vacana.patha*'= these (above-said) five ways is like the impossibility to paint in the sky a figure with the multi- coloured liquid, and the mind of the monk who practises (enters) the *Jhānic Mettā* that cannot be changed by such kind of speech is like this sky. So live practicing (entering) the *Jhānic Mettā*"]

"Monks! for example, suppose a man, taking a fire-brand red-burning with the straws, may say:- "With this red-burning fire-brand, I will burn (heat) the River *Ganges* and the whole environment." Monks, how do you think of it? Can that man burn (heat) the river *Ganges* and the whole environment with the red-burning fire brand made of straw?"- thus the *Buddha* asked.

The monks replied, "No sir, Blessed One, it is impossible." When the *Buddha* asked, "Why is it impossible?" the monks replied, "The river *Ganges* is very deep, very broad and unlimited. So it is not easy to burn (heat) the river *Ganges* and the environment with the red-burning fire-brand made of straw. It is just painful for that man".

"Monks, in the same way ..."

Page- 467

"Monks, take another example. Suppose there is a bag made of the cat's skin, with the inner and outer sides well kneaded (trampled) and so soft like the cotton that it makes no sound 'Kywi, Kywi'. Then a man, taking a stick or a potsherd (shard), may say, the bag made of the cat's skin thoroughly trampled (kneaded) and so soft, will be sounded (made sound?) by me with the stick or the potsherd (shard)". Monks, how do you think of it? Can the bag made of the cat's skin, thoroughly trampled and so soft like the cotton be sounded (made sound?) 'Kywi, Kywi, by that man, with the stick or potsherd?"- thus the *Buddha* asked.

The monks replied, "No sir, Blessed One, it is impossible. When the *Buddha* asked, "Why is it impossible?" the monks replied, "This is the bag made of the cat's skin, thoroughly

trampled and so soft like the cotton. So, that bag, made of the cat's skin, thorough trampled and so soft like the cotton, cannot easily be sounded (made sound?) 'Kywi, Kywi', by that man, with a stick or a potsherd. It is just weary and painful for that man".

"Monks, in the same way ..."

Page -468

"Monks, the evil-minded thieves (robbers) may saw your bodily limbs, big and small, with a double-edged saw. In sawing (cutting with a saw), too, one who offends (him who saws oneself) is not the one who follows and practises my (the **Buddha's**) exhortation (admonition) on account of that offence. Monks, in sawing (cutting with a saw), too, you must practise, thus:- "My mind will not change (be corrupt). I will not speak the vulgar speech. We will live, radiating. (my) loving-kindness to him who speaks thus. And we will live, radiating (my) unlimited loving-kindness to all beings, thus, "May they be free from dangers and sufferings".

"Monks, (you) always bear in mind this admonition illustrated by the 'simile of saw'. Monks, ... have you heard of those unbearable ways of speech, big and small?" (asked the **Buddha**). (The monks replied):- "No, we haven't, sir, Blessed one". (The **Buddha** continued)" Monks, therefore you always bear in mind this admonition illustrated by the 'simile of saw'. This admonition (advice) will be for your welfare and happiness for your welfare and happiness for long." The **Buddha** thus preached (delivered) this sermon. The monks listened to and received (accepted) this sermon with great delight and satisfaction. (M-1-172-181: **Kakacūpama. Sutta**).

Page-469

Makkha-Palāsa (Detraction- Malice)

In connection with '**Dosa**' (hatred), **Makkha** (detraction) and **Palāsa** (malice), too, should be understood of them, '**Makkha**' means 'a kind of, **Dosa** (hatred) or ungratefulness (ingratitude) that erases (reduces) others' credit (honour, reputation). A being or a man may have received the kind services done by (his) parents, teachers, and friends, especially by the parents who take care of and nourish their baby (child) from childhood till grown-up. Most of the persons do not know and erase the kind services done by those benefactors, and become ungrateful by erasing those kind services, saying- "He does no kind service to me".

Some of them are not only ungrateful, but erase the benefactor's kind service, and such a man is commonly said to be an ungrateful one, '**Mitta.dubbhi**', who offends his own friend (benefactor).

In one past existence, the Bodhisat was a white elephant, who served (attended on) his old blind mother. A hunter, the would-be Rev. **Devadatta**, was crying (weeping) wandering astray for seven days, in the **Himalyan**-forest. The Bodhisat placed him on his back and carried him to the road leading to the place where the human beings lived. But the hunter reported the news (matter) about the white elephant to the king, who sent the hunter and the elephant-trainers to capture the white elephant. The white elephant was captured. (**Jātaka**-A-4-91).

The service (favour) done by others is an obligation like a debt. Although one has not done a service in return yet, one should (must) be grateful, recognizing the benefactor, and one

day when one finds an opportunity, one should whole-heartedly do a service in return. The ancient wise men not only as a human being but also as an animal had done a service in return. In one past existence, the Bodhisat was a parrot, who was one day caught (entrapped) in the snare (noose), while going about (resorting) in the field of a **Brahman** in **Magadha**. The Bodhisat parrot ate the grains in the field, and took also the ears of corn when returning home. He was captured by the field-watcher by the order of the field-owner Brahman, to whom he was carried. When the Brahman asked the reason of taking the ears of corn, the Bodhisat explained to the latter that he did so in order to 1- repay the old debt, 2- to lend the new debt, and 3-to deposit a pot of gold.

1- "to pay the old debt" means "to do a service in return for his being brought up in his youthfulness by his parents".

Page- 470

2- "To lend the new debt" means "to bring up his unfledged children who, he hopes, will one day serve (attend on) him in return by his children."

3- "To deposit a pot of gold" means "to give charity by serving the old and feeble parrots, and to deposit the gold-pot of charity which will follow him through the cycle of existences.

When the Bodhisat, parrot explained these noble things, which are absent (not present) even in some men, the Brahmin was very much satisfied and so allowed him to take the ears of corn as many as he wished. (*Jātaka*.A.4. 276-281)

The favour of the teacher

The step-mother **Gotamī** gave (donated) to the **Buddha** a pair of yellow robes prepared (made) by herself. The robes let be given (donated) to the **Sangha** by the **Buddha**. Then Rev. **Ānanda** requested the **Buddha** to accept the robes donated by the step-mother **Gotamī**, who greatly favoured the Bodhisat, by feeding (nourishing) and bringing him up since the death of **Mahā-Māyā** (the Bodhisats own mother). Then the **Buddha** explained the incomparable favours (virtues) of the teacher who leads a pupil (a being) to the stage of Ariyāship, as follows-

"**Ānanda**, this word is true, **Ānanda**, depending on the (his) teacher, the pupil takes refuge in the **Buddha**, in the **Dhamma** and in the **Sangha**. **Ānanda**, I do not say that it is a good service in return done by the pupil to his teacher, by means of saluting (worshipping), welcoming and respecting him with the folded hands, and by giving him the robes, alms-food, dwelling and medicine (fourfold requisites).

"**Ānanda**, depending on the (his) teacher, the pupil refrains (abstains) from killing, taking what is not given (stealing), adultery, telling lies and taking the intoxicating drinks (and

drugs). *Ānanda*, I do not say that it is not a good service in return done by the pupil to his teacher, by means of saluting, ...

"*Ānanda*, depending on the (his) teacher, the pupil is endowed with (possessed of) the unshakable and firm faith (confidence) in the *Buddha*, in the tenfold supramundane *Dhammas*

Page- 471

(states), namely, fourfold Paths, fourfold fruitions, *Nibbāna* and the (other) *Dhamma*-groups, in the *Sangha* (order) of *Ariyās*, and endowed with the fivefold precepts loved and esteemed by the *Ariyās*. *Ānanda*, I do not say that it is a good service in return done by the pupil to his teacher, by means of saluting ...

"*Ānanda*, depending on the (his) teacher, the pupil has no doubt in the Truth of Suffering, in the Truth of Cause of Suffering in the Truth of Cessation of Suffering (*Nibbāna*) and in the Truth of the Path Leading to *Nibbāna*. *Ānanda*, I do not say that it is a good service in return done by the pupil to his teacher, by means of saluting, ...

(M- 3- 297; *Dakkhina-vibhanga sutta*). [pali quotations ...]

A good (suitable) service in return cannot be done by the pupil to the (his) teacher who favours his pupil, by means of '*Dhammānuggaha*' that is, by teaching the *Dhamma* to his pupil who (there by) comes to realize the four Noble Truths, even by means of giving (the teacher) the four requisites of immeasurable (unlimited) amount that fills up the whole universe. The *Dhammānuggaha* that the teacher favours his pupil who, due to the teacher's favour, realizes the four Noble Truths surpasses-hundred, thousand, hundred-thousand times-the '*Āmisānuggaha*' that the pupil gives service in turn to the (his) teacher by means of the four requisites of unlimited amount.

Depending on the teacher, if the pupil attains the '*Catusacca-Sammāditthi. ñāna*' (the wisdom that realizes truly the four Noble Truths) up to the *Arahatta*-Fruition,

- 1- When he becomes the Stream-winner, he is free from (falling into) the four woeful states;
- 2- When he becomes the Once- returner, he has the chance to be return only once in the abode of human beings;
- 3- When he becomes the Non-returner, he will not return to the abodes of sensuality and attain to *Parinibbāna* in the abode of Brahma-gods;

Page- 472

- 4- When he becomes an *Arahat*, he will never be reborn in any of the 31 abodes and totally be free from fearful dangers of rebirth, old age, disease and death.

These are the greatest and the best benefits favoured by the teacher. Any true virtuous man should never erase such a teacher's favours. A man who sits and sleeps under the tree should never break its branches. He who offends a true friend (benefactor) is really a wretch.

"Yassa rukkhassa chāyāya, nisideyya sayeyya vā; Na tassa sākhamibhañjeyya, mitta. dubbho hi pāpako" (Jātaka-2-300; Khu-V-221-299).

***Palāsa* (Malice or Spite)**

'*Palāsa*' means 'a kind of anger (*Dosa*) willing to emulate (rival). If is a kind of rivalling (competing), saying "there is no difference between him and me", though knowing that he is better or higher than (Superior to) oneself in all respects- in morality, concentration and knowledge, in wealth, beauty and race (caste), in cleverness, strength and ability, (which do not exist in oneself). If (however) one speaks in rivalry, thinking (assuming) that one has all those qualities (virtues), it is not (called) '*Palāsa*'.

There was a village, half a *Yojana* for away, from the *Jetavana* monastery. There are many kinds of 'ticket food' and alms-food given at both bright and dark halves of a month, given (by the people) in that village. In that village, there lived a man called 'block-head' who put the monks and novices to shame by asking them the (difficult) questions. That 'block-head' put to shame by asking the (difficult) questions to the monks and novices who were going for alms-food the ticket-food, and the food given fortnightly and eating (taking having) the eatables and drinkable. The monks and novices, being afraid of that 'block-head,' did not go to that village for those kinds of food.

Then, one day a certain monk went to that village in order to tame (subdue) that 'block-head'. That 'block-head', running towards that monk, said;- "Monk, answer my question". The monk, postponing the time.. until he finished eating the gruel, sweeping the dining-hall and taking (receiving) the 'ticket-food-- , made (let) the latter take hold of his alms-bowl while going to and coming 'back (returning) from the village throughout the way (journey). Then he stood at a proper place, putting the folded robe on his shoulder and taking the alms-bowl from the latter (block-head). There the 'block-head' asked (demanded) the monk to answer his question. Then the monk, placing his alms-bowl at a suitable place and saying 'I will answer your question', felled him (down) on the ground by beating up his whole body, as if making his bones broken, and put the lumps of excrement into his mouth. Then he threatened the 'block-head' not to ask any question to the monks coming to that village from now onwards, saying;- "Know (Remember) what I will do to you, if you ask any question to the monks (whom you meet with)", and then departed. Since then the 'block-head' ran away when seeing the monks.

Page- 473

That news reached the *Buddha*'s ear, who narrated a memorable past story (as follows):-

"In the past, when the people living in the countries of *Anga* and *Magadha*, went to each other's country, one day they were at an early time going on a journey together, after drinking liquors near a lake drinking liquors near a lake on the *Anga-Magadha* border, by their bullock-

carts. At that time, the 'block-head,' who gave troubles to the monks by asking them (difficult) questions, had got further past existence as a coprophagi, which ate excrement. That coprophagi, getting (smelling) the smell of excrement and coming to that place, drank the liquor left by those people and got drunk. Then he ascended the heap of wet excrement, when the wet excrement sank (lowered) he said (cried) boastingly (boastfully):- "This heap of excrement is unable to bear (uphold) me." At that very moment, an elephant in rut came (arrived) there and departed, as being disgusted with the smell of excrement. Then when he saw the elephant turning away (round), he thought that the elephant ran away, being afraid of himself, and so he invited the latter to combat with himself.

Then the elephant said to the coprophagi:- "Friend, I will not kill you either by my feet, or tusks, nor trunk, but by the lump of my excrement: (Let) you be dead by my excrement".

So saying, he discharged excrement on the coprophagi and then urine also on it, and thereby he made it dead on that very spot. Afterwards, he entered the forest, making the sound like that of a crane. This is an ancient example of ruin due to anger (*Dosa*) of one who vies with a superior (matchless) one.

(*Jātaka*-A-2-192-194 *Gūthapāna Jātaka*)
